- Section 2 summarises the methodology used for this study;
  - Section 3 sets out how the Regulation is being applied by airports;
  - Section 4 sets out how the Regulation is being applied by airlines;
  - Section 5 describes enforcement and complaint handling by NEBs;
  - Section 6 summarises stakeholder views on other policy issues relating to the Regulation;
  - Section 7 summarises the factual conclusions; and
  - Section 8 summarises the recommendations.
- 1.6 Further detailed information on the policies of airlines regarding carriage of PRMs is provided in Appendices A and B.
- 1.7 Case studies have been undertaken of complaint handling and enforcement in 16 Member States. These are provided in Appendix C, which, due to its size, is provided as a separate document.

## 2. RESEARCH METHODOLOGY

### Introduction

2.1 This section provides a summary of the research methodology used. It describes:

- the overall approach used;
- the selection of case studies;
- the scope of the desk research that has been undertaken; and
- the stakeholders that have participated in the study, and how they have provided inputs.

### Overview of our approach

2.2 The Commission requested us to collect evidence to address a number of questions, most of which can be categorised as either relating to:

- enforcement and complaint handling undertaken by National Enforcement Bodies (NEBs); and
- application of the Regulation by air carriers, their agents, tour operators and airports.

2.3 In order to address these questions, we developed a research methodology divided into two parts:

- case study research; and
- cross-EU interviews and analysis.

2.4 The rationale for this division is that enforcement and complaint procedures are specific to Member States and are therefore best evaluated through a case study approach. It was agreed to undertake case studies of complaint handling and enforcement in 16 Member States as part of this study. The case studies also describe state-specific aspects of airline and airport implementation of the Regulation.

2.5 Key airlines cover the whole of the EU rather than restricting operations primarily to one State (for example, the Irish-registered carrier Ryanair operates domestic flights in the UK, France, Spain and Italy). In addition, the issues faced by airports in implementing the Regulation are, in most cases, not State-specific. Questions relating to the application of the Regulation by airlines and airports have therefore been addressed through a cross-EU approach. Information from both elements of the research has been used for the conclusions, and will be used in the development of recommendations.

2.6 Both the case study and the cross-EU research use a mixture of stakeholder interviews and desk research. The desk research has been useful to supplement the information provided by stakeholders, particularly regarding the charges levied by airports for services to PRMs.

---

## Selection of case study States

2.7 The 16 case study states were selected in agreement with the Commission, with reference to the following criteria:

- The Member States with the largest aviation markets (measured by passenger numbers these are UK, Spain, Germany, Italy, France, Greece, Netherlands and Ireland);
- At least some of the Member States that, at the time the study commenced, had not introduced sanctions into national law;
- Member States in which the structure of the NEB is unusual (for example, in the UK, the Equality and Human Rights Commission is responsible for complaint handling);
- Member States in which airlines are based with which we identified significant issues of non-compliance with Regulation 1107/2006 in our 2008 review of Conditions of Carriage (carriers with some particularly non-compliant terms were based in Denmark and Italy); and
- States covering a wide geographical scope and variation in sizes.

2.8 The case study states are:

- Belgium;
- Denmark;
- France;
- Germany;
- Greece;
- Hungary;
- Ireland;
- Italy;
- Latvia;
- Netherlands;
- Poland;
- Portugal;
- Romania;
- Spain;
- Sweden; and
- United Kingdom.

2.9 In order to present a thorough analysis of the operation of the Regulation across the EU we conducted a more limited programme of data collection and stakeholder interviews in the remaining 11 Member States.

## Stakeholder selection and inputs

2.10 The stakeholders important for the study were:

- NEBs;
- Airlines;
- Airport managing bodies; and
- Organisations representing disabled people, and people with reduced mobility (PRM organisations).

2.11 In addition to these, we spoke to cross-EU bodies which represented these organisations at a European level.

### *National Enforcement Bodies*

2.12 We interviewed (face-to-face or by telephone) the NEB(s) notified to the Commission in every case study State, and obtained written responses from the NEBs of all other States.

2.13 We obtained the following information from each NEB:

- The legal basis for complaint handling and enforcement in the Member State;
- The degree of compliance by airlines;
- The degree of compliance by airports;
- Statistics on the number of complaints and the process for handling them;
- Issues relating to enforcement; and
- Any other issues.

2.14 Non-case study states were provided with a shorter question list which, while addressing the areas listed above, does so at a less detailed level.

2.15 Engagement of the NEBs was obtained through a combination of written responses, meetings and telephone interviews, depending on whether the State concerned is one of the 16 case study states. The approach adopted for case study NEB is listed in Table 2.1, together with the final status of contact as we drafted this Report.

**TABLE 2.1 STAKEHOLDER INTERVIEWS: CASE STUDY NEBS**

Member State	Organisation	Form of input
Belgium	SPF Mobilité et Transport	Written response and face-to-face interview
Denmark	CAA-Denmark (Støtens Luftfartsvesen)	Face-to-face interview
France	DGAC Sous-direction du tourisme	Face-to-face interview
Germany	Luftfahrt-Bundesamt (LBA) BM für Verkehr, Bau und Stadtentw	Face-to-face interview
Greece	CAA, Air Transport Economics Section CAA, Airports Division	Written response and telephone interview

Member State	Organisation	Form of input
Hungary	Nemzeti Közlekedési Hatóság (Directorate for Aviation) Egyenlő Bánásmód Hatóság (Equal Treatment Authority)	Face-to-face interview
Ireland	Commission for Aviation Regulation	Face-to-face interview
Italy	ENAC - Direzione Centrale Operazioni	Face-to-face interview
Latvia	Civil Aviation Agency	Written response and telephone interview
Netherlands	Inspectie Verkeer en Waterstaat	Written response and face-to-face interview
Poland	Civil Aviation Office	Face-to-face interview
Portugal	Instituto Nacional de Aviação Civil	Face-to-face interview
Romania	Autoritatea Nationala Pentru Persoanele cu Handicap Romanian Civil Aeronautical Authority	Face-to-face interview
Spain	Servicio de inspección y relaciones con usuarios	Written response and face-to-face interview
Sweden	Swedish Civil Aviation Authority	Written response and telephone interview
United Kingdom	Equality and Human Rights Commission (England) Civil Aviation Authority	Face-to-face interview

2.16 We obtained responses from all NEBs in the non-case study States, as shown in Table 2.2. We requested written responses from all non-case study NEBs and these were followed up with telephone interviews where necessary for clarification.

**TABLE 2.2 STAKEHOLDER INTERVIEWS: NON-CASE STUDY NEBS**

Member State	Organisation
Austria	Civil Aviation Authority
Bulgaria	Civil Aviation Administration Ministry of Transport, Information Technologies and Communications
Cyprus	Department of Civil Aviation
Czech Republic	Civil Aviation Authority
Estonia	Consumer Protection Body
Finland	Civil Aviation Authority
Lithuania	Civil Aviation Administration
Luxembourg	Direction de l'Aviation Civile
Malta	Department of Civil Aviation
Slovakia	Slovak Trade Inspection Ministry of Transport, Posts and Telecommunications, Directorate General of Civil Aviation and Water Transport, Air Transport Department
Slovenia	Ministry of Transport, Directorate of Civil Aviation

## Airlines

2.17 20 airlines have been selected to include a sample with variation across several criteria. These are:

- One key airline with major operations in each case study State;
- At a minimum to include the top 10 European airlines measured in terms of passenger numbers;
- Also to include a mix of different airline types (legacy, low cost and charter), States of registration, and sizes; and
- At least 2 non-EU airlines.

2.18 The airlines selected, and their relevance to each of the criteria, is shown in Table 2.3. We were originally planning to consider Air France-KLM as one airline, but various differences (for example, in its Conditions of Carriage) have meant that it is more logical to consider it as two airlines, meaning there are 11 airlines under the ‘Top 10 passenger numbers’ criterion. We have consequently excluded the 11<sup>th</sup> (Austrian) from the interview sample, although the airline still forms part of the desk research.

**TABLE 2.3 AIRLINE SELECTION CRITERIA**

Airline	Case study State coverage		Airline type				Top 10 passenger numbers
	Selected for case study state coverage	Case study states	Non-EU	Legacy	Low cost	Charter	
Aegean Airlines	✓	Greece			✓		
Air Berlin					✓		✓
Air France	✓	France / Netherlands		✓			✓
AirBaltic	✓	Latvia			✓		
Alitalia	✓	Italy		✓			✓
British Airways	✓	UK		✓			✓
Brussels Airlines	✓	Belgium		✓			
Delta			✓	✓			
EasyJet					✓		✓
Emirates			✓	✓			
Iberia	✓	Spain		✓			✓
KLM	✓	Netherlands		✓			✓
Lufthansa	✓	Germany		✓			✓
Ryanair	✓	Ireland			✓		✓
SAS	✓	Denmark / Sweden		✓			✓
TAP Portugal	✓	Portugal		✓			
TAROM	✓	Romania		✓			
Thomas Cook						✓	
TUI (Thomsonfly)						✓	

Wizzair	✓	Hungary / Poland	✓
---------	---	------------------	---

2.19 We approached all 21 case study airlines requesting either a face-to-face or telephone interview. The methods they chose to respond are shown in Table 2.4 below.

**TABLE 2.4 STAKEHOLDER INTERVIEWS: AIRLINES**

Airline	Form of input
Aegean Airlines	Written response and telephone interview
Air Berlin	Input through IACA only
Air France	Telephone interview
AirBaltic	Did not respond
Alitalia	Written response
British Airways	Declined to participate
Brussels Airlines	Did not respond
Delta	Written response
easyJet	Face-to-face interview
Emirates	Did not respond
Iberia	Telephone interview
KLM	Face-to-face interview
Lufthansa	Declined to participate
Ryanair	Face-to-face interview
SAS	Written response
TAP Portugal	Face-to-face interview
TAROM	Face-to-face interview
Thomas Cook	Face-to-face interview
TUI (Thomsonfly)	Input through IACA only
Wizzair	Did not respond

2.20 We also consulted the five main associations representing airlines operating airlines within the EU, listed in Table 2.5 below.

**TABLE 2.5 STAKEHOLDER INTERVIEWS: AIRLINE ASSOCIATIONS**

Organisation	Full Name	Type of airline represented	Form of input
IATA	International Air Transport Association	Legacy	Written response and telephone interview
ELFAA	European Low Fares Airline Association	European low cost	Face-to-face interview
AEA	Association of European Airlines	European legacy	Face-to-face interview
ERA	European Regions Airlines Association	European regional	Face-to-face interview
IACA	International Air Carrier Association	Leisure / charter	Face-to-face interview

### Airports

2.21 The 21 case study airports were selected according to the following criteria:

- All of the top 10 European airports in terms of passenger numbers;
- The main airport in each of the 16 case study Member States; and
- A sample of smaller airports.

2.22 The airports selected under each criterion, and the methods they chose to respond, are shown in Table 2.6. Note that three of the top 10 airports were excluded from the case study consultation as they were operated by the same organisations as others in the top 10. These comprise Paris Orly, London Gatwick, Zaragoza and Barcelona airports which, at the time the study was planned, were managed by the same companies as Paris CDG, Heathrow and Madrid Barajas respectively<sup>6</sup>. These airports do still form part of the desk research, however.

**TABLE 2.6 AIRPORT SELECTION CRITERIA**

Airport	State	Main airport in case study State	Top 10 passenger numbers	Smaller airport	Form of input
Amsterdam	Netherlands	✓	✓		Face-to-face interview
Athens	Greece	✓			Written response and telephone interview
Bologna	Italy			✓	Face-to-face interview
Brussels	Belgium	✓			Face-to-face interview
Bucharest Otopeni	Romania	✓			Face-to-face interview
Budapest	Hungary	✓			Face-to-face interview
Brussels Charleroi	Belgium			✓	Face-to-face interview
Copenhagen	Denmark	✓			Written response and telephone interview
Dublin	Ireland	✓			Face-to-face interview
Frankfurt Main	Germany	✓	✓		Face-to-face interview
Lisbon	Portugal	✓			Face-to-face interview
London Heathrow	United Kingdom	✓	✓		Face-to-face interview
London Luton	United Kingdom			✓	Face-to-face interview
Madrid Barajas	Spain	✓	✓		Face-to-face interview*
Munich	Germany		✓		Not able to obtain a response
Paris Charles De Gaulle	France	✓	✓		Face-to-face interview
Riga	Latvia	✓			Written response and telephone interview
Roma Fiumicino	Italy	✓	✓		Written response and telephone interview

<sup>6</sup> Gatwick ceased to be managed by BAA, the operator of Heathrow, on 2 December 2009

Stockholm	Sweden	✓		Written response and telephone interview
Warsaw	Poland	✓		Face-to-face interview
Zaragoza	Spain		✓	Face-to-face interview*

\* Interview with AENA covered all State airports in Spain

### *Selection of PRM organisations and other passenger groups*

2.23 In each case study State we selected a PRM organisation representing all disabilities and impairments at a national level. We initially approached the national council organisations that are members of the European Disability Forum (EDF); however in a small number of cases we were unable to obtain a response from this organisation and had to contact an alternative organisation in their place. The table also includes four cross-EU PRM organisations.

**TABLE 2.7 PRM AND PASSENGER ORGANISATIONS BY CASE STUDY STATE**

State	Organisation	Form of input
Belgium	Belgium Disability Forum	Telephone interview
Denmark	Danske Handicaporganisationer (DH; Disabled Peoples Organisations Denmark)	Face-to-face interview
France	Conseil Français des personnes Handicapées pour les questions Européennes (CFHE ; French Council of Disabled People for European Affairs)	Telephone interview
Germany	Deutscher Behinderten Rat (DBR; German Disability Council)	Unable to obtain a response
Greece	National Confederation of Disabled People (ESAEA)	Written response and telephone interview
Hungary	National Council of Federations of People with Disabilities (FESZT)	Written response and telephone interview
Ireland	People with Disabilities in Ireland (PWDI)	Face-to-face interview
Italy	Forum Italiano sulla Disabilità (FID; Italian Disability Forum)	Face-to-face interview
Latvia	Latvian Umbrella Body for Disability Organisations (SUSTENTO)	Written response and telephone interview
Netherlands	CG-Raad*	Face-to-face interview
Poland	Polskie Forum Osob Niepełnosprawnych (PFON; Polish Disability Forum)	Face-to-face interview
Portugal	Confederação Nacional dos Organismos de Deficientes (CNOD; National Confederation of Organisations of Disabled People)	Unable to obtain a response
Romania	National Disability Council (CNDR)	Face-to-face interview
Spain	Fundación ONCE*, on request of Comité Español de Representantes de Personas con Discapacidad (CERMI)	Face-to-face interview
Sweden	Swedish Disability Federation (HSO)	Written response and telephone interview
United Kingdom	UK Coalition for Disability Rights in Europe (UKCDRE)	Telephone interview

EU	European Disability Forum	Face-to-face interview
EU	European Blind Union	Face-to-face interview
EU	European Union of the Deaf	Written response and telephone interview
EU	Inclusion Europe	Declined to respond

\* Not a national council organisation member of EDF

*Selection of other organisations*

2.24 In addition to the stakeholders listed above, we contacted a number of cross-EU organisations. These comprised:

- **Passenger organisations:** the European Passenger Federation;
- **Travel agent associations:** ECTAA;
- **Airport association:** ACI Europe; and
- **Advisory bodies:** EASA, ECAC.

2.25 At the level of Member States, there were stakeholders which did not correspond to the categories described so far, but which we believed would provide useful information. These organisations were as follows:

- **Wings on Wheels (UK):** This organisation provides package holidays tailored to the needs of disabled people.
- **Thomas Cook, TUI:** Elements of the Regulation apply to travel agents as well as to airlines.
- **Air Transport Users Council (UK):** Prior to the introduction of the Regulation, this organisation had handled complaints from disabled passengers regarding travel by air, and as a result continued to receive some complaints after the Regulation came into force. In addition, the AUC is the only government-funded body in the EU specifically to represent the interests of air passengers

2.26 The form of input adopted by each stakeholder is shown in Table 2.8.

**TABLE 2.8 STAKEHOLDER INTERVIEWS: OTHER ORGANISATIONS**

State	Association name	Form of input
EU	ECTAA	Written response
EU	EPF	Did not respond
EU	ACI Europe	Face-to-face interview
EU	EASA	Written information provided
EU	ECAC	Face-to-face interview
United Kingdom	Wings on Wheels	Unable to obtain a response
Germany	Thomas Cook	Face-to-face interview
United Kingdom	TUI	Through IACA only
United Kingdom	Air Transport Users Council	Face-to-face interview

---

## Desk research

- 2.27 The main objectives of the desk research were:
- To evaluate the extent to which air carriers demonstrate compliance with the Regulation through published information, such as Conditions of Carriage and policies on carriage of PRMs; and
  - The extent to which airports have complied with the requirement to develop and publish PRM quality standards, as specified in Article 9 of the Regulation, and the content of these standards.
- 2.28 Conclusions emerging from the desk research were supplemented by the information collected through stakeholder interviews.

### *Airlines*

- 2.29 The research methodology employed for this part of the study was based on a review of the websites of the 21 case study airlines listed above. Although the focus was on the English language version of the websites, versions in other languages were checked to check whether additional information was provided.
- 2.30 Three key sources of information were surveyed from each website:
- Conditions of Carriage, with particular regard to the conditions set out for the carriage of PRMs;
  - Other policies on the carriage of PRMs: a more detailed search across the airline's website for any policies and relevant information on PRM travel; and
  - Options to notify carriers of assistance requirements.

### *Airports*

- 2.31 Again, the research conducted for this part of the study was internet-based. The websites of each of the case study airports was surveyed against the following criteria:
- whether the airport publishes quality standards;
  - how easy these are to find;
  - the content of the standards; and
  - whether the airport publishes details of its performance against the standards.

### *Review of relevant legislation and other documentation*

- 2.32 We also reviewed airline and airport policies with reference to other applicable legislation and guidance. The only other EU-wide legislation which relates to the carriage of PRMs by air is EU-OPS 1 (Commission Regulation 859/2008). In addition, many EU carriers which operate flights to the US are also covered by the corresponding US regulation (14 CFR Part 382, Nondiscrimination on the Basis of Disability in Air Travel); this is significantly different from Regulation 1107/2006 and this has an impact on the operating procedures of some carriers.

2.33 Other current guidance includes:

- ECAC Document 30;
- JAR-OPS 1 Section 1;
- JAA Temporary Guidance Leaflet (TGL) No. 44; and
- UK Department for Transport (DfT), *Access to Air Travel for Disabled Persons and Persons with Reduced Mobility – Code of Practice*.

### 3. APPLICATION OF THE REGULATION BY AIRPORTS

#### Introduction

- 3.1 One of the most fundamental changes introduced by the Regulation was the change in responsibility for provision of assistance to PRMs: where previously these services were provided by airlines, the Regulation requires airports to provide them, and permits them to pass on the associated costs to users, provided this is done in a fair and transparent manner. The Regulation also requires airports handling over 150,000 passenger movements per year to develop and publish quality standards for assistance. The detailed requirements are set out in the following section.
- 3.2 In order to assess how airports are implementing these requirements, we met or sought responses from a sample of airports selected under the criteria set out above (see 2.21). The information gathered was supplemented by tours of the services provided at certain airports, by interviews with other stakeholders who gave their views on service provision, and by desk research. The desk research included analysis of the charges and quality standards set out by the airports in the sample.

#### Requirements of the Regulation

- 3.3 As noted above, the Regulation places responsibility for provision of assistance with the airport, whereas previously assistance had been provided by ground handling companies on the basis of contracts with individual airlines. The Regulation requires each airport to provide a uniform service quality for all airlines that it handles (except where an airline requests a higher level of service). The key requirements for the PRM assistance service are summarised below:
- **Designated points:** Airports are required to designate points inside and outside the terminal building at which PRMs can announce their arrival at the airport and request assistance. These must be developed in cooperation with airport users and relevant PRM organisations, must be clearly signed and must offer basic information about the airport in accessible formats.
  - **Assistance:** Airports must provide assistance to PRMs so that they are able to take the flight for which they hold a reservation, providing that they have pre-notified their requirements and arrive with sufficient time before the departure of their flight. If they have not pre-notified, the airport must make all reasonable efforts to enable them to take their flight. For PRMs on arriving flights, the airport must provide assistance to enable them to leave the airport or reach a connecting flight. The assistance provided should be appropriate to the individual passenger. An airport may contract for these services to be provided by another company, in compliance with quality standards (discussed below).
  - **Charges:** An airport cannot charge a PRM for this service, but may levy a specific charge on airport users for it. The charge must be reasonable, cost-related and transparent, and the accounts for these services must be separated from its other accounts. The charge must be shared between airport users in proportion to the total number of passengers carried to and from the airport by each. If an airport wishes to contract for services or levy a charge, both must be done in cooperation with airport users through the Airport Users Committee (AUC).

- **Quality standards:** Airports with over 150,000 annual passenger movements must set and publish quality standards for these services, and decide resource requirements to meet them, in cooperation with airport users and PRM organisations. The standards must take account of relevant policies and codes, such as the ECAC Code of Good Conduct in Ground Handling for Persons with Reduced Mobility (ECAC Document 30). An airline can agree with an airport to receive a higher standard of service, for an additional charge.
- **Training:** All employees (including those employed by sub-contractors) providing direct assistance to PRMs should be trained in how to meet their needs. Disability-equality and disability-awareness training should be provided to all airport personnel dealing directly with the travelling public, and all new employees should attend disability-related training.

### Categories of PRM defined by carriers and airports

3.4 The Regulation covers passengers with a wide range of impairments for which the needs for assistance are different. Although each individual is different, airlines and airports find it helpful to apply some categorisation when referring to the needs of different passengers. The most commonly used categorisation is the list of Special Service Request (SSR) codes defined by IATA. These categories are:

- **WCHR:** Wheelchair (R for Ramp). Passengers who are able to ascend and descend steps and move about inside the aircraft cabin, but who require a wheelchair or other assistance for longer distances (e.g. between the terminal and the aircraft).
- **WCHS:** Wheelchair (S for Steps): Passengers who cannot ascend or descend steps, but can move about inside the aircraft cabin. They require a wheelchair for the distances to and from aircraft and must be assisted up and down any steps.
- **WCHP:** Wheelchair (P for Paraplegic). Passengers with a disability of the lower limbs who have sufficient personal autonomy to take care of themselves, but who require assistance to embark and disembark and can move about inside the aircraft cabin only with the assistance of an onboard wheelchair.<sup>7</sup>
- **WCHC:** Wheelchair (C for Cabin Seat). Passengers who are completely immobile, and who can move about only with the assistance of a wheelchair or other means, and require this assistance at all points from arrival at the airport to seating (which may be fitted to their specific needs) on board the aircraft, and the reverse process on arrival.
- **BLND:** Blind or visually impaired passengers.
- **DEAF:** Deaf or hearing impaired passengers, and passengers who are deaf without speech.
- **BLND/DEAF:** Passengers who are both visually and hearing impaired, and who can only move about with the assistance of an accompanying person.
- **DPNA:** Disabled passengers with intellectual or developmental disabilities who need assistance.
- **MEDA:** Passengers whose mobility is impaired due to illness or other clinical reasons, and who are authorised to travel by medical authorities.

---

<sup>7</sup> This code is not widely used or universally recognised at present

- **STCR:** Passengers who can only be transported on a stretcher.
  - **MAAS:** Meet and Assist. All other passengers requiring special assistance.
- 3.5 Some airlines use different categorisations. For example, Ryanair uses a more detailed classification system with 16 categories that also identify, for example, whether the passenger is travelling with their own wheelchair.
- 3.6 In addition to the codes above which describe the needs of the passenger, when referring to wheelchair users airlines may also add a description of the type of wheelchair which will be carried. The codes used are WCMP for manual power, WCBD for dry cell battery and WCBW for wet cell battery. These codes are useful for planning the type of assistance which will be necessary to transport them, for example if they require preparation or disassembly.

### Services actually provided by airports

- 3.7 All of the case study airports had implemented the Regulation, and were providing the required services in some form. We were given tours of the services provided at several of the airports we visited. From these, and descriptions of services given in interviews, we have drawn together a description of a typical process by which the services required by the Regulation are provided.

#### Departures

<i>Pre-notification</i>	Almost all airports and airlines have contracted SITA (a company providing aviation information technology) to provide a telex or email service for the purpose of passing notification of the needs of PRMs (see 4.64). For each series of flights for a given aircraft, any assistance required is communicated via a telex which includes a four letter code describing the category of disability of each PRM on each flight (see 3.4). This message is known as the passenger assistance list (PAL); if requirements change prior to the flight this is updated by a change assistance list, or CAL. Where a request for assistance is made by a PRM at least 48 hours before the published departure time for the flight, the airline is obliged to transmit this information to the relevant airports at least 36 hours before the published departure time.
<i>Recording of notification</i>	This information arrives at a telex server in the dispatch office of the airport PRM service provider. The telex describes: the time of the flight, the flight number, the names of passengers on board requiring assistance, and the category of disability of these passengers. The information from this telex is used to update the service provider's task management system, either via an automatic link, or via manual input. The task management system can be purposely developed task management software, or in some airports a piece of paper containing notes on expected assistance. Information regarding requests for assistance may also arrive via email. Airlines and airports may use email for several reasons: some airlines (such as non-EU charter carriers) may not have a SITA terminal; larger groups (such as operators of cruises) may send an off-line message in addition to PAL/CAL messages.
<i>PRM arrives and is assigned an assistant</i>	Each new request for assistance creates a new task; if a passenger arrives without notification, the task is created on their arrival. The task management software lists PRMs requiring assistance as tasks, and sets out expected arrival times and real-time information about their flights. When the passenger announces their arrival (either via a designated point or a check-in desk), the type of assistance they require is confirmed, and the task is assigned to one or more available assistants. At some airports, assistants carry personal digital assistants (PDAs) which record progress on a particular task; if this is the case, information regarding the passenger to be met will be forwarded to the PDA of the selected assistant. At other airports (for example in Spain) the management of tasks is a manual process. More than one assistant may be assigned if the passenger requires more involved assistance, such as carrying into their seat or is in a stretcher.

<p><i>PRM is met and needs are confirmed</i></p>	<p>The assistant meets the passenger at the point at which they announced their presence; when they meet the PRM, they update the dispatch office with their action. This update may be via PDA linking through to the software in the dispatch office, or via calling in. Assistants should be trained in how to approach passengers with different requirements. If the PRM has difficulty with long distances, the airport may use electric carts, or may push the passenger in a wheelchair provided by the airport. The electric carts may be capable of carrying a passenger in an airport wheelchair. The extent of the use of electric carts may be dependent on airport design.</p> <p>PRMs who are blind or visually impaired may require someone whose arm they can hold guide them through the airport. A PRM with an intellectual disability may require information about the airport to be presented to them in a simplified manner, or may require check-in and other procedures to be conducted in a particular manner. The assistant will help PRMs with a reasonable amount of baggage, but only as much as any other passenger would take.</p>
<p><i>PRM is assisted through check-in and security</i></p>	<p>The passenger is taken through check-in and security. At check-in, there may be lowered desks for passengers in wheelchairs. At security, there may be a track where the security staff are trained in searching PRMs, including searching wheelchairs, and a screen to provide privacy for the search. Usually it is not possible for wheelchairs to be taken through metal detector arches, and therefore wheelchair users are searched manually. The security track is not typically exclusively for PRMs, but they may receive priority. There may be a dedicated PRM lounge; if there is time before their flight leaves, they will have the option of resting there or if there is time may wish to use the facilities in the departure lounge until called for their flight. Some airports are willing to take PRMs to these facilities (such as restaurants and shops), while others require PRMs to remain in the waiting area allocated. Where the airport is willing to provide this, the assistant arranges a time at which to collect the passenger. Some airports allow PRMs to use the business lounge regardless of class of travel.</p>
<p><i>PRM is assisted through customs and to gate</i></p>	<p>Once the flight is ready for boarding, the assistant takes the passenger to the gate. Different methods of assisting a PRM into the aircraft will be used depending on the passenger's needs and on the manner in which the aircraft is embarked (e.g. via airbridge or from the apron). Some PRMs will be able to use either stairs or an airbridge and will not require specific assistance at this point.</p>
<p><i>PRM is assisted on board aircraft with airbridge</i></p>	<p>Where passengers board via an airbridge, category WCHC and WCHS PRMs are transferred to the onboard wheelchair at the door of the aircraft. If they have remained in their own chair up to this point, their wheelchair is transferred to the hold; otherwise the airport's wheelchair is returned with the assistant. The onboard wheelchair is narrower to allow it to pass down the aisle, and has straps to hold the passenger safely in the chair. Other categories of PRM board the aircraft on foot, without particular assistance. Depending on the policy of the carrier concerned, PRMs may have to board either first or last.</p>
<p><i>PRM is assisted on board aircraft without airbridge</i></p>	<p>Where passengers board via steps, category WCHC and WCHS PRMs are transferred to the onboard wheelchair on the apron before entering the aircraft. They are then lifted up to the aircraft either by an Ambulift<sup>8</sup>, by a motorised stair-climbing chair or at some airports by manual lifting. Other categories of PRM board the aircraft on foot, and may require assistance to ascend the stairs. If the aircraft is boarded away from the terminal building and passengers are brought to the aircraft by bus, a dedicated PRM vehicle may be used to bring the PRM to the aircraft.</p>
<p><i>PRM is assisted to seat on board aircraft</i></p>	<p>On board, the assistant provides the assistance necessary for the passenger to get to their seat. This may include lifting the passenger from the on-board wheelchair into the seat and if, as required by certain carriers, the PRM has to be seated in a window seat, transferring across other seats. The assistant may also help the passenger with storing any baggage in the overhead lockers. Once the passenger is installed in their seat, the airport ceases to have responsibility for providing assistance, and it transfers to the airline.</p>

<sup>8</sup> An Ambulift is a vehicle with a hydraulic platform which can be raised to the level of the flight deck to allow wheelchairs to be pushed on board.

*Arrivals*

<i>Notification arrives</i>	In addition to arriving via PAL or CAL, notification for arriving passengers may arrive by passenger service message (PSM). This is a list of passengers on board the aircraft requiring particular treatment on arrival, dispatched when an aircraft departs. The message states the points of embarkation and disembarkation, the flight number and date, and lists the names of the passengers requiring particular assistance with a description of the assistance. In addition to PRMs, the PSM lists children travelling alone (unaccompanied minors, or UMs), deportees and returned inadmissible passengers. In some circumstances, no PAL or CAL is received for arriving passengers, and the only notification is via PSM; this reduces the period of notification from 36 hours to the duration of the flight. In some cases no notification is received at all.
<i>PRM is met and assisted to disembark</i>	The information from the PSM is input into the task management system in the same manner as the PAL or CAL. When a flight lands, available assistants are assigned to each of the PRMs on board the flight, and dispatched to meet them at the gate. On landing, if a PRM requires assistance to disembark they will typically disembark once all other passengers have disembarked. The PRM is met at the door of the aircraft or within the aircraft by their assigned assistant. Depending on the code included in the PSM the assistant may have equipment such as wheelchairs, or may be accompanied by another member of staff. If the passenger has their own wheelchair, this is removed from the hold, and the passenger may then be assisted to transfer from the aircraft wheelchair into their own. At some airports the passenger's wheelchair is not returned to them until baggage reclaim, for security reasons.
<i>PRM is assisted from aircraft to point of arrival</i>	The passenger is then assisted through passport control (where there may be a dedicated PRM-accessible track) to the baggage hall, where they are assisted to retrieve their bags. They are then assisted through customs, and the assistant accompanies them as far as is required, up to the designated point of arrival outside the terminal. If it is situated close to the arrival point, they may also assist the PRM to their car if requested.

*Connections*

<i>Connecting flights</i>	Where a PRM requires assistance to make a connecting flight, the assistance offered varies depending on the length of time between arrival and departure. If there is limited time, assistance is offered as described above to disembark, transfer, and embark the passenger onto their next flight. If there is a significant wait between arrival and departure, the passenger may be taken to a PRM lounge or waiting area, until their departing flight is ready for boarding.
---------------------------	---

**Policies on service provision***Provision for non pre-notified passengers*

- 3.8 The Regulation sets out the assistance which must be provided to PRMs where they have notified the air carrier or tour operator at least 48 hours before the published time of departure of their flight. It also requires that where no such notification is made, the airport should make all reasonable efforts to provide this assistance.
- 3.9 Of the airports we contacted, most stated that there was little or no difference in the service received by passengers who had not pre-notified, and differences in service quality only occurred when the services were busy. Even in the cases where a choice did have to be made between assisting a pre-notified and non-pre-notified passenger, some airports informed us that they would make decisions on the basis of ensuring all passengers could make their flights, rather than on the basis of notification. Some airports informed us that the level of notification was so low that it was not useful to make any distinction on this basis. Only a small minority of the case study airports stated that a slower service was provided to passengers who did not pre-notify (Table 3.1 below).

**TABLE 3.1 AIRPORT SERVICE PROVIDED TO NON-PRE-NOTIFIED PRMS**

Airport	Service provided to non-pre-notified PRMs
Amsterdam Schiphol	Equivalent service, priority based on ensuring passengers can make their flights
Athens	Slower service than pre-notified for departures, equal service for arrivals
Bologna	Equivalent service is provided
Brussels	Equivalent service as pre-notified, lower priority when busy
Bucharest Otopeni	Equivalent service is provided (some equipment may not be available)
Budapest	Equivalent service is provided (possible delay of a few minutes)
Brussels Charleroi	Equivalent service, priority based on ensuring passengers can make their flights
Copenhagen	Equivalent service as pre-notified, lower priority when busy
Dublin	Slower service
Frankfurt Main	Equivalent service as pre-notified, lower priority when busy
Lisbon	Standards not defined
London Heathrow	N/A
London Luton	Equivalent service is provided
Madrid Barajas	Equivalent service is provided (possible delay on arrival)
Munich	Equivalent service as pre-notified, lower priority when busy
Paris Charles De Gaulle	Equivalent service as pre-notified, lower priority when busy
Riga	Equivalent service is provided
Roma Fiumicino	Slower service
Stockholm	Slower service
Warsaw	Equivalent service as pre-notified, lower priority when busy
Zaragoza	Equivalent service is provided (possible delay on arrival)

3.10 Airports' estimates of the impact of pre-notification rates on staffing and equipment levels varied considerably. Several airports informed us that while an increase in the rate of pre-notification would improve the quality of the service provided, they would not expect it to significantly affect the number of staff they employed. In contrast, Aéroports de Paris believed that improving rates of pre-notification could allow them to reduce the costs of PRM service provision by 30%-40%. In January 2010, London Heathrow introduced a banded charge which varies the amount paid depending on the level of pre-notification of the airline (see 3.34).

#### *Restrictions on service*

3.11 Unlike for airlines, the Regulation does not explicitly state any grounds for airports to restrict the services provided. However, there may be national laws which have bearing on the functions which airport staff are permitted to undertake; for example, we were informed that in Denmark national laws on health and safety did not permit people of above a certain weight limit to be carried up stairs and into an aircraft.

*Other issues noted*

- 3.12 All of the case study airports provide the services required under the Regulation. The manner and quality of provision varies among the sample, and there have been a number of incidents of significant service failure, but we identified no fundamental problems with service provision at major airports. However, we were informed that the Regulation had not been implemented at Greek airports other than Athens: at these airports, services are provided to PRMs, but the change of responsibility from airline to airport has not yet been effected; provision of and payment for services is agreed between airlines and ground handling companies, as it was prior to the introduction of the Regulation.
- 3.13 The views of stakeholders on the provision of services are discussed at the end of this chapter (see 3.76).

**Statistical evidence for carriage of PRMs**

*The proportion of passengers requiring assistance*

- 3.14 The frequency with which PRM assistance services are used varies considerably between airports. Figure 3.1 shows the rate of use at the airports in our sample for which we were provided with data. At London Heathrow 1.2% of passengers are PRMs requiring assistance, while at Riga only 0.1% of passengers require assistance. However, for most airports in the sample, the proportion requiring assistance is between 0.2% and 0.7%. ACI informed us that the higher rates at some airports were the result of the demographics of the passengers flying to these destinations.

**FIGURE 3.1 FREQUENCY OF PRMS REQUESTING ASSISTANCE AT AIRPORTS (2009)**

- 3.15 Some other airports have higher proportions of PRMs requiring assistance, resulting from the demographic profile of passengers using the airports. These include holiday destinations popular with elderly people, such as Alicante, Malaga and Tenerife Sur; and pilgrimage destinations such as Lourdes.
- 3.16 Based on the information we have received from airports, the profile of PRM travel differs markedly from that of other passengers (see Figure 3.2). Most data indicates that the number of PRMs travelling tends to be lower in relative terms, and at some airports also in absolute terms, during July and August when total air travel is at a peak. At some airports, there appears to be a peak in December and January, however this is not consistent across all the airports for which we have data. Airports informed us that provision of services between April and September can be particularly affected by passengers travelling to cruise ships: these often carry high numbers of PRMs, and since a cruise ship usually disembarks passengers at the same time as it embarks the next load, there is a twofold increase in the number of PRMs travelling through the airport. The winter peak in PRMs is partly due to high rates of injury amongst passengers returning from winter sports holidays.

**FIGURE 3.2 FREQUENCY OF PRMS OVER THE YEAR (2009)**

*Trend in PRM travel*

- 3.17 Several airports and airlines informed us that the number of PRMs requiring assistance has increased significantly since the introduction of the Regulation. It is difficult to verify this, as airports generally did not provide PRM services before July 2008, and therefore did not have a time series of data available. However, Brussels Zaventum airport introduced a PRM service similar to that required by the Regulation earlier, and as a result was able to provide figures for PRM's travelling between 2005 and 2010. This shows an increasing trend (Figure 3.3): the proportion of passengers

requiring assistance appears stable at approximately 0.35% over 2005 and 2006, and then climbs to 0.66% in 2009. It believed that this was a result of significant abuse of the services.

**FIGURE 3.3 RATE OF PRMS OBSERVED AT BRUSSELS ZAVENTUM AIRPORT**

#### *Types of assistance provided*

- 3.18 Assistance is often divided by airports into WCHC/WCHS (see 3.4), which requires significant time and resources, and others. We requested data on the types of passengers assisted from each of the case study airports and a summary of the data is shown in Figure 3.4. At all airports which provided data, the most frequent category of assistance was WCHR, although the proportion ranged from 44% to 89% (median 64%). The category “Wheelchair other” comprises wheelchair codes which do not fit into the other wheelchair categories: WCMP, manually powered wheelchair; WCBBD, dry cell operated wheelchair; and WCBW, wet cell operated wheelchair. We have excluded the codes for medical cases and unaccompanied minors (MEDA and UM respectively) from this analysis, as they are not within the scope of the Regulation.

**FIGURE 3.4 VARIATION IN TYPES OF PRMS ASSISTED (2009)**

*Abuse of services*

3.19 Many airports – particularly larger and busier airports – reported that the services they provided for PRMs were sometimes used by passengers who did not appear to have the right to do so under the Regulation. A typical observation was of a passenger who was assisted in a wheelchair from a designated point of arrival through security and customs, and who then walked to the gate unassisted. Several types of passenger who might be motivated to do this were suggested:

- Passengers who feel confused by a large and complex airport, and do not feel that they would be able to navigate it successfully;
- Passengers who do not speak the language used for the airport signs and announcements;
- Passengers who have no mobility impairment which prevented them from walking long distances within the airport, but who did not wish to; and
- Passengers (particularly those who arrive at the airport with limited time before the departure of their flight) who wish to avoid lengthy queues at emigration, customs and security.

3.20 In addition, some airports reported cases where airlines had requested PRM assistance for passengers such as unaccompanied minors, passengers with excessive cabin baggage, and VIPs. These passengers might previously have been classified ‘meet and assist’ (MAAS) and any assistance required would have been paid for by the airline.

- 3.21 By its nature, it is hard to establish the true level of this abuse. PRM organisations noted that a passenger's disability may not always be visible. They also noted the perceived stigma attached to travelling in a wheelchair, and believed that many passengers would prefer to avoid this in preference to receiving the services offered under the Regulation.
- 3.22 The level of abuse reported varied between airports. Copenhagen Airport reported a rate of approximately one passenger per day whom they suspected was not entitled to services under the Regulation, while Brussels reported 20-30 passengers per day. Brussels Airport perceived abuse as a bigger problem than other airports within the sample.
- 3.23 However, Charleroi Airport informed us that abuse of services had decreased since the introduction of the Regulation, as a result of changes made to procedures. The two changes it identified as having had an impact were:
- requiring passengers who had not pre-notified requirements for assistance to wait; and
  - boarding passengers requiring assistance after, rather than before, other passengers, and hence users of the PRM service no longer get first choice of seats on low cost carriers that do not allocate seats in advance.
- 3.24 These changes had the effect of reducing the number passengers without mobility needs who wished to use the services to avoid queues, and to obtain first choice of seating. However, these policies create some disadvantages for passengers who are entitled to the services.

#### **Organisation of service delivery**

- 3.25 Airport managing bodies may provide the services required under the Regulation themselves, or may contract with other parties to provide the assistance. Any arrangements for assistance to be provided through other parties must be compliant with published quality standards, and must be determined with the cooperation of airport users.

#### *Overview*

- 3.26 15 of the sample of 21 airports provided PRM services through a subcontractor (Table 3.2 below) and, of these, 12 were procured through open tenders. The advantage of procuring this service through an open tender include:
- a specialised provider might more easily be able to provide services of the cost or quality required;
  - providing services through subcontractors facilitates the separation of costs of PRM services in an airport's accounts; and
  - open tenders allow the airport to demonstrate that the costs are reasonable, as required by the Regulation.
- 3.27 Some of the largest airports split the tendering of provision into more than one contract, usually through grouping terminals together on a geographical basis.

- 3.28 In contrast, some of the airports provide the services required under the Regulation through specially trained airport staff. This may be through the creation of new department with this remit, or through extending the remit of a pre-existing department (for example the firefighting department). Airports may also subcontract some services (such as assisting passengers from the gate to the aircraft) to ground handling staff whilst providing other elements of the service themselves.
- 3.29 We also identified variation in the type of organisation providing services, where this was sub-contracted:
- **Subsidiary company of airport:** This approach is very similar to providing the services in-house, although an advantage is that it is easier for the airport to separate the accounts relating to the provision of PRM services.
  - **Ground handling companies:** Airports may be able to realise economies of scope through provision of PRM services by ground handling companies.
  - **Specialist PRM contractor:** Among the airports examined for this study, the most frequent type of organisation providing PRM services was a company that specialised in this kind of assistance service. Some such companies provided PRM services only, while a number provide it as part of a range of services. These other services might include cleaning services, facilities management, emergency assistance, and ambulance services.

**TABLE 3.2 METHODS OF PROCURING PRM SERVICES AT AIRPORTS**

Airport	Approach to procurement	Type of organisation providing PRM services
Amsterdam Schiphol	Open tender	Specialist PRM contractor
Athens	Open tender	3 ground handling companies
Bologna	In-house / non-competitive tender	Airport staff, 2 ground handling companies
Brussels	Open tender	Specialist PRM contractor
Bucharest Otopeni	In-house	Airport staff
Budapest	Open tender	Ground handling company
Brussels Charleroi	In-house	Airport staff
Copenhagen	Open tender	Specialist PRM contractor
Dublin	Open tender	Specialist PRM contractor
Frankfurt Main	Non-competitive tender	Subsidiary of airport
Lisbon	In-house	Airport staff, subcontracted ground handling staff
London Heathrow	Open tender	2 specialist PRM contractors
London Luton	Open tender	Specialist PRM contractor
Madrid Barajas	Open tender	Information not provided at interview
Munich	Open tender	Specialist PRM contractor
Paris Charles De Gaulle	Open tender	2 specialist PRM contractors
Riga	In-house	Airport staff
Roma Fiumicino	Non-competitive tender	Subsidiary of airport

Stockholm Arlanda	In-house	Airport staff
Warsaw	Non-competitive tender	Ground handling company
Zaragoza	Open tender	Information not provided at interview

3.30 Although the PRM service had only been provided by airports for around 18 months at the time of our research, we were informed by a number of airports that they were considering or were in the process of retendering the service. The primary reason given for retendering was that service quality had not been sufficiently high, although some airports cited a higher than expected increase in use of services after the introduction of the Regulation.

3.31 The Regulation also allows<sup>9</sup> for airlines to request a higher level of service than those set out in the quality standards for the airport, and to levy a supplementary charge for this service. However, none of the sample airports or airlines were requesting or providing such a service.

#### *Consultation*

3.32 The Regulation requires contracts for the supply of services under the Regulation to be entered into in cooperation with airport users and with organisations representing PRMs. Cooperation with airport users is usually through the airport users committee (AUC). Although this is intended to improve consultation, airlines informed us that in some circumstances it did not do so, citing examples where:

- the proceedings of the AUC were conducted only in the native language of the airport;
- only ground handlers were represented on the committee; and
- one stakeholder has a voting majority on the committee, allowing it to disregard the views of other carriers.

3.33 We were also informed of circumstances where the consultation provided by airports was extensive. London Luton retendered for PRM services in March 2010, and involved airport users (airlines and ground handling companies) at all stages of the tendering process, including the development of the specification, and the evaluation and scoring of bids.

#### **Airport charges**

3.34 The Regulation permits airports to fund the provision of assistance through a specific charge on airport users. This charge must be reasonable, cost-related, transparent and established in co-operation with airport users. It must be shared among airport users in proportion to the total number of passengers that each carries to and from the airport (this is typically calculated on the basis of departing passengers). The accounts of the airport relating to provision of PRM services must be separate from its accounts relating to other services, and it must make available to airport users and NEBs an audited annual overview of charges received and costs incurred relating to the provision.

<sup>9</sup> Articles 9 (4) and (5).

3.35 The majority of the case study airports recover costs for PRM assistance through a PRM charge levied on all departing passengers which is specific to the airport and set to fully recover the costs of the PRM service. However, we identified the following key variations in this approach:

- **Uniform charge:** The PRM charges in Spain and Portugal are uniform across the airports operated by AENA and ANA respectively. This approach appears to infringe the Regulation, which requires a specific charge “established by the managing body of the airport”, although there is some uncertainty about this due to differences between the English and Spanish language versions of the Regulation. Both AENA and ANA believed that, since the service was provided across a network of airports, it was appropriate that there should be a uniform network charge.
- **Economic regulation:** Many airports are subject to economic regulation of the charges they may levy on airlines. At most of the airports in our sample, the PRM charge is excluded from the regulated price cap, but at Dublin and Brussels Zaventem the PRM charge is included within this. As a result, their flexibility to amend charges (for example to reflect a higher than expected use of PRM services) is constrained: for example, they may require regulatory approval for any changes, or have the level of any increases limited by a charging cap. Charges may also be fixed over the course of a given regulatory period.
- **Pre-existing provision:** Stockholm Arlanda and all other State-owned airports in Sweden provided some elements of the services required under the Regulation prior to its introduction. In Sweden, charges for services for WCHC and WCHS passengers were introduced in 2001 at a rate of 1 SEK (€0.10<sup>10</sup>) per departing passenger; charges have not yet been increased since the Regulation came into force to reflect the wider range of passengers requiring assistance, but we were informed that this is likely to happen in the next year.
- **Non-implementation of the Regulation:** With the exception of Athens, none of the airports in Greece provide assistance for PRMs. Assistance is provided by ground handling companies, and charges are negotiated directly between airlines and ground handling companies, and consequently not made public.

3.36 We were informed by ACI that the proportion of airports which identify this fee separately was 52% across the airports it surveyed, as opposed to 48% which include it in the passenger fee.

3.37 The types of costs which may be recovered using the PRM charge are:

- **Direct assistance costs:** The direct costs of the day-to-day running of the service.
- **Other incidental operating costs:** These may include maintenance, purchase of operating materials, other services, etc.
- **Capital expenditure:** Expenditure to invest in facilities required to provide services, such as mobility equipment and the fitting out of a dispatch office.
- **Administrative expenses:** These may include time spent by airport personnel in running the contract, and project costs such as airport management time in developing the tender.

---

<sup>10</sup> Calculated on the basis of €1 = 9.7 SEK.

- **Other airport fees:** The PRM contractor may have to, for example, rent space from the airport and to pay a fee for doing so. This would also be recovered through the PRM charge.

#### Level of charges

3.38 Figure 3.5 shows the charges at the case study airports in euros, converted using current (January 2010) exchange rates where required. There is significant variation in the level of the PRM charge between airports, from a minimum of €0.16 in Bucharest to €0.90 at Frankfurt Main and Paris CDG.

**FIGURE 3.5 AIRPORT CHARGES PER DEPARTING PASSENGER  
(€ AT CURRENT EXCHANGE RATES)**

3.39 The variation in charges between airports may result from several factors, including:

- staff cost variation;
- quality standards in place;
- the frequency with which the PRM services are used;
- the proportion of connecting flights; and
- the design of the terminal or airport.

3.40 We discuss each of these possible reasons for variation in turn.

3.41 **Purchasing power parities (PPPs)** can be used to compensate for differences in price levels between States. Figure 3.6 uses Eurostat PPPs for 2008 to convert PRM charges in national currency to euros at average price levels for the EU-27. The harmonisation only very slightly reduces the variation in the charges (measured in terms of standard deviation).

**FIGURE 3.6 AIRPORT CHARGES PER DEPARTING PASSENGER, 2009  
(€ AT 2008 EU-27 PPP)**

- 3.42 Although it was not possible to find published data showing the actual **level of service** offered to PRMs at any of the case study airports, the level of service set out in the PRM quality standards might help explain the variation in charges. To test this, we have calculated a weighted average PRM wait time and compared this with the PRM charge at each airport. This analysis suggests little or no correlation: for example, although the London airports state the highest service standards in terms of waiting times, the charges levied are lower than those at many other airports. Similarly, low charges at Bucharest are not reflected in longer proposed waiting times for PRMs requesting assistance.
- 3.43 It might also be expected that airports with **higher proportions of PRMs** would have higher charges. To examine this we calculated a proxy for the cost of assisting each PRM, for the airports for which we had data. This was obtained by dividing the PRM charge by the proportion of PRMs at each airport, to obtain the revenue gained by the airport for each PRM assisted.
- 3.44 It should be noted that there are some limitations to this analysis. It calculates revenue per PRM, and for this to be a valid proxy for costs, it must be assumed that charges are accurately cost-reflective, which is not the case in some airports: in Spain and Portugal the charge is uniform across all mainland State-owned airports, and does not therefore reflect local variation in costs; at State-owned airports in Sweden, the charge reflects only the costs of providing services for WCHC and WCHS passengers. For the costs to be cost-reflective it is also necessary that the frequency of use of the service is as forecast when the charges were calculated.
- 3.45 Figure 3.7 shows the results of the analysis. There is still significant variation between airports; the maximum cost per PRM assisted (€100 at Copenhagen, PPP adjusted) is 5 times the minimum cost (€18 at Bucharest, PPP adjusted). This shows that the variation in the number of PRMs does not fully explain the variation in the charge.

**FIGURE 3.7 AIRPORT COSTS PER PRM ASSISTED, 2009  
(€ AT 2008 EU-27 PPP)**

- 3.46 The level of variation also does not appear to be accounted for by the **size of the airport**: the charge at London Heathrow is relatively low, while Paris CDG is relatively high.
- 3.47 Several airports cited **high proportions of connecting passengers** as a factor which increased costs. However, we do not believe that high proportions of connecting passengers would increase the costs of provision: transfer passengers are counted as two passengers in airport statistics and any PRM charge is levied twice, so if the service is less than twice the cost of that for an arriving or departing passenger, such passengers would in fact result in a cost saving relative to other PRMs. This view is supported by the data, where the charge at London Heathrow is relatively low.
- 3.48 **Terminal design** may impact on the amount of time required to provide assistance, or the efficiency with which it can be provided. For example, Amsterdam Schiphol airport, which has one integrated terminal building and the concourse is generally at the same level, can make extensive use of electric carts to transport multiple passengers together; this is not practical at airports such as CDG.

#### *Changes to charges in 2010*

- 3.49 The charges and costs in this section are based on those current in 2009, as this is the only complete year for which data was available. Where updated charges have been published for 2010<sup>11</sup>, we have compared these with those for 2009. Most airports had not made any changes, but Munich and Rome Fiumicino increased charges by 48% and 28% respectively.

<sup>11</sup> IATA Airport, ATC and Fuel Charges Monitor, February revision, published March 2010.

3.50 London Heathrow changed the structure of its PRM charges in 2010. Whereas previously it levied a charge of £0.35 (€0.38) per passenger for all airlines, from 1 January 2010 the charges vary depending on the level of pre-notification. Airlines which pre-notify 85% or more of PRMs are charged £0.42 (€0.46) per departing passenger, while those which pre-notify 45% or less of their passengers are charged £0.83 (€0.91).

#### *Consultation*

3.51 Airports are required to determine charges in cooperation with users through airport user committees. The Regulation does not define cooperation further, however, and as a result the form this consultation has taken varies considerably. London Luton informed us that their tender process involved airlines, ground handlers and PRM organisations at all points of the tender process, from developing the specification to evaluating the bids and awarding the contract. In contrast, several airlines informed us that the consultation in Portugal and Spain was limited to the publication of a letter stating the amount the charge per person. We were also informed that consultations on PRM charges were often included in wider general charge negotiations.

3.52 A number of issues were raised regarding this cooperation.

- We were informed by several airports that certain carriers have contested the procedural steps taken by airport managing bodies to establish the charge. This has in at least one case been supported by an NEB taking a strict interpretation of the meaning of ‘in cooperation with airport users’, as requiring agreement between the airport and the airline both on the tender and the level of the charge. This has led to delays, particularly due to challenges by low-cost airlines, including requests to see cost information, which the airports regarded as unnecessary, after the tender processes were completed.
- Some airlines have blocked the process of approving charges by refusing to participate in the consultation.
- Some airports believed that direct involvement of users in the tender process can be problematic: without signing personal non-disclosure agreements, it may not be possible to share the commercially sensitive information included in tenders; there may also be conflicts of interests between some of the handlers and the tendering parties. However, the example of London Luton discussed above demonstrates that these barriers are not impossible to overcome.

#### **Quality standards**

##### *Standards published*

3.53 The Regulation requires all airports serving over 150,000 passenger movements per year to set and publish quality standards. Figure 3.8 indicates the proportions of airports publishing quality standards. The following airports had not yet done so:

- Amsterdam Schiphol: quality standards are in the process of being re-developed with airlines, and have not been published yet;
- Bologna: standards not yet published;
- Budapest: standards published to airlines and handling companies by letter; and
- Stockholm Arlanda: standards published to airlines but not yet published on its

website; it informed us that the standards would be published soon.

3.54 Three of these airports provided the quality standards to us at interview, but Amsterdam Schiphol and Bologna did not provide any details of their quality standards.

3.55 We found that the largest ten European airports in terms of passenger numbers were more likely to publish quality standards than those outside the top 10.

**FIGURE 3.8 PROPORTION OF AIRPORTS PUBLISHING QUALITY STANDARDS**

#### *Ease of finding quality standards*

3.56 The ease with which the quality standards could be located on airport websites varied considerably. For the airports which published quality standards, some of the main issues encountered were:

- Having to click through an excessive number of links before finding the standards, e.g. the website of Charleroi Airport requires the user to click on five links before the standards can be viewed;
- Locating the standards on the site of the management company rather than within the section or website dedicated to the airport – this was the case for the Spanish airports for which the information is on the main AENA website;
- Using terminology which may not be obvious, avoiding the actual term ‘quality standards’, e.g. BAA use the term ‘Service Level Agreement’; and
- Restrictions on language – Bucharest Otopeni, Brussels Charleroi and the Paris airports only publish quality standards on the local language versions of their websites.

#### *Standards for waiting time*

3.57 The standards defined by the case study airports are shown in Table 3.3 and Table 3.4 below. At all of the case study airports for which we were able to obtain standards, these are defined in terms of the percentage of PRMs who should wait for up to a given number of minutes. For example, at Barcelona, 80% of departing passengers who have pre-notified requirements for assistance should wait for 10 minutes or less from the point at which notice is given that they have arrived at the airport. This

approach is consistent with the example standards in Annex 5-C of ECAC Document 30<sup>12</sup>, and eight of the airports in the sample (including Copenhagen, Munich and the AENA Spanish airports) follow these exactly.

- 3.58 There are however variations in both how the standards are structured and the level of the standards. Paris Charles de Gaulle is unusual in that, with the exception of the top 99% bracket, an additional ten minutes is added to the wait time for departing passengers located ‘further away’. The published standards do not define how far away this is. Aéroports de Paris also define an additional category, of pre-notification of between 8 and 36 hours, for whom the standards are part-way between those applying to PRMs for which notification was received 36 hours or more before travel (‘pre-booked’), and those for which notification was received less than 8 hours beforehand (‘non-pre booked’). This is not shown in the table as it is not comparable with the standards offered by the other airports.
- 3.59 There are also some differences in how the wait time for arriving passengers is measured. At most airports, it is measured from when the aircraft reaches the parking position, but there are the following exceptions:
- From descent of last passenger: Rome Fiumicino;
  - From boarding bridge lock: Brussels; and
  - Not defined: Athens, Budapest, Lisbon, Stockholm Arlanda.
- 3.60 The standards proposed for pre-booked departing passengers are generally consistent, at least in terms of the waiting times which percentages are applied to: 10, 20 and 30 minutes are the most commonly used intervals, at 80%, 90% and 100% respectively. For non pre-booked passengers 80%, 90% and 100% apply to 25, 35 and 45 minutes. Better standards are offered by the UK and French airports that we reviewed. This is also reflected in the standards for arriving passengers, with the London and Paris airports targeting zero waiting time for 90-100% of passengers. There is also a clear pattern for arriving passengers, with 80% of pre-notified PRMs waiting no more than 5 minutes, 90% no more than 10 and 100% no more than 20 minutes. Standards are not as high as this for non pre-booked passengers, however.
- 3.61 Several airports informed us that the standards suggested by ECAC Document 30 for arriving passengers were not short enough to meet airline requirements on turnaround times: if the airports adhered only to these standards, there would be significant operational issues. Some of these airports published standards in line with Document 30, but stated that they actually provided services in much shorter times.

---

<sup>12</sup> ECAC Policy Statement in the field of Civil Aviation Facilitation, 11th Edition/December 2009.

*Other elements of published quality standards*

- 3.62 Some airports define additional standards other than the waiting time targets, generally reflective of the assistance set out in Annex 1 of the Regulation. For example, Charleroi provides detailed information regarding the level of assistance which will be provided for PRMs, for example support for embarking and disembarking the aircraft, or for dealing with customs formalities. Brussels Airport also defines how many assistants will accompany a PRM, depending on their type of disability.
- 3.63 Some airports also include more general, qualitative targets, less directly related to the assistance offered to an individual PRM. For example, Luton Airport's published standards include responding to 'disabled customer enquiries to offer guidance and advice', and auditing to ensure compliance with all disability legislation. Athens Airport also provides extensive details of the measures it has taken to accommodate PRMs, including disabled-access internet points and a special walkway for partially sighted PRMs.

### Monitoring

3.64 While the Regulation requires larger airports to develop and publish quality standards, it does not require them publish whether they are actually met, and none of the case study airports do so. Nonetheless most airports do undertake some form of monitoring and several provided us with performance statistics. There were a number of approaches to monitoring:

- **Time spent waiting to receive assistance:** This is the most common measure used by airports, as set out above. These times are often measured by time stamps inputted into the personal digital assistants (PDAs) or equivalent devices carried by staff providing assistance to PRMs (discussed earlier). The data recorded can often give wider outputs than solely the time taken to receive assistance, such as time from gate to boarding, or time waiting once disembarked from an aircraft. This approach should give accurate information on the time spent waiting by passengers, but does not address other aspects of quality of service.
- **Spot checks:** Many airports reported that the PRM service manager will undertake frequent unannounced tours of the services and infrastructure provided within the airport. They may check, for example, that the designated points of arrival and departure are functioning correctly. This approach is useful to identify wide-ranging problems but may not be sufficiently systematic to identify all problems.
- **Surveys:** A number of airports reported using surveys to obtain feedback from passengers. Typically, a postcard with survey questions to be completed was given to PRMs at some point during their use of the airport's services, which could be submitted at information desks or at various comment boxes placed throughout the airport. These covered questions on the services received, and in some cases assessed the passenger's knowledge of the Regulation. A potential problem with this approach is the lack of accessibility for all passengers.
- **Mystery shoppers:** 'Mystery shoppers' are people (typically PRMs) paid to anonymously receive the service provided by the airport and afterwards give detailed reports or feedback about their experiences. This approach gives a thorough appraisal of the service provided at a particular time.

3.65 Table 3.5 sets out the actions airports have taken to monitor their quality standards. Most airports do not include any external auditing in their monitoring processes; Athens, Bucharest Otopeni, Luton, Madrid Barajas, Zaragoza include some external checks.

**TABLE 3.5 AIRPORT ACTIONS TO MONITOR QUALITY STANDARDS**

Airport	Measures monitored
Amsterdam Schiphol	Manual checks of numbers of PRMs and service quality
Athens	Audits, including 'mystery PRM' audit; PRM surveys
Bologna	PRM survey; time taken for assistance
Brussels	Time taken for assistance (in real time); passenger complaints
Bucharest Otopeni	Passenger surveys; complaints; external audits by NEB, PRM organisations, Commission, and airlines
Budapest	Monthly reports of time taken for assistance and passenger complaints; daily contact with service provider; 'walk-throughs' of service provided; airline audits

Brussels Charleroi	Passenger complaints received
Copenhagen	Time taken for assistance (in real time)
Dublin	Weekly audits of time taken; annual training audit
Frankfurt Main	Monthly reports of time taken for assistance
Lisbon	Time taken for assistance
London Heathrow	Time taken for assistance; missed flights; flight delays; internal audits; regular meetings with service providers; complaints from passengers and airlines; some of these measures monitored through a 'dashboard'; monthly 'scorecard' review
London Luton	Passenger feedback forms; 'walk-throughs' of service provided; internal and external audit teams of provider; airline and PRM organisation audits
Madrid Barajas	Monthly meetings with service providers and PRM organisation; surveys by service providers; independent surveys; PRM feedback forms
Munich	Monthly reports of time taken for assistance; spot checks; quality service manager as 'mystery shopper'; yearly passenger survey
Paris Charles De Gaulle	Flight delays for which PRM services are responsible; passenger complaints
Riga	Questionnaires to airlines, passengers and others; daily service monitoring by duty managers; internal audits
Rome Fiumicino	Time taken for assistance (in real time); other unspecified monitoring
Stockholm Arlanda	Time taken for assistance; passenger complaints; AOC meetings
Warsaw	Infrequent spot checks of time taken
Zaragoza	Monthly meetings with service providers and PRM organisation; surveys by service providers; independent surveys; PRM feedback forms

3.66 In addition, we found that most NEBs had not undertaken any direct, systematic monitoring of whether airports were meeting quality standards. Table 3.6 sets out the actions NEBs have taken to monitor airport quality standards.

**TABLE 3.6 NEB ACTIONS TO MONITOR QUALITY STANDARDS**

Member State	Monitoring
Belgium	Inspections of infrastructure and procedures
Denmark	No monitoring, biannual meetings
France	No monitoring
Germany	No monitoring
Greece	Inspections of infrastructure and procedures at Athens, not of regional airports
Hungary	Inspections of infrastructure and procedures, questionnaire on training
Ireland	No monitoring
Italy	Inspections of quality standards including infrastructure, procedures, information, training
Latvia	Inspection of infrastructure, procedures, waiting times, documentation
Netherlands	Inspection of infrastructure and procedures
Poland	No monitoring
Portugal	No monitoring

Member State	Monitoring
Romania	Request annual reports
Spain	Checks of staff training and procedures
Sweden	No monitoring
United Kingdom	Inspections of infrastructure and procedures, attend monthly PRM groups at major airports, less frequently at smaller airports

## Complaints to airports

### *Airport processes for handling complaints*

- 3.67 Most case study airports accepted complaints relating to PRM services in the same way as other complaints. Often airports will accept complaints via email, via information desks at the airport, or via forms which can be filled in and deposited in comment boxes located at various points within the terminals.
- 3.68 Typically, complaints are registered in a database which is reviewed by a member of staff on the service quality team. The staff member allocated to the complaint reviews documents relating to the service referred to in the complaint, and talks to the member of staff who provided the service (this member of staff may be employed by either the airport or a contractor). After investigating the complaint, the staff member writes a report including the findings and any response which is sent to the passenger. The service quality manager may review monthly reports on complaints, which will include complaints regarding the PRM service.
- 3.69 The level of detail to which the complaint handling process is specified varies depending on the volume of complaints received: an airport which handles many complaints may follow clearly defined procedures for handling complaints, while an airport which receives only few complaints may address them on a more ad hoc basis.

### *Number of complaints received*

- 3.70 For each airport in the case study sample we requested the number of complaints received relating to provision of services to PRMs. We compared the data received with the assistance provided to give a rate of complaints, shown in Figure 3.9. This shows a high level of variation in the number of complaints received. Most of the larger airports have a similar rate of complaints. The highest rate of complaints is at Brussels Zaventem (0.33%, over double the next highest).

**FIGURE 3.9 RATE OF COMPLAINTS RECEIVED BY AIRPORTS, 2009**

3.71 Some airports note that they have received no complaints regarding the Regulation since its introduction, while during the same period they have received several thousand complaints regarding aspects of their service not covered by the Regulation. This is evidence that their system for receiving complaints is functioning well, but it is not necessarily evidence that there are no problems regarding the implementation of the Regulation. We were informed by several PRM organisations that a mobility-impaired passenger who receives poor service may be reluctant to complain, as they may wish to forget the incident, and since these passengers may face many obstacles during a journey, they may take the view that reporting the more frequent minor incidents is not worthwhile. In addition, the lack of compensation in most Member States means there is little direct incentive to complain.

### Training

3.72 The Regulation requires that airports provide training relating to PRMs for their personnel:

- All personnel who provide direct assistance to PRMs, including those employed by subcontractors, must have knowledge of how to meet the needs of various different types of PRMs.
- All airport personnel who have direct contact with the travelling public must have disability-equality and disability-awareness training.
- All new employees must attend disability-related training and personnel must have appropriate refresher training.

3.73 We requested information on the training provided at each of the airports in the sample for the study. As many considered this material confidential, we were not able to obtain many copies of training documents. From the information we have received, the content of the three types of training may typically include the following:

- **Staff assisting PRMs directly:** Most courses described included: theoretical training on rights and obligations under the Regulation, training in awareness of disabilities, and physical training in lifting and other handling of PRMs. Some elements of training may be given to all staff; these could include Ambulift licenses and sign language. It may also include training not directly related to PRMs, such as training in first aid. Not all of the training courses we were given information for included provision for ‘soft’ elements of interacting with PRMs, such as ensuring that the person providing assistance is at the same height as a wheelchair user when talking to them, or being aware of the type of circumstances which could cause a person with autism to become distressed.
- **Passenger-facing staff:** This training is typically the disability-equality and disability-awareness sections of the training for staff providing direct assistance to PRMs. Several airports ensured that this training was undertaken by all staff working in the airport (including external staff) by making this training a requirement for obtaining the security clearance pass needed to work in the airport. It may include specific training for security staff who perform searches on PRMs, relating for example to how to search a passenger in their own wheelchair, and awareness of the importance to blind passengers of having belongs replaced in exactly the same place within their baggage.
- **Other employees:** The form of this training was often a short video on disability awareness. Some airports did not provide this training, or did not make it compulsory, which appears to be an infringement of the Regulation.

3.74 Training was delivered either internally, by external contractors specialising in training, or by PRM organisations. Several airports informed us that they used a “train the trainer” approach, where employees who have received the training then go on to train other employees. Several airports informed us that their training programmes were compliant with the guidance given in Annex 5-G of ECAC Document 30. A number of airports had involved PRM organisations in their training in some way, including in the development of the training, in its delivery, or through audit and approval. Several airports informed us that they had sought assistance from local PRM organisations but had found this problematic.

3.75 The lengths of the training programmes about which we were given information varied widely. We were given information relating to 6 training programmes for those providing direct assistance to PRMs: of these, 4 lasted 3-6 days, while two lasted 12 days or more. The length of training for passenger-facing staff also varied, with some airports requiring a full day of training whilst others only required the staff member to watch a 20 minute video. Refresher courses also varied considerably in length (between 1 and 4.5 days) and frequency: one airport informed us that it had monthly refresher training, while another required refresher training every 2 years.

#### **Stakeholder views on effectiveness of implementation**

3.76 We asked each of the stakeholders we contacted about how effectively they believed airports had implemented the Regulation; views vary considerably between different groups of stakeholders (Figure 3.10 below). Airlines and PRM organisations both believe that there are significant improvements to be made, but over 70% of NEBs believe that the actions of airports are largely sufficient. The rest of this section summarises the views expressed by stakeholders.

**FIGURE 3.10 VIEWS OF STAKEHOLDERS ON AIRPORT EFFECTIVENESS**

*Airports*

3.77 Most airports viewed their own actions as effective implementations of the Regulation. The most common problem reported by airports was misuse of the PRM service, however the level of impact of this reported misuse varied considerably between airports. The following other issues were identified by airports:

- Connecting flights: Minimum connection times, while sufficient for other passengers, can be insufficient for a PRM.
- Initial implementation of the Regulation: Several airports informed us that they had had problems with subcontracted service providers; a number had since retendered the service because of unsatisfactory service quality.
- Several airports informed us that they had had difficulty obtaining the cooperation of PRM organisations when developing quality standards.

*Airlines and airline associations*

3.78 Many airlines reported that quality of service and level of charges varied considerably between airports. This did not necessarily relate to size of airport: some airlines informed us that larger airports tended to provide better assistance, while other airlines informed us that their provision tended to be worse. Few airlines reported significant delays due to PRM services.

3.79 The most common problems with airport implementation of the Regulation reported by airlines related to airport charges. These issues were raised, in particular, by low cost and charter carriers:

- many airlines believed that the method of determining charges was not transparent and that the charges determined by airports were not reasonable or cost reflective;
- many airlines reported that the costs of the PRM service had increased (in some cases significantly) since the introduction of the Regulation, relative to the previous situation when the PRM service was contracted directly by the carrier, generally from its ground handler;

- this increase was believed by several airlines to be a result of overstaffing, or by some as a result of the inclusion of a margin, which they believed to be a contravention of the Regulation;
- at the same time as this perceived increase in cost, many airlines believed the quality of service had decreased, or at best not improved, since the introduction of the Regulation, and that the charges therefore represented poor value for money; and
- some States (in particular Spain and Portugal) have introduced uniform charges for services at State-operated airports, which airlines do not believe are cost-reflective or give value for money.

3.80 Some airlines informed us that they had serious concerns regarding the safety of uses of the PRM assistance services provided by airports, and noted that the airlines have no right to audit or directly influence the service provider.

3.81 Airline associations raised many of the same issues. ELFAA had particularly negative views regarding the assistance provided by airports: it believed that assistance was provided by unskilled staff and that the quality had decreased as a result, and that the cost of provision had tripled at some airports. It also believed that services were poorly synchronised with airline schedules. All of the airline associations from whom we obtained a response raised at least some concerns on all points regarding charges, including whether the costs were reasonable, cost-related and transparent, and whether the cooperation with airlines was sufficient.

#### *NEBs*

3.82 Most NEBs believed that airports had implemented the Regulation effectively. Several informed us that they believed there had initially been problems with implementation, but that these were now resolved. Those that believed there were areas which should be improved identified problems with designated points, infrastructure, delays on arrival and provision of information. It is not clear whether the level of supervision by most NEBs would be sufficient to allow an in-depth analysis of airport effectiveness (see 5.42).

#### *PRM organisations*

3.83 Most organisations representing disabled people believed there were some issues with the implementation of the Regulation by airports, and identified issues at all points of the process. Most organisations also noted that there was wide variation in the quality of service provided at different airports; several believed that this was a result of variation in the training given. Frequently identified problems included:

- **Mobility equipment is frequently damaged:** Many PRM organisations informed us that understanding of mobility equipment was poor and that training regarding it was insufficient. They believed that this poor understanding amongst airport and ground handling staff contributed to frequent damage. There was an expectation amongst most of the PRMs using wheelchairs that we spoke to that, if they travel by air, there is a high likelihood their chair will be damaged. For disabled people with extremely limited mobility who rely heavily on their wheelchair and may have adaptations particular to their needs, damage to their chair can be extremely distressing.

- **Lengthy waits for disembarkation:** Although the initial disembarking from the plane may be completed within the time set out in the quality standards, the passenger may then have to wait a long period of time in a holding area before the rest of the arrivals procedure is finished.
- **Information provision is poor:** This includes information on the layout of the airport, accessible real-time information on flights, and information on the rights of PRMs.
- **Websites are inaccessible:** We were informed by many organisations that airport websites are frequently inaccessible to visually impaired people.
- **Poor training of staff:** Several organisations reported that the interaction of airport assistance staff with PRMs could be poor. Examples of this included the assumption that all PRMs require a wheelchair, and where the assistance staff talk to a companion of a PRM rather than directly to the PRM.
- **Inability to use own wheelchair:** As discussed above, some wheelchair users with particularly limited mobility may wish to use their own wheelchair for as long as possible. We were informed that many airports do not permit the use of a passenger's own chair up to the gate, and that some have a policy of transferring the passenger to an airport chair at check-in.
- **Inadequate provision where connection times are long:** Where there is a wait of several hours between the arrival of one flight and the scheduled departure of the connecting flight, at some airports this may result in a PRM being left unattended for a long period in an area without facilities or assistance.
- **Insufficient time allowed for connections:** The minimum connection time given by airports may not be sufficient to unload, transfer and board a PRM. This is a particular problem at larger, more complex airports with multiple terminals.
- **Parking provision:** A number of issues were raised with the parking spaces made available to PRMs. These included comments on inconvenient location, insufficient capacity, or inappropriate requirements for payment.
- **“Holding areas”:** Some airports do not enable PRMs to access departure lounge facilities such as shops or restaurants, and require them to remain in a “holding area” for PRMs. Although such access to facilities is not required by the Regulation, it can significantly improve the experience of air travel of PRMs, and is provided by many airports.
- **Communication of arrival:** Communication of arrival at the airport can be difficult, for example through poor signage for points of communication, or points of communication failing to respond to calls for assistance.
- **Poor provision for the visually impaired:** Many airports do not provide adaptations to allow visually impaired passengers to access the airport independently. These can include tactile surfaces or Braille maps. We were also informed that training on how security staff should search the bags of these passengers was often lacking; it is important that all items are returned to their original location, as otherwise the passenger may have difficulty finding them.

#### *Other organisations*

3.84 The other organisations we interviewed raised issues which have been raised by the stakeholder groups already discussed. These included:

- “Teething problems” when the Regulation was first introduced;
- Poor provision of information;

- Variability of training; and
- Falling service levels, in particular falling standards of safety.

### Conclusions

- 3.85 All airports in the sample for this study had implemented the provisions of the Regulation. We were informed that the regional airports in Greece had yet to effect the change from provision by ground handlers to provision by airports, but we were not told of any other airports at which the Regulation has not been implemented. Most of the sample airports had contracted the provision of PRM assistance services to an external company, and several had changed their service provider within 18 months of the Regulation coming into force; this was interpreted by some as a sign that initial procurement and specification had not met actual needs.
- 3.86 The service provided at the sample airports varies in terms of a number of factors including the resources available to provide the services; the level of training of the assistance staff; the type of equipment used to provide services; the facilities provided to accommodate PRMs (such as PRM lounges). According to the information provided by PRM organisations, there is resulting variability in service quality, although this is difficult to quantify.
- 3.87 There is also significant variation between airports in the frequency with which PRM services are requested: the level of use of the service varies by a factor of 15 between the airports for which we have been able to obtain data. The type of PRM service requested also varies considerably between airports. Both the frequency of use and the type of service required are likely to be affected by the varying demographics of the passengers using different airports.
- 3.88 The Regulation requires airports to publish quality standards. Most sample airports had done so, although some had published them only to airlines and other service users. Almost all quality standards followed the example format set out in ECAC Document 30, which defines the percentage of PRMs who should wait for up to given numbers of minutes. Some airports published qualitative measures in addition to these time standards, such as descriptions of the treatment the passenger should expect at all points of the service. However, none of the sample airports had published the results of any monitoring of these quality standards, and whilst most did undertake monitoring in some form, only four had commissioned external checks of the service.
- 3.89 The Regulation allows airports to levy a specific charge to cover the costs of assistance. All but one of the sample airports had done so. The level of charges varied considerably. We analysed this charge to examine whether variation could be explained by higher frequency of use of the service, differences in price levels between States, or differences in service quality, but there was no evidence that this was the case. The design of the airport may be a further factor influencing the cost of service provision and hence the level of charges.
- 3.90 Some stakeholders believe that the requirements to select contractors and establish charges in cooperation with users and PRM organisations were not followed thoroughly. Many airlines did not believe that consultation on either element had been sufficient, and this view was shared by some PRM organisations. There were a

number of barriers to effective consultation, including linguistic restrictions and airport user committees which failed to include all interested stakeholders. Consultation with airlines was reported as particularly poor in Spain, Portugal and Cyprus. In contrast to this, we note that several airports stated that they had sought the participation of PRM organisations but had found this difficult to obtain.

- 3.91 The Regulation requires airports to provide specialised disability training for staff directly assisting PRMs, and whilst all sample airports had done so, there were significant variations in the length and format of this training. The shortest training course among those for which we have data was 3 days long, while the longest lasted 14 days. There was similar variation in the length of training provided for passenger-facing staff who did not provide direct assistance. A number of airports informed us that they did not provide disability-awareness training for staff not in public-facing roles, or only provided it on a voluntary basis.

## 4. APPLICATION OF THE REGULATION BY AIRLINES

### Introduction

4.1 Regulation 1107/2006 also sets out requirements for air carriers relating to their treatment of passengers with reduced mobility (PRMs). This section assesses how airlines are implementing these requirements. Information is drawn from two key sources:

- a detailed review of information published by the case study airline on their websites, against a range of criteria; and
- interviews with representatives of the carriers and other stakeholders.

4.2 This section begins by outlining the obligations imposed on airlines by the Regulation, and evaluates how airlines are implementing these requirements.

### Requirements of the Regulation for air carriers

4.3 The Regulation imposes a range of requirements on airlines, which can be summarised as follows:

- **Prevention of refusal of carriage:** The Regulation prohibits airlines from refusing carriage or accepting reservations from PRMs, unless this is necessary to comply with safety requirements, or necessitated by the physical constraints of the aircraft. Where boarding is refused, the provisions of Regulation 261/2004 should apply with regard to refunds or rerouting. Airlines are permitted to require that a PRM be accompanied by a person who is able to provide any assistance that is required (again subject to this being necessary to meet safety requirements), and are required to publish any safety rules which they attach to the carriage of PRMs.
- **Transmission of information:** Airlines are required to take all necessary measures to enable the receipt of PRM assistance requests at all points of sale. Where such requests are received up to 48 hours prior to departure, the airline should transmit the information to the relevant airport(s) at least 36 hours before departure, or as soon as possible if notification is received from the passenger less than 48 hours before departure. Following departure of a flight the airline is also required to provide the destination airport with details of the PRMs requiring assistance on the arriving flight.
- **Assistance:** Annex II specifies the level of assistance which air carriers should provide to PRMs. This comprises carriage of assistance dogs, transport of up to two items of mobility equipment, communication of flight information in accessible formats, making efforts to accommodate seating requests (and seating accompanying persons next to the PRM where possible) and assistance in moving to toilet facilities.
- **Training:** All employees (including those employed by sub-contractors) handling PRMs should have knowledge of how to meet their needs. Disability-equality and disability-awareness training should be provided to all airport personnel dealing directly with the travelling public, and all new employees should attend disability-related training.

- **Compensation for lost or damaged mobility equipment:** Airlines are required to compensate passengers for lost or damaged mobility equipment or assistive devices, in accordance with national and international law.

#### **Published safety rules**

- 4.4 Article 4(3) requires airlines to publish the safety rules relating to carriage of PRMs. The Regulation does not state in any more detail what these safety rules should cover, but we would expect from the context that this is intended to mean rules relating to where carriers would exercise a derogation under Article 4(1) to allow refusal or limitation of carriage, or for where passengers would have to be accompanied. This would include any rules necessitating limitations on the number of PRMs which can be carried, restrictions on the types of PRM posing specific safety risks, or limitations on their carriage or on that of mobility equipment due to the size of aircraft.
- 4.5 In some cases the information published by airlines is in the form of a document defined as ‘safety rules’ or ‘information pursuant to Regulation 1107/2006’, but more commonly information is provided on a web page (or pages) without these descriptions. The limited use of the ‘safety rules’ term by airlines may indicate that carriers do not understand what is meant by the term, or that the requirement is open to interpretation. It is also possible that airlines do not have specific PRM safety rules – both KLM and SAS informed us that the same safety rules apply to PRMs as to all other passengers.
- 4.6 The airlines’ Conditions of Carriage may also provide a useful source of information on policy on the carriage of PRMs, and in some cases may provide more detail than dedicated PRM web pages.
- 4.7 Seven carriers’ Conditions of Carriage also refer to other requirements (often described as ‘Our regulations’ or ‘Other regulations’) which apply to carriage of PRMs. In the sample we have reviewed, the reference to such regulations does not always specify exactly what the scope of these is or where they are to be found. This may infringe the requirement in Article 4(3) to publish any safety rules affecting PRMs, and may also raise issues of consistency with the Unfair Contract Terms Directive, as the conditions on which bookings are made should be transparent at the time. Whilst some airlines’ Conditions state that these regulations are published on their websites, the following case study carriers’ Conditions include such references without saying where the information can be found:
- Air Baltic;
  - Emirates;
  - SAS; and
  - TAP Portugal.
- 4.8 The carriers which provided the most detailed information set out the information listed below, and we would therefore expect a comprehensive PRM web page to provide at least some information on these topics:
- Any limitations on the carriage of PRMs, for example a limit on the number that can be conveyed on a given flight;

- Advance booking requirements for any PRM requiring assistance;
- Conditions under which an accompanying passenger will be required;
- Guidance on the carriage of assistance animals;
- Policies on the carriage of equipment, e.g. wheelchairs, stretchers and oxygen; and
- Any assistance which will be offered on board.

*Information actually published by carriers*

- 4.9 Three of the sample airlines (Air Berlin, easyJet and Ryanair) provide either ‘safety rules’, or a notice specifically stated to be pursuant to Regulation 1107/2006. In a further six cases Regulation 1107/2006 is mentioned in a first sentence of the web page / PRM document, or elsewhere in the text.
- 4.10 We found that eight of the sample airlines include on their website all the information likely to be required. This was normally in the form of a web page, sometimes with sub-sections, however AirBaltic and KLM provide downloadable documents containing all PRM guidance. Delta also provides a PRM brochure, but this does not contain all the information provided on the PRM web page. In the remainder of cases airlines provide fairly comprehensive web pages, but omit certain items which may appear on other sections of the website (for example in the Conditions of Carriage).
- 4.11 In some cases we found inconsistencies between the PRM web page and that the information provided in the Conditions of Carriage. For example, Delta’s Conditions of Carriage state that 48 hours’ advance notice is required for any PRMs who wish to receive special assistance, but the PRM information section states that 48 hours’ advance notice is only required if the passenger needs to use oxygen during the flight, requires the packaging of a wheelchair battery for shipment as checked luggage, or is travelling with a group of 10 or more people with disabilities. Austrian Airlines’ PRM information emphasises the importance of booking in advance, but does not reflect the stronger wording in the Conditions of Carriage, which state that carriage of PRMs ‘is subject to express prior arrangement’. Similarly, the Conditions of Carriage of Alitalia, Brussels Airlines, Delta, Ryanair and Wizzair state that carriage may be refused to PRMs if not arranged in advance; however although the PRM webpage states that assistance should be requested at the time of booking, it is not indicated that failure to do this may result in denial of boarding.
- 4.12 Some of the rules set out in airlines’ Conditions of Carriage do not appear in the PRM information section of the website. For example, Thomsonfly imposes a limit on the number of PRMs or wheelchairs which will be accepted per flight in their Conditions of Carriage, which does not appear on the airline’s PRM web page.

Table 4.1 outlines the coverage of the PRM web pages against the criteria set out in paragraph 4.9 above.

TABLE 4.1 INFORMATION AVAILABLE ON CARRIER WEBSITES

Airline	Information provided	Key issues and omissions
Aegean Airlines	'Travel Guide' section of website provides some information on carriage of assistance animals, wheelchairs and oxygen.	No information on advance booking, accompanying passengers or animals  Information on wheelchairs is incomplete – conditions of carriage state that spillable batteries cannot be carried. No information on stretchers.
Air Berlin	Information is provided within a section entitled 'Flying barrier-free', and in a safety rules section entitled 'airberlin's safety regulations for the carriage of passengers with restricted mobility (PRMs) in accordance with EC regulation no. 1107/2206' downloadable from the same page. The safety rules discuss the following: <ul style="list-style-type: none"> <li>• PRM limit</li> <li>• Accompanying persons</li> <li>• Seat allocation</li> <li>• Guide dogs</li> <li>• Information in the event of refusal of carriage</li> </ul>	The safety rules do not include advance booking or policies on carriage of equipment. However, with the exception of stretchers this information is provided on the PRM webpage which contains the safety rules.
Air France	Information is provided within a section entitled 'Passengers with reduced mobility'	None
AirBaltic	Detailed information is provided within a document entitled 'Air travel for physically challenged passengers'	None
Alitalia	Limited information across all categories is provided in a section entitled 'No barriers travelling'.	More detailed information on some topics can be accessed only by searching the site for specific terms, e.g. 'stretcher'.
Austrian	Information on most categories is provided in a section entitled 'Barrier-free travel'.	No reference is made to the carriage of stretchers.
British Airways	Information on all categories is provided within a section entitled 'Disability assistance'	None
Brussels Airlines	Reasonably detailed information across all categories is provided in a section entitled 'Special Assistance'.	Information on accompanying passengers, wheelchairs and stretchers is incomplete.
Delta	Detailed information on all categories is provided within a section entitled 'Services for Travelers with Disabilities'. A brochure providing a summary of this information can also be downloaded from the site.	None
easyJet	Detailed information on almost all categories is provided within a notice entitled 'For passengers who are disabled or have reduced mobility (PRM) due to a physical, cognitive (learning) disability or any physical impairment, as defined by current European law, Regulation EC1107/2006 Article 2(a).' In addition detailed information is provided in the 'Carrier's Regulations'.	The information notice on the website is detailed and generally appears complete. There is no reference to provision of oxygen or carriage of stretchers although both are addressed in the Carrier's Regulations.
Emirates	Some information across all categories is provided within the sections 'Health & Travel', 'Special Needs' and 'FAQs'.	The information provided appears to be complete but it is fragmented between these

Airline	Information provided	Key issues and omissions
		three sections, which could be confusing.
Iberia	The website has a general information section entitled 'Passengers with reduced mobility or special needs'. This provides a link to a more detailed information leaflet, downloadable by clicking on a 'No barriers to travel' icon.	The location of the information leaflet is not obvious as it is not listed under 'Information of interest'.  Information in the leaflet on accompanying passengers and carriage of mobility equipment appears to be incomplete.  There is a document entitled 'Attending to the needs of people with reduced mobility' but this appears to be a general summary of ECAC/ICAO guidance and it is not clear what applies to Iberia.
KLM	Information is provided within a section entitled 'Physically challenged passengers' and in a 'Carefree travel' brochure.	None
Lufthansa	Information on most categories is provided in a section entitled 'Travellers with special needs'.	No information on accompanying passengers or stretchers, although some info is provided in a section on flights to and from the USA.
Ryanair	Detailed information on almost all categories is provided within a notice entitled 'NOTICE PURSUANT TO EC REGULATION 1107/2006 CARRIAGE OF DISABLED PERSONS AND PERSONS WITH REDUCED MOBILITY'.	None
SAS	Information on almost all categories is provided within a section entitled 'Special needs'.	No information on accompanying passengers or stretchers
TAP Portugal	Detailed information on all categories is provided within a section entitled 'Special Assistance'.	None
TAROM	Limited information across all categories is provided in a section entitled 'Persons with disabilities'.	Because the information is not detailed it is not clear whether it is complete, e.g. whether all circumstances where passengers need to be accompanied are listed.
Thomas Cook	Information on all categories is provided within a section entitled 'Medical - passengers with Reduced Mobility'.	None
TUI (Thomsonfly)	Some information on most categories is provided within a section entitled 'Passengers with special needs'.	No information on stretchers or oxygen
Wizzair	Limited information is provided within a section entitled 'Passengers with Special Needs'.	No information on assistance animals or stretchers, although both are referred to in the Conditions of Carriage.

## Carrier requirements on carriage of PRMs

### *Safety requirements defined in law or by licensing authorities*

- 4.13 Article 4(1) allows derogations from Article 3 in order to meet safety requirements defined by national or international law, or to meet safety requirements established by the authority that issued the air operator's certificate to the air carrier concerned. The only EU-wide legislation which applies is EU-OPS1 (Commission Regulation 859/2008), which is aligned with JAR-OPS 1 Section 1 guidance previously produced by the Joint Aviation Authorities.
- 4.14 National health and safety legislation may also provide safety-related grounds for imposing restrictions on the carriage of PRMs – for example cabin crew may not be permitted to lift passengers between their seat and an on-board wheelchair, which would then necessitate an accompanying passenger if it is expected that they will need to leave their seat at any point during the flight.
- 4.15 All other restrictions are governed by safety requirements established by licensing authorities, which are often (although not always) the same organisation that has been designated as the NEB for the Regulation. The main guidance material relating to carriage of PRMs that licensing authorities should take into account is that originally defined in Section 2 of JAR-OPS 1. Section 2 was not included in EU-OPS1, but ECAC Document 30 states that, pending the adoption of implementing rules related to operations based on the EASA Regulation (216/2008), Member States are allowed to use the Section 2 guidance material, provided that there is not conflict with EU-OPS. To accompany EU-OPS 1, the JAA published an updated version of Section 2 in the form of Temporary Guidance Leaflet (TGL) 44. The section relating to the carriage of PRMs, ACJ OPS 1.260, remains unchanged from the original JAR-OPS 1 Section 2. It states that:

- 1 *A person with reduced mobility (PRM) is understood to mean a person whose mobility is reduced due to physical incapacity (sensory or locomotory), an intellectual deficiency, age, illness or any other cause of disability when using transport and when the situation needs special attention and the adaptation to a person's need of the service made available to all passengers.*
- 2 *In normal circumstances PRMs should not be seated adjacent to an emergency exit.*
- 3 *In circumstances in which the number of PRMs forms a significant proportion of the total number of passengers carried on board:*
  - a. *The number of PRMs should not exceed the number of able-bodied persons capable of assisting with an emergency evacuation; and*
  - b. *The guidance given in paragraph 2 above should be followed to the maximum extent possible.*

- 4.16 Licensing authorities may require their carriers to impose more stringent restrictions on carriage of PRMs than the 50% limit defined by TGL 44. However, this is rare: the only example identified amongst the case study States is the Belgian Civil Aviation Authority (BCAA), which has set restrictions on the numbers of certain types of PRM, and minimum numbers of accompanying passengers. The numerical limits, which are outlined in more detail in the case study for Belgium in appendix C, are reflected in the conditions imposed by Brussels Airlines. In contrast, some licensing authorities

(for example the UK CAA) have stated that they will not generally approve limits on carriage of PRMs below the 50% defined in TGL 44.

- 4.17 In the remainder of cases, licensing authorities do not have any defined policy and will consider any restrictions on carriage of PRMs on a case by case basis. Therefore, more stringent restrictions on carriage of PRMs may be proposed by the airlines themselves, included in their Operations Manuals and submitted for approval by the licensing authority. As a result, there are significant variations between airlines, even where operational models and types of aircraft are similar. For example, whilst Wizzair, easyJet and Ryanair have similar operational models and aircraft types, Ryanair has a limit of 4 PRMs who require assistance per aircraft whilst Wizzair has a limit of 28 PRMs and easyJet 50%. Although the limits imposed by the three airlines are all based on safety, it is difficult to imagine that all three could be ‘safe’ limits. There does not seem to be an evidence base for these limits and a stakeholder suggested to us that, in the event of an emergency, it is impossible to predict whether even ‘able bodied’ passengers will be in a physical or psychological state consistent with evacuating the aircraft in the expected time; therefore, it was discriminatory to have a PRM limit.
- 4.18 The policy adopted by many of the legacy carriers is influenced by the United States Department of Transport Regulation, 14 CFR Part 382 (hereafter described as rule 382). The United States Air Carrier Access Act of 1999 made rule 382 apply to non-US carriers on flights to/from the US, and to all flights which are codeshares with US carriers (even flights not to/from the US), except where there is a specific conflict with non-US law. Despite sharing the same aspiration of ensuring equal access to air travel for all, there are significant differences between the US and EU regulations. Rule 382 specifically prohibits airlines from imposing numerical limits on PRMs, on the basis that this practice is discriminatory. Lufthansa and TAP Portugal are the only case study airlines operating to and from the US to publish PRM limits.
- 4.19 PRM limits have also been challenged on the basis of national law. In 2009, the Madrid Provincial Court ruled that Iberia must change its Flight Operation Manual because it was indirectly discriminatory against disabled people. The case was brought by three deaf people who were refused boarding because they were unaccompanied.
- 4.20 The Regulation allows airlines to **request that a passenger be accompanied**, but only on the basis of safety. Three carriers cited the UK Department for Transport’s *Access to Air Travel for Disabled Persons and Persons with Reduced Mobility – Code of Practice* as the basis for the criteria they use to determine whether a PRM should be accompanied. The document also supports the Regulation in providing guidance to airlines and airports on best practice approaches to the handling and transit of PRMs. The guidance states that an accompanying passenger should only be required “when it is evident that the person is not self-reliant and this could pose a risk to safety”. The document defines this as being as passenger who cannot:
- Unfasten their seat belt;
  - Leave their seat and reach an emergency exit unaided;
  - Retrieve and fit a lifejacket;
  - Don an oxygen mask without assistance; or
  - Is unable to understand the safety briefing and any advice and instructions given

by the crew in an emergency situation (including information communicated in accessible formats).

- 4.21 The document also states that passengers who require a level of personal care which cabin crew cannot provide should be told that they should be accompanied. This includes assistance with the following:
- Breathing (reliance on supplementary oxygen);
  - Feeding;
  - Toileting; and
  - Medicating.
- 4.22 The guidance implies that a passenger should only be required to be accompanied if they are likely to require such assistance during the course of the flight. This is consistent with rule 382, which states that "concern that a passenger with a disability may need personal care services...is not a basis for requiring the passenger to travel with a safety assistant".
- 4.23 The most significant difference between US and EU law relates to the **48 hour advance notification** requirement in the Regulation for passengers requiring assistance. Rule 382 states that requiring pre-notification from PRMs is discriminatory, given that the same requirement is not imposed on other passengers. It does however allow airlines to require 48 hours pre-notification in circumstances where a passenger:
- Requires oxygen on a domestic flight (72 hours notice can be requested on international flights);
  - Is travelling in an incubator;
  - Requires a respirator or oxygen concentrator to be connected to the aircraft power supply;
  - Is travelling in a stretcher;
  - Is travelling in an electric wheelchair on an aircraft with 60 seats or less;
  - Requires hazardous material packaging, e.g. for an electric wheelchair;
  - Is travelling in a group of 10 or more PRMs;
  - Requires an on-board wheelchair on an aircraft with more than 60 seats that does not have an accessible toilet;
  - Intends to travel in the cabin with an emotional support animal;
  - Intends to travel in the cabin with a service animal on a flight of 8 hours or more; or
  - Has both severe vision and hearing impairments.
- 4.24 The Regulation does not define the circumstances under which **medical clearance** can be reflected from a passenger, but rule 382 prohibits airlines from requesting medical certification unless the passenger's condition poses a 'direct threat', which 'means a significant risk to the health or safety of others that cannot be eliminated by a modification of policies, practices, or procedures, or by the provision of auxiliary aids or services'.

*Policy on carriage of PRMs defined in Conditions of Carriage*

4.25 The element of carriers’ Conditions of Carriage relating to PRMs can be classified into the following six categories:

- **Will not refuse carriage on disability grounds** – all PRMs carried without restriction or requirement for pre-booking;
- **Carriage subject to prior arrangement, but will not be refused if not arranged** – the airline would prefer that advance arrangements are made, but PRMs may nevertheless be carried without this;
- **Carriage subject to prior arrangement and will not be refused if arranged** – PRMs are required to make advance arrangements, and will not be refused carriage on the basis of their disability if advance arrangements have been made;
- **Carriage is subject to prior arrangement** – as above, but without the additional clause on non-refusal of carriage to PRMs who have made arrangements;
- **Non-compliant term** – e.g. airline refuses to carry certain PRMs;
- **No reference** – PRMs not discussed in Conditions of Carriage.

4.26 Figure 4.1 shows the general approach adopted in the Conditions of Carriage of the case study airlines. None of the case study Conditions of Carriage were at the extreme ends of the scale, i.e. explicitly non-compliant terms or carriage of all PRMs without any restriction.

**FIGURE 4.1 CONDITIONS ON CARRIAGE OF PRMS**

4.27 Most (13) of the Conditions of Carriage of the sample airlines surveyed state a policy of not refusing carriage to PRMs on the grounds of their special requirements subject to arrangements being made in advance, although boarding may still be denied for other reasons. Alitalia adds an additional disclaimer, which states that the PRMs who have made advance arrangements will be carried, unless this is “...impossible due to objective causes of force majeure”.

- 4.28 The advance booking requirement does not necessarily apply to all PRMs. Air Berlin states that the carriage of medical devices and mobility aids can only be guaranteed with up to 48 hours' notice, and visually impaired passengers with guide dogs are also required to make advance arrangements. No reference is made to PRMs not falling within these categories, however.
- 4.29 Table 4.2 shows the approaches adopted by each of the case study airlines in their Conditions of Carriage. Air Berlin is unusual in that the advance booking requirement appears only to apply to PRMs reliant on mobility aids, medical devices or assistance animals, and it appears that no such requirement exists for other PRMs.

**TABLE 4.2 CONDITIONS OF CARRIAGE OF PRMS**

Airline	State	General approach
Aegean Airlines	Greece	No reference
Air Berlin	Germany	Carriage of mobility aids, medical devices and assistance animals is subject to prior arrangement
Air France	France	Carriage is subject to prior arrangement, will not be refused if arranged
AirBaltic	Latvia	Carriage is subject to prior arrangement, will not be refused if arranged
Alitalia	Italy	Carriage is subject to prior arrangement, will not be refused if arranged
Austrian	Austria	Carriage is subject to prior arrangement
British Airways	UK	Carriage is subject to prior arrangement, will not be refused, and will make best efforts if not arranged
Brussels Airlines	Belgium	Carriage is subject to prior arrangement, will not be refused if arranged Also state that they will make reasonable efforts even if not arranged.
Delta	Non-EU	Carriage is subject to prior arrangement
EasyJet	UK	Carriage is subject to prior arrangement
Emirates	Non-EU	Carriage is subject to prior arrangement
Iberia	Spain	No reference
KLM	Netherlands	Carriage is subject to prior arrangement, will not be refused if arranged
Lufthansa	Germany	Carriage is subject to prior arrangement, will not be refused if arranged
Ryanair	Ireland	Carriage is subject to prior arrangement, will not be refused if arranged
SAS	Sweden	Carriage is subject to prior arrangement, will not be refused if arranged
TAP Portugal	Portugal	Carriage is subject to prior arrangement, will not be refused if arranged
TAROM	Romania	Carriage is subject to prior arrangement, will not be refused if arranged
Thomas Cook	Germany / UK	Carriage is subject to prior arrangement, will not be

Airline	State	General approach
		refused if arranged
TUI (Thomsonfly)	Germany / UK / Netherlands	Carriage is subject to prior arrangement, will not be refused if arranged
Wizzair	Hungary	Carriage is subject to prior arrangement

*Circumstances under which carriage may be refused*

4.30 Although all of the case study airlines impose a range of conditions on PRM bookings, only a proportion state explicitly that carriage may be refused if certain conditions are not met. In some cases, an individual PRM travelling cannot control whether the conditions are met, but some conditions can be satisfied if the PRM follows a defined course of action:

- Conditions which individual PRMs cannot control whether they meet include limits on the number of PRMs which can be carried on a given flight, and restrictions posed by the physical size and configuration of specific aircraft
- Conditions which PRMs can take actions to comply with include advance booking (discussed in the preceding section), travelling with an accompanying passenger or obtaining medical clearance.

4.31 The remaining categories are discussed in turn below.

4.32 Under Article 4 of the Regulation carriage can only be refused on safety grounds, or if boarding is physically impossible due to space constraints, a requirement with which most of the case study airlines are compliant. The only condition we have identified which is potentially non-compliant is the requirement for advance booking cited by Alitalia, Brussels Airlines, Delta, Ryanair and Wizz Air.

*PRM limits and physical constraints*

4.33 Ryanair is the only case study airline to set out numerical limits on carriage of PRMs in its Conditions of Carriage. In addition, Delta's Conditions of Carriage include the vague statement that carriage may be refused to any PRM on the basis of safety.

4.34 Airline PRM web pages provide more information on PRM limits, with several airlines setting out limits:

- Air Berlin;
- AirBaltic;
- Brussels Airlines;
- Lufthansa;
- TAROM (only for PRMs in wheelchairs); and
- Wizz Air.

4.35 Aegean Airlines and TAP Portugal also informed us that they have PRM limits in place, although these are not published. Full details of the PRM limits adopted by each airline are given in Table 4.3. Several of the other case study airlines informed us that they are required to adhere to the limit set out in TGL 44 that the number of PRMs

should not exceed the number of able bodied passengers; this restriction is not included in the table below, although it is possible that some of the unspecified restrictions actually relate to this. Note that other carriers may have unpublished limits which we have not been informed about.

**TABLE 4.3 AIRLINE PRM LIMITS**

Airline	Published limits	Unpublished limits	Applies to
Aegean Airlines	-	Unspecified restriction	All unaccompanied PRMs
AirBaltic	If number of PRMs exceeds number of cabin crew per flight (typically 3-4 on short haul aircraft)	-	All PRMs, only where PRMs form a large proportion of passengers on flight
Air Berlin	Unspecified limit for safety reasons	-	All PRMs
Brussels Airlines	2 when travelling individually, except on A330-300, where limit of 4. When travelling in group limit ranges from 9 (on BAe 146) to 27 (on A330-300), including escorts.	-	WCHS + WCHC + STCR + BLND + DEAF/BLND, in any combination
Lufthansa	Limit on unaccompanied passengers in wheelchairs: 3 on regional flights (>70 seats); 5 on other flights Limit on no. of wheelchairs per flight: 3 on most intercontinental flights, 2 on continental flights and 1 on regional flights. Also unspecified general limit on limited mobility passengers for care and safety reasons.	-	All unaccompanied PRMs
Ryanair	Limit of 4 per aircraft for safety reasons	-	Passengers with reduced mobility, blind/visually impaired or requiring special assistance.
TAP Portugal	-	Stretcher: 2, except Fokker 100 and Embraer 145; WCHC: 4-10 depending on aircraft; WCHS, blind and deaf: 9, except Fokker 100 and Embraer 145; Incubator: 1, except Fokker 100 and Embraer 145.	See left
TAROM	Limit on passengers requiring wheelchair in		

	cabin: 0 on AT42, 2 on B737 and 6 on A318. No limits on other PRMs	
Wizz Air	Limit of 28 disabled or incapacitated or passengers with reduced mobility, including a maximum of 10 who require a wheelchair from check-in to the cabin seat	See left

4.36 Fewer airlines refer to other physical constraints in their Conditions of Carriage, with only AirBaltic and Brussels Airlines indicating that carriage may be refused if the PRM is unable to physically board via the aircraft’s doors.

*Accompanying passengers*

4.37 Article 4(2) of the Regulation allows airlines to require PRMs to be accompanied in order to meet the applicable safety requirements referred to in Article 4(1). As with any numerical PRM limits, requirements for PRMs to be accompanied should be set out in the carriers’ Operations Manuals, which again would require the approval of the licensing authority in the relevant Member State.

4.38 Most airlines publish criteria under which a PRM would have to be accompanied. These are again generally safety related, or relate to the level of assistance cabin crew are able to give. Three common themes emerge:

- The PRM has certain specified conditions, e.g. difficulty walking;
- The PRM requires care which the cabin crew are unable to provide (typically this means that the passenger is not self-reliant); or
- The PRM is unable to evacuate the aircraft without assistance.

4.39 Although many airlines make reference to self-reliance criteria there is a difference between those requiring **all** passengers who are not self-reliant to be accompanied; and those which state that passengers who, for example, require help with eating, should be accompanied. In the latter case a passenger could argue that they will not be eating on the flight, and that this criterion is therefore irrelevant. Six of the sample airlines state that all passengers who are not self-reliant must be accompanied, and this is not limited to cases where there is a safety implication. In our view, these airlines may be infringing the Regulation as well as (if they fly to the US) rule 382.

*Medical clearance*

4.40 The majority of the case study airlines required medical clearance for certain types of PRM, either confirming fitness to travel, or stating a need to carry medical equipment such as syringes or oxygen, although again it is generally not explicitly stated that boarding will be refused if clearance is not obtained. In most cases, the PRM is required to ask their doctor to fill in a medical clearance form, which is then forwarded to the airline’s medical department for approval.

4.41 Given the importance of not confusing disability with illness, it might be expected that

the proportion of passengers required to seek clearance before travelling would be minimised. This is the case for most of the case study airlines. Although the types of PRM required to obtain clearance varies, this normally includes those requiring oxygen or stretchers and is not overly restrictive. However, six airlines adopt slightly different policies:

- Lufthansa states that ‘In the case of a physical or psychological limitation, you must obtain an assessment of your fitness for air travel from a Lufthansa doctor in advance’, although it is stated elsewhere that this does not apply to blind people. Nevertheless, this requirement could potentially encompass many types of PRM, and the requirement to see a Lufthansa doctor is likely to be particularly onerous.
- The policy adopted by Wizz Air, although vague, also has the potential to be quite onerous. The airline reserves the right to require medical clearance in all cases, and will refuse the reservation if this is not obtained.
- Austrian, Iberia (both on the PRM web pages) and Wizzair (in the airline’s Conditions of Carriage) all state explicitly that boarding may be refused to passengers on medical grounds if clearance has not been arranged in advance.
- Thomas Cook takes an unusually vague approach in stating that ‘Some medical conditions require a fitness to fly certificate’. Passengers who consider themselves to have a condition that will require the authorisation of their doctor are advised to obtain their approval before flying. A telephone number is however provided, where presumably clarification of the conditions requiring medical authorisation can be obtained.

4.42 Policies on denial of boarding, accompanying passengers and medical clearance are summarised in Appendix A. This information is mostly derived from the PRM web pages provided by the airlines, unless explicit reference is made to the conditions of carriage. Any unpublished information provided to us directly by the airline is shown in italics.

*Actions to be taken when carriage refused*

4.43 Article 4(1) requires that, where a PRM is refused boarding, the airline is required to offer reimbursement or rerouting in line with Regulation 261/2004. Although none of the case study airlines make any references to this in either their PRM web pages or Conditions of Carriage, almost all of the airlines we interviewed confirmed that passengers who have been refused boarding would be offered a refund, rerouting or cost-free cancellation, depending on the circumstances. However, some carriers indicated that this situation would be rare, as refusal would most commonly occur at the booking stage.

4.44 Where boarding is refused, airlines are required under Article 4(4) of the Regulation to immediately inform the PRM of the reasons for the refusal and, on request, should communicate the reasons to the PRM in writing within five working days. Alitalia and Ryanair are the only airlines to refer to this in their Conditions or policies, Alitalia stating in its Conditions of Carriage that in the event of refusal of carriage the passenger may request additional information, and Ryanair stating on its PRM webpage that ‘If we are unable to carry a disabled/reduced mobility passenger, we will inform the person concerned of the reasons for refusal of carriage’.

4.45 However, although only two of the case study airlines provide details of the actions

they will take when carriage is refused, again most indicated in their interviews with us that they will provide either written or verbal explanations to passengers who have been refused boarding.

### **Services provided to PRMs**

#### *Requirements defined in law or other guidance*

4.46 Annex II of the Regulation requires that airlines provide the following assistance to pre-notified PRMs without additional charge:

- Carriage of recognised assistance dogs in the cabin, subject to national regulations.
- In addition to medical equipment, transport of up to two pieces of mobility equipment per disabled person or person with reduced mobility, including electric wheelchairs (subject to advance warning of 48 hours and to possible limitations of space on board the aircraft, and subject to the application of relevant legislation concerning dangerous goods.
- Communication of essential information concerning a flight in accessible formats.
- The making of all reasonable efforts to arrange seating to meet the needs of individuals with disability or reduced mobility on request and subject to safety requirements and availability.
- Assistance in moving to toilet facilities if required.
- Where a disabled person or person with reduced mobility is assisted by an accompanying person, the air carrier will make all reasonable efforts to give such person a seat next to the disabled person or person with reduced mobility.

4.47 This guidance is reflected in ECAC Document 30 and the UK DfT Code of Practice. The Code of Practice also suggests the following:

- Cabin crew should provide reasonable assistance with the stowage and retrieval of any hand baggage and/or mobility aid whilst in flight.
- Cabin crew should familiarise disabled passengers with any facilities on board designed particularly for disabled passengers. In the case of visually impaired people they should additionally offer more general familiarisation information and such other explanations as may be requested, such as about on-board shopping.
- Other printed material, such as dinner menus, should, where reasonably practicable, be accessible to blind and partially sighted people. Alternatively, cabin crew should explain the material.
- Where video, or similar systems, are used to communicate safety or emergency information, sub-titles should be included to supplement any audio commentary.
- Where possible, films and other programmes should be subtitled for deaf and hard of hearing passengers.
- In selecting catering supplies, air carriers should consider how “user-friendly” the packaging is for disabled people.
- Cabin crew should describe the food, including its location on the tray, to blind and partially sighted passengers.
- During the flight, cabin crew should check periodically to see if PRMs need any

assistance. In the case of those requiring the use of the on-board wheelchair (where one is installed), the staff must be trained in how to assist the passenger to and from the toilet by pushing the on-board wheelchair.

- Passengers' own portable oxygen concentrators should normally be allowed if battery powered, though air carriers will need to check the type of device to ensure it does not pose any technical problems.

4.48 The assistance provided by the case study airlines generally reflects this guidance, although not all provide comprehensive information on the service they provide to PRMs, particularly in terms of general assistance on-board the aircraft.

4.49 Again, there are some conflicts between Regulation 1107/2006 and the US guidance defined in rule 382, which would apply to some flights operated by EU carriers including all flights to/from the US. In particular, the US regulations do not define an upper limit on the number of items of mobility equipment that should be carried. Some additional requirements established by rule 382 include:

- Assistance in moving to and from seats;
- Assistance in preparation for eating;
- All new videos, DVDs, and other audiovisual displays played on aircraft for safety purposes should be high-contrast captioned;
- Passengers should be able to use moveable armrests seats where their condition requires it;
- Seats with additional legroom should be provided for passengers with fused or immobilised legs;
- PRMs should be permitted to use ventilator, respirator, continuous positive airway pressure machine, or portable oxygen concentrator (POC) of a kind equivalent to an FAA-approved POC on all aircraft originally designed to have a maximum passenger capacity of more than 19 seats, unless the equipment does not meet safety requirements or cannot be used or stowed safely in the cabin.

#### *Assistance animals*

4.50 Of all the case study airlines which refer to guide dogs, almost all accept them in the cabin free of charge, as required by Annex II of the Regulation, although carriage is also limited by national regulations regarding the transport of animals. However, we identified the following issues with the carriers' published policies:

- Alitalia – assistance dogs are only allowed in the cabin if space is available;
- Emirates – assistance animals can only be carried in the hold;
- TAP Portugal / Thomas Cook / Wizz Air – insufficient information regarding charging and carriage in cabin;
- TUI – assistance dogs carried for a nominal charge. It is not stated whether animals can be carried in the cabin; and
- Air France / EasyJet – not stated whether carriage is free of charge.

4.51 There is some variation in terms of the conditions applied to the carriage of guide dogs; some airlines require a carrying case, muzzle or harness, for example; Austrian,

EasyJet and TAP Portugal require certification of service animal status; and carriage in exit rows is often prohibited. Several airlines state limits on the number of guide dogs that can be carried on a given flight – AirBaltic, British Airways and Ryanair. Other airlines may enforce similar unpublished limits. Full details of airline policies are provided in Appendix B.

- 4.52 In most cases, the information provided by carriers on which routes service dogs can be carried on is quite vague. Two exceptions are British Airways and Iberia, which include detailed information and links to external websites; in the case of British Airways this is the UK DEFRA (Department for Environment, Food and Rural Affairs) guidance on the Pet Travel Scheme which governs the carriage of assistance animals on flights within and to/from the UK. This includes detailed guidance on travel preparation and a full list of approved routes. The guidance provided by Brussels Airlines is also reasonably detailed, and both Austrian and Thomas Cook provide links to EU and UK regulations respectively, but without detailed supporting explanations.

#### *Mobility equipment*

- 4.53 All the airlines reviewed accept wheelchairs, and in most cases airlines state that there is no charge for this. Three airlines allow at least certain types of personal wheelchair in the cabin, with carriage restricted to the hold or not stated in the remainder of cases. Spillable wet-cell batteries are not accepted by some airlines and where they are accepted this is usually subject to preparation. Where specified, most airlines policies on the carriage of wheelchairs are consistent with the upper limit of two items of mobility equipment per passenger specified in Annex II of the Regulation. Air Berlin is the only one of the case study airlines to define a limit below this.
- 4.54 Dangerous goods legislation is cited by many airlines as posing a limitation on the range of battery operated wheelchairs which may be carried. However, few airlines provide specific details of the laws and regulations which apply. Austrian does provide references to both Regulation (EC) No 820/2008 and the IATA Dangerous Goods Regulations, the latter accessible via an external link; and Delta provides a link to the US Department of Transportation's Safe Travel information, which provides information to passengers on the carriage of batteries. The Thomas Cook and TUI websites include a reference to the IATA Dangerous Goods Regulations, but without external links. It is worth noting that, although only a fraction of the case study airlines provide this level of detail on their PRM web pages, many may provide such information in their luggage regulations or elsewhere in the Conditions of Carriage.
- 4.55 Under Article 12 airlines are required to compensate for losses or damage to mobility equipment, up to the limits specified by national and international law, which effectively means the limits defined in the Montreal Convention. This limits any compensation to 1131 SDR (approximately €1260), which would be inadequate for technologically advanced wheelchairs which can cost up to €20,000. However, several airlines have indicated that these limits would be waived in practice, partly to avoid bad publicity associated with provision of insufficient compensation, and also because it is generally agreed that such events are rare. Air France, Iberia, KLM, TAROM, Thomas Cook and TUI informed us that they compensate passengers for the full value of the equipment; with TUI also indicating that all UK airlines have agreed to waive

the Montreal limits. In contrast, one PRM organisation informed us that it was aware of cases where airlines had not waived the limits.

- 4.56 Almost all stakeholders stated that the Regulation had made no impact on loss or damage to mobility equipment, both in terms of the number of incidents and levels of compensation for loss or damage; although some felt that the training requirements imposed by the Regulation has resulted in improved handling procedures.

#### *Medical equipment*

- 4.57 Oxygen is available on most of the case study airlines, and can either be provided by the airline or the passenger. Where stated, charges range from €100 (Ryanair / Thomas Cook) to €335 (SAS intercontinental flights). Wizzair is the only exception: the airline accepts passengers who need oxygen with medical certification, but does not provide additional oxygen or allow passengers to bring their own onboard. Such restrictions appear to equate to a complete ban on PRMs requiring oxygen.
- 4.58 Policies on the carriage of stretchers (where stated) tend to be based on aeroplane size, with several operators not accepting stretchers on the smaller planes in their fleet. Most low cost carriers including easyJet, Ryanair, Thomas Cook and Wizzair prohibit carriage of stretchers entirely.

#### *Accessible information*

- 4.59 Only 6 airlines specify the types of accessible information provided for PRMs. This tends to be safety-related, although may also include Braille seat numbers and verbally describing food-related information.

#### *Seating*

- 4.60 Austrian, British Airways, Delta and KLM are the only case study airlines to state on their web pages that PRMs can be allocated any seat most appropriate to their needs, subject to safety regulations restricting access to exit row seats. Where most other airlines discuss their PRM seating policy this is usually in terms of restrictions, again the most frequent being not allowing PRMs to be seated in exit rows. Many airlines provide seats with retractable armrests, although normally only a proportion of the seats on an aircraft are provided with this feature (KLM is the only airline to state that all seats have moveable armrests). British Airways state that passengers will be allocated a bulkhead seat when requested, provided that this is not already allocated to another PRM. Similarly, Delta and Lufthansa also state that customers with service animals (or immobilised legs in the case of Delta) are entitled to bulkhead seats. Again, only a proportion of the airlines (14 out of 21) provide any of this kind of information, so it is unclear what the other case study airlines offer. The results of our analysis are shown in Appendix Table A.2.
- 4.61 Ryanair requires PRMs to sit in window seats, so that they do not impede the evacuation of other passengers, although this could result in a difficult or uncomfortable transfer to and from the seat for some passengers. Other airlines may adopt similar policies which we were not informed about. Iberia informed us that, although they recommend that PRMs are accommodated in window seats, through

their online booking systems PRMs are able to choose any seat, with the exception of emergency exit rows.

- 4.62 Several airlines prohibit PRMs from being seated in exit rows ‘for safety reasons’, but generally do not make a specific reference to the legal basis for this, which in most cases would be EU-OPS1. Air Berlin, Delta and Ryanair are the only airlines to provide details of the regulations on which this prohibition is based – in the case of Delta this is the Exit Seat Regulation, 14 CFR 121.585; and for Air Berlin and Ryanair EU/JAR-OPS 1.260. Thomas Cook and TUI make more vague references to UK CAA regulations as a justification for their seating restrictions.

*Restrictions on service*

- 4.63 12 of the case study airlines provide an indication of the level of assistance in-flight provided to PRMs, although mostly in terms of the assistance staff are unable to provide. This generally includes feeding, lifting passengers, administering medication and assisting in personal hygiene or toilet functions. The level of assistance which is provided is generally limited to preparation for eating, assistance in moving around the aircraft and stowing and retrieving luggage.

**Pre-notification of requirements**

*Requirements defined in law or other guidance*

- 4.64 Article 6(1) of the Regulation requires that airlines take all measures necessary to ensure that they are able to receive PRM assistance requests via all normal points of sale. Articles 6(2) and 6(3) state that, where this information is received more than 48 hours before departure it should be transmitted to the relevant airports no later than 36 hours before the flight departs. Requests received after 48 hours should be communicated at the earliest opportunity. Article 6(4) requires that, after departure of a flight, airlines inform the destination airport (if within the EU) of the number of disabled persons and persons with reduced mobility on that flight requiring assistance, and the nature of the assistance required.

*Methods by which passengers can pre-notify*

- 4.65 In addition to the requirements of Article 6(1), the Recitals of the Regulation state that all essential information provided to air passengers should be provided “in at least the same languages as the information made available to other passengers”. Several airlines do not meet this standard, although the Recitals are in themselves not binding.
- 4.66 Many of the major airlines provide offices and contact telephone numbers in a number of countries where the official language may not be one of the languages in which the airline website is offered. In most cases it is not possible to assess the languages offered by staff in these offices, and if the website is not offered in this language passengers may in any case have difficulty finding the contact for their country. For these reasons the language category is based on the website languages offered rather than the geographical spread of airline offices.
- 4.67 Some NEBs highlighted the use of premium rate special assistance telephone numbers as being an issue. Our research indicates that many carriers use phone numbers that do

---

charge, although rates are usually moderate, with the following exceptions:

- Some carriers, for example AirBaltic, provide international numbers only.
- Ryanair provides national phone numbers in most Member States but the rates in some States are high – for example, €0.50 per minute in Belgium
- Brussels Airlines provides (for calls from the UK) either a Belgian telephone number, or the UK reservations centre which charges £0.40 (€0.44) per minute, although this number centre deals with all reservations, and not just PRM assistance requests.
- SAS provides (for calls from the UK) a UK reservations number, which charges £0.25 (€0.28) per minute, although again this is not PRM-specific.

4.68 Each of these airlines accept notifications online, so passengers could theoretically avoid payment of these charges. However, we are not able to comment on the accessibility of these systems or whether they enable collection of all of the information that would be required in each case – some passengers may still need to use the telephone numbers for these reasons.

4.69 The notification options available to PRMs for the 21 case study airlines are shown in Table 4.4. It should be noted that options presented during the booking process could only be examined up to the point of payment for tickets. Some airlines may provide a notification option after payment has been made, which we would not have identified.

TABLE 4.4 OPTIONS TO NOTIFY CARRIERS OF REQUIREMENTS

Airline	Options provided	Differences between languages of PRM info and main website	Languages for phone calls
Aegean Airlines	Telephone	None	Not stated
Air Berlin	Telephone	None	Not stated
Air France	During online booking process Email / website Telephone	Main site in 15 languages PRM info in 10 languages	Not stated
AirBaltic	Telephone	None	Not stated
Alitalia	Telephone	Main site in 8 languages PRM info in 6 languages	Not stated
Austrian	Email / website Fax	Main site in 22 languages PRM info in 2 languages	Not applicable
British Airways	During online booking process Email / website Telephone	None	Not stated
Brussels Airlines	Email / website Telephone	None	Not stated
Delta	Telephone	None	Not stated
EasyJet	During online booking process Email / website Telephone	None	Telephone numbers only accessible after logging into personal account
Emirates	Email / website Telephone	None	Not stated
Iberia	During online booking process	None	Not applicable
KLM	Email / website Telephone	Main site in 15 languages PRM info in 9 languages	Not stated
Lufthansa	Email / website Telephone	None	Not stated
Ryanair	During online booking process Telephone	None	English French Italian Spanish
SAS	During online booking process Email / website Telephone	Main site in 15 languages PRM info in 12 languages	Not stated
TAP Portugal	Telephone	Main site in 9 languages PRM info in 7 languages	Not stated

Airline	Options provided	Differences between languages of PRM info and main website	Languages for phone calls
TAROM	During online booking process	None	Not applicable
Thomas Cook	During online booking process Telephone	None	Not stated
TUI (Thomsonfly)	Telephone	None	Not stated
Wizzair	During online booking process Telephone	None	Bulgarian Czech English French German Hungarian Italian Polish Romanian Ukrainian

*Process for collection and transmission of requests*

- 4.70 Although many case study airlines enable PRMs to make special assistance requests online, this often has to be supplemented by a telephone call to the airline to establish the PRM's exact requirements. Air France informed us that, when notifying online, a 'pop up' window will appear which informs the passenger that they will be contacted by the airline to clarify the assistance required. Similarly, KLM stated that, although they do provide an online notification option, the passenger would still need to call the airline to establish their exact requirements.
- 4.71 The standard procedure for transmitting assistance requests to the relevant airports is the PAL (Passenger Assistance List), which under Article 6(2) should be sent 36 hours before departure. Additional requests received after this time can be included in the CAL (Change Assistance List) in line with the requirements of Article 6(3). Most requests are transmitted using the standard special assistance codes IATA codes, although some airlines their own codes.
- 4.72 This information is supported by Passenger Service Messages (PSM) which are automatically generated by all special assistance requests recorded on the Passenger Name List of a given flight (thus complying with Article 6(4) of the Regulation). PSM messages are generated automatically on departure from the origin airport, so can be particularly useful for airports in relation to long haul flights, where there is sufficient time to mobilise staff and equipment before the aircraft arrives. Conversely, PRM messages are of less use in relation to short haul flights, as staffing arrangements cannot be so easily amended at short notice.

*Effectiveness of process*

- 4.73 All of the case study airlines interviewed use the standard PAL / CAL / PSM system, although Ryanair informed us that they also have their own system of codes and notifications (discussed in section 3 above).
- 4.74 Rates of pre-notification vary substantially, as shown in Figure 4.2. It should be noted that the definition of pre-booked assistance may vary between airports – for example Brussels Charleroi airport informed us that its figures for pre-notification includes notification by PSM message, which would not be received prior to the 36 hours specified by the Regulation. A number of other airports did not clarify their definition of pre-notification, including Bucharest and Budapest, which may explain why the percentages here are particularly high.

**FIGURE 4.2 PRE-NOTIFICATION RATES BY AIRPORT**

- 4.75 There a number of possible explanations for both the wide divergence of pre-notification rates, and the particularly low values observed at some airports. These include:
- **Passenger factors**, e.g. not being aware of the pre-notification requirement, abuse of the system or not realising that they would need assistance until arriving at the airport;
  - **Airline factors**, e.g. not providing sufficient or appropriate means for passengers to pre-notify of their requirements, or failing to transmit assistance requests to airports within the time limits specified in the Regulation;
  - **Other factors** – primarily communication and other technological failures.
- 4.76 Stakeholder views on the possible explanations for pre-notification issues are explored in the relevant section below.

## Complaints to airlines

### *Airline processes for handling complaints*

- 4.77 Most of the case study airlines have dedicated complaint forms and departments for the handling of complaints. Complaints regarding the Regulation do not necessarily require specialised procedures – both easyJet and Ryanair stated that their process for handling complaints was the same as for Regulation 261/2004, and KLM reported that PRM complaints were handled in the same way as all others. The only differences cited by the airlines were that, in the case of easyJet, complaints regarding refusal of boarding were escalated to head office; and KLM informed us that the airline’s medical department may need to be involved in more complex cases. Ryanair also informed us that they will amend standard procedures for receipt of complaints where required, for example if a customer needs to complain by phone rather than in writing. KLM stated that to date they have only received complaints by phone, email or letter; and none in Braille / audio tape or other accessible formats.
- 4.78 Delta reported a more complex procedure, shaped primarily by the requirements of rule 382. The airline is required to designate Complaints Resolution Officials, responsible for providing a ‘dispositive response’ to customer complaints of an alleged violation, summarising the facts and explaining the airline’s determination of the issue. If the complaint relates to the airline’s policy and not a specific infringement the airline is still responsible for providing a full and final response and the reasons for its determination.
- 4.79 The stated time taken by airlines to respond to complaints is variable, and is not related to the airline type or business model.
- 4.80 Air France, SAS, TAP Portugal reported that they would (at least in theory) be able to accept complaints in any of the languages of the countries which they serve and/or have offices. Aegean Airlines, Ryanair and TAROM reported a more restricted range – despite its destinations including Albania, Egypt, Israel, Serbia, Spain and Turkey, Aegean Airlines stated that it can only accept complaints in Greek, English, German, French and Italian. Likewise, despite both Ryanair and TAROM operating services to 25 countries, the range of languages in which they will accept complaints is limited. Ryanair is only able to accept complaints in English, German, French, Spanish and Italian; and TAROM will only process complaints in Romanian, English, French, German, Spanish and Italian. Thomas Cook stated that, to date, they have only received complaints in English, although they do have a retainer with a language translation service which can be used if required.

### *Number of complaints received*

- 4.81 Only TAROM and Thomas Cook were able to provide us with PRM complaint statistics. TAROM reported so far receiving no complaints from PRMs; Thomas Cook received 51 complaints in each of 2008 and 2009.

## Cost of complying with the Regulation

- 4.82 The main compliance cost identified by airlines was the airport PRM charge. As discussed in section 3 above, several airlines (mostly low cost and charter carriers)

expressed dissatisfaction with the level of these charges; in contrast, Air France stated that it did not consider the PRM charge to be a real cost, as it was passed directly to passengers. Another legacy carrier stated that the Regulation did not generate any additional costs for it, as it was already compliant with the (generally more onerous) requirements of rule 382.

- 4.83 An issue raised by Air Berlin and TUI related to the additional costs likely to be associated with providing a cost-neutral special assistance telephone number. The German NEB considers that the special assistance helpline should be free, and the UK DfT Code of Practice also suggests that cost-neutral telephone numbers should be provided for PRMs, which TUI accommodates by requesting that the special assistance helpline calls the passenger back. However, the costs associated with telephone assistance calls are likely to be relatively small, particularly in relation to the staffing costs associated with providing a call centre.
- 4.84 TUI also highlighted the initial training costs incurred by the Regulation, which have now diminished as the focus shifts to more limited refresher training where required.

### **Training**

- 4.85 Under Article 11 airlines are required to:
- Ensure that all staff (including those employed by sub-contractors) providing direct assistance to PRMs, have knowledge of how to meet the needs of these persons;
  - Provide disability-equality and disability-awareness training to all staff working at airports dealing directly with the travelling public;
  - Ensure that, upon recruitment, all new employees attend disability-related training and that personnel receive refresher training courses when appropriate.
- 4.86 Most of the case study airlines were able to demonstrate compliance with the training criteria set out in Article 11, although the carriers informed us that training was restricted to passenger-facing staff only. Some examples of the training provided to airline staff are given below.
- Major European network carrier: 2.5 hours theory (e.g. responsibilities under the Regulation, how to approach PRMs) and practical (e.g. guiding blind PRMs, lifting to and from wheelchairs) training for crew; 1.5 hours theory for all other passenger-facing personnel.
  - US network carrier: annual recurrent training is provided to all Complaint Resolution Officers (CROs); required under 14 CFR Part 382 to ensure effective implementation and to resolve passengers' problems as quickly as possible).
  - European low cost carrier: initial and refresher cabin crew training includes PRM training, and the airline has requested that this training should be a requirement in contracts with ground handling staff.
  - European low cost carrier: basic training in sign language is included.
- 4.87 Airlines operating to the US and therefore already compliant with rule 382 stated that few if any changes to their existing training programmes were required to comply with the Regulation.

**Stakeholder views on effectiveness of implementation by airlines**

4.88 Figure 4.3 summarises stakeholder views on the effectiveness of the implementation of the Regulation by airlines. Although many stakeholders did not express an opinion on this, relatively few stakeholders were dissatisfied. A summary of views of each stakeholder group is given below.

**FIGURE 4.3 STAKEHOLDER VIEWS: AIRLINES**

*Airlines and airline associations*

4.89 Unsurprisingly, the majority of airlines did not express an opinion on their own effectiveness in implementing the Regulation, and none felt that implementation was ineffective. Similarly, airline associations either expressed no opinion, or stated that implementation by their members was effective. ELFAA felt that all its members were complying and not refusing carriage. AEA was also generally satisfied that its members were not discriminating against PRMs in any way, but did suggest that there may be issues around the interpretation of the safety rules governing embarkation by PRMs, leading to inconsistencies between its members.

*Airports*

4.90 Pre-notification was the most frequently cited issue raised by the airports, an issue discussed separately below. The second most common theme emerging across several airports was the alleged non-payment of PRM charges by airlines.

4.91 Alongside the non-payment issue ACI highlighted several other issues relating to agreement of the PRM charges at airports. These included trying to avoid or reduce the charge, for example by requiring excessive levels of detail on the costs of PRM assistance at airports after the tender process had been completed, and refusing to cooperate with consultation meetings. Two airports with high proportions of low cost carrier traffic informed us that some carriers sought to specify the lowest possible levels of service in order to minimise PRM charges.

*NEBs*

4.92 The majority of NEBs informed us that compliance by airlines was satisfactory.

Although some issues were raised no common themes emerged, suggesting that any issues may be somewhat isolated. The NEBs which stated that implementation by airlines was partially effective were:

- France (DGAC): lack of information, and limited consistency in policies between airlines.
- Germany (BMBVS): use of premium rate telephone numbers by airlines.
- Portugal (INAC): some issues with the explanations provided for refusal of carriage.
- Spain (AESA): notification can incur additional costs for the passenger, airline safety rules are sometimes insufficient, and some airlines claim that passengers with mobility equipment are taking two seats, and charge for this.
- Sweden (CAA): issues around pre-notification (see section below).
- UK (CAA / EHRC / CCNI): lack of consistency in criteria for refusal of carriage. Some airlines charge for reserving specific seats.

*PRM organisations*

- 4.93 Satisfaction with implementation by airlines was generally lower among the PRM organisations, although none of the stakeholders informed us that airlines were significantly non-compliant with the Regulation. Inconsistencies in airline policies, accessibility of websites and the level of information provided by airlines emerged as the most frequently cited issues – *Danske Handicaporganisationer* (DH) suggested that less than 5% of airlines’ websites were accessible. Two organisations also indicated that they had not seen any PRM safety rules published online.
- 4.94 Two organisations highlighted issues with medical clearance – this was felt to be requested too frequently, and that an unnecessary level of information was being requested by some airlines. Other issues raised included insufficient training, issues with handling of mobility equipment, seating, and inaccessibility of airport check-in systems. Guide Dogs reported instances where flight crew had not reported allergies which then prevented a passengers with guide dogs from flying, or had not checked that the dog was secure prior to take-off or landing. It was felt that policies of refusing boarding to unaccompanied blind passengers on the basis that they could not evacuate was misguided, given that they were accustomed to not being able to see and could therefore cope more easily in smoky conditions.

- 4.95 These views were echoed by the European Blind Union (EBU) and the European Disability Forum (EDF). In addition, EBU emphasised continuing difference in the handling of PRM travel between carriers, and felt that booking processes were discriminatory against those without access to a computer (we were informed that requesting assistance by phone can take several hours). The UK PRM organisation informed us that only 30% of the disabled population are online, which would increase this discrimination. EDF also noted that some airlines still only paid up to the Montreal Convention limits in cases of damage or loss of mobility equipment; that insurance for mobility equipment was extremely difficult to obtain; and that establishing liability for damage can be very complex. EDF also believe that the enforcement of numerical limits on PRMs is inappropriate and discriminatory, and that it is unacceptable for carriers to require passengers to be accompanied on self-reliance criteria.
- 4.96 EDF provided us with some examples of discrimination which had been reported to them. Some examples relating to treatment on-board the aircraft include:
- A blind passenger was not given any safety information in an accessible way, and the cabin crew were unaware of how to assist the passenger when serving a meal, or to communicate with the passenger more generally.
  - A passenger was not allowed to check-in online, due to him using a wheelchair. Once on the aircraft he was forced to sit in a window seat at the back of the plane, which he found both discriminatory and difficult, as being tetraplegic meant that it was not easy to access the seat, or to receive assistance in an emergency.
  - A passenger was informed that he had to pay extra to bring his prosthetic legs when going on holiday.
  - A wheelchair user tried to book a ticket with an airline but noticed on their website that it was clearly indicated that they do not accept passengers using wheelchairs.
  - A blind couple travelling with their baby were told that in order to be allowed to travel, they needed to bring an accompanying person, as it was not considered safe that the couple were responsible for their baby on board.
  - A blind passenger was asked by a member of cabin crew in a rude manner whether she really was entirely blind.

#### *Other organisations*

- 4.97 Key issues raised by other organisations were the application by some carriers of limits on the numbers of PRMs that could be carried, and that these limits could be further reduced based solely on arbitrary decisions by pilots. In addition, ECAC felt that information should be simplified for passengers with learning disabilities. However, ECTAA highlighted the improvements which airlines, tour operators and travel agents had made to their websites and booking procedures to enhance PRM travel.

**Stakeholder views on effectiveness of pre-notification systems**

4.98 Figure 4.4 shows stakeholder views on the effectiveness of the pre-notification system and reasons cited for low rates of notification. Most stakeholders believed that this system was not functioning well, although the explanations cited by each stakeholder group vary.

**FIGURE 4.4 STAKEHOLDER VIEWS: PRE-NOTIFICATION**

4.99 The NEBs were generally the most optimistic about how the pre-notification system was working, with fewer than half identifying problems. Where they did express a view on the cause of pre-notification issues it was most commonly that the passenger was the cause. The Irish NEB suggested that awareness of the Regulation and the need to pre-notify to receive assistance was low amongst PRMs who were not members of representative groups. Most of the PRM groups felt that the airlines were the primary cause of problems with the pre-notification system, for a variety of reasons:

- Poor design and accessibility of airline websites makes it difficult for passengers to pre-notify;
- Airlines have been unwilling to make the significant investments required to ensure an effective system; and
- Airlines have been ineffective at transmitting special requests (e.g. dietary needs) between staff and departments.

4.100 The majority of airlines believed that the main issue in terms of pre-notification was that passengers were themselves failing to notify of their assistance needs. Several airlines and airports suggested a possible explanation as being that, although they may not normally consider themselves as being in need of special assistance, some travellers (especially infrequent flyers and the elderly) may find they need this once in the airport and having to walk long distances to reach their flight. Low rates of pre-notification were also attributed partly to abuse of the system, as it was believed that ‘genuine’ PRMs would usually pre-notify.

4.101 However, the majority of airports stated that the most significant problem was failure by airlines to pass on notifications, or erroneous notifications. Several highlighted the large differences in pre-notification rates between airlines: some airlines are able to achieve high rates of pre-notification (60-80%) whereas others have very low rates

(10% or less). Non-EU airlines were often stated to be worse, with flights from North Africa and India often cited as being particularly problematic, both in terms of the low levels of pre-notification and the high numbers of PRMs on these flights. Aéroports de Paris stated that passengers travelling from some north African airports would be charged for assistance if pre-notifying, even though the European airport provided assistance free of charge. US flights also pose difficulties for airports as US carriers are generally not allowed, under rule 382, to request details of assistance requirements in advance; however, the relative length of these flights means that PSM messages are usually received 7-10 hours in advance of arrival.

- 4.102 Several airports also indicated that charter carriers had particularly low rates of pre-notification. This was attributed by some carriers to low rates of notification by travel agents – in many cases agents may have an incomplete knowledge of the full range of wheelchair codes, often simply observing that the passenger is using a wheelchair and then allocating the WCHR special assistance code.
- 4.103 Communication failures were also cited by a number of stakeholders, sometimes a result of the confusion generated by the IATA special assistance codes themselves, particularly unnecessary requests for wheelchairs. Although technological failures may have been a problem when the Regulation was first implemented, these did not emerge as a significant current issue.

### Conclusions

- 4.104 The main obligation that the Regulation places on carriers is that it prohibits refusal of carriage of PRMs, unless this is necessary to meet national or international safety rules or requirements imposed by the carrier's licensing authority, or is physically impossible due to the size of the aircraft or its doors. We found that most carriers comply with this, although some make carriage of PRMs conditional on advance notification, which does not appear to be consistent with the Regulation. In addition, a small number of carriers impose requirements for medical clearance which appear to be excessively onerous.
- 4.105 There are significant differences in policies relating to carriage of PRMs between carriers – even between carriers with similar aircraft types and operational models. The most significant difference is that some carriers impose a numerical limit on the number of PRMs that can be carried on a given aircraft. These can be quite low: some carriers have limits of 2-4 PRMs on a standard single-aisle aircraft such as an Airbus 319. In most cases, these requirements are defined in carriers' Flight Operations Manuals, which have to be approved by the relevant licensing authority; often, although not always, this is the same organisation that has been designated as the NEB. In some cases the PRM limits are required by the licensing authority, but in most cases, they are proposed by the carrier and approved by the authority. Whilst the rationale for these limits is safety, there does not seem to be an evidence base for them, and they are specifically prohibited by the equivalent US regulation on carriage of PRMs (14 CFR part 382).

- 4.106 The Regulation also allows carriers to require that PRMs be accompanied, subject to the same safety-based criteria. We found that a number of carriers require PRMs to be accompanied where they are not ‘self-reliant’, which can mean that the PRM cannot (for example) eat unaided. In our view this may be an infringement of the Regulation because there is no direct link to safety; for those carriers that fly to the US, it is also an explicit breach of the US PRM rules. Other carriers require PRMs to be accompanied where they are not self-reliant **and** this has a safety impact (for example, if the PRM could not exit the aircraft unaided in an emergency); this is consistent with the Regulation.
- 4.107 The Regulation also requires carriers to publish safety rules relating to the carriage of PRMs, although it does not specifically state what issues these safety rules should cover. We found that carriers all published some PRM-related information but in some cases there appeared to be significant omissions from this information.
- 4.108 Annex II of the Regulation sets out various requirements for services which have to be provided to PRMs by carriers. Evidence for the extent to which this is provided is limited, and restricts a fair assessment of compliance with these requirements. There is however sufficient evidence to conclude that the vast majority of case study airlines are complying with the requirement to carry up to two items of mobility equipment free of charge. Some PRM representative groups were critical of the effectiveness of airlines in implementing the Regulation, and we were informed of some particularly bad passenger experiences, but it is difficult to assess how common such occurrences are.

## 5. ENFORCEMENT AND COMPLAINT HANDLING BY NEBS

### Introduction

5.1 This section summarises the complaint handling and enforcement process undertaken by National Enforcement Bodies (NEBs). We set out the following information:

- an overview of the NEBs, describing the types of organisations they are and the resources they have available;
- the legal basis for complaint handling and enforcement in each State;
- statistics for the number of complaints received, the nature of the complaints, and the outcomes, and for sanctions that have been issued;
- the typical process for complaint handling and enforcement in each State, and outline a number of common issues and difficulties;
- a summary of the activities of NEBs to monitor the implementation of the Regulation; and
- an overview of other activities undertaken by NEBs in relation to the Regulation, such as interactions with other stakeholders and promotional activity.

5.2 Most of the information within this section is provided for the NEBs in all Member States. The detailed information relating to the complaint handling and enforcement process, and to monitoring and other activities undertaken by the NEB, has been collected for the case study States only. Further detail on complaint handling and enforcement in the 16 case study States is provided in the case studies, in Appendix C.

### Requirements of the Regulation relating to States and NEBs

5.3 The Regulation requires each Member State to designate a National Enforcement Body (NEB) responsible for the enforcement of the Regulation regarding flights departing from or arriving at airports within its territory, and to inform the Commission of this designation. This body is required to ensure that the rights of PRMs are respected, and in particular that the quality standards defined by Article 9(1) (see 3.53) are respected. It must also ensure that the provisions of Article 8 are respected. More than one body may be designated. To allow NEBs to enforce the Regulation, Member States must set out penalties for infringements of the Regulation, which must be effective, proportionate and dissuasive.

5.4 These bodies must also accept complaints from PRMs where they are dissatisfied with the service they have received under the Regulation and have been unable to obtain satisfaction by complaining directly to the service provider. If a body receives a complaint for which a body in another State is competent, it must forward the complaint to the other NEB. Other bodies may be designated specifically for the purpose of receiving complaints.

5.5 Member States should also inform PRMs about their rights under the Regulation, and the possibility of complaint to the bodies above.

## Overview of the NEBs

5.6 Most of the NEBs (68%) are Civil Aviation Authorities. The other NEBs are government departments, independent statutory bodies or consumer protection authorities. Some Member States have designated more than one NEB. In these States, the responsibilities of the NEBs are divided in two ways:

- according to which type of organisation the enforcement relates to: in France, there are separate bodies for complaints handling and enforcement relating to airlines and airports, and to tour operators; and
- according to task: in the UK, there are separate NEBs for complaints handling and for enforcement.

5.7 In Belgium, there are three NEBs and an additional body responsible for handling complaints; the case of Belgium is unique, as the Flemish- and French-speaking regions are administered separately. For some of the States, there is a body which acts as the NEB but which has not yet been explicitly designated (see 5.13).

5.8 No States have designated a separate body for the enforcement of Article 8.

5.9 Table 5.1 lists the NEBs, the nature of the organisation, and where there is more than one NEB in a State, the role of each organisation. The table is divided into case study and non-case study States.

**TABLE 5.1 ENFORCEMENT BODIES**

State	Enforcement Body	Nature of organisation	Role
Belgium	Belgian CAA	CAA	Enforcement and sanctions
	Departement Mobiliteit en Openbare Werken	Regional government department	Enforcement and sanctions
	Service public de Wallonie, direction générale opérationnelle de la mobilité et des voies hydrauliques	Regional government department	Enforcement and sanctions
	Passenger Rights Department of Federal Public Service of Mobility and Transport	Federal government department	Complaints handling
Denmark	Statens Luffartsvæsen (SLV)	CAA	-
France	Direction Générale de l'Aviation Civile (DGAC)	CAA	Airlines and airports
	Ministry of Economy, Industry and Labour, Division on Competition, Industry and Services	Government department	Tour operators
Germany	Luffahrts-Bundesamt (LBA)	CAA	-
Greece	Hellenic Civil Aviation Authority (HCAA): Airports Division	CAA	Airports
	Hellenic Civil Aviation Authority (HCAA): Air Transport Economics	CAA	Airlines and tour operators

Hungary	Equal Treatment Authority (ETA)	Independent statutory body	Complaint handling, enforcement relating to PRM complaints
	National Transport Authority Directorate for Aviation (NTA)	CAA	Other enforcement
Ireland	Commission for Aviation Regulation	Independent economic regulator	-
Italy	Ente Nazionale Aviazione Civile (ENAC)	CAA	-
Latvia	CAA, Aircraft Operations Division	CAA	-
Netherlands	Transport and Water Management Inspectorate (IVW)	CAA	-
Poland	Civil Aviation Office (CAO) Commission on Passengers' Rights	CAA	-
Portugal	National Institute for Civil Aviation (INAC)	CAA	-
Romania	Autoritatea Națională pentru Persoanele cu Handicap (ANPH)	Independent statutory body	All Articles except 8
	Autoritatea Aeronautică Civilă Română (AACR)	CAA	Article 8
Spain	Agencia Estatal de Seguridad Aérea (AESA)	CAA	-
Sweden	Swedish Transport Agency, Civil Aviation Department	CAA	-
UK	CAA	CAA	Enforcement
	EHRC	Independent statutory body	Complaints handling in UK except Northern Ireland
	CCNI	Consumer protection authority	Complaints handling in Northern Ireland
Austria	Federal Ministry of Transport, Innovation and Technology	CAA	-
Bulgaria	CAA	CAA	-
Cyprus	Department of Civil Aviation	CAA	-
Czech Republic	Civil Aviation Authority	CAA	-
Estonia	Consumer Protection Board	Consumer protection authority	-
Finland	Finnish Transport Safety Agency	CAA	-
Lithuania	Civil Aviation Administration	CAA	-
Luxembourg	Direction de l'Aviation Civile	CAA	-
Malta	Civil Aviation Directorate	CAA	-
Slovak Republic	Slovak Trade Inspectorate	Consumer protection authority	Consumer protection
	Civil Aviation Authority	CAA	Safety aspects
	Ministry of Transport, Post and	Government	Implementation, including airline

	Telecommunications	department	conditions of carriage and aspects of airport operations
Slovenia	Civil Aviation Directorate	CAA	-

5.10 Most of the bodies designated as NEBs under Regulation 1107/2006 are also designated as NEBs under Regulation 261/2004. The States which have different NEBs are shown in Table 5.2.

**TABLE 5.2 STATES WHERE NEBS ARE DIFFERENT UNDER REGULATIONS 1107/2006 AND 261/2004**

State	NEB(s) under Regulation 1107/2006	NEB(s) under Regulation 261/2004
Finland	Finnish Transport Safety Agency	Consumer Ombudsman & Agency
		Consumer Disputes Board
		Finnish Civil Aviation Authority
Hungary	Equal Treatment Authority (ETA)	Hungarian Authority for Consumer Protection
	National Transport Authority Directorate for Aviation (NTA)	National Transport Authority Directorate for Aviation
Latvia	CAA, Aircraft Operations Division	Consumer Rights Protection Centre
Romania	Autoritatea Națională pentru Persoanele cu Handicap (ANPH)	National Authority for Consumer Protection
	Autoritatea Aeronautică Civilă Română (AACR)	
Slovak Republic	Slovak Trade Inspectorate	Slovak Trade Inspectorate
	Civil Aviation Authority	
	Ministry of Transport, Post and Telecommunications	
Sweden	Swedish Transport Agency, Civil Aviation Department	Konsumentverket
		Allmänna reklamationsnämndens
UK	CAA	CAA
	EHRC	Air Transport Users Council
	CCNI	

5.11 Only BCAA is shown as a notified NEB for Belgium in the list published by the Commission. As a result, we were not made aware of the existence of the other Belgian NEBs until our interview with BCAA, and therefore did not seek responses from them; in addition, at the time of our research for this project, BCAA had not held meetings with the other regional departments. For these reasons, we therefore have only limited information on their operations, and the data relating to Belgian NEBs in this report refers only to BCAA.

#### *Separation of regulation from service provision*

5.12 There is no requirement in the Regulation that the NEB be independent from service providers. However, in our view, it is inappropriate for the NEB also to be a service provider, as it would be difficult for it to act independently in undertaking

enforcement in relation to an infringement that it was itself committing. The only case we have identified where an NEB is also a service provider is the Greek NEB, HCAA, which is also the operator of the regional airports in Greece. This is a significant issue because, as identified in section 4 above, the most significant failure to implement the Regulation that we have identified is that it has not been implemented at the HCAA airports.

### Legal basis for complaint handling and enforcement

5.13 Most Member States have complied with the obligations set out in Articles 14 and 16 to designate an NEB and introduce sanctions into national law, with the exception of:

- **Poland:** No sanctions have yet been introduced; a proposed amendment which includes fines is before the Polish parliament, but has not yet been passed.
- **Slovenia:** As yet no body has been designated, and no sanctions have been introduced.
- **Spain:** Enforcement relies on a law which predates the Regulation and hence does not refer explicitly to it. As a result, sanctions for infringements of Regulation 261/2004 (which have an equivalent legal basis) have been challenged by airlines. In most cases, the courts have upheld the right of the NEB to impose sanctions, but cases have not as yet reached the Supreme Court, and in one case a court has ruled that the NEB was not competent to impose sanctions. This is discussed in detail in the case study for Spain (appendix C).
- **Sweden:** No sanctions have yet been introduced; a proposed amendment which includes fines is before the Swedish parliament, but has not yet been passed. The proposed amendment does not define the levels of fines.

5.14 There are a number of States where sanctions have not been introduced for all potential infringements of the Regulation:

- Bulgaria, which does not define penalties for Article 8;
- Estonia, where sanctions have only been introduced for carriers;
- Luxembourg, which only defines explicit fines for Article 4; and
- Romania, where the law defining responsibilities makes the CAA responsible for enforcing compliance with Article 8, but does not endow it with the powers to do so.

5.15 In several Member States, enforcement is dependent on more than one law; for example, the law defining how the NEB must operate and the procedure for imposing sanctions may differ from the law introducing sanctions. There may also be other laws – typically defining rights to equal treatment – which may apply at the same time as the Regulation. Table 5.3 below summarises the relevant legislation in the case study States. More detailed information is provided in the case studies in Appendix C.

**TABLE 5.3 RELEVANT NATIONAL LEGISLATION**

State	Summary of relevant legislation
Belgium	• Articles 32 and 45-52 of Law of 27 June 1937
Denmark	• Air Navigation Act, Articles 149(11) and 149a define sanctions

France	<ul style="list-style-type: none"> <li>Article 330-20 of the Civil Aviation Code, as amended by Decree 2008-1445 of 22 December 2008: gives the Minister of Civil Aviation the power to impose sanctions</li> </ul>
Germany	<ul style="list-style-type: none"> <li>Air Traffic Licensing Regulation (Luftverkehrszulassungsordnung): defines LBA as the NEB and that breaches of the Regulation are considered an offence.</li> <li>Air Traffic Law (Luftverkehrsgesetz): defines that breach of EU Regulations relating to air traffic is an offence, and defines the fines applying.</li> <li>Law on Administrative Offences (Gesetz über Ordnungswidrigkeiten): defines the administrative process that must be followed in order to impose sanctions.</li> </ul>
Greece	<ul style="list-style-type: none"> <li>Letter of 1 December 2006 (reference 6310/A/10909) from Permanent Representation of Greece to Commission designates NEB; National Aviation Law 1815/1988 sets out fines</li> <li>Act CXXV of 2003 defines role and sanctions of ETA</li> <li>Act CXXX of 2003, and Article 4 (2) of Government Decree No 362/2004 define complaints handling procedure</li> </ul>
Hungary	<ul style="list-style-type: none"> <li>Act XCVII of 1995 on Air Traffic, implemented by Government Decree No. 141/1995 defines role and sanctions of NTA</li> <li>Ministerial Order 97/2005 makes NTA responsible for approving airport charges</li> <li>Act CXL of 2004 defines procedure for imposing fines and sets out administrative penalties</li> </ul>
Ireland	<ul style="list-style-type: none"> <li>Section 45(a) of the Aviation Regulation Act 2001 as inserted by the Aviation Act 2006: defines basis for enforcement and sanctions</li> <li>Statutory Instrument SI 299/2008: transposes the Regulation into law</li> </ul>
Italy	<ul style="list-style-type: none"> <li>Legislative Decree 24/2009 of 24 February 2009: defines process to be followed by ENAC and fines that can be imposed</li> </ul>
Latvia	<ul style="list-style-type: none"> <li>Air Navigation Order (2007): designates NEB</li> <li>Administrative Violations Code: defines fines</li> </ul>
Netherlands	<ul style="list-style-type: none"> <li>Resolution to set up the Transport and Water Management Inspectorate (Instellingsbesluit Inspectie Verkeer en Waterstaat), Article 2, paragraph 1, item d: sets up the NEB</li> <li>Civil Aviation Act (Wet luchtvaart), revised December 2009, Article 11.15, section b, item 1 and Article 11.16, paragraph 1.e.3: defines circumstance under which sanctions may be imposed</li> <li>General Administrative Law Act (Algemene wet bestuursrecht), chapter 4 (process to impose sanctions) and chapter 5 (level of fines).</li> </ul>
Poland	<ul style="list-style-type: none"> <li>Aviation Act ( Article 21.2(3) ): designates NEB</li> <li>Administrative Procedure Code: defines procedures to be followed</li> <li>No sanctions yet defined - draft amendment to Aviation Act (Articles 205a, 205b, 209a, 209b) will set out fines</li> </ul>
Portugal	<ul style="list-style-type: none"> <li>Decree Law 241/2008: designates NEB and defines level of fines which can be imposed for each infringement</li> <li>Decree Law 10/2004: defines standard scale of fines</li> </ul>
Romania	<ul style="list-style-type: none"> <li>Decree 27/2002: requires all government bodies to be able to receive complaints</li> <li>Decision 787/2007: defines penalties (except for Article 8)</li> <li>Decree 2/2001 (approved and modified by Law 180/2002): defines framework for imposing penalties</li> </ul>
Spain	<ul style="list-style-type: none"> <li>Royal Decree 184/2008: designates NEB</li> <li>Aviation Security Law (Law 21/2003): basis for enforcement and sanctions</li> <li>Royal Decree 28/2009: defines inspection regime</li> <li>Law on Public Administrations and Administrative Procedures (Law 30/1992): defines operational procedures for the NEB</li> </ul>

	<ul style="list-style-type: none"> <li>• Regulation on Procedures for the Imposition of Sanctions (Royal Decree 1398/1993): defines process for imposing sanctions</li> </ul>
Sweden	<ul style="list-style-type: none"> <li>• Förordning (1994:1808) om behöriga myndigheter på den civila luftfartens område (ordinance on competent authorities in civil aviation): designates the NEB</li> <li>• No sanctions yet defined, but some are set out in a proposed amendment Regeringens proposition 2009/10:95- Luftfartens lagar</li> <li>• Prohibition of Discrimination Act may also apply in some circumstances (e.g. infringements of Articles 3 and 4)</li> </ul>
UK	<ul style="list-style-type: none"> <li>• Statutory Instrument 2007/1895: designates NEBs, defines penalties and introduces a right to compensation for injury to feelings resulting from an infringement</li> <li>• Enterprise Act 2002: defines civil powers for NEB, including power to apply for an injunction ('stop now order') and power to seek binding undertakings</li> </ul>
Austria	<ul style="list-style-type: none"> <li>• Austrian Civil Aviation Law</li> </ul>
Bulgaria	<ul style="list-style-type: none"> <li>• Civil Aviation Act, Art. 81a</li> </ul>
Cyprus	<ul style="list-style-type: none"> <li>• Civil Aviation Act N 213(I)/2002</li> </ul>
Czech Republic	<ul style="list-style-type: none"> <li>• Civil Aviation Act (No 49/1997), § 93 Articles 7 (a) - (l) and 8</li> <li>• Administrative Code (No 500/2004)</li> </ul>
Estonia	<ul style="list-style-type: none"> <li>• Consumer Protection Act</li> <li>• Aviation Act §58 and §60</li> </ul>
Finland	<ul style="list-style-type: none"> <li>• Finnish Aviation Act (1194/2009) - Section 157 (Conditional fines and conditional orders of execution)</li> <li>• Conditional Fine Act (1113/1990)</li> </ul>
Lithuania	<ul style="list-style-type: none"> <li>• Paragraph 2 of Article 70 of the Act of Aviation No. VIII-2066 (O.J. 2000, No. 94-2918; 2007, No. 59-2279): designates CAA as NEB</li> <li>• Code of Administrative Violations, Article 115: defines penalties</li> </ul>
Luxembourg	<ul style="list-style-type: none"> <li>• Law of 31st January 1948, art 43, modified by the law of June 5, 2009, Article 1 (19)</li> </ul>
Malta	<ul style="list-style-type: none"> <li>• Civil Aviation (rights of Disabled Persons and Persons with Reduced Mobility) Regulations (LN234/07) as amended by (LN 411/07)</li> </ul>
Slovak Republic	<ul style="list-style-type: none"> <li>• Act No 128/2002 (State Inspections Act): defines powers of NEB to conduct inspections, impose preventative measures, and impose sanctions</li> <li>• Act No 250/2007 on Consumer Protection: provides legal framework for NEB's consumer protection activities</li> </ul>
Slovenia	<ul style="list-style-type: none"> <li>• Not yet implemented</li> </ul>

#### *Sanctions allowed in national law*

- 5.16 There are significant differences between the States in the maximum sanctions for infringements of the Regulation that can be imposed under national law (Table 5.4). The highest defined maximum sanctions are in Spain (€4.5 million) but in Denmark, Finland, Netherlands and the UK unlimited fines can be imposed, and in Cyprus the maximum fine is 10% of the turnover of the carrier. In Austria, Belgium and Denmark sanctions may also include a prison sentence.
- 5.17 However, in many States, sanctions are low, and in some States maximum sanctions are close to or below the costs that a service provider may in some circumstances avoid through non-compliance with the Regulation. In these States, it is possible that the sanctions regime may not comply with the requirement in Article 16 for dissuasive

sanctions to be introduced by Member States; however, without data on the costs of compliance we are unable to assess this. Maximum sanctions are particularly low (less than €1,000) in Estonia, Lithuania and Romania.

5.18 In most States, fines are determined by the NEB, taking into account various factors relating to the case, including the circumstances and conditions of the case, any reasons given for non-compliance, its impact on the passenger and the size of the company. In some States, fines may be imposed which relate directly to the financial impact of the alleged infringement:

- in Germany, additional fines may be imposed to recover any financial gains to the service provider which resulted from its non-compliance; and
- in the Netherlands, reparatory fines can be imposed, which require the service provider to make good any financial loss incurred by the passenger.

**TABLE 5.4 MAXIMUM FINES**

State	Maximum sanction (€)	Explanation/notes
Belgium	€4,000,000 (criminal and administrative)	In addition up to 1 year's imprisonment if a criminal prosecution
Denmark	Unlimited fine	In addition up to 4 months' imprisonment
France	€7,500	Maximum sanction 'per failing', which is not defined. Can be imposed on a per-passenger basis to give a higher total sanction. Can be doubled if repeated within a year.
Germany	€25,000	Additional fines can be imposed to recover the economic advantage that the carrier has obtained from infringement
Greece	€250,000	Minimum sanction is €500. Fines are generic, and do not refer specifically to the Regulation
Hungary	€22,600 (ETA) €11,300 (NTA)	Minimum sanction €189 for ETA. In addition penalty of up to €3,774 for failure to cooperate with an investigation.
Ireland	€150,000	Maximum €5,000 if the case is heard in a District Court. Fines only applicable on failure to comply with a Direction.
Italy	€120,000	Maximum depends on Article infringed and reduced by two thirds if paid within 60 days. Minimum fines of €2,500-€30,000.
Latvia	€2,800	Fine can be applied per passenger that complains. Law makes no direct reference to the Regulation, and it is possible that penalties could be open to legal challenge.
Netherlands	Reparatory fines: unlimited Punitive fines: €74,000	Reparatory fines should be in proportion to the amount of loss and to the severity of the violation. Punitive fines are per infringement and are not multiplied by number of passengers affected. IVW are conducting a study which will define policy on punitive fines.
Poland	Not yet defined, but proposed to be €1,875	Fines vary depending on Article infringed. Fines are variable for infringements of some Articles, but otherwise are fixed. Fines are cumulative per Article and per passenger that complains, so maximum could be a multiple of this. Minimum fines €47-€1,875.
Portugal	€250,000	The maximum and minimum fines depend on the infringement ('light', 'serious' or 'very serious'), the size of the

		company, and whether the infringement was intentional or negligent. Minimum fine €350-4,500.
Romania	€608	Maximum depends on Article infringed. Per Article breached and per passenger. No penalties available for Article 8. Minimum fines €195-€243.
Spain	€4,500,000	For most infringements maximum would be €4,500
Sweden	Not yet defined	Proposed amendment does not define levels of fines
UK	Unlimited fine	Maximum fines depend on Article breached; for many Articles the maximum fine is €5,600. Unlimited fines must be imposed by Crown Court, for serious cases.
Austria	€22,000	In addition up to 6 weeks' imprisonment
Bulgaria	€5,100	No penalties available for Article 8. Minimum fines €1,020.
Cyprus	€8,000 or 10% of operators turnover	-
Czech Republic	€192,000	-
Estonia	€640	Only applies to carriers
Finland	Unlimited fine	Fines are conditional on the period of time during which a condition is unfulfilled, and should be in proportion to company's size, amongst other factors
Lithuania	€870	Minimum sanction €290. Per case, not per passenger.
Luxembourg	€10,000	Fine of €10,000 for violation of Article 4, of €5,000 for failure to provide information, but no other sanctions given.
Malta	€2,300	Criminal procedure
Slovak Republic	€66,000	Depending on number of passengers affected and whether it is repeated
Slovenia	Not yet defined	-

### Statistics for complaint handling and enforcement

- 5.19 Most NEBs had received very few complaints in relation to the Regulation. Of the 27 NEBs, 8 had received no complaints, and 26 had received less than 50. 80% of all complaints to NEBs had been received by the UK NEBs. Although, the UK has the largest aviation market in Europe, and therefore would be expected to receive a higher number of complaints, in 2009 it received over ten times as many complaints as Germany or Spain, the next largest markets. This may be a result of the right in the UK to claim compensation for infringements of the Regulation, discussed below.

5.20 Of those NEBs that had received complaints, most were not able to give a breakdown. Table 5.5 therefore gives a brief description of the types of complaints received.

**TABLE 5.5 COMPLAINTS RECEIVED**

State	2009	Total	Description/notes
Belgium	1	1	Poor quality of assistance
Denmark	0	0	-
France	5	24	Transport of insulin and other liquids; denied boarding and requirements to be accompanied; damage to mobility equipment
Germany	22	34	Assistance by the carrier (55%), at the airport (18%), refusal of reservation (14%), denial of boarding (14%)
Greece	3	4	Denial of boarding; carriage of oxygen; handling of passengers
Hungary	0	1	Denial of boarding
Ireland	14	18	Conditions imposed on travel e.g. seating or carriage of oxygen.
Italy	36	40	48% refusal to embark PRMs; most of remainder lack of assistance at airports
Latvia	0	0	-
Netherlands	5	6	IVW was only competent for 1 complaint
Poland	2	2	Both related to airports outside Poland
Portugal	16	34	Not provided
Romania	0	0	-
Spain	35	46	Not provided
Sweden	3	5	Denied boarding, assistance dog policy
UK	356	883	Allocation of appropriate seating; timely provision of assistance on landing; and communicating requests for assistance on arrival at the airport.
Austria	1	2	Treatment of injured passengers
Bulgaria	0	0	Denied boarding
Cyprus	1	3	Not provided
Czech Republic	0	0	-
Estonia	0	0	-
Finland	3	4	Seating, oxygen, movement within cabin
Lithuania	0	0	-
Luxembourg	0	1	Boarding denied to deaf passengers
Malta	1	1	Carriage of guide dogs
Slovak Republic	0	0	-
Slovenia	0	1	Denied boarding
<b>Total</b>	<b>499</b>	<b>1110</b>	

- 5.21 In addition, NEBs in several States had received questions which were not complaints, regarding, for example, airline seating policy.

*Sanctions applied*

- 5.22 At the time the interviews for this study were conducted, no sanctions had yet been applied for infringements of the Regulation. At the time of drafting this report, three States were in the process of applying sanctions:

- France had opened proceedings to impose fines in one case;
- Portugal had opened proceedings to impose fines in two cases; and
- Spain had opened proceedings to impose fines in five cases.

- 5.23 Two other States had taken other actions to encourage compliance:

- Hungary wrote to an airline requiring it to correct its policy, and published this letter; and
- the UK has threatened several organisations with sanctions, and has taken other actions to encourage compliance, including writing to airlines, and setting out its requirements for compliance.

**The complaint handling and enforcement process**

*Overview of the process*

- 5.24 The complaint handling process is broadly similar in each NEB, however, since most NEBs receive very few complaints, the process for handling them is often not defined in detail. A typical process is as follows:

- complaints are recorded (since the number of complaints is frequently very low, this may be in a spreadsheet or a filing system rather than in a database);
- most undertake an initial filter of the complaints, to remove those that are not related to the Regulation, where the passenger has not first sought redress from the service provider, or where there is no *prima facie* case of an infringement;
- complaints relating to flights departing from other States are forwarded to the NEB of the State which is competent to handle the complaint;
- the complaint is investigated through contacting service providers to request information and/or justification for their actions; and
- a decision is made on the complaint.

- 5.25 The complaint handling process is different for complaints submitted to one of the UK NEBs (see box below). Otherwise, the main differences between the processes in different Member States are in the following areas, which are discussed in more detail below:

- the nature of the ruling or decision issued to the passenger, in particular whether the ruling is binding;
- under what circumstances the investigation of the complaint may lead to sanctions; and
- the process by which sanctions may be imposed and collected.

**Complaint handling in the UK (excluding Northern Ireland) by EHRC**

The legislation implementing penalties for infringements of the Regulation in the UK also grants a right to compensation for injury to feelings resulting from an infringement. This is in line with UK disability rights legislation in other sectors. As a result of this, the process for complaint handling is structured around conciliation, with a possible civil claim for compensation if conciliation fails. In other States there is no right to compensation and therefore no reason to offer conciliation proceedings.

The EHRC handles complaints relating to incidents which occurred in the UK excluding Northern Ireland. When a complaint is submitted to the EHRC and an initial evaluation shows it to be potentially valid, a letter is sent to the service provider which summarises the complaint and requests comments. This letter also explains the conciliation process, and asks if the service provider would be willing to participate. The responses are evaluated to see whether they appear to justify the actions of the service provider, but there is no technical or operational investigation, for example, to establish whether any claims made by a service provider are true.

If the complaint remains unresolved, the EHRC will consider referring the case for conciliation. If both parties agree, conciliation is provided independently, and may result in a voluntarily binding agreement on both parties. This agreement may include financial compensation, or may include non-financial reparations such as an apology.

If a service provider does not wish to participate in conciliation, the EHRC may suggest to the passenger that they initiate legal proceedings, which may result in payment of compensation. The EHRC may also consider offering litigation support for cases where it believes that the outcome could help clarify the application of the Regulation.

Complaints related to incidents occurring in Northern Ireland are handled by CCNI. This follows a procedure similar to most other NEBs, including an investigation of the facts of the case, but if this procedure fails to resolve the complaint to the passenger's satisfaction, the passenger can seek financial compensation under UK national law.

*Languages in which complaints can be handled*

5.26 Most NEBs are able to handle and reply to complaints written in the national language and English, but in many cases NEBs were not able to handle complaints in other Community languages. The languages in which NEBs can receive complaints, and respond to passengers, are shown below.

**TABLE 5.6 LANGUAGES IN WHICH COMPLAINTS ARE HANDLED**

State	Languages in which complaints may be written	Languages in which the NEB will reply to the passenger
Belgium	Flemish, French, English	Flemish, French, English
Denmark	Danish, English, German	Danish, English
France	French, English, Spanish	French only
Germany	German, English	German, English
Greece	Greek, English, French, German, Spanish, Italian	Greek, English
Hungary	Hungarian, English, German, Italian, other languages where possible	Hungarian, English, German, Italian
Ireland	English, French, German, Spanish, Italian	English, Spanish
Italy	Italian, English, French, Spanish, German	Italian, English, French, Spanish

Latvia	Information not provided at interview	Information not provided at interview
Netherlands	Dutch, English; sometimes also French and German	Dutch, English; sometimes also French and German
Poland	Polish, English, German, French	Polish, informal translation to English provided
Portugal	Portuguese, Spanish, English and French	Portuguese, Spanish, English and French
Romania	Romanian, English	Romanian, English
Spain	Spanish, English	Spanish, English
Sweden	Swedish, English	Swedish, English
UK	English, but would make arrangements to handle any other languages	English, but would make arrangements to handle any other languages

### *Time taken*

5.27 Many NEBs informed us that they had received too few complaints to be able to draw conclusions on the average time taken to handle them (see Table 5.7 below). Several other States had received very few complaints, but had a legal limit on time to respond set by national law. Of those that were able to estimate the actual time taken to resolve complaints, most reported wide variation: for example, Italy reported variation between 1 and 6 months. The longest time taken to resolve complaints was reported in the UK, where complaints may take up to 6 months, and there are instances where complaints have taken longer than this to resolve; as a result the passenger has no longer been able to claim for compensation under UK national law (see 5.25).

**TABLE 5.7 TIME TAKEN TO RESOLVE COMPLAINTS**

State	Average time taken	Explanation/Notes
Belgium	Too few complaints to estimate time	
Denmark	Too few complaints to estimate time	No complaints yet received, but in principle 2-3 months
France	Varies significantly	If the case goes to CAAC, it will take longer. Overall, durations are similar to under Regulation 261/2004
Germany	Too few complaints to estimate time	Complaints are handled faster than for Regulation 261/2004, which take 3-4 months
Greece	30 days	Response time is set by law and is generic across all complaints to HCAA
Hungary	75 days	Response time is set by law and is generic across all complaints to ETA
Ireland	3-4 months	Awaiting responses (from service providers or Commission) lengthens the average time taken, so many cases handled quicker than this
Italy	30 days to 6 months	Depends on investigation required and response of service provider
Latvia	Too few complaints to estimate time	
Netherlands	Too few complaints to estimate time	Same procedure as for Regulation 261/2004: in principle 3-6 months
Poland	Too few complaints to estimate time	Likely to be quicker than for Regulation 261/2004
Portugal	Too few complaints to estimate time	May be faster than for Regulation 261/2004

Romania	30 days	Time limit set by law
Spain	Too few complaints to estimate time	Always less than six months, and delay is due to service providers. Shorter than equivalent complaints under Regulation 261/2004.
Sweden	At most 6 weeks	This is a non-binding target for the CAA; little information at present on how well this has been met.
UK	EHRC: Up to 6 months, can take longer CCNI: Up to 6 weeks	EHRC: Wide variation in time taken. Process is driven by 6 month time limit for court cases for compensation under SI. CCNI: Wide variation in time taken.

#### *Responses issued to passengers*

- 5.28 All of the NEBs in the case study States provide PRMs who complain with an individual response. As there is no right to compensation, the extent to which an NEB can offer assistance to obtain redress is limited; most responses state a decision on whether the NEB considers the Regulation to have been infringed, but do not state whether any payment should be made to the PRM, for example for loss due to denied boarding. The UK is an exception, for the reasons given in above. Most responses from NEBs do not have specific legal status, however in Hungary the response is legally binding, and in the Netherlands non-compliance with a decision may lead to a fine.
- 5.29 Almost all States would undertake some form of investigation of a complaint. The exception to this is the UK (excluding Northern Ireland), where the body responsible for handling complaints does not take an investigative role, although the CAA does investigate the facts of a proportion of cases. As discussed above, the UK process is structured around claims for compensation and the NEB sees its role as to facilitate conciliation, where the service provider is incentivised to voluntarily provide some form of compensation, or risk having a court award compensation against it.
- 5.30 Table 5.8 summarises the responses issued to the passenger.

**TABLE 5.8 RESPONSES ISSUED TO PASSENGERS**

State	Nature of response issued
Belgium	Individual non-binding evaluation sent to both service provider and passenger
Denmark	Non-binding individual evaluation provided to PRM and service provider
France	Individual response provided by DGAC summarising the conclusions of the investigation and its opinion on the case
Germany	Individual response giving the result of the investigation and their conclusions
Greece	Individual response giving the result of the investigation and their conclusions
Hungary	ETA issues legally binding decision to both passenger and service provider
Ireland	CAR writes to each passenger to summarise conclusions and whether incident was an infringement of the Regulation
Italy	ENAC writes to each complainant to inform them of its conclusions
Latvia	No specific procedures established, but passengers would be issued with an official letter communicating the final decision

Netherlands	Formal decision issued to both passenger and carrier. Not legally binding, but non-compliance may lead to a fine.
Poland	Formal decision issued to both passenger and carrier
Portugal	Individual response summarising correspondence with service provider and reasons for decision.
Romania	Individual response is sent to the passenger, setting out any infringements of the Regulation and any corrective measures taken by ANPH
Spain	Individual response, including response from carrier and AESA's view on it, and information on how passenger can obtain redress
Sweden	Individual non-binding response summarising correspondence with service provider and reasons for decision.
UK	EHRC: Does not investigate complaints, and therefore does not have standard format for output. Conciliation process may result in form agreeing actions to be taken. CCNI: Individual opinion letter sent to passengers.

#### *Circumstances in which sanctions may be imposed*

- 5.31 There are also significant differences between the States as to whether and when sanctions are imposed.
- 5.32 Some NEBs, including one of the Hungarian NEBs, Italy, Portugal, and Romania, always impose sanctions in the case that an infringement is found, even if it is a minor or technical infringement which does not significantly inconvenience passengers. If the amendments to the Aviation Act are passed in their current form, the Polish NEB will in future apply fines for every infringement. The German NEB must also take some action whenever an infringement is identified, although it has discretion to choose between a warning letter and a fine. If it chooses a fine, this has to be proven to the same standard of evidence required for criminal cases, and the NEB is therefore unlikely to impose sanctions if the infringement is 'not significant'.
- 5.33 In other States, the policy is to impose sanctions far less frequently:
- In two States (Belgium and Greece), a sanction would only be imposed where a service provider fails to take corrective action when required to do so by the NEB. In Ireland, this is the case for infringements of some Articles. In Spain, this is the general policy of the NEB but it could in theory impose sanctions without first warning the service provider.
  - Several States have a policy of imposing sanctions where there is evidence of serious or systematic infringements, including Denmark, and the Netherlands.
  - The UK will consider prosecution of a service provider where it fails to comply with CAA requests for corrective action, or for wilful non-compliance. Any case to be taken to prosecution must be proven to a criminal standard of evidence, despite the due diligence defence available in UK law. The UK NEB believed that this would be less difficult than under Regulation 261/2004, as Regulation 1107/2006 is more prescriptive.
- 5.34 The policies of the case study States on imposition of sanctions are shown in Table 5.9 below.

**TABLE 5.9 POLICY ON IMPOSITION OF SANCTIONS**

State	Policy on imposition of sanctions	Explanation/Notes
Belgium	Applied for serious or systematic violations (allows opportunity for corrective action first). Public prosecutor decides whether to bring criminal case; if not, BCAA may then decide whether to impose administrative sanctions.	If prosecutor brings criminal case, BCAA may not impose administrative sanctions
Denmark	Applied for serious or systematic offenses; minor offences would receive a caution, which would not be made public	
France	In consultation with CAAC. Ultimate decision made by the Minister responsible for Civil Aviation on the advice of CAAC.	Cases would only be considered by CAAC if referred by DGAC
Germany	If a complaint is upheld, imposes warning letter or sanction; LBA has flexibility to decide which	Procedure is a mix between administrative and criminal procedures: level of proof required is equivalent to a criminal case but case is decided by LBA
Greece	First send a letter of caution; if service provider infringes again, then impose penalty.	
Hungary	Choice of actions (including fines and non-pecuniary measures) which may be applied by ETA, depending on nature of case. NTA has same choice of actions but must take some form of action. Fines also imposed for non-cooperation with cases.	Fines for non co-operation can be imposed even where there was no infringement found
Ireland	CAR would consider prosecuting if a service provider did not comply with a Direction, or if it identified a breach of Articles 3 or 6 (2)	CAR can consider issuing a Direction if issue identified during an inspection, or if a service provider does not rectify a case when required to do so
Italy	Applied in every case of an infringement, identified either by investigation of complaint or inspection	Amount of fine considers facts of the case. Appeals and collection process can be lengthy, up to 7 years
Latvia	At discretion of NEB	More specific policies to be developed when Administrative Violations Code amended.
Netherlands	In principle sanctions could be applied for every violation, but IVW policy is to apply them only for severe or repeated infringements	Appeals process includes several stages, and may take in principle up to 2 years
Poland	When in force, will be applied in every case of an infringement	No sanctions yet in place
Portugal	Applied for every confirmed infringement, identified either through complaint or inspection	
Romania	Applied for every confirmed infringement	Amount of fine considers facts of the case. Any sanctions must be imposed through the Social Inspectorate; specific methodology is in development. AACR cannot impose fines for violations of Article 8.
Spain	Whenever an infringement is identified, the service provider receives warning, with a period in which to rectify the issue; if it fails to	

---

do so, AESA can impose a sanction.		
Sweden	Sanctions not yet defined	
UK	Applied when service provider fails to comply with CAA requests for corrective action, or for wilful non-compliance	In addition, standard of evidence required for criminal prosecution, and 'due diligence defence' means that it must be proved that senior management of carrier had intended not to comply

---

#### *Process to impose sanctions*

5.35 In most Member States, the process to impose sanctions is an administrative procedure undertaken by the NEB, and the decision to impose sanctions is made by the NEB alone. Service providers, and in some cases also passengers, can appeal to the courts.

5.36 The exceptions to this are the following States:

- In Germany, the procedure is similar to the administrative procedures applying in other States, but the standard of evidence required is equivalent to that in criminal cases.
- In Slovakia, the procedure is also similar to the administrative procedures in other States, but with the key difference that (as for Regulation 261/2004) an on-site inspection is required before a sanction can be issued. A consequence of this is that sanctions cannot be imposed on carriers that are not based in Slovakia.
- In Denmark, Ireland, Malta and the UK<sup>13</sup>, sanctions are imposed under criminal law and therefore a criminal prosecution is required.
- In France, cases are referred by the NEB (DGAC) to an administrative commission (the CAAC) that meets twice per year. This makes a recommendation to the Minister of Civil Aviation, who takes the ultimate decision about whether a sanction should be imposed, and the level of any sanction.
- In Belgium, sanctions can be imposed under criminal law but administrative fines to an equivalent level are also available.
- In Austria, administrative fines can be imposed, but in aggravated cases a prison sentence of up to 6 weeks may also be imposed, under criminal law.

5.37 Some States have administrative fines to encourage compliance, which can be applied when a service provider fails to respond within a certain time; these include Hungary and Latvia.

#### *Application of sanctions to carriers based in other Member States*

5.38 A number of NEBs face difficulties in applying sanctions to carriers that are not based in their State. This arises because national law either:

- does not permit application of sanctions to carriers not based in the State; or
- requires administrative steps to be taken in order to impose a sanction, which are

---

<sup>13</sup> Issues regarding the imposition and collection of fines in the UK are discussed in further detail in the Evaluation of Regulation 261/2004, SDG for European Commission, February 2010.

either difficult or impossible to take if the carrier is not based in, or does not have an office in, the State concerned.

5.39 The problem is particularly significant in relation to carriers based in other EU Member States, as opposed to non-EU carriers. In many Member States where sanctions are imposed through an administrative process, national law requires a notification of a sanction, or the process to start imposition of a sanction, to be served at a registered office of the carrier, or on a specific office-holder within the carrier. Non-EU (long haul) carriers will usually have an office in the each of the States to which they operate, and this can be a condition of the bilateral Air Services Agreements which permit their operation; however there are no such requirements on EU carriers, which are free to operate any services within the Union.

5.40 We discussed this issue in detail in our recent report on Regulation 261/2004, and in most cases the issues are equivalent, because the process to impose the sanction is the same. However, since the research for that report was conducted, there have been changes affecting the imposition of fines on non-national carriers in two States:

- **Greece:** Until 2008, the legal process for serving a fine required that a writ was accepted by a representative in Greece of the company being fined. As a result, HCAA faced difficulties in imposing fines on non-national carriers that had not established an office in Greece. To resolve this problem, in May 2008 HCAA adopted a regulation on airline representation, requiring all non-national airlines to have representation agreements with their local representatives. This was withdrawn shortly after it came into force, as the restrictions it imposed violated Regulation 1008/2008 on common rules for the operation of air services in the Community. The difficulties in imposing sanctions on non-national carriers therefore remain.
- **Germany:** German national law requires LBA to prove that the notification of any sanction had been issued to a named person within the carrier; as these carriers often do not have offices or legal representation in Germany, at the time of the research for the study on Regulation 261/2004 it was often not possible to meet this requirement. LBA now believes that this problem has been resolved and expects to test this application within six months.

5.41 The problems with application of sanctions to carriers not based in the Member State are summarised in Table 5.10. Since no fines have yet been imposed for infringements of the Regulation, many of the procedures and issues described below have not been tested in practice. However, often the procedures for imposing fines are equivalent to those for Regulation 261/2004 and therefore where possible we have drawn conclusions on this basis.

**TABLE 5.10 ISSUES WITH APPLICATION OF SANCTIONS TO CARRIERS NOT BASED IN THE STATE**

State	Whether it is possible to impose sanctions	Explanation/Notes
Belgium	Yes in principle	In principle there are no problems although this has not been tested as yet as no sanctions have been imposed. BCAA believed the best approach would be through cooperation with other NEBs, but the scope of the Regulation could limit this.
Denmark	Yes, although only if the incident occurred on Danish territory	No sanctions have been imposed and therefore this has not been tested. Restriction to Danish territory means that a small proportion of incidents would not be covered, i.e. incidents occurring mid-flight on board a non-Danish carrier which had departed from or was landing at a Danish airport.
France	Yes	Sanctions have been imposed on foreign carriers without any difficulties for other Regulations, so in principle should not be a problem. Notification can be sent by registered mail, and by fax if it is not possible to obtain a receipt from the registered mail.
Germany	Yes in principle	Sanctions must be served on a named person within the airline, which caused problems when issuing fines for Regulation 261/2004. LBA believe this is now resolved, and that it should be sufficient to obtain a signed receipt either by registered mail or by a courier, or issue the sanction through the German embassy in the State concerned
Greece	Uncertain	In summer 2009 national legislation came into force on airline representation, requiring a representation agreement for all non-national airlines. This allowed HCAA to impose financial penalties on all carriers but has now been repealed. The same difficulties in imposing fines on non-national carriers are now present: the legal process of serving a fine requires that a representative of the airline in Greece accept the writ, and there are therefore difficulties in imposing fines on non-national carriers that have not established an office in Greece.
Hungary	No	ETA is only able to handle discrimination cases regarding companies based in the territory of the Republic of Hungary.
Ireland	Yes in principle	Notification of a Direction can be served at the carrier's registered office, which does not have to be within the State. Any proceedings would require proof of incorporation of an airline which could be accepted by the Irish courts.
Italy	Yes but slower / more complex	ENAC would use the process set out in Regulation 1393/2007 to serve notifications on carriers which do not have offices in Italy, but this is likely to be slow/complex. For fines imposed under Regulation 261/2004, this has been short-cut in some cases by the Italian embassy/consulate in the State serving the notification directly.
Latvia	No	The Latvian Administrative Violations Code only allows for sanctions to be imposed on 'legal persons'. This is defined as including foreign individuals but not foreign companies.
Netherlands	Yes	IVW must prove that the company being fined has been notified, for example by proving receipt of the letter setting out the fine. The law states that if IVW can prove it has sent the fine, it is up to the other party to prove it has not received it.
Poland	Yes	Notifications are sent by registered mail or courier to the head office of the carrier – there is no limitation provided a receipt is obtained. A receipt from a courier company is considered sufficient.

Portugal	Yes	No specific constraints on imposing sanctions. Procedure equivalent to that for national carriers.
Romania	No	Notification of any penalty must be made by mail with a receipt, or by physically presenting it in the presence of a witness. If an airline does not have a legal representation in Romania, this cannot be done.
Spain	Yes	Notifications are sent by registered mail – there is no limitation provided a receipt is obtained. In theory collection of sanctions is problematic if carrier does not have an office in Spain, but this has not yet proved a problem.
Sweden	Sanctions not yet defined	Proposed amendment to Civil Aviation Act is unlikely to allow this, as no other Swedish legislation does so.
UK	Yes in principle	In principle there are no problems although this has not been tested as yet as no sanctions have been imposed. As sanctions could only be imposed through a criminal process, this would be undertaken by the criminal courts system not the NEB.

### Monitoring undertaken by NEBs

5.42 While the Regulation does not explicitly require NEBs to undertake monitoring of compliance with the Regulation, it does require them to take measures to ensure that the rights of PRMs are respected, including compliance with the quality standards required by Article 9 (1).

#### *Monitoring of airport quality of service*

5.43 Two NEBs, Denmark and Germany, had undertaken no actions to directly monitor airport service quality. Denmark holds biannual meetings with stakeholders including PRM organisations, airport managing bodies and airlines, but does not undertake any first-hand monitoring of service quality at airports.

5.44 NEBs in all but two of the case study States had undertaken some inspections of airports. Many undertook yearly inspections of the major airports, although some inspected airports more frequently: the Hungarian NEB inspects Budapest airport three times per year, and Spain had conducted 152 inspections since the introduction of the Regulation. Some had only undertaken one inspection, when the Regulation came into force; these included France, the Netherlands, Romania and Sweden.

5.45 Most inspections focus on checks of the systems and procedures in place to provide service. These checks included confirming the signage and functioning of the designated points of arrival, training records, and the written procedures followed by staff providing the service. Most did not assess the passenger experience; those that did were Latvia, Sweden and the UK. These checks included site visits accompanied by representatives of PRM organisations to check actual waiting times and infrastructure such as designated points.

5.46 In addition to inspections, there were a number of other approaches to monitoring quality of service, including:

- attending the PRM steering committees of larger airports on a monthly basis (UK);
- holding biannual meetings with stakeholders including PRM organisations (Denmark); and

- sending annual surveys on implementation of the Regulation to airports (Romania).

5.47 Table 5.11 summarises the actions NEBs have taken to monitor airport service quality.

**TABLE 5.11 NEB ACTIONS TO MONITOR AIRPORT QUALITY OF SERVICE (EXCLUDING INDIRECT MONITORING)**

State	Direct monitoring of airport quality of service
Belgium	Inspection and audit of subcontractors at Brussels Airport, covering part of Regulation
Denmark	Biannual meetings with stakeholders including PRM organisations, airport managing bodies and airlines
France	One inspection of Paris Charles De Gaulle
Germany	None
Greece	Inspections of all airports (including 3 at Athens) for compliance with quality standards (although no quality standards set at any airport other than Athens)
Hungary	Regular inspections (Budapest 3 per year, smaller airports once) covering systems and equipment; questionnaire requesting number of complaints received and training given; approves safety license of PRM service provider, including check of quality standards
Ireland	2 inspections at each airport under jurisdiction
Italy	Regular inspections by staff based at airports, reviewing equipment and procedures, application of quality standards, and provision of training
Latvia	Inspections for compliance with quality standards: checking 'time stamps', site visits to measure actual waiting times. Meetings two times a year to discuss standards.
Netherlands	Audit of systems at major Dutch airports in 2007/2008. Further investigations will be driven by complaints.
Poland	Surveys of all airports, covering: quality standards, training records and programmes, documentation of cooperation with PRM organisations and airport users. Documentation checked by inspections.
Portugal	Yearly inspections of major Portuguese airports, covering designated points and information, but excluding staff training and assistance provided.
Romania	Inspection of Bucharest Otopeni, in cooperation with Social Inspectorate. Annual surveys of airports on several topics, including training, accessible information and procurement.
Spain	152 inspections relating to the Regulation
Sweden	Inspection of Stockholm Arlanda with PRM organisation, including checks of designated points and signage. No such checks of smaller airports.
UK	CCNI: Annual PRM site visits at airports; quarterly meetings with airports. CAA: Physical inspections of airports combined with discussions with service providers. Attends airport-PRM consultative committees monthly for London Heathrow, Gatwick, Luton and Stansted, and for Manchester less frequently.

5.48 For most of the NEBs we spoke to, resource constraints were not an issue: most NEBs received few complaints, and did not undertake significant additional activity which would require additional resources. Where inspections of airports for compliance with the Regulation were undertaken, they were frequently combined with other inspections and did not therefore require significant additional resourcing. The case study States which informed us that they would undertake more inspections if they

had more resources were France and Ireland.

*Monitoring of airline quality of service and policy regarding carriage of PRMs*

5.49 Most NEBs did not inform us of any monitoring of airline service quality they had undertaken, and stated that they had not investigated or challenged any airline policies on carriage of PRMs.

5.50 The most pro-active approach to airline service quality was that of the Spanish NEB, which in 2009 undertook 409 inspections on passenger rights. The other NEBs which informed us of reviews of airline quality of service took a number of approaches:

- approval of ground handler training (Greece);
- reviewing operating manuals (Latvia, Poland);
- reviewing websites for accessibility (Latvia, Netherlands); and
- annual surveys on airline implementation of the Regulation (Romania).

5.51 Table 5.11 summarises the actions NEBs have taken to monitor airline service quality and policies on carriage of PRMs.

**TABLE 5.12 NEB ACTIONS TO MONITOR AIRLINE QUALITY OF SERVICE AND POLICY**

State	Monitoring of airline quality of service and policy on carriage of PRMs
Belgium	Developed advisory document which sets limits on PRM carriage by Belgian carriers
Denmark	No review of service quality. Discussion of hypothetical reasons for refusal of embarkation discussed at stakeholder meetings
France	None
Germany	No review of service quality.
Greece	Training of ground handlers is approved by HCAA
Hungary	Reviews requirements and Conditions of Carriage for compliance with Regulation
Ireland	Reviewed airline policies on carriage of PRMs
Italy	None
Latvia	Inspections of both main Latvian airlines: reviewed operating manuals, websites and records. Would use unannounced inspections if infringements identified.
Netherlands	Consultations with EDF to check accessibility of airline websites
Poland	NEB reviewed airline's operating manual as a result of one case
Portugal	None
Romania	Annual surveys of airlines on several topics, including refusal of carriage, training and accessible information
Spain	409 inspections in 2009 on passenger rights, including checks on information provided to passengers and compliance with conditions of carriage
Sweden	Reviewed policies on carriage in cooperation with Swedish Work Environment Authority; awaiting EASA report before defining policy on PRM limits
UK	Requested and reviewed information from airlines on the rationales for their policies

- 5.52 In addition, many NEBs are also the licensing authority for carriers registered in the State, and therefore have to approve carriers Operating Manuals. Where this is the case, these NEBs have to approve, and therefore could determine, carriers' policies on carriage of PRMs and requirements to be accompanied.
- 5.53 We have identified that in some cases the licensing authority does have specific policies on carriage of PRMs which must be reflected in carriers Operating Manuals. The stated rationale for these policies is safety, but these policies vary significantly between States, and have not been demonstrated to be evidence-based. In most cases, the licensing authorities do not have specific policies and will approve those proposed by the carriers, subject to these being reasonably based on safety. Most NEBs and licensing authorities have not done anything to challenge policies on carriage of PRMs proposed by carriers, and this has resulted in significant differences in policies between carriers. This issue is discussed in more detail in section 4 above.

#### *Monitoring of airport charges*

- 5.54 As noted previously (see 5.6), no Member State has designated a separate body for enforcement of Article 8 of the Regulation, and several have not yet passed legislation to allow penalties to be imposed for infringements of this Article.
- 5.55 7 out of 16 case study NEBs had undertaken no direct monitoring of the charges levied by airports for providing services under the Regulation, or of the consultation which airports are also obliged to undertake when setting such charges.
- 5.56 The NEBs for Hungary and Italy had undertaken audits of the charges levied, while a number of NEBs had undertaken high level reviews of expenses and charges (including Greece, Latvia, Poland and Romania). The Netherlands and Portugal had undertaken benchmarking exercises against other airports.
- 5.57 Table 5.11 summarises the actions NEBs have taken to monitor airport charges under the Regulation.

**TABLE 5.13 NEB ACTIONS TO MONITOR AIRPORT CHARGES (EXCLUDING INDIRECT MONITORING)**

State	Direct monitoring of airport service charges
Belgium	None
Denmark	None
France	None
Germany	None
Greece	Annual review of expenses and charges
Hungary	Approves airport charges; in-depth audit of costs and charge for Budapest
Ireland	Charges included within regulated price cap. CAR has investigated level of consultation on charges.
Italy	Charges set by ENAC in cooperation with airports and airlines
Latvia	High-level check of charge
Netherlands	Reviews against other airports with advice of Netherlands Competition Authority.

Poland	Review of charges (by other CAO department)
Portugal	Benchmarking exercise across European countries, but no auditing or analysis of whether charges are cost-reflective
Romania	Checks for: existence of charges; separation of accounts; annual report on expenses and revenues. No checks on whether reasonable or cost-reflective (but in the process of recruiting staff with economic skills).
Spain	None
Sweden	None, but review is planned.
UK	None

### Other activities undertaken by NEBs

#### *Interaction between NEBs and with other organisations*

5.58 Given the low number of complaints received by NEBs, interaction with other stakeholders is important to maintain an awareness of any issues arising. Table 5.14 summarises the interactions between NEBs and other organisations.

**TABLE 5.14 NEB INTERACTION WITH OTHER ORGANISATIONS**

State	Form of any interaction between NEB and other organisations
Belgium	None
Denmark	Biannual meetings with stakeholders, including airports, airlines and PRM organisations
France	No information provided at interview
Germany	No information provided at interview
Greece	Meetings with PRM organisations to help define quality standards, joint accessibility reviews of regional airports
Hungary	Biannual meetings with PRM organisations
Ireland	No information provided at interview
Italy	Round table discussions to develop advisory guidance, good relationship with PRM organisation
Latvia	CAA attends quarterly PRM steering committee at Riga Airport with PRM organisations
Netherlands	Consultations with EDF to check accessibility of airline websites
Poland	Worked with PRM organisation to improve CAO understanding of problems faced by PRMs
Portugal	One day seminar for aviation industry stakeholders on Regulations 261/2004 and 1107/2006. Did not include representatives of PRM organisations.
Romania	NEB and PRM organisation cooperated with Bucharest Otopeni to develop quality standards
Spain	No information provided at interview
Sweden	Approximately monthly contact with PRM organisations, including biannual aviation focus group
UK	CCNI: Worked with Equality Commission of Northern Ireland to support introduction. CAA: Attends monthly PRM steering committees at major UK airports with PRM organisations, receives guidance from government advisory committee on disabled travel.

*Promotional activity undertaken by NEBs*

- 5.59 The Regulation requires Member States to inform PRMs of their rights and the possibility of complaints to NEBs. Relatively few NEBs have made significant efforts towards this: of the case study NEBs, only Romania and UK had undertaken nationwide campaigns to promote awareness of passengers' rights under the Regulation, and even in the UK, the PRM organisation we spoke to was not aware of the campaign the UK NEB had conducted.
- 5.60 Other NEBs had undertaken less direct promotional activity, including the following:
- publishing of leaflets to be distributed at airports (Belgium, Germany);
  - holding a conference (Germany); and
  - actions to promote awareness of the Regulation to PRM organisations and other stakeholders, but which did not directly inform passengers (Denmark, Italy, Netherlands, Poland).
- 5.61 A number of NEBs had published information on their websites. While such information can be useful, if a passenger is unaware that they have rights, or is aware they have rights but unaware of the role the NEB plays in enforcing them, they are unlikely to find and read NEB websites. Table 5.15 lists the activities undertaken by NEBs.

**TABLE 5.15 NEB ACTIVITY TO PROMOTE AWARENESS OF THE REGULATION**

State	Actions taken by NEBs to promote awareness of the Regulation
Belgium	Leaflets sent to Brussels Airport; also available on the BCAA website.
Denmark	Letters to stakeholders on obligations under Regulation sent out when it was passed.
France	No information provided at interview. Section on website with information on Regulation.
Germany	BMBVS published a leaflet on Regulation in 2008 and held a conference with PRM organisations and the association of German air carriers; published information on website.
Greece	Information on the Regulation (including videos) placed on website.
Hungary	Information on the Regulation (including videos) placed on website.
Ireland	No information provided at interview. Section on website with in-depth information on Regulation.
Italy	Guidance on implementing the Regulation developed with and circulated to airports, airlines and PRM organisations. No direct promotional activity to passengers.
Latvia	Published PRM complaint form on website.
Netherlands	Contact with Dutch Association of Travel Agents to improve awareness and ensure correct allocation of IATA codes.
Poland	Provided information regarding the Regulation to PRM organisations.
Portugal	No information provided at interview. Section on website with information on Regulation.
Romania	Public awareness campaign with main PRM organisations, including dedicated website, posters and leaflets distributed throughout the country, through airports, carriers, travel agents and municipal bodies.
Spain	No information provided at interview. Section on website with information on Regulation.

UK	EHRC: distribution of guides on rights under Regulation; advertised in national media CCNI: distribution of guides on rights under Regulation, covered in regional media; advertorial piece in newspapers; exhibitions at relevant events.

**Stakeholders views on complaint handling and enforcement**

5.62 We asked each of the stakeholders we contacted about how effectively they believed NEBs had enforced the Regulation; there is some variation between different groups of stakeholders (Figure 3.10 below). A high proportion of stakeholders (over 60% of airports and airlines) have no opinion on how well NEBs have been enforcing the Regulation; often, the reason given for this response was that the stakeholder had had no interaction with the NEB in question. The proportion which believes that NEBs have not been enforcing the Regulation effectively is broadly consistent across stakeholder groups, at 20%-25%.

**FIGURE 5.1 VIEWS OF STAKEHOLDERS ON NEB EFFECTIVENESS**

5.63 In this section, we discuss the particular issues raised by each group of stakeholders.

*Airlines and airline associations*

5.64 Most airlines did not express strong views on whether NEBs had enforced the Regulation effectively, and did not give specific examples of areas where NEBs were performing well or poorly. One airline expressed frustration with the lack of action taken against airports, in particular relating to excessive charges and to lack of focus on safety.

5.65 Of the airline associations we spoke to, AEA believed that effectiveness of enforcement varied by State. IACA believed that in general NEBs were unfairly targeting airlines and not airports. Regarding specific NEBs, it believed that the UK complaint-handling NEB was bringing cases which were factually inaccurate, and that there was insufficient distinction between NEBs and service providers in Spain and Portugal.

*Airports*

- 5.66 A higher proportion of airports than airlines believed that NEBs were ineffective. Two airports believed actions needed to be taken by NEBs to raise the proportion of pre-notifications for assistance. One airport believed that the NEB should take more action to inform passengers of their rights and obligations. Three airports informed us that they had had no interaction with their NEBs, and two stated that their interactions with NEBs had been unsatisfactory: one informed us that the NEB was slow and unresponsive, and the other stated that it was not clear which organisation was their NEB. Only one airport informed us that it had good and close cooperation with its NEB.

*NEBs*

- 5.67 As there have been very few complaints received under the Regulation, there have also been very few complaints which have required forwarding to other NEBs. Therefore, the NEBs have no information on the effectiveness of other NEBs via their responses to forwarded complaints.

*PRM organisations*

- 5.68 13% of PRM organisations believed that NEBs were enforcing the Regulation effectively. Those that believed that NEBs were functioning ineffectively or only partially effectively believed that too little action was being taken, either through active monitoring of the services provided or through taking actions to remedy poor service. Four of the PRM organisations we spoke to had had little or no interaction with their NEB.

*Other organisations*

- 5.69 The other organisations we spoke to noted the following issues with regard to enforcement:
- lack of consistency of approach between NEBs, particularly in terms of whether they believe it is their role to handle complaints;
  - unwieldy complaints systems; and
  - unreasonable requests made by NEBs.
- 5.70 One organisation also believed that some NEBs were taking a sensible line between the demands of PRMs and of service providers.

**Conclusions**

- 5.71 Member States are required to designate a body responsible for enforcing the Regulation regarding flights from or arriving at its territory. They may also designate separate bodies responsible for handling complaints, and for enforcing Article 8. All Member States except Slovenia have designated an NEB, which in most cases is the Civil Aviation Authority and is the same organisation that is responsible for enforcement of Regulation 261/2004. In a number of States, the Regulation is not explicitly referred to in the law designating the NEB, and in Spain, the imposition of sanctions has been challenged, in one case successfully, on the basis that the NEB was not competent to impose the sanction.

- 5.72 There is no requirement in the Regulation that the NEB be independent from service providers and we have identified one case where it is not: the Greek NEB, HCAA, is also the operator of the airports other than Athens.
- 5.73 Member States are also required to introduce penalties in national law for infringements of the Regulation, which must be effective, proportionate and dissuasive. All States except Poland and Sweden have introduced sanctions into national law, although there are a number of States where sanctions have not been introduced for infringements of all Articles. In the UK, national law grants rights additional to those given in the Regulation: passengers who suffer injury to feelings as a result of an infringement of the Regulation may seek financial compensation from the service provider.
- 5.74 There is significant variation in the level of the maximum sanctions which can be imposed for infringements, and in some States the fines may not be at a high enough level to be dissuasive. While some States allow unlimited fines to be imposed and may also impose a prison sentence, maximum sanctions in Estonia, Lithuania and Romania are lower than €1,000.
- 5.75 The Regulation allows any passenger who believes that the Regulation has been infringed, and is dissatisfied with the response they have received from the service provider, to make a complaint to the appropriate body (usually an NEB). However, very few complaints have been received under the Regulation: to date, since the introduction of the Regulation, 1,110 complaints have been received, compared to a total of 3.2 million passenger assisted in 2009 across a sample of 21 EU airports. 80% of all complaints were received by the UK NEBs; none of the NEBs in the other 26 Member States has received more than 50 complaints.
- 5.76 Where an NEB identifies an infringement (through a complaint or other means) it may choose to enforce the Regulation by imposing sanctions. No sanctions have yet been imposed, but France, Portugal and Spain have opened proceedings to impose fines. However, in a number of States, there are likely to be significant practical difficulties in imposing and collecting sanctions, in particular in relation to airlines registered in different States.
- 5.77 Many NEBs had taken at least some action, other than the monitoring of complaints, to assess whether service providers were complying with the Regulation. NEBs in 14 of the 16 case study States had undertaken at least one inspection of airports for compliance with the Regulation, however most inspections have focused on checks of systems and procedures, and did not assess the actual experience of PRMs using the service provided by the airport. NEBs for 9 of the 16 States had undertaken no direct monitoring of the charges levied by airports for providing PRM services, although Hungary and Italy informed us that they had undertaken in-depth audits of the charges levied at airports.
- 5.78 Member States are required to take measures to inform PRMs of their rights under the Regulation, and the possibility of complaining to appropriate bodies. Of those that provided information, relatively few NEBs had made significant efforts to promote awareness of the Regulation by passengers; only two informed us of national public awareness campaigns they had undertaken.

- 5.79 Awareness of the NEBs performance appeared in general to be poor: most stakeholders contacted for the study held no opinion on the effectiveness of enforcement by NEBs, and many informed us that this was because they had had no interaction with them.

## 6. STAKEHOLDER VIEWS ON POLICY ISSUES

### Introduction

6.1 This section summarises views expressed by stakeholders in the course of our consultation exercise on key policy issues, including whether any changes should be made to the scope or content of the Regulation, and what any changes should be.

6.2 Stakeholders also expressed views on the application of the Regulation by airports, carriers, and the complaint handling and enforcement process; these views are summarised in the relevant chapters above.

### Whether changes should be made to the Regulation

6.3 We asked all of the stakeholders that we interviewed whether they considered that any changes should be made to the Regulation.

6.4 Half of the airports we interviewed believed that the Regulation should be changed. Several suggested that the definition of PRM was too broad, and that this was contributing to abuse of services. It was also suggested that the Regulation be amended to require proof of disability, and that the Regulation should also be amended to improve the functioning of pre-notification (for example by making it mandatory). ACI supported these positions. The airports which did not believe the Regulation should be amended, or had a neutral opinion, thought that any lack of clarity in the Regulation could be addressed through information from the Commission.

6.5 In addition, around half of the airlines we interviewed also believed that the Regulation should be changed, however this was for different reasons to those given by airports. A number of airlines believed that it should be possible for them to choose to provide the service themselves or that responsibility should lie with airlines, arguing that as customer-focussed organisations they are better able to do this. Of the airline associations, only ELFAA argued for this amendment. One airport strongly agreed with this position, however most believed that the allocation of responsibility should not be revised, as if airlines were to provide their own service, the incentive to reduce costs would result in unacceptable reductions in service quality. Airlines also supported amendments to clarify the definitions of PRM and mobility equipment, and to improve pre-notification.

6.6 Most of the NEBs we interviewed did not have a clear opinion on whether the Regulation should be amended. Seven NEBs believed that the definitions of terms such as PRM and mobility equipment should be clarified, and two of the NEBs in the case study sample supported changes which would allow airlines to opt out of the Regulation and provide the services themselves.

6.7 Slightly over half of the PRM representative organisations we interviewed believed that the Regulation should be amended. Amendments were suggested to address the following issues:

- limits on number of PRMs which can safely be carried;

- allocation of seating;
- requirements on compensation payable for damaged mobility equipment, and improvements to its handling; and
- provision of information.

6.8 EDF suggested that compensation should be introduced, as this would incentivise more complaints and therefore improve service. Those that did not believe the Regulation should be amended either believed that the Regulation had not been in force for long enough to assess its efficacy, or that poor implementation was the cause of any problems identified.

### **The content and drafting of the Regulation**

6.9 We outline below some of the main detailed issues that have been raised by stakeholders. Few stakeholders believed that there were significant issues with the drafting of the Regulation that made it difficult to implement, however many stakeholders outlined issues relating to insufficient definition.

#### *Definition of terms*

6.10 The issue most commonly raised, particularly by airports and NEBs, is the definition of PRM set down in the Regulation. Many stakeholders believe this is too broad and opens the service to abuse, both by passengers and by airlines. A number of airports believed that airlines were using the wide definition to allow them to avoid costs: passengers who were previously classified as MAAS (including unaccompanied minors, VIPs and passengers with language issues), and therefore paid for by the airline, are now classified as WCHR and the cost is borne by all airlines. Some airports believed this could be resolved by setting out a clear definition of MAAS.

6.11 The definition in the Regulation could include a wide range of passengers who some stakeholders do not believe were the intended beneficiaries of the Regulation, including:

- obese passengers;
- stretchers;
- medical cases; and
- passengers who had sustained injuries (whose travel is often paid for by their travel insurance).

6.12 Some stakeholders believed that the definition of PRM was so broad that it could be considered to include passengers which the Regulation was clearly not intended to cover, such as passengers whose intellectual and sensory capacities were temporarily impaired by excessive consumption of alcohol.

6.13 Several stakeholders believed this issue could be resolved by requiring some proof of need for assistance in order to receive assistance, for example in the form of a disability ID card. This was opposed by some PRM organisations.

6.14 Stakeholders also considered that a number of other terms were not sufficiently defined. These included:

- **Mobility equipment:** The reference in Annex II to mobility equipment states that it should include electric wheelchairs but does not define the term any further. Stakeholders had differing views on what should be included in this: several airlines believe that it should refer only to equipment that is required to make it possible to travel by air, but a number of PRM organisations believed it should include items which make the *purpose* of the trip possible. This could include, for example, joists for lifting passengers in and out of seats.
- **Medical equipment:** Several stakeholders believed there was insufficient clarity on which items were classified as medical equipment and which as mobility equipment. It was also uncertain whether airlines could any limits (for example on weight) on its carriage.
- **Accessible formats:** It was reported that the requirement for designated points of arrival and departure to offer basic information about the airport in accessible formats did not define what was required, for example, whether all such points should include a map in Braille of the airport.
- **Safety rules:** Article 4(3) requires airlines to make publicly available the safety rules that it applies to the carriage of PRMs, and any restrictions on the carriage of PRMs or mobility equipment. Several stakeholders informed us that such documents were not defined, and it was not clear what this term referred to.

#### *Lack of clarity in the Regulation*

- 6.15 In one case, the requirements of the Regulation appear contradictory. Several NEBs noted that the responsibility for enforcement defined in Article 14 contradicts that specified in Recital 17. Article 14 states that NEBs are responsible for enforcement regarding flights departing from or arriving at airports within their State, while Recital 17 places responsibility on the NEB of the State which issued the carrier's operating license.
- 6.16 Stakeholders identified a number of other provisions where they considered the description of obligations was insufficiently clear, including:
- **Article 7:** Under this Article, airports are required to provide assistance to PRMs holding reservations so that they able to take their flight, however, it does not define what an airport is required to provide to a PRM who does not hold a valid reservation. In addition, it does not define the airport's liability when a PRM misses their flight, in particular where the passenger has not pre-notified their requirement for assistance.
  - **Article 11:** One airport had been the subject of a legal challenge by an airline regarding the inclusion within its PRM service charge of the costs of providing training under Article 11(b) to subcontractors at the airport. The airline contended that since the paragraph did not refer to subcontractors (unlike Article 11(a)) the airport was not obliged to provide such training. Several airports believed that the requirement under this Article to provide disability-related training to all new staff (not just those whose role required them to interact with PRMs) was unnecessary. In contrast, some PRM organisations believed that training should be explicitly extended to Commanders of aircraft, to enable them to make better-informed decisions on whether to embark PRMs. PRM organisations also noted

that it was not clear whether airports were required to provide training on specific procedures for handling mobility equipment; as damage to mobility equipment is perceived to be a significant issue, they believed this requirement should be explicitly included.

- **Article 12:** Several PRM stakeholders raised concerns that the compensation referred to in this Article would be consistent with the Montreal Convention, and that the limits under the Convention were insufficient for some mobility equipment, such as technologically advanced wheelchairs (see 4.55). Although this had not been an issue to date – in almost all cases that we were informed of, airlines waived the limits – it creates uncertainty for wheelchair users travelling by air. This is heightened by the reported difficulties in obtaining insurance for such equipment.
- **Annex I:** A number of airlines raised concerns regarding the allocation of liability when boarding a passenger. For example, they did not believe that liability was clear in the case that an accident occurs on board an aircraft when airport staff are present. Some airports raised concerns regarding liability for damage to wheelchairs while in their care. In addition, the services which should be provided to transfer passengers and the measures which should be taken to accommodate assistance dogs are not defined.

- 6.17 Regarding training, some stakeholders raised the issue of the legal weight of ECAC Document 30, particularly Annex 5-G which sets out recommended guidance for training regarding PRM services. While this is referred to in the Regulation as a policy which should be considered when developing quality standards, the same reference is not made in Article 11 where training requirements are defined.

*Conflicts with 14 CFR Part 382*

- 6.18 As discussed in section 4 above, the US regulations on carriage of PRMs (14 CFR Part 382) apply to European carriers operating flights to/from the US, and other flights where these are operated as codeshares with US carriers. There are a number of differences between these rules and the Regulation, the most significant of which is the allocation of responsibilities for assistance: the Regulation requires airports to arrange the provision of services to PRMs, while under the US legislation it is the airlines that have this responsibility. This has caused difficulties for carriers who are required to comply with legislation that conflicts, although the US legislation does allow carriers to apply for a waiver where there is a conflict of laws.

*Pre-notification*

- 6.19 The requirement to pre-notify requests for assistance and problems in doing so were raised by many stakeholders (see 4.98). Stakeholders held differing views on how this should be improved. Several airlines (in particular those with operations to the US, where requiring pre-notification is usually prohibited) believed that the requirement to pre-notify should be removed; they believed that the resulting increases in costs of provision would be marginal, as most resourcing requirements could be planned on the basis of observed variation in demand (over the course of a year, a week or a day as appropriate). This approach was supported by some PRM organisations. In contrast, a number of airports believed that pre-notification should be made compulsory, and

this proposal was opposed by some PRM organisations.

*Level of detail*

- 6.20 Almost all stakeholders informed us that there was significant variation in the services provided under the Regulation. This is partly a result of the approach taken by the Regulation, which does not seek to define in detail the services to be provided. In contrast, the equivalent US rules set out in detail all aspects of the services to be provided, in effect setting out procedures to be followed by all service providers.
- 6.21 Several stakeholders have raised the lack of detail in the Regulation as an issue, and believe that a more prescriptive approach would lead to greater harmonisation of the services provided. In particular, they believed that the services set out in Annexes I and II and the training required under Article 11 should be defined with greater precision.

---

## Conclusions

- 6.22 We asked each stakeholder we contacted for the study whether they believed that changes should be made to the Regulation. Slightly more thought that there should be changes than did not, but there was not a clear majority in favour of changes. The reasons given for making changes and what those changes should be varied depending on the stakeholder.
- 6.23 No significant problems were identified with the drafting of the Regulation, although there is a conflict between Recital 17 and Article 14. In general, stakeholders had not found it difficult to follow the provisions of the Regulation. The most common issue raised with regard to the text of the Regulation is that the definitions used are not sufficiently precise; in particular, the definition of PRM is believed by airports and some airlines to be too broad, and this is believed to make it difficult for them to take action to counter abuse. The Regulation is much less precise about the policies and procedures that have to be followed, particularly by air carriers, than the equivalent US regulation on carriage of PRMs, 14 CFR Part 382.
- 6.24 In addition, many stakeholders pointed out the significant differences between the Regulation and 14 CFR Part 382, which applies to European carriers on flights to/from the US and other flights operated as codeshares with US carriers. One of the most significant is the requirement to pre-notify requirements for assistance was raised as an issue, particularly by airlines operating to the US, and by airports where the rates of pre-notification were low. Two different approaches were proposed to address the perceived problem. Some airlines (primarily those flying to US) proposed removing the requirement to pre-notify, which would resolve the conflict with US legislation; this was opposed by airports on the grounds that it would reduce service quality and increase cost. Some airports proposed making pre-notification compulsory; this was opposed by some PRM organisations on the grounds that it would reduce the freedom of PRMs to travel.

## 7. FACTUAL CONCLUSIONS

### Introduction

- 7.1 This section summarises our conclusions in relation to how effectively airports and airlines are providing the assistance required by the Regulation, and how effectively Member States and National Enforcement Bodies (NEBs) are undertaking their roles specified in the Regulation.

### Implementation of the Regulation by airports

- 7.2 We selected a sample of 21 airports for detailed analysis for the study, and reviewed how they had implemented the Regulation, through desk research and through interviews with representatives of airport management and other stakeholders.
- 7.3 Prior to the introduction of the Regulation, assistance at airports was provided by airlines and usually contracted from ground handlers. The Regulation places responsibility for provision of this assistance with the airport management company. We found that all airports in the sample for this study had implemented the provisions of the Regulation, although we were informed by airlines and other stakeholders that the regional airports in Greece had yet to effect the change from provision by ground handlers to provision by airports. We were not informed by stakeholders of any other EU airports at which the Regulation has not been implemented.
- 7.4 Most of the sample airports had contracted the provision of PRM assistance services to an external company, generally selected through a competitive tender process. However, several airports had changed their service provider within 18 months of the Regulation coming into force; this was interpreted by some as a sign that the service initially specified and procured had been inadequate. One major hub airport acknowledged that it had had significant problems with a PRM service provider.
- 7.5 The service provided at the sample airports varies in terms of: the resources available to provide the services; the level of training of the staff providing assistance; the type of equipment used to provide services; and the facilities provided to accommodate PRMs (such as PRM lounges). According to the information provided by PRM organisations, this results in variability in service quality. PRM representative organisations, airlines and some airports cited a number of examples of poor quality or even unsafe provision of services at airports, although it is not possible to infer how regular these occurrences are. Overall, most stakeholders believed that the Regulation had been implemented effectively by airports.
- 7.6 There is also significant variation between airports in the frequency with which PRM services are requested: the level of use of the service varies by a factor of 15 between the airports for which we have been able to obtain data, although in most cases between 0.2% and 0.7% of passengers requested assistance. The type of PRM service requested also varies considerably between airports although in all cases the largest category is WCHR (passengers who cannot walk long distances but can board the aircraft, including using stairs, unaided). Both the frequency of use and the type of service required are likely to be affected by the varying demographics of the passengers using different airports; PRMs account for the highest proportions of

---

passengers at holiday airports, such as Alicante, and airports serving pilgrimage destinations, such as Lourdes.

- 7.7 The Regulation requires airports to publish quality standards. Most of the sample airports had done so, although some had published them only to airlines. Almost all quality standards followed the example format set out in ECAC Document 30, which defines the percentage of PRMs who should wait for up to given numbers of minutes. Some airports published qualitative measures in addition to these time standards, such as descriptions of the treatment the passenger should expect at all points of the service. However, none of the sample airports had published the results of any monitoring of these quality standards, and whilst most did undertake monitoring in some form, only four had commissioned external checks of the service.
- 7.8 The Regulation allows airports to levy a specific charge to cover the costs of assistance. All but one of the sample airports had done so. The level of charges varied considerably: the highest charges of the sample airports were at Paris CDG and Frankfurt. We analysed the charges to examine whether variation could be explained by higher frequency of use of the service, differences in levels of wages and other costs between States, or differences in service quality, but there was no evidence that this was the case. The design of the airport is a further factor influencing the cost of service provision and hence the level of charges: the assistance service can be provided at lower cost at an airport such as Amsterdam Schiphol, which is on a single level and has one integrated terminal building, than at an airport with a more complex configuration such as Paris CDG.
- 7.9 Some stakeholders believe that the requirements to select contractors and establish charges in cooperation with users and PRM organisations were not followed thoroughly. Many airlines did not believe that consultation on either element had been sufficient, and this view was shared by some PRM organisations. There were a number of barriers to effective consultation, including linguistic restrictions and airport user committees which did not adequately represent all air carriers. Consultation with air carriers was reported as particularly poor in Spain, Portugal and Cyprus. In contrast to this, we note that several airports stated that they had sought the participation of PRM organisations but had found this difficult to obtain.
- 7.10 The Regulation requires airports to provide specialised disability training for staff directly assisting PRMs, and whilst all sample airports had done so, there were significant variations in the length and format of this training. The shortest training course among those for which we have data was 3 days long, while the longest lasted 14 days. There was similar variation in the length of training provided for passenger-facing staff who did not provide direct assistance. A number of airports informed us that they did not provide disability-awareness training for staff not in public-facing roles, or only provided it on a voluntary basis.

### Implementation of the Regulation by air carriers

- 7.11 We selected a sample of 20 air carriers for the study. We reviewed how they had implemented the Regulation, both through review of their published policies, procedures and Conditions of Carriage, and through interviews with the carriers themselves and with other stakeholders.
- 7.12 The main obligation that the Regulation places on air carriers is that it prohibits refusal of carriage of PRMs, unless this is necessary to meet national or international safety rules or requirements imposed by the carrier's licensing authority, or is physically impossible due to the size of the aircraft or its doors. We found that air carriers largely comply with this, although some state in their Conditions of Carriage that carriage of PRMs is conditional on advance notification. In our view, this is not consistent with the Regulation, which does not allow for a derogation on the prohibition of refusal of carriage on the basis that the passenger has not provided advance notification. In addition, we found that a small number of carriers impose requirements for medical clearance which appear to be excessively onerous and to be worded to include PRMs as well as passengers with medical conditions.
- 7.13 We found significant differences in policies relating to carriage of PRMs between carriers – even between carriers with similar aircraft types and operational models. The most significant difference is that some carriers impose a numerical limit on the number of PRMs that can be carried on a given aircraft. These can be quite low: some carriers have limits of 2-4 PRMs on a standard single-aisle aircraft such as an Airbus 319. These limits are not required by any international or European safety rules, although in some cases they are required by the licensing authority for the carrier concerned; often, although not always, this is the same organisation that has been designated as the NEB. However, in most cases, these requirements are defined by carriers in their Flight Operations Manuals; although the licensing authority has to approve this, it appears that in most States, little has been done to challenge the limits proposed by carriers. Whilst the stated rationale for these limits is safety, there does not seem to be a clear evidence base for them, and they are specifically prohibited by the equivalent US regulation on carriage of PRMs (14 CFR part 382).
- 7.14 The Regulation also allows carriers to require that PRMs be accompanied, subject to the same safety-based criteria. We found that a number of carriers require PRMs to be accompanied where they are not 'self-reliant', which can mean that the PRM cannot (for example) eat unaided. In our view this may be an infringement of the Regulation because there is no direct link to safety; for those carriers that fly to the US, it is also an explicit breach of the US PRM rules. This type of condition is also, in our view, unreasonable for short haul flights for which passengers could decide to (for example) not eat or drink during the flight. Other carriers require PRMs to be accompanied only where they are not self-reliant **and** this has a safety impact (for example, if the PRM could not exit the aircraft unaided in an emergency or put on an oxygen mask without assistance); this is consistent with the Regulation.
- 7.15 The Regulation also requires carriers to publish safety rules relating to the carriage of PRMs, although it does not specifically state what issues these safety rules should cover. We found that carriers all published some PRM-related information, but few published a notice specifically described as being the safety rules related to carriage of

PRMs. In some cases there appeared to be significant omissions from the information published by carriers: for example, some of the carriers which imposed a numerical limit on the number of PRMs which could be carried did not publish this.

- 7.16 Annex II of the Regulation sets out various requirements for services which have to be provided to PRMs by carriers. Evidence for the extent to which this is provided is limited, and restricts a fair assessment of compliance with these requirements. There is however sufficient evidence to conclude that the vast majority of case study air carriers are complying with the requirement to carry up to two items of mobility equipment free of charge. Some PRM representative groups were critical of the effectiveness of airlines in implementing the Regulation, and we were informed of some particularly bad passenger experiences, but it is difficult to assess how common such occurrences are.

### **Enforcement and complaint handling by NEBs**

- 7.17 Member States are required to designate a body responsible for enforcing the Regulation regarding flights from or arriving at its territory. They may also designate separate bodies responsible for handling complaints, and for enforcing Article 8. All Member States except Slovenia have designated an NEB. In the majority of States, the NEB for this Regulation is the same organisation as the NEB for Regulation 261/2004, in most cases the Civil Aviation Authority. In a number of States, the Regulation is not explicitly referred to in the law designating the NEB, and in Spain, the imposition of sanctions has been challenged, in one case successfully, on the basis that the NEB was not competent to impose the sanction.
- 7.18 Member States are also required to introduce penalties in national law for infringements of the Regulation, which must be effective, proportionate and dissuasive. All States except Poland and Sweden have introduced sanctions into national law, although there are a number of States where sanctions have not been introduced for infringements of all Articles. There is significant variation in the level of the maximum sanctions which can be imposed for infringements, and in some States the fines may not be at a high enough level to be dissuasive. While some States allow unlimited fines to be imposed and may also impose a prison sentence, maximum sanctions in Estonia, Lithuania and Romania are lower than €1,000.
- 7.19 The Regulation allows any passenger who believes that the Regulation has been infringed, and is dissatisfied with the response they have received from the service provider, to make a complaint to the appropriate body (usually an NEB). However, very few complaints have been received relating to the Regulation: to date, since the introduction of the Regulation, 1,110 complaints have been received, compared to a total of 3.2 million passengers assisted in 2009 across the case study sample of 21 EU airports. There is also a significant disparity in which States had received complaints: 80% of all complaints about infringements of the Regulation were received by the UK NEBs; none of the NEBs in the other 26 Member States had received more than 50 complaints.
- 7.20 In the UK, national law grants rights additional to those in the Regulation: passengers who suffer injury to feelings as a result of an infringement of the Regulation may seek financial compensation from the air carrier or airport concerned. This is in line with

disability rights legislation applying to other sectors in the UK. A consequence of this is that the process for handling complaints is significantly different in the UK from other Member States, because passengers may have a right to claim compensation from the carrier or airport concerned. At least in part, this also explains the significantly higher number of complaints in the UK compared to the other Member States.

- 7.21 Where an NEB identifies an infringement (through a complaint or other means) it may choose to enforce the Regulation by imposing sanctions. No sanctions have yet been imposed, but the NEBs for France, Portugal and Spain have opened proceedings to impose fines. In most States, the process to impose sanctions is equivalent to that for Regulation 261/2004. In a number of States, there are likely to be significant practical difficulties in imposing and collecting sanctions, in particular in relation to airlines registered in different Member States. This is due to the same reasons identified in our recent study for the Commission of Regulation 261/2004<sup>14</sup>: either specific limitations in national law on imposition of sanctions on foreign companies, or administrative requirements which cannot be met if the carrier is based outside the State. This means that, in these States, the system of sanctions cannot be considered to be dissuasive as required by the Regulation.
- 7.22 There is no requirement in the Regulation that the NEB must be separate from the service providers that it has to regulate. The only case we have identified where the NEB is also a service provider is Greece, where HCAA is the operator of the airports other than Athens, as well as the NEB. Although not an infringement of the Regulation, this is a breach of the principle of separation of regulation and service provision. As noted above, the most significant failure to implement the Regulation that we have identified is at the HCAA airports, and HCAA has not imposed a sanction on itself for this failure to implement the Regulation.
- 7.23 Many NEBs have taken at least some action, other than the monitoring of complaints, to assess whether service providers were complying with the Regulation. NEBs in 14 of the 16 case study States have undertaken at least one inspection of airports for compliance with the Regulation. However, most inspections have focused on checks of systems and procedures, and did not assess the actual experience of PRMs using the service provided by the airport. NEBs for 9 of the 14 States have undertaken no direct monitoring of the charges levied by airports for providing PRM services, although Hungary and Italy informed us that they had undertaken in-depth audits of the charges levied at airports.
- 7.24 Member States are required to take measures to inform PRMs of their rights under the Regulation, and the possibility of complaining to appropriate bodies. Of those that provided information, relatively few NEBs had made significant efforts to promote awareness of the Regulation by passengers; only two informed us of national public awareness campaigns they had undertaken, and even in one of these States, a key national PRM organisation was not aware that the public campaign had taken place. Awareness of the NEBs performance appeared in general to be poor: most

---

<sup>14</sup> Evaluation of Regulation 261/2004; Steer Davies Gleave on behalf of European Commission, February 2010

stakeholders contacted for the study held no opinion on the effectiveness of enforcement by NEBs, and many informed us that this was because they had had no interaction with them.

### **Other issues that have arisen with the Regulation**

7.25 Stakeholders also pointed out a number of other issues with the Regulation. Whilst few significant problems have been identified with the drafting of the Regulation, the following issues were identified:

- there is a conflict between Recital 17 and Article 14, regarding which NEB is responsible for enforcing the Regulation in relation to air carriers;
- the definition of PRM used in the Regulation is very broad, and could be interpreted to include some categories of passenger who it might not have been intended to cover (such as obese passengers, or even passengers temporarily incapacitated due to excess alcohol consumption); and
- the Regulation does not specify in detail the policies or procedures that have to be followed by air carriers, particularly if compared to the equivalent US regulations, and this has resulted in significant differences in policies between carriers.

7.26 In addition, stakeholders emphasised the significant differences between the Regulation and the equivalent US regulations on carriage of PRMs (14 CFR part 382). These can cause difficulties for air carriers, as part 382 applies to non-US carriers on flights to/from the US and all other flights that are operated as codeshares with US carriers (even if not to/from the US). The most significant differences are:

- in most circumstances, part 382 does not permit carriers to request pre-notification;
- part 382 does not allow limits on the number of PRMs on an aircraft and limits the circumstances in which an accompanying passenger may be required; and
- part 382 places the responsibility for provision of PRM assistance services on the air carrier, whereas the Regulation places this responsibility on the airport.

### **Conclusions**

7.27 Overall, despite difficulties with service provision at some airports, the services required by the Regulation have been implemented at most European airports and compliance with the Regulation appears to be relatively good. Most stakeholders considered that the quality of service provision had improved since the introduction of the Regulation, although some airlines strongly disagreed with this.

7.28 The key issue we have identified with the implementation of the Regulation is that there are significant differences between carriers in their policies on carriage of PRMs. This arises in part from the fact that the Regulation does not specify in detail the services to be provided and the procedures to be followed, in particular if compared to the equivalent US regulations on carriage of PRMs. The Regulation allows carriers to refuse carriage or require a passenger to be accompanied on the basis of safety requirements, but these requirements are not specified in law, and therefore there are significant differences in interpretation of these requirements.

## 8. RECOMMENDATIONS

### Overview

- 8.1 This section sets out our recommendations relating to how to improve the operation and enforcement of the Regulation. We present first a number of recommendations which would improve the operation of the Regulation without requiring any changes to be made to the text. However, we believe some changes are necessary which could only be implemented through amendments to the Regulation.

### Measures to improve the operation of the Regulation

- 8.2 This section sets out measures to improve the operation of the Regulation. It covers the following:
- improvement in the operation of PRM services at airports;
  - issues relating to the carriage of PRMs by airlines;
  - actions to be taken by or in relation to NEBs; and
  - guidance on PRM services and carriage which should be produced by the Commission, in consultation with other parties.

### *Airports*

- 8.3 All airports in the sample for the study had implemented the provisions of the Regulation in some form, although as the Regulation does not precisely specify the quality of service to be provided, PRM organisations have reported this as being variable. We do not recommend any significant changes, and recommend a number of measures which will help airports to move towards consistency of service.

### *Maintain allocation of responsibility*

- 8.4 Several airlines (primarily those operating low-cost business models) argued in their submissions to the study that they should be permitted to provide or contract their own PRM assistance services, as they could provide it more cost-efficiently than airports. We believe that this could create an incentive to minimise the service provided and hence would risk a reduction in service quality. Whilst there were initially significant issues with the quality of PRM service provision at certain airports, most stakeholders believed that these issues had now been addressed, and therefore we recommend that allocation of responsibility for PRM services to airports should **not** be amended.

### *Monitor misuse of services*

- 8.5 A number of airports (in particular larger and busier airports) reported that the services they provided for PRMs were sometimes used by passengers who did not appear to have the right to do so under the Regulation. There was no consensus amongst airports about how significant this issue was. This variation in perception of the problem, combined with the nature of the problem itself, makes it difficult to accurately assess its extent. We recommend that the Commission monitor reports of misuse of services, so that it is alerted if the problem becomes more consistently serious.

*Improve provision of information*

8.6 Several PRM organisations informed us that provision of information on accessibility by airports could be improved. In particular, we were informed that many PRMs would find it helpful to have access to information, in a consistent format, regarding the accessibility of airports to which they were travelling. This could be provided through a webpage on an airport's website included, for example:

- the maximum likely walking distance within the airport;
- locations of any flights of stairs;
- the means used for access to aircraft (airbridge or stairs);
- any facilities available for PRMs;
- appropriate contact details for PRM services both for airlines and the airport<sup>15</sup>.

8.7 Whilst some of this information is often available on airport websites, it can be difficult to find and is not always complete. To address this, we suggest that ACI could develop a single website which would either include all of this information or alternatively provide links to the specific pages on airport websites which include this information.

*Share best practice on contracting of PRM service providers*

8.8 We identified two issues with the process for selection of PRM service providers:

- several airports which had subcontracted PRM services had re-tendered within 18 months of the Regulation entering into force, as there were significant issues with the operation of the service; and
- many airlines informed us that they did not believe the extent of consultation from airports was sufficient.

8.9 To address these issues, we recommend that the Commission, in co-operation with ACI, develop and distribute best practice advice on contracting for services, including:

- **Content and structure of the contract:** This could include the level of detail at which contract terms relating to services should be specified, and any penalties for failure to meet required standards. It could be provided in the form of a sample contract. This would help to reduce the likelihood of issues with the contract leading to retendering.
- **Recommended methods of cooperation:** This could give details of the level and manner of consultation an airport should undertake. It could detail how to involve airport users in consultation at all points of a tendering process, including from drafting of invitation to tender documents, to evaluating and scoring bids, and might include input on the eventual decision. It could also include how to involve PRM organisations in this process. Where implemented, this would improve the perception by airport users and other parties of airport consultation.

---

<sup>15</sup> London Luton airport provides a good example of this; see <http://www.london-luton.co.uk/en/content/3/1427/how-to-book-special-asistance.html>.

*Share best practice on training*

- 8.10 Our research found that approaches to training of staff to provide PRM services varied significantly. In particular, there was significant variation in length of training (between 3 and 14 days) and method of delivery (videos, classroom-based or practical), to provide what should in principle be the same services. In addition, some airports reported that they had sought assistance on developing training from local PRM organisations, but the PRM organisations were too resource-constrained to be able to provide the required assistance. We therefore recommend that the Commission work with ACI and EDF to develop and distribute best practice advice on training, which would include recommended minimum levels.

**Airlines**

- 8.11 A key problem identified in our research is the lack of consistency between airline policies on the carriage of PRMs. These policies are subject to approval by the carriers' licensing authorities (which are often the same organisation as the NEB), but in many cases they approve policies with little or no challenge.

*Work with EASA to determine safe policies on carriage of PRMs*

- 8.12 Article 4 of the Regulation permits air carriers to refuse to accept reservations from a PRM, or to require that a PRM be accompanied, in order to meet safety requirements set out in international, Community or national law, or established by the authority that issued the carrier's operating certificate. However, other than minimal requirements in EU-OPS, Community law does not impose specific requirements regarding the safe carriage of PRMs. There is little published research into safety issues regarding carriage of PRMs, so even where licensing authorities do seek to challenge proposed airline policies or impose their own, there is a limited evidence base on which to do this. This results in wide and unjustifiable variation in airline policies.

- 8.13 Therefore, we recommend that the Commission work with EASA to determine policies on carriage of PRMs which are consistent with safe operation. Such policies should include any limits on the number of PRMs permitted on board an aircraft, where PRMs may be seated, and whether and under what circumstances PRMs must be accompanied. The policies should take into account the type of aircraft and the different safety implications of carriage of different types of PRMs.

*Airlines to publish clear policies on carriage of PRMs*

- 8.14 We have identified a number of airlines which are failing to publish clear policies on carriage of PRMs. We recommend that the Commission encourage the relevant NEBs to ensure that the airlines identified in Table 4.1 as not publishing sufficient information do so. The Commission could also encourage NEBs to review the policies of airlines outside the study sample to ensure that these provide sufficient information.

*Monitor pre-notification*

- 8.15 Pre-notification of requirements for assistance should have two benefits:

- it should ensure that PRMs are able, on arrival at an airport, to promptly receive the assistance they require to take their chosen flight; and
- it should allow airports to plan their staffing requirements efficiently, minimising the cost of service provision .

8.16 However, at present, as discussed in section 4.74 above, pre-notification is not functioning well. Of the 16 airports which provided us with information on levels of pre-notification, 11 have rates of pre-notification under 60%. The result of this is that at most airports, the rate of pre-notification is too low for the airport to gain efficiency benefits, and the incentive for PRMs to pre-notify is reduced (since at many airports a similar quality of service is provided regardless of pre-notification). Therefore the system as it presently operates requires airlines and airports to incur the costs of enabling pre-notification, but not to realise the benefits of reduced costs or smoother provision of services. We recommend that the Commission monitor the operation of pre-notification (for example by encouraging NEBs to collect appropriate data), and in future assess the situation and consider either eliminating the requirement for pre-notification or alternatively retaining it and providing passengers and carriers with more incentive to pre-notify.

*Encourage airlines to provide receipts for pre-notification*

8.17 Several PRM organisations reported problems where PRMs had pre-notified their requirements for assistance, but then found that this information had not been passed on to airport or airline staff. To address this, and to provide PRMs with evidence that they can use when making a complaint, we recommend that the Commission encourage airlines to provide PRMs with a receipt for pre-notification. Once this voluntary scheme has been in place for an appropriate length of time, the Commission could consider amending the Regulation to make it compulsory.

*Monitor implementation of ECAC Document 30 recommendations on carriage*

8.18 Section 5 of ECAC Document 30 contains a number of recommendations regarding on-board provisions for PRMs which it recommends airlines commission in new or significantly refurbished aircraft. These include (depending on the type of aircraft) the provision of on-board wheelchairs, provision of at least one toilet catering for the special needs of PRMs, and ensuring that at least 50% of all aisle seats should have moveable armrests<sup>16</sup>. We recommend that the Commission monitor uptake of these recommendations.

**NEBs**

8.19 The greatest problem identified by the study regarding NEBs was the lack of proactive measures taken to monitor or enforce the Regulation. In most cases this has not had significant detrimental effect, as most airports and airlines have implemented the provisions of the Regulation, but could become an issue if the situation changes in the future. In most States few complaints had been received by the NEB, and as a result

---

<sup>16</sup> See ECAC/CEAC DOC No. 30 (PART I), 11th Edition/December 2009, Section 5.10.5.

the handling of complaints has not been raised as a significant issue.

*Encourage all States to implement the Regulation*

- 8.20 We identified in section 5.13 above that some States have not as yet either introduced penalties into national law for all infringements of the Regulation, or designated an NEB. We recommend that the Commission encourage all States to comply with their obligations under the Regulation.

*Encourage better promotion of rights under Regulation*

- 8.21 Article 15(4) of the Regulation requires Member States to take measures to inform PRMs of their rights under the Regulation and of the possibility of complaint to the relevant NEB. Of the NEBs which provided information on this point, few had taken direct actions to promote the Regulation. Many had published sections with information on their websites, but unless PRMs are made aware that this website exists and is relevant to them, we do not believe that this is sufficient. Only two case study NEBs informed us that they had commissioned national promotional campaigns relating to the Regulation. We recommend that the Commission takes actions to encourage NEBs to inform PRMs of their rights under the Regulation.

*Encourage NEBs to pro-actively monitor application of Regulation*

- 8.22 Article 14 of the Regulation requires Member States to take the measures necessary to ensure that the rights of PRMs are respected. Our research found that most NEBs were taking only limited actions to monitor the application of the Regulation (see 5.42), and few NEBs were directly monitoring whether airports were meeting published quality standards. Many NEBs rely on complaints as a method of monitoring, but without promotion of awareness of rights and of the NEB as the body able to receive complaints (see above), a low number of complaints cannot be interpreted as evidence that there are no issues with the application of the Regulation.

- 8.23 We therefore recommend that the Commission encourage NEBs to pro-actively monitor the application of the Regulation. This could take a number of forms:

- increased interaction with PRM organisations;
- direct monitoring of quality of service provided, for example through ‘mystery shopping’ and other types of inspections of airports (which could be conducted in cooperation with PRM organisations);
- collection of airline pre-notification data; and
- reviews of airline websites for accessibility.

***Guidance to be produced***

- 8.24 We recommend that the Commission should, in collaboration with airlines, airports, PRM representatives and NEBs, develop a detailed good practice guide regarding implementation of the Regulation. This could take the code of practice issued by the

UK Department for Transport<sup>17</sup> as a model, and could form the basis for later detailed revisions of the Regulation. Publishing voluntary policies would allow potential future amendments to the Regulation to be tested in practice before adoption.

- 8.25 The good practice guide could address the following areas (some of which are discussed in previous sections on recommendations regarding airports and airlines):
- recommendations on safety limits;
  - the format and content of policies on carriage (including safety rules);
  - detailed training modules implementing the recommendations in Annex 5G of ECAC Document 30, in addition to recommended minimum duration;
  - consultation; and
  - airport accessibility information.
- 8.26 A key issue to be addressed in this guidance would be the quality standards to be published by airports. At present, most airports follow the format of the minimum standards recommended in ECAC Document 30<sup>18</sup> (see 3.57). However, these standards are a limited measure of the quality of service received by PRMs. We recommend that the Commission work with ECAC to develop recommended minimum standards which are wider in scope, and cover qualitative aspects of the service received. Airports such as London Luton, which publishes a wide range of quality standards which address all aspects of the service, could provide a model for this approach.
- 8.27 The guidance should also specify the information which should be included in carriers' published policies on carriage of PRMs, which should cover at least the areas identified in 4.8.

#### **Recommendations for changes to the Regulation**

- 8.28 The measures described above could significantly improve the operation of the Regulation. However, we believe that some issues could only be addressed through amendments to the text, and therefore we also set out:
- Recommendations for some minor amendments to address issues with the text (such as areas where the Regulation is unclear) which we believe should be implemented as soon as possible.
  - Suggestions for more significant revisions to be considered in the longer term. These would require consultation with stakeholders and an impact assessment to be undertaken.

#### ***Changes to be implemented as soon as possible***

##### *Training*

---

<sup>17</sup> *Access to Air Travel for Disabled Persons and Persons with Reduced Mobility – Code of Practice*, UK Department for Transport, July 2008.

<sup>18</sup> See ECAC/CEAC DOC No. 30 (PART I), 11th Edition/December 2009, Annex 5C section 1.6.

- 8.29 We recommend that Article 11 be extended to require airlines to ensure that the personnel of their ground handling companies are trained to handle mobility equipment. Several PRM organisations informed us that damage to mobility equipment was one of the most serious problems for PRMs travelling by air, and that such damage could cause considerable distress to PRMs.
- 8.30 We recommend that Article 11 be amended to include the provisions in Recital 10, namely to specify that the provisions regarding training in ECAC Document 30 be taken into account when commissioning and developing training. This could be phrased in the manner of Article 9(2) on quality standards.
- 8.31 We recommend that Article 11b be amended to clarify that disability-equality and – awareness training is required for passenger-facing subcontractors as well as personnel directly employed by an airport. This would be consistent with Article 11a regarding personnel providing direct assistance. We were informed by one airport that an airline had disputed the level of PRM charges on the basis that the charges recovered the costs of training subcontractors, which the airline believed was not required by the Regulation.
- 8.32 We recommend that the Commission consider removing the requirement in Article 11c for disability-awareness training for non-passenger facing personnel, as it is not clear why this should be any more necessary in this sector than in others.

*Obligatory charges where costs recovered*

- 8.33 Article 8 permits airports to levy specific charges on airport users to fund the assistance provided under the Regulation, which must be reasonable, cost-related, transparent and established in cooperation with airport users. However, it does not *require* airports to levy such charges; several of the airports we researched for the study recovered costs through their general passenger charges, and did not identify the PRM component separately. Where specific charges are not applied, airports are not required to follow the requirements on reasonability, cost-relatedness, transparency and cooperation. We therefore recommend that, for airports above a minimum size, Article 8 be amended to make specific charges obligatory if costs are to be recovered from users.

*Airport charges*

- 8.34 We recommend that Article 8 be amended where necessary to make clear that PRM charges are airport-specific and cannot be set at a network level. At present, the translation into some languages (for example Spanish) could be interpreted to permit network charges, which we believe is contrary to the intention of the Regulation.

*Independence of NEBs*

- 8.35 We recommend that Article 14 be amended to require that NEBs must be independent of any bodies responsible for providing services under the Regulation.

*Scope of Regulation*

- 8.36 We recommend that Article 14 be amended to clarify that NEBs are responsible for

flights departing from (rather than, as is currently stated, both departing from and arriving at) airports in their territory, in addition to flights by Community carriers arriving at airports within State's territory but departing from a third country.

- 8.37 We also recommend that Recital 17 (which states that complaints regarding assistance given by an airline should be addressed to the NEB of the State which issued the operating license to the carrier) be amended to be consistent with Article 14.

*PRMs without a reservation*

- 8.38 Article 7 requires airports to provide assistance to PRMs arriving at an airport so that they are able to take the flight for which they hold a reservation. However, there may be rare occasions where a PRM (like any other passenger) arrives at an airport *without* a reservation, expecting to purchase a ticket at the airport. We therefore recommend that Article 7 be amended to set out the airport's responsibilities to such PRMs.

***Longer term changes to the Regulation***

- 8.39 The key issue that we have identified with the Regulation is that the text is much less detailed or specific than other comparable legislation (in particular, the equivalent US regulations on carriage of PRMs) and therefore leaves much more scope for interpretation and variation in service provision. We suggest that, to ensure greater consistency and that PRMs rights are adequately respected, the Commission should consider making the text more detailed and specific about the requirements for airlines and airports. The rest of this section describes key areas in which we suggest that changes could be made.
- 8.40 It would be necessary to consult with stakeholders about these changes and to undertake an impact assessment, and therefore these changes could not be introduced immediately.

*Provisions on safe carriage PRMs*

- 8.41 Once the Commission has established with EASA policies on the safe carriage of PRMs, particularly regarding any permissible limits on carriage and requirements for passengers to be accompanied (see 8.13), we recommend that either the Regulation or EU-OPS be extended to include these policies.

*Definitions*

- 8.42 We recommend that the following definitions should be clarified:
- **PRM:** The definition of PRM used in the Regulation is very broad and this has led to disputes as to whether obese passengers or those impacted by temporary injuries (e.g. winter sports) are included; and even that those temporarily incapacitated e.g. due to alcohol consumption might be included. We suggest that, at a minimum, the definition should be amended to clarify this, and ideally (but subject to consultation) a much more precise definition of passengers entitled to assistance should be used, along the lines of that used in the equivalent US Regulations (see below).
  - **Mobility equipment:** The Regulation should make clear whether this includes

equipment required by PRMs for the trip but not required for them to be able to take the flight (e.g. joists for assisted lifting of PRMs).

- **Cooperation:** The Regulation should to specify what measures airports must take when required by the Regulation to set out policies and charges in cooperation with airport users and PRM organisations - in particular in Article 8(4).

#### Definition of disability used in US CFR part 14 rule 382

*Individual with a disability* means any individual who has a physical or mental impairment that, on a permanent or temporary basis, substantially limits one or more major life activities, has a record of such an impairment, or is regarded as having such an impairment. As used in this definition, the phrase:

(a) *Physical or mental impairment* means:

(1) Any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: neurological, musculoskeletal, special sense organs, respiratory including speech organs, cardio-vascular, reproductive, digestive, genito-urinary, hemic and lymphatic, skin, and endocrine; or

(2) Any mental or psychological disorder, such as mental retardation, organic brain syndrome, emotional or mental illness, and specific learning disabilities. The term physical or mental impairment includes, but is not limited to, such diseases and conditions as orthopedic, visual, speech, and hearing impairments; cerebral palsy, epilepsy, muscular dystrophy, multiple sclerosis, cancer, heart disease, diabetes, mental retardation, emotional illness, drug addiction, and alcoholism.

(b) *Major life activities* means functions such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working.

(c) Has a record of such impairment means has a history of, or has been classified, or misclassified, as having a mental or physical impairment that substantially limits one or more major life activities.

(d) *Is regarded as having an impairment* means:

(1) Has a physical or mental impairment that does not substantially limit major life activities but that is treated by an air carrier as constituting such a limitation;

(2) Has a physical or mental impairment that substantially limits a major life activity only as a result of the attitudes of others toward such an impairment; or

(3) Has none of the impairments set forth in this definition but is treated by an air carrier as having such an impairment.

#### Supplementary charges

- 8.43 Although we have not been made aware of any incidences of airlines or airports charging for assistance provided under the Regulation, several airlines charge for the supply of medical oxygen, and for multiple seats where one seat is insufficient for the passenger (for example, in the case of obese or injured passengers). Several PRM organisations informed us that they believed these charges were unjust. We recommend that in any amendment of the Regulation it should be clarified whether airlines may levy such additional charges.

#### Information on rights of PRMs

- 8.44 Regulation 261/2004 requires airlines to display at check-in a notice informing passengers that they may request information on their rights under the Regulation. To assist the promotion of awareness of rights under Regulation 1107/2006, we recommend that the Regulation be extended to include a provision requiring airports

to publish information on the rights of PRMs (including the right to complain) at accessible points within the airport, for example at check-in desks and help points.

*Liability for mobility equipment*

- 8.45 The Montreal Convention allows for compensation for damage to baggage up to 1,131 SDRs (€1,370), however this is insufficient for many technologically advanced electric wheelchairs, which can cost several thousand euros. Although most airlines we contacted for the study informed us that they waived the Montreal limits in this type of situation, several PRM organisations informed us of cases where they did not. Even in the case that an airline voluntarily waives the limit, the PRM is in a position of uncertainty. This is exacerbated by the difficulty of obtaining insurance for such wheelchairs; the high cost combined with the high probability of damage means that the PRM organisations we spoke to had been unable to find any insurers willing to provide coverage.
- 8.46 We therefore recommend that the Commission work with non-EU States to amend the Montreal Convention to exclude mobility equipment from the definition of baggage.

**APPENDIX A**  
**AIR CARRIERS POLICIES ON CARRIAGE OF PRMS**

**APPENDIX TABLE A.1 POLICY ON DENIAL OF BOARDING, ACCOMPANYING PASSENGERS AND MEDICAL CLEARANCE**

Airline	Circumstances for refusal of carriage	Circumstances requiring accompanying passenger	Circumstances requiring medical clearance
Aegean Airlines	Not stated <i>Unpublished limit on unaccompanied PRMs</i>	Not stated	<ul style="list-style-type: none"> <li>PRM requires oxygen</li> </ul>
Air Berlin	May limit number of PRMs on each flight for safety reasons	<p>'Advised' if the following apply (although the use of 'must' in terms of the criteria for the companion suggest that this may not be optional):</p> <ul style="list-style-type: none"> <li>PRM has severe walking disability</li> <li>PRM has severe visual impairment</li> </ul> <p><i>Also required if:</i></p> <ul style="list-style-type: none"> <li>PRM is on stretcher</li> <li>PRM is mentally ill / blind / deaf if unable to follow crew instructions</li> <li>ID states that continuous accompaniment required</li> </ul>	<ul style="list-style-type: none"> <li>PRM has infectious disease</li> <li>PRM is on stretcher</li> <li>PRM requires oxygen</li> </ul>
Air France	Not stated	<ul style="list-style-type: none"> <li>PRM cannot safely exit aircraft alone</li> <li>PRM cannot follow safety instructions</li> <li>PRM has visual or hearing impairment</li> </ul>	<ul style="list-style-type: none"> <li>PRM is on stretcher or in incubator</li> <li>PRM will need extraordinary medical equipment during flight</li> <li>PRM requires oxygen</li> </ul>
AirBaltic	<p>To meet safety requirements</p> <p>If aircraft doors make boarding physically impossible</p> <p>If number of PRMs exceeds number of cabin crew per flight, where PRMs form a large proportion of passengers on flight</p>	<p>PRM requires assistance beyond that provided by cabin crew. Cabin crew will provide additional information to PRMs, but will not:</p> <ul style="list-style-type: none"> <li>Assist with eating or personal hygiene;</li> <li>Administer medication; or</li> <li>Lift or carry passengers.</li> </ul> <p><i>Also required if unable to follow safety instructions, e.g. if in stretcher, incubator, of if both blind and deaf</i></p>	<ul style="list-style-type: none"> <li>PRM has infectious disease</li> <li>PRM has 'unusual condition' which could affect welfare of crew or other passengers, or could be considered a potential hazard to flight or its punctuality</li> <li>PRM will require medical attention or special equipment during flight</li> <li>PRM has medical condition which may worsen during, or because of, flight</li> <li>PRM cannot use normal seat in upright position</li> </ul>

Airline	Circumstances for refusal of carriage	Circumstances requiring accompanying passenger	Circumstances requiring medical clearance
Alitalia	Conditions of Carriage state that boarding may be denied if advance arrangements have not been made	<ul style="list-style-type: none"> <li>PRM uses wheelchair</li> <li>PRM is blind or deaf</li> <li>PRM is on stretcher</li> <li>PRM is not self sufficient</li> </ul>	<ul style="list-style-type: none"> <li>Pregnant passengers, except when uncomplicated and with more than 4 weeks until due date.</li> <li><i>PRM will require medical assistance on board</i></li> </ul>
Austrian	Not stated	<ul style="list-style-type: none"> <li>PRM cannot evacuate aircraft alone</li> <li>PRM cannot follow safety instructions</li> <li>PRM needs assistance in feeding or using toilet</li> <li>PRM is deaf and blind</li> <li>PRM requires assistance beyond that provided by cabin crew</li> </ul>	<ul style="list-style-type: none"> <li>PRM has chronic illness or disability</li> </ul>
British Airways	Not stated	<ul style="list-style-type: none"> <li>PRM cannot lift themselves</li> <li>PRM cannot evacuate aircraft alone</li> <li>PRM cannot communicate with crew on safety matters</li> <li>PRM cannot unfasten seat belt</li> <li>PRM cannot retrieve and fit life jacket</li> <li>PRM cannot fit oxygen mask.</li> </ul>	Not stated
Brussels Airlines	<p>To meet safety requirements</p> <p>If size of doors makes boarding or alighting physically impossible</p> <p>Limit of PRMs of up to 31 per flight depending on aeroplane type</p> <p>Conditions of Carriage state that boarding may be denied if advance arrangements have not been made</p>	<ul style="list-style-type: none"> <li>PRM is mentally disabled and does not have prior medical clearance of airline</li> </ul>	<ul style="list-style-type: none"> <li>PRM is on stretcher or bed</li> <li>PRM requires oxygen</li> <li>PRM is under care of a doctor</li> <li>PRM has unstable medical condition</li> <li>PRM suffers from illness</li> <li>PRM has recently been to hospital, or has operation</li> </ul>

Airline	Circumstances for refusal of carriage	Circumstances requiring accompanying passenger	Circumstances requiring medical clearance
			<ul style="list-style-type: none"> <li>PRM has medical disability and cannot be accompanied</li> <li>PRM is more than 34 weeks pregnant</li> </ul>
Delta	<p>On basis of safety, or if in violation of Federal Aviation Regulations</p> <p>If advance arrangements have not been made (this requirement is more stringent in the Conditions of Carriage)</p>	<ul style="list-style-type: none"> <li>PRM requires constant monitoring at departure gate</li> <li>PRM requires assistance beyond that provided by cabin crew</li> </ul>	<ul style="list-style-type: none"> <li>PRM has infectious disease</li> <li>PRM requires oxygen</li> <li>PRM will require extraordinary medical assistance during flight</li> </ul>

**APPENDIX B**  
**SERVICES PROVIDED BY AIR CARRIERS**

**APPENDIX TABLE A.2 SERVICE AND RESTRICTIONS**

<b>Airline</b>	<b>Assistance dogs</b>	<b>Wheelchairs and other equipment</b>	<b>Assistance offered</b>	<b>Accessible information</b>	<b>Seating and onboard assistance</b>
Aegean Airlines	Prenotification required Carried free in cabin Case / carrier required Subject to weight restriction Not carried on UK flights	Wheelchairs carried free Not subject to baggage allowance Passenger's oxygen allowed with medical certification Conditions of Carriage state that wet cell batteries are not allowed in cabin	Not stated	Not stated	Not stated
Air Berlin	Carried free in cabin Case / carrier not required Harness required	Wheelchairs carried in hold only Wet cell batteries subject to safety regulations Other medical aids carried free with medical certificate Limit of one wheelchair per passenger defined in Conditions of Carriage	Not stated	Not stated	Free seat reservation for passengers with severe disability pass (or equivalent) for 50% disability or more, and for companion PRMs cannot reserve XL / extra large seats (i.e. in exit rows) Conditions of carriage state that seating may be restricted for safety reasons
Air France	Carried free in cabin Leash required, attached to seat in front Muzzle not required	Up to two wheelchairs carried free of charge Onboard wheelchairs on most flights Stretchers accepted with medical clearance Oxygen allowed on board on payment of fee	Cannot lift passengers Cannot administer medication	Braille seat numbers in new aircraft Safety briefing in French or English Braille Some crew members able to communicate in French sign language	Additional seat may be reserved at discounted rate if needed Seats with retractable armrests Easy access toilets
AirBaltic	Carried free in cabin Excluded from weight	Carried free of charge Only collapsible wheelchairs	Will provide extra information Cannot assist with eating or	Not stated	Depending on aircraft, provide movable aisle armrest seats

Airline	Assistance dogs	Wheelchairs and other equipment	Assistance offered	Accessible information	Seating and onboard assistance
	restrictions Prohibited from exit rows	allowed in cabin Spillable batteries accepted if removed and packed and labelled Stretchers not carried Oxygen provided free with prenotification, doctor's verification and accompanying passenger	personal hygiene Cannot lift or carry passengers Cannot administer medication		PRMs cannot obstruct crew or emergency exits Companion must travel in seat next to PRM
Alitalia	Carried free in hold, or in cabin if space available Leash required Muzzle required	Wheelchairs carried free Stretcher service offered for a fee and with authorisation and accompanying passenger, only one per aircraft. Oxygen must be booked in advance, and not available on all flights	Not stated	Not stated	Not stated
Austrian	Carried free in cabin Leash required Subject to size and weight restriction Proof of status required	Up to two wheelchairs carried free, subject to space and prenotification for electric wheelchairs Onboard wheelchairs available	Preparation for eating Use of on-board wheelchair Accessing lavatory Stowing / retrieving carry-on items	Will communicate effectively as required.	Choice of seat may be limited Some seats with moveable armrests Accessible lavatories on long haul flights
British Airways	Prenotification required Limit on no. of guide dogs per flight Carried free in cabin Carried on all UK and certain international routes	Up to two wheelchairs carried free Preparation required for certain types of electric wheelchair Onboard wheelchairs on some flights Portable Oxygen Concentrators accepted with medical clearance, included in cabin	Cannot assist with breathing apparatus Cannot assist with eating Cannot administer medication Cannot assist with going to toilet Can assist in access to and from toilet when on-board wheelchair is available	Individual safety briefings and subtitles on English safety video Braille cards on some flights	Lifting armrests on some seats Cannot be seated on emergency exit aisle due to safety regulations. Will be allocated bulkhead seat when requested, unless already allocated to PRM. Adapted toilets on 747-operated flights

Airline	Assistance dogs	Wheelchairs and other equipment	Assistance offered	Accessible information	Seating and onboard assistance
		baggage allowance Conditions of carriage state that the airline reserves the right to refuse stretchers on any flight			
Brussels Airlines	Prenotification required Carried free in cabin Leash required Muzzle required Subject to national regulations	Electric wheelchairs carried in hold Spillable batteries accepted under certain conditions In-flight wheelchair on some flights Up to two stretchers on certain planes Can supply oxygen with prenotification and payment of fee in advance	Moving to toilet facilities Cannot lift passengers Cannot assist during visit to lavatory	Not stated	Not stated
Delta	Carried free in cabin Prohibited from exit rows Must occupy space where passenger sits No documentation required Subject to national entry requirements	One wheelchair can be carried in cabin per flight Wet cell batteries accepted with preparation One onboard wheelchair per flight Personal oxygen tanks can be transported but not used in flight Can provide oxygen on many flights, subject to medical certification Conditions of Carriage state that carriage of passengers requiring stretcher kit may be refused	Cannot assist with feeding or personal hygiene and lavatory functions. Cannot lift or carry passengers Cannot provide medical services such as giving injections.	Pre-booked passengers with hearing disabilities can be accompanied by agents who will provide updates on flight information	FAA regulations limit exit seats to certain customers Customers with service animals or immobilised leg are entitled to bulkhead seats On board aircraft with 100 seats or more, Delta provides a stowage location specifically for the first collapsible wheelchair

Airline	Assistance dogs	Wheelchairs and other equipment	Assistance offered	Accessible information	Seating and onboard assistance
EasyJet	<p>Carried free in cabin if space available</p> <p>Must occupy space where passenger sits</p> <p>Harness required</p> <p>Proof of training and status required</p> <p>Only allowed on routes within UK or mainland Europe</p>	<p>Up two to portable mobility items carried free, subject to weight restriction</p> <p>Wet cell batteries not accepted</p> <p>No onboard wheelchairs</p> <p>Allow up to two oxygen cylinders per passenger, with medical certification</p> <p>Conditions of Carriage state that stretchers are not carried</p>	<p>Stowing and retrieving of hand baggage</p> <p>Opening food packages and describing the contents</p> <p>Cannot lift passengers</p> <p>Cannot provide personal care</p> <p>Cannot administer medication</p> <p>Cannot assist with feeding or children</p>	<p>Can provide a verbal explanation of the safety card information and location of emergency exits</p>	<p>Body supports required for passengers who cannot sit upright</p>
Emirates	<p>All animals carried in hold, subject to IATA Live Animals and national regulations</p>	<p>Wheelchairs carried free of charge</p> <p>Do not count towards baggage allowance</p> <p>Battery-powered wheelchairs subject to safeguards</p> <p>Stretcher kit provided</p> <p>Oxygen provided</p> <p>Portable Oxygen Concentrators allowed</p>	<p>Cannot assist with transfer</p> <p>Cannot assist with feeding</p> <p>Cannot assist with toilet functions</p>	<p>Not stated</p>	<p>Not stated</p>
Iberia	<p>Carried free in cabin</p> <p>Must not use seat</p> <p>Muzzle required</p> <p>Does not count towards luggage allowance</p> <p>Deaf passengers will require medical certificate</p>	<p>All wheelchairs carried free in hold</p> <p>Wet cell batteries accepted with preparation</p> <p>Carriage of stretchers may be restricted on smaller aircraft</p> <p>Oxygen allowed in cabin subject to certain conditions</p>	<p>Cannot provide sanitary, hygienic or safety onboard assistance.</p>	<p>Not stated</p>	<p>‘The entire fleet has been adapted to carry Passengers with Reduced Mobility, despite the space limitations that air transport normally poses.’</p>
KLM	<p>Carried free in cabin</p> <p>Must be with PRM, but not using seat or blocking aisle of</p>	<p>Up to two pieces of mobility equipment carried free</p> <p>Collapsible wheelchairs allowed</p>	<p>Transporting passengers using on-board wheelchair</p>	<p>Braille safety cards</p> <p>Toilets with Braille attendant call</p>	<p>Seats with moveable armrests</p> <p>Leg rests available</p>

Airline	Assistance dogs	Wheelchairs and other equipment	Assistance offered	Accessible information	Seating and onboard assistance
	<p>exit</p> <p>Leash required</p> <p>Subject to national regulations</p>	<p>in cabin, electric wheelchairs carried in hold</p> <p>Wet cell batteries accepted with preparation</p> <p>Onboard wheelchairs on all flights</p> <p>Stretcher service offered, subject to medically trained companion</p> <p>Oxygen allowed on board on payment of fee</p> <p>Own oxygen not allowed</p> <p>Approved Portable Oxygen Concentrators allowed</p>	<p>Cannot assist with eating</p> <p>Cannot lift or carry passengers</p> <p>Cannot administer medication</p> <p>Cannot assist with personal hygiene</p>	<p>buttons</p>	
Lufthansa	<p>Carried free in cabin</p> <p>Limited number allowed per flight</p> <p>Subject to national regulations</p>	<p>Wheelchairs carried free in hold (small collapsible devices allowed in cabin to/from US)</p> <p>Non leak-proof wet cell batteries not accepted except to/from US</p> <p>Limit on number of wheelchairs per flight</p> <p>Limited oxygen available with advance payment of an unspecified fee</p>	<p>Assistance in boarding / disembarking</p> <p>Stowing hand luggage</p> <p>Opening of food items</p> <p>Getting to / from toilet</p> <p>Cannot provide assistance in toilet</p> <p>Cannot lift or carry passengers</p> <p>Cannot feed passengers</p> <p>Cannot administer medication</p>	<p>Will explain arrangement of meal tray to partially sighted</p> <p>Flights to/from US section of website also includes:</p> <p>Separate safety briefings</p> <p>Separate briefings about delays and other issues</p> <p>Captioning of in-flight video in English and German</p>	<p>Disabled toilets in long-haul aircraft</p> <p>Flights to/from US section of website also includes:</p> <p>Bulkhead seats provided if travelling with service animal</p> <p>Some seats with lifting armrests</p> <p>May not be able to sit near exit</p>

**DIRECTIVE 2004/17/EC OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL**  
**of 31 March 2004**  
**coordinating the procurement procedures of entities operating in the water, energy, transport and postal services sectors**

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 47(2) and Article 55 and Article 95 thereof,

Having regard to the proposal from the Commission <sup>(1)</sup>,

Having regard to the Opinion of the Economic and Social Committee <sup>(2)</sup>,

Having regard to the Opinion of the Committee of the Regions <sup>(3)</sup>,

Acting in accordance with the procedure laid down in Article 251 of the Treaty <sup>(4)</sup>, in the light of the joint text approved by the Conciliation Committee on 9 December 2003,

Whereas:

(1) On the occasion of new amendments being made to Council Directive 93/38/EEC of 14 June 1993 coordinating the procurement procedures of entities operating in the water, energy, transport and telecommunications sectors <sup>(5)</sup>, which are necessary to meet requests for simplification and modernisation made by contracting entities and economic operators alike in their responses to the Green Paper adopted by the Commission on 27 November 1996, the Directive should, in the interests of clarity, be recast. This Directive is based on Court of Justice case-law, in particular case-law on award criteria, which clarifies the possibilities for the

contracting entities to meet the needs of the public concerned, including in the environmental and/or social area, provided that such criteria are linked to the subject-matter of the contract, do not confer an unrestricted freedom of choice on the contracting entity, are expressly mentioned and comply with the fundamental principles mentioned in recital 9.

(2) One major reason for the introduction of rules coordinating procedures for the award of contracts in these sectors is the variety of ways in which national authorities can influence the behaviour of these entities, including participation in their capital and representation in the entities' administrative, managerial or supervisory bodies.

(3) Another main reason why it is necessary to coordinate procurement procedures applied by the entities operating in these sectors is the closed nature of the markets in which they operate, due to the existence of special or exclusive rights granted by the Member States concerning the supply to, provision or operation of networks for providing the service concerned.

(4) Community legislation, and in particular Council Regulation (EEC) No 3975/87 of 14 December 1987 laying down the procedure for the application of the rules on competition to undertakings in the air transport sector <sup>(6)</sup> and Regulation (EEC) No 3976/87 of 14 December 1987 on the application of Article 85(3) of the Treaty to certain categories of agreements and concerted practices in the air transport sector <sup>(7)</sup>, is designed to introduce more competition between carriers providing air transport services to the public. It is therefore not appropriate to include such entities in the scope of this Directive. In view of the competitive position of Community shipping, it would also be inappropriate to make the contracts awarded in this sector subject to the rules of this Directive.

<sup>(1)</sup> OJ C 29 E, 30.1.2001, p. 112 and OJ C 203 E, 27.8.2002, p. 183.

<sup>(2)</sup> OJ C 193, 10.7.2001, p. 1.

<sup>(3)</sup> OJ C 144, 16.5.2001, p. 23.

<sup>(4)</sup> Opinion of the European Parliament of 17 January 2002 (OJ C 271 E, 7.11.2002, p. 293), Council Common Position of 20 Mars 2003 (OJ C 147 E, 24.6.2003, p. 137) and Position of the European Parliament of 2 July 2003 (not yet published in the Official Journal). Legislative Resolution of the European Parliament of 29 January 2004 and Decision of the Council of 2 February 2004.

<sup>(5)</sup> OJ L 199, 9.8.1993, p. 84. Directive as last amended by Commission Directive 2001/78/EC (OJ L 285, 29.10.2001, p. 1).

<sup>(6)</sup> OJ L 374, 31.12.1987, p. 1. Regulation as last amended by Regulation (EC) No 1/2003 (OJ L 1, 4.1.2003, p. 1).

<sup>(7)</sup> OJ L 374, 31.12.1987, p. 9. Regulation as last amended by the 1994 Act of Accession.

- (5) The scope of Directive 98/38/EEC covers, at present, certain contracts awarded by contracting entities operating in the telecommunications sector. A legislative framework, as mentioned in the Fourth report on the implementation of the telecommunications regulations of 25 November 1998, has been adopted to open this sector. One of its consequences has been the introduction of effective competition, both *de jure* and *de facto*, in this sector. For information purposes, and in the light of this situation, the Commission has published a list of telecommunications services<sup>(1)</sup> which may already be excluded from the scope of that Directive by virtue of Article 8 thereof. Further progress has been confirmed in the Seventh report on the implementation of telecommunications regulations of 26 November 2001. It is therefore no longer necessary to regulate purchases by entities operating in this sector.
- (6) It is therefore no longer appropriate to maintain the Advisory Committee on Telecommunications Procurement set up by Council Directive 90/531/EEC of 17 September 1990 on the procurement procedures of entities operating in the water, energy transport and telecommunications sectors<sup>(2)</sup>.
- (7) Nevertheless, it is appropriate to continue to monitor developments in the telecommunications sector and to reconsider the situation if it is established that there is no longer effective competition in that sector.
- (8) Directive 93/38/EEC excludes from its scope purchases of voice telephony, telex, mobile telephone, paging and satellite services. Those exclusions were introduced to take account of the fact that the services in question could frequently be provided only by one service provider in a given geographical area because of the absence of effective competition and the existence of special or exclusive rights. The introduction of effective competition in the telecommunications sector removes the justification for these exclusions. It is therefore necessary to include the procurement of such telecommunications services in the scope of this Directive.
- (9) In order to guarantee the opening up to competition of public procurement contracts awarded by entities operating in the water, energy, transport and postal services sectors, it is advisable to draw up provisions for Community coordination of contracts above a certain value. Such coordination is based on the requirements inferable from Articles 14, 28 and 49 of the EC Treaty and from Article 97 of the Euratom Treaty, namely the principle of equal treatment, of which the principle of non-discrimination is no more than a specific expression, the principle of mutual recognition, the principle of proportionality, as well as the principle of transparency. In view of the nature of the sectors affected by such coordination, the latter should, while safeguarding the application of those principles, establish a framework for sound commercial practice and should allow maximum flexibility.
- For public contracts the value of which is lower than that triggering the application of provisions of Community coordination, it is advisable to recall the case-law developed by the Court of Justice according to which the rules and principles of the Treaties referred to above apply.
- (10) To ensure a real opening up of the market and a fair balance in the application of procurement rules in the water, energy, transport and postal services sectors it is necessary for the entities covered to be identified on a basis other than their legal status. It should be ensured, therefore, that the equal treatment of contracting entities operating in the public sector and those operating in the private sector is not prejudiced. It is also necessary to ensure, in keeping with Article 295 of the Treaty, that the rules governing the system of property ownership in Member States are not prejudiced.
- (11) Member States should ensure that the participation of a body governed by public law as a tenderer in a procedure for the award of a contract does not cause any distortion of competition in relation to private tenderers.
- (12) Under Article 6 of the Treaty, environmental protection requirements are to be integrated into the definition and implementation of the Community policies and activities referred to in Article 3 of the Treaty, in particular with a view to promoting sustainable development. This Directive therefore clarifies how the contracting entities may contribute to the protection of the environment and the promotion of sustainable development, whilst ensuring the possibility of obtaining the best value for money for their contracts.
- (13) Nothing in this Directive should prevent the imposition or enforcement of measures necessary to protect public morality, public policy, public security, health, human and animal life or the preservation of plant life, in particular with a view to sustainable development, provided that these measures are in conformity with the Treaty.

<sup>(1)</sup> OJ C 156, 3.6.1999, p. 3.

<sup>(2)</sup> OJ L 297, 29.10.1990, p. 1. Directive as last amended by Directive 94/22/EC of the European Parliament and of the Council (OJ L 164, 30.6.1994, p. 3).

(14) Council Decision 94/800/EC of 22 December 1994 concerning the conclusion on behalf of the European Community, as regards matters within its competence, of the Agreements reached in the Uruguay Round multilateral negotiations (1986 to 1994) <sup>(1)</sup>, approved in particular the WTO Agreement on Government Procurement (hereinafter referred to as the 'Agreement'), the aim of which is to establish a multilateral framework of balanced rights and obligations relating to public contracts with the aim of achieving the liberalisation and expansion of world trade. In view of the international rights and commitments devolving on the Community as a result of the acceptance of the Agreement, the arrangements to be applied to tenderers and products from signatory third countries are those defined by the Agreement. The Agreement does not have direct effect. The contracting entities covered by the Agreement which comply with this Directive and which apply the latter to economic operators of third countries which are signatories to the Agreement should therefore be in conformity with the Agreement. It is also appropriate that this Directive should guarantee for Community economic operators conditions for participation in public procurement which are just as favourable as those reserved for economic operators of third countries which are signatories to the Agreement.

(15) Before launching a procurement procedure, contracting entities may, using a technical dialogue, seek or accept advice which may be used in the preparation of the specifications, provided, however, that such advice does not have the effect of precluding competition.

(16) In view of the diversity of works contracts, contracting entities should be able to make provision for contracts for the design and execution of work to be awarded either separately or jointly. It is not the intention of this Directive to prescribe either joint or separate contract awards. The decision to award contracts separately or jointly should be determined by qualitative and economic criteria, which may be defined by national law.

A contract may be considered to be a works contract only if its subject-matter specifically covers the execution of activities listed in Annex XII, even if the contract covers the provision of other services necessary for the execution of such activities. Service contracts, in particular in the sphere of property management services, may in certain circumstances include works. However, insofar as such works are incidental to the principal subject-matter of the contract, and are a possible consequence thereof or a complement thereto, the fact that such works are included in the contract does not justify the qualification of the contract as a works contract.

For the purpose of calculating the estimated value of a works contract it is appropriate to take as a basis the value of the works themselves as well as the estimated value of supplies and services, if any, that the contracting entities place at the disposal of contractors, insofar as these services or supplies are necessary for the execution of the works in question. It should be understood that, for the purposes of this paragraph, the services concerned are those rendered by the contracting entities through their own personnel. On the other hand, calculation of the value of services contracts, whether or not to be placed at the disposal of a contractor for the subsequent execution of works, follows the rules applicable to service contracts.

(17) The field of services is best delineated, for the purpose of applying the procedural rules of this Directive and for monitoring purposes, by subdividing it into categories corresponding to particular headings of a common classification and by bringing them together in two Annexes, XVII A and XVII B, according to the regime to which they are subject. As regards services in Annex XVII B, the relevant provisions of this Directive should be without prejudice to the application of Community rules specific to the services in question.

(18) As regards service contracts, full application of this Directive should be limited, for a transitional period, to contracts where its provisions will permit the full potential for increased cross-frontier trade to be realised. Contracts for other services need to be monitored during this transitional period before a decision is taken on the full application of this Directive. In this respect, the mechanism for such monitoring needs to be defined. This mechanism should, at the same time, enable interested parties to have access to the relevant information.

(19) Obstacles to the free provision of services should be avoided. Therefore, service providers may be either natural or legal persons. This Directive should not, however, prejudice the application, at national level, of rules concerning the conditions for the pursuit of an activity or a profession, provided that they are compatible with Community law.

(20) Certain new electronic purchasing techniques are continually being developed. Such techniques help to increase competition and streamline public purchasing, particularly in terms of the savings in time and money which their use will allow. Contracting entities may make use of electronic purchasing techniques, provided that such use complies with the rules of this Directive

<sup>(1)</sup> OJ L 336, 23.12.1994, p. 1.

and the principles of equal treatment, non-discrimination and transparency. To that extent, a tender submitted by a tenderer, in particular under a framework agreement or where a dynamic purchasing system is being used, may take the form of that tenderer's electronic catalogue if the latter uses the means of communication chosen by the contracting entity in accordance with Article 48.

(21) In view of the rapid expansion of electronic purchasing systems, appropriate rules should now be introduced to enable contracting entities to take full advantage of the possibilities afforded by these systems. Against this background, it is necessary to define a completely electronic dynamic purchasing system for commonly used purchases and to lay down specific rules for setting up and operating such a system in order to ensure the fair treatment of any economic operator who wishes to join. Any economic operator which submits an indicative tender in accordance with the specification and meets the selection criteria should be allowed to join such a system. This purchasing technique allows the contracting entity, through the establishment of a list of tenderers already selected and the opportunity given to new tenderers to join, to have a particularly broad range of tenders, as a result of the electronic facilities available, and hence to ensure optimum use of funds through broad competition.

(22) Since use of the technique of electronic auctions is likely to increase, such auctions should be given a Community definition and be governed by specific rules in order to ensure that they operate fully in accordance with the principles of equal treatment, non-discrimination and transparency. To that end, provision should be made for such electronic auctions to deal only with contracts for works, supplies or services for which the specifications can be determined with precision. Such may in particular be the case for recurring supplies, works and service contracts. With the same objective, it should also be possible to establish the respective ranking of the tenderers at any stage of the electronic auction. Recourse to electronic auctions enables contracting entities to ask tenderers to submit new prices, revised downwards, and, when the contract is awarded to the most economically advantageous tender, also to improve elements of the tenders other than prices. In order to guarantee compliance with the principle of transparency, only the elements suitable for automatic evaluation by electronic means, without any intervention and/or appreciation by the contracting entity, may be the object of electronic auctions, that is, only the elements which

are quantifiable so that they can be expressed in figures or percentages. On the other hand, those aspects of tenders which imply an appreciation of non-quantifiable elements should not be the object of electronic auctions. Consequently, certain works contracts and certain service contracts having as their subject-matter intellectual performances, such as the design of works, should not be the object of electronic auctions.

(23) Certain centralised purchasing techniques have been developed in Member States. Several contracting authorities are responsible for making acquisitions or awarding contracts/framework agreements for contracting entities. In view of the large volumes purchased, those techniques help increase competition and streamline public purchasing. Provision should therefore be made for a Community definition of central purchasing bodies used by contracting entities. A definition should also be given of the conditions under which, in accordance with the principles of non-discrimination and equal treatment, contracting entities purchasing works, supplies and/or services through a central purchasing body may be deemed to have complied with this Directive.

(24) In order to take account of the different circumstances obtaining in Member States, Member States should be allowed to choose whether contracting entities may use central purchasing bodies, dynamic purchasing systems or electronic auctions, as defined and regulated by this Directive.

(25) There has to be an appropriate definition of the concept of special or exclusive rights. The consequence of the definition is that the fact that, for the purpose of constructing networks or port or airport facilities, an entity may take advantage of a procedure for the expropriation or use of property or may place network equipment on, under or over the public highway will not in itself constitute exclusive or special rights within the meaning of this Directive. Nor does the fact that an entity supplies drinking water, electricity, gas or heat to a network which is itself operated by an entity enjoying special or exclusive rights granted by a competent authority of the Member State concerned in itself constitute an exclusive or special right within the meaning of this Directive. Nor may rights granted by a Member State in any form, including by way of acts of concession, to a limited number of undertakings on the basis of objective, proportionate and non-discriminatory criteria that allow any interested party fulfilling those criteria to enjoy those rights be considered special or exclusive rights.

- (26) It is appropriate for the contracting entities to apply common procurement procedures in respect of their activities relating to water and for such rules also to apply where contracting authorities within the meaning of this Directive award contracts in respect of their projects in the field of hydraulic engineering, irrigation, land drainage or the disposal and treatment of sewage. However, procurement rules of the type proposed for supplies of goods are inappropriate for purchases of water, given the need to procure water from sources near the area in which it will be used.
- (27) Certain entities providing bus transport services to the public were already excluded from the scope of Directive 93/38/EEC. Such entities should also be excluded from the scope of this Directive. In order to forestall the existence of a multitude of specific arrangements applying to certain sectors only, the general procedure that permits the effects of opening up to competition to be taken into account should also apply to all entities providing bus transport services that are not excluded from the scope of Directive 93/38/EEC pursuant to Article 2(4) thereof.
- (28) Taking into account the further opening up of Community postal services to competition and the fact that such services are provided through a network by contracting authorities, public undertakings and other undertakings, contracts awarded by contracting entities providing postal services should be subject to the rules of this Directive, including those in Article 30, which, safeguarding the application of the principles referred to in recital 9, create a framework for sound commercial practice and allow greater flexibility than is offered by Directive 2004/18/EC of the European Parliament and of the Council of 31 March 2004 on the coordination of procedures for the award of public works contracts, public supply contracts and public service contracts<sup>(1)</sup>. For a definition of the activities in question, it is necessary to take into account the definitions of Directive 97/67/EC of the European Parliament and of the Council of 15 December 1997 on common rules for the development of the internal market of Community postal services and the improvement of quality of service<sup>(2)</sup>.
- Whatever their legal status, entities providing postal services are not currently subject to the rules set out in Directive 93/38/EEC. The adjustment of contract award procedures to this Directive could therefore take longer to implement for such entities than for entities already subject to those rules which will merely have to adapt their procedures to the amendments made by this Directive. It should therefore be permissible to defer application of this Directive to accommodate the additional time required for this adjustment. Given the varying situations of such entities, Member States should have the option of providing for a transitional period for the application of this Directive to contracting entities operating in the postal services sector.
- (29) Contracts may be awarded for the purpose of meeting the requirements of several activities, possibly subject to different legal regimes. It should be clarified that the legal regime applicable to a single contract intended to cover several activities should be subject to the rules applicable to the activity for which it is principally intended. Determination of the activity for which the contract is principally intended may be based on an analysis of the requirements which the specific contract must meet, carried out by the contracting entity for the purposes of estimating the contract value and drawing up the tender documents. In certain cases, such as the purchase of a single piece of equipment for the pursuit of activities for which information allowing an estimation of the respective rates of use would be unavailable, it might be objectively impossible to determine for which activity the contract is principally intended. The rules applicable to such cases should be indicated.
- (30) Without prejudice to the international commitments of the Community, it is necessary to simplify the implementation of this Directive, particularly by simplifying the thresholds and by rendering applicable to all contracting entities, regardless of the sector in which they operate, the provisions regarding the information to be given to participants concerning decisions taken in relation to contract award procedures and the results thereof. Furthermore, in the context of Monetary Union, such thresholds should be established in euro in such a way as to simplify the application of these provisions while at the same time ensuring compliance with the thresholds laid down in the Agreement, which are expressed in Special Drawing Rights (SDR). In this context, provision should also be made for periodic reviews of the thresholds expressed in euro so as to adjust them, where necessary, in line with possible variations in the value of the euro in relation to the SDR. In addition, the thresholds applicable to design contests should be identical to those applicable to service contracts.
- (31) Provision should be made for cases in which it is possible to refrain from applying the measures for coordinating procedures on grounds relating to State security or secrecy, or because specific rules on the awarding of contracts which derive from international agreements, relating to the stationing of troops, or which are specific to international organisations are applicable.

<sup>(1)</sup> See page 114 of this Official Journal.

<sup>(2)</sup> OJ L 15, 21.1.1998, p. 14. Directive as last amended by Regulation (EC) No 1882/2003 (OJ L 284, 31.10.2003, p. 1).

- (32) It is appropriate to exclude certain service, supply and works contracts awarded to an affiliated undertaking having as its principal activity the provision of such services, supply or works to the group of which it is part, rather than offering them on the market. It is also appropriate to exclude certain service, supply and works contracts awarded by a contracting entity to a joint venture which is formed by a number of contracting entities for the purpose of carrying out activities covered by this Directive and of which that entity is part. However, it is appropriate to ensure that this exclusion does not give rise to distortions of competition to the benefit of the undertakings or joint ventures that are affiliated with the contracting entities; it is appropriate to provide a suitable set of rules, in particular as regards the maximum limits within which the undertakings may obtain a part of their turnover from the market and above which they would lose the possibility of being awarded contracts without calls for competition, the composition of joint ventures and the stability of links between these joint ventures and the contracting entities of which they are composed.
- (33) In the context of services, contracts for the acquisition or rental of immovable property or rights to such property have particular characteristics which make the application of procurement rules inappropriate.
- (34) Arbitration and conciliation services are usually provided by bodies or individuals designated or selected in a manner which cannot be governed by procurement rules.
- (35) In accordance with the Agreement, the financial services covered by this Directive do not include contracts relating to the issue, purchase, sale or transfer of securities or other financial instruments; in particular, transactions by the contracting entities to raise money or capital are not covered.
- (36) This Directive should cover the provision of services only where based on contracts.
- (37) Pursuant to Article 163 of the Treaty, the encouragement of research and technological development is a means of strengthening the scientific and technological basis of Community industry, and the opening up of service contracts contributes to this end. This Directive should not cover the cofinancing of research and development programmes: research and development contracts other than those where the benefits accrue exclusively to the contracting entity for its use in the conduct of its own affairs, on condition that the service provided is wholly remunerated by the contracting entity, are therefore not covered by this Directive.
- (38) To forestall the proliferation of specific arrangements applicable to certain sectors only, the current special arrangements created by Article 3 of Directive 93/38/EEC and Article 12 of Directive 94/22/EC of the European Parliament and of the Council of 30 May 1994 on the conditions for granting and using authorisations for the prospection, exploration and production of hydrocarbons <sup>(1)</sup> governing entities exploiting a geographical area for the purpose of exploring for or extracting oil, gas, coal or other solid fuels should be replaced by the general procedure allowing for exemption of sectors directly exposed to competition. It has to be ensured, however, that this will be without prejudice to Commission Decision 93/676/EEC of 10 December 1993 establishing that the exploitation of geographical areas for the purpose of exploring for or extracting oil or gas does not constitute in the Netherlands an activity defined by Article 2(2)(b)(i) of Council Directive 90/531/EEC and that entities carrying on such an activity are not to be considered in the Netherlands as operating under special or exclusive rights within the meaning of Article 2(3)(b) of the Directive <sup>(2)</sup>, Commission Decision 97/367/EC of 30 May 1997 establishing that the exploitation of geographical areas for the purpose of exploring for or extracting oil or gas does not constitute in the United Kingdom an activity defined by Article 2(2)(b)(i) of Council Directive 93/38/EEC and that entities carrying on such an activity are not to be considered in the United Kingdom as operating under special or exclusive rights within the meaning of Article 2(3)(b) of the Directive <sup>(3)</sup>, Commission Decision 2002/205/EC of 4 March 2002 following a request by Austria applying for the special regime provided for in Article 3 of Directive 93/38/EEC <sup>(4)</sup> and Commission Decision 2004/73/EC on a request from Germany to apply the special procedure laid down in Article 3 of Directive 93/38/EEC <sup>(5)</sup>.
- (39) Employment and occupation are key elements in guaranteeing equal opportunities for all and contribute to integration in society. In this context, sheltered workshops and sheltered employment programmes contribute efficiently towards the integration or reintegration of people with disabilities in the labour market. However, such workshops might not be able to obtain contracts under normal conditions of competition. Consequently, it is appropriate to provide that Member States may reserve the right to participate in award procedures for contracts to such workshops or reserve performance of contracts to the context of sheltered employment programmes.

<sup>(1)</sup> OJ L 164, 30.6.1994, p. 3.

<sup>(2)</sup> OJ L 316, 17.12.1993, p. 41.

<sup>(3)</sup> OJ L 156, 13.6.1997, p. 55.

<sup>(4)</sup> OJ L 68, 12.3.2002, p. 31.

<sup>(5)</sup> OJ L 16, 23.1.2004, p.57.

- (40) This Directive should apply neither to contracts intended to permit the performance of an activity referred to in Articles 3 to 7 nor to design contests organised for the pursuit of such an activity if, in the Member State in which this activity is carried out, it is directly exposed to competition on markets to which access is not limited. It is therefore appropriate to introduce a procedure, applicable to all sectors covered by this Directive, that will enable the effects of current or future opening up to competition to be taken into account. Such a procedure should provide legal certainty for the entities concerned, as well as an appropriate decision-making process, ensuring, within short time limits, uniform application of Community law in this area.
- (41) Direct exposure to competition should be assessed on the basis of objective criteria, taking account of the specific characteristics of the sector concerned. The implementation and application of appropriate Community legislation opening a given sector, or a part of it, will be considered to provide sufficient grounds for assuming there is free access to the market in question. Such appropriate legislation should be identified in an annex which can be updated by the Commission. When updating, the Commission takes in particular into account the possible adoption of measures entailing a genuine opening up to competition of sectors other than those for which a legislation is already mentioned in Annex XI, such as that of railway transports. Where free access to a given market does not result from the implementation of appropriate Community legislation, it should be demonstrated that, *de jure* and *de facto*, such access is free. For this purpose, application by a Member State of a Directive, such as Directive 94/22/EC opening up a given sector to competition, to another sector, such as the coal sector, is a circumstance to be taken into account for the purposes of Article 30.
- (42) The technical specifications drawn up by purchasers should allow public procurement to be opened up to competition. To this end, it should be possible to submit tenders which reflect the diversity of technical solutions. Accordingly, it should be possible to draw up the technical specifications in terms of functional performance and requirements and, where reference is made to the European standard or, in the absence thereof, to the national standard, tenders based on other equivalent arrangements which meet the requirements of the contracting entities and are equivalent in terms of safety should be considered by the contracting entities. To demonstrate equivalence, tenderers should be permitted to use any form of evidence. Contracting entities should be able to provide a reason for any decision that equivalence does not exist in a given case. Contracting entities that wish to define environmental requirements for the technical specifications of a given contract may lay down the environmental characteristics, such as a given production method, and/or specific environmental effects of product groups or services. They may use, but are not obliged to use appropriate specifications that are defined in eco-labels, such as the European Eco-label, (multi-) national eco-labels or any other eco-label provided that the requirements for the label are drawn up and adopted on the basis of scientific information using a procedure in which stakeholders, such as government bodies, consumers, manufacturers, distributors and environmental organisations can participate, and provided that the label is accessible and available to all interested parties. Contracting entities should, whenever possible, lay down technical specifications so as to take into account accessibility criteria for people with disabilities or design for all users. The technical specifications should be clearly indicated, so that all tenderers know what the requirements established by the contracting entity cover.
- (43) In order to encourage the involvement of small and medium-sized undertakings in the public contracts procurement market, it is advisable to include provisions on subcontracting.
- (44) Contract performance conditions are compatible with the Directive provided that they are not directly or indirectly discriminatory and are indicated in the notice used to make the call for competition, or in the specifications. They may in particular be intended to encourage on-site vocational training, the employment of people experiencing particular difficulty in integration, the fight against unemployment or the protection of the environment. For example, mention may be made of the requirements — applicable during the performance of the contract — to recruit long-term job-seekers or to implement training measures for the unemployed or for young persons, to comply in substance with the provisions of the basic International Labour Organisation (ILO) Conventions, assuming that such provisions have not been implemented in national law, and to recruit more handicapped persons than are required under national legislation.
- (45) The laws, regulations and collective agreements, at both national and Community level, which are in force in the areas of employment conditions and safety at work apply during the performance of a contract, provided that such rules, and their application, comply with Community law. In cross-border situations where workers from one Member State provide services in another Member State for the purpose of performing a contract, Directive 96/71/EC of the European Parliament and of the Council of 16 December 1996 concerning the

posting of workers in the framework of the provision of services<sup>(1)</sup> lays down the minimum conditions which must be observed by the host country in respect of such posted workers. If national law contains provisions to this effect, non-compliance with those obligations may be considered to be grave misconduct or an offence concerning the professional conduct of the economic operator concerned, liable to lead to the exclusion of that economic operator from the procedure for the award of a contract.

- (46) In view of new developments in information and telecommunications technology, and the simplifications these can bring in terms of publicising contracts and the efficiency and transparency of procurement procedures, electronic means should be put on a par with traditional means of communication and information exchange. As far as possible, the means and technology chosen should be compatible with the technologies used in the other Member States.
- (47) The use of electronic means leads to savings in time. As a result, provision should be made for reducing the minimum periods where electronic means are used, subject, however, to the condition that they are compatible with the specific mode of transmission envisaged at Community level. However, it is necessary to ensure that the cumulative effect of reductions of time limits does not lead to excessively short time limits.
- (48) Directive 1999/93/EC of the European Parliament and of the Council of 13 December 1999 on a Community framework for electronic signatures<sup>(2)</sup> and Directive 2000/31/EC of the European Parliament and of the Council of 8 June 2000 on certain legal aspects of information society services, in particular electronic commerce, in the internal market ('Directive on electronic commerce')<sup>(3)</sup> should, in the context of this Directive, apply to the transmission of information by electronic means. The public procurement procedures and the rules applicable to service contests require a level of security and confidentiality higher than that required by these Directives. Accordingly, the devices for the electronic receipt of offers, requests to participate and plans and projects should comply with specific additional requirements. To this end, use of electronic signatures, in particular advanced electronic signatures, should, as far as possible, be encouraged. Moreover, the existence of voluntary accreditation schemes could constitute a favourable framework for enhancing the level of certification service provision for these devices.
- (49) It is appropriate that the participants in an award procedure are informed of decisions to conclude a

framework agreement or to award a contract or to abandon the procedure within time limits that are sufficiently short so as not to render the lodging of requests for review impossible; this information should therefore be given as soon as possible and in general within 15 days following the decision.

- (50) It should be clarified that contracting entities which establish selection criteria in an open procedure should do so in accordance with objective rules and criteria, just as the selection criteria in restricted and negotiated procedures should be objective. These objective rules and criteria, just as the selection criteria, do not necessarily imply weightings.
- (51) It is important to take into account Court of Justice case-law in cases where an economic operator claims the economic, financial or technical capabilities of other entities, whatever the legal nature of the link between itself and those entities, in order to meet the selection criteria or, in the context of qualification systems, in support of its application for qualification. In the latter case, it is for the economic operator to prove that those resources will actually be available to it throughout the period of validity of the qualification. For the purposes of that qualification, a contracting entity may therefore determine the level of requirements to be met and in particular, for example where the operator lays claim to the financial standing of another entity, it may require that that entity be held liable, if necessary jointly and severally.

Qualification systems should be operated in accordance with objective rules and criteria, which, at the contracting entities' choice, may concern the capacities of the economic operators and/or the characteristics of the works, supplies or services covered by the system. For the purposes of qualification, contracting entities may conduct their own tests in order to evaluate the characteristics of the works, supplies or services concerned, in particular in terms of compatibility and safety.

- (52) The relevant Community rules on mutual recognition of diplomas, certificates or other evidence of formal qualifications apply when evidence of a particular qualification is required for participation in a procurement procedure or a design contest.
- (53) In appropriate cases, in which the nature of the works and/or services justifies applying environmental management measures or schemes during the performance of a contract, the application of such measures or schemes may be required. Environmental management schemes,

<sup>(1)</sup> OJ L 18, 21.1.1997, p. 1.

<sup>(2)</sup> OJ L 13, 19.1.2000, p. 12.

<sup>(3)</sup> OJ L 178, 17.7.2000, p. 1.

whether or not they are registered under Community instruments such as Regulation (EC) No 761/2001 (EMAS)<sup>(1)</sup>, can demonstrate that the economic operator has the technical capability to perform the contract. Moreover, a description of the measures implemented by the economic operator to ensure the same level of environmental protection should be accepted as an alternative to environmental management registration schemes as a form of evidence.

- (54) The award of public contracts to economic operators who have participated in a criminal organisation or who have been found guilty of corruption or of fraud to the detriment of the financial interests of the European Communities or of money laundering should be avoided. Given that contracting entities, which are not contracting authorities, might not have access to indisputable proof on the matter, it is appropriate to leave the choice of whether or not to apply the exclusion criteria listed in Article 45(1) of Directive 2004/18/EC to these contracting entities. The obligation to apply Article 45(1) should therefore be limited only to contracting entities that are contracting authorities. Where appropriate, the contracting entities should ask applicants for qualification, candidates or tenderers to supply relevant documents and, where they have doubts concerning the personal situation of these economic operators, they may seek the cooperation of the competent authorities of the Member State concerned. The exclusion of such economic operators should take place as soon as the contracting authority has knowledge of a judgment concerning such offences rendered in accordance with national law that has the force of *res judicata*.

If national law contains provisions to this effect, non-compliance with environmental legislation or legislation on unlawful agreements in contracts which has been the subject of a final judgment or a decision having equivalent effect may be considered an offence concerning the professional conduct of the economic operator concerned or grave misconduct.

Non-observance of national provisions implementing the Council Directives 2000/78/EC<sup>(2)</sup> and 76/207/EEC<sup>(3)</sup> concerning equal treatment of workers, which has been the subject of a final judgment or a decision having

equivalent effect may be considered an offence concerning the professional conduct of the economic operator concerned or grave misconduct.

- (55) Contracts must be awarded on the basis of objective criteria which ensure compliance with the principles of transparency, non-discrimination and equal treatment and which guarantee that tenders are assessed in conditions of effective competition. As a result, it is appropriate to allow the application of two award criteria only: 'the lowest price' and 'the most economically advantageous tender'.

To ensure compliance with the principle of equal treatment in the award of contracts, it is appropriate to lay down an obligation — established by case-law — to ensure the necessary transparency to enable all tenderers to be reasonably informed of the criteria and arrangements which will be applied to identify the most economically advantageous tender. It is therefore the responsibility of contracting entities to indicate the criteria for the award of the contract and the relative weighting given to each of those criteria in sufficient time for tenderers to be aware of them when preparing their tenders. Contracting entities may derogate from indicating the weighting of the criteria for the award of the contract in duly justified cases for which they must be able to give reasons, where the weighting cannot be established in advance, in particular on account of the complexity of the contract. In such cases, they must indicate the descending order of importance of the criteria.

Where contracting entities choose to award a contract to the most economically advantageous tender, they should assess the tenders in order to determine which one offers the best value for money. In order to do this, they should determine the economic and quality criteria which, taken as a whole, must make it possible to determine the most economically advantageous tender for the contracting entity. The determination of these criteria depends on the object of the contract since they must allow the level of performance offered by each tender to be assessed in the light of the object of the contract, as defined in the technical specifications, and the value for money of each tender to be measured. In order to guarantee equal treatment, the criteria for the award of the contract must enable tenders to be compared and assessed objectively. If these conditions are fulfilled, economic and qualitative criteria for the award of the contract, such as meeting environmental requirements, may enable the contracting entity to meet the needs of the public concerned, as expressed in the specifications of the contract. Under the same conditions, a contracting entity may use criteria aiming to meet social requirements, in particular in response to the needs — defined in the specifications of the contract — of particularly disadvantaged groups of people to which those receiving/using the works, supplies or services which are the object of the contract belong.

(1) Regulation (EC) No 761/2001 of the European Parliament and of the Council of 19 March 2001 allowing a voluntary participation by organisations in a Community eco-management and audit scheme (EMAS) (OJ L 114, 24.4.2001, p. 1).

(2) Council Directive 2000/78/EC of 27 November 2000 establishing a general framework for equal treatment in employment and occupation (OJ L 303, 2.12.2000, p. 16).

(3) Council Directive 76/207/EEC of 9 February 1976 on the implementation of the principle of equal treatment for men and women as regards access to employment, vocational training and promotion, and working conditions, (OJ L 39 of 14.2.1976, p. 40). Directive as amended by Directive 2002/73/EC of the European Parliament and of the Council (OJ L 269, 5.10.2002, p. 15).

- (56) The award criteria must not affect the application of national provisions on the remuneration of certain services, such as the services provided by architects, engineers or lawyers.
- (57) Council Regulation (EEC, Euratom) No 1182/71 of 3 June 1971 determining the rules applicable to periods, dates and time limits<sup>(1)</sup> should apply to the calculation of the time limits contained in this Directive.
- (58) This Directive should be without prejudice to the existing international obligations of the Community or of the Member States and should not prejudice the application of the provisions of the Treaty, in particular Articles 81 and 86 thereof.
- (59) This Directive should not prejudice the time-limits set out in Annex XXV, within which Member States are required to transpose and apply Directive 93/38/EEC.
- (60) The measures necessary for the implementation of this Directive should be adopted in accordance with Council Decision 1999/468/EC of 28 June 1999 laying down the procedures for the exercise of implementing powers conferred on the Commission,<sup>(2)</sup>.

## TITLE I

### GENERAL PROVISIONS APPLICABLE TO CONTRACTS AND DESIGN CONTESTS

#### CHAPTER I

#### **Basic terms**

##### *Article 1*

#### **Definitions**

1. For the purposes of this Directive, the definitions set out in this Article shall apply.
2. (a) 'Supply, works and service contracts' are contracts for pecuniary interest concluded in writing between one or more of the contracting entities referred to in Article 2(2), and one or more contractors, suppliers, or service providers.
- (b) 'Works contracts' are contracts having as their object either the execution, or both the design and execution, of works related to one of the activities within the meaning of Annex XII or a work, or the realisation by whatever means of a work corresponding to the requirements specified by the contracting entity. A 'work' means the outcome of building or civil engineering works taken as a whole which is sufficient of itself to fulfil an economic or technical function.

(c) 'Supply contracts' are contracts other than those referred to in (b) having as their object the purchase, lease, rental or hire-purchase, with or without the option to buy, of products.

A contract having as its object the supply of products, which also covers, as an incidental matter, siting and installation operations shall be considered to be a 'supply contract';

(d) 'Service contracts' are contracts other than works or supply contracts having as their object the provision of services referred to in Annex XVII.

A contract having as its object both products and services within the meaning of Annex XVII shall be considered to be a 'service contract' if the value of the services in question exceeds that of the products covered by the contract.

A contract having as its object services within the meaning of Annex XVII and including activities within the meaning of Annex XII that are only incidental to the principal object of the contract shall be considered to be a service contract.

3. (a) A 'works concession' is a contract of the same type as a works contract except for the fact that the consideration for the works to be carried out consists either solely in the right to exploit the work or in that right together with payment;

(b) A 'service concession' is a contract of the same type as a service contract except for the fact that the consideration for the provision of services consists either solely in the right to exploit the service or in that right together with payment.

4. A 'framework agreement' is an agreement between one or more contracting entities referred to in Article 2(2) and one or more economic operators, the purpose of which is to establish the terms governing contracts to be awarded during a given period, in particular with regard to price and, where appropriate, the quantities envisaged.

5. A 'dynamic purchasing system' is a completely electronic process for making commonly used purchases, the characteristics of which, as generally available on the market, meet the requirements of the contracting entity, which is limited in duration and open throughout its validity to any economic operator which satisfies the selection criteria and has submitted an indicative tender that complies with the specification.

6. An 'electronic auction' is a repetitive process involving an electronic device for the presentation of new prices, revised downwards, and/or new values concerning certain elements of tenders, which occurs after an initial full evaluation of the tenders, enabling them to be ranked using automatic evaluation methods. Consequently, certain service contracts and certain works contracts having as their subject-matter intellectual performances, such as the design of works, may not be the object of electronic auctions.

7. The terms 'contractor', 'supplier' or 'service provider' mean either a natural or a legal person, or a contracting entity within the meaning of Article 2(2)(a) or (b), or a group of such persons and/or entities which offers on the market, respectively, the execution of works and/or a work, products or services.

The terms 'economic operator' shall cover equally the concepts of contractor, supplier and service provider. It is used merely in the interests of simplification.

A 'tenderer' is an economic operator who submits a tender, and 'candidate' means one who has sought an invitation to take part in a restricted or negotiated procedure.

8. A 'central purchasing body' is a contracting authority within the meaning of Article 2(1)(a) or a contracting authority

within the meaning of Article 1(9) of Directive 2004/18/EC which:

— acquires supplies and/or services intended for contracting entities or

— awards public contracts or concludes framework agreements for works, supplies or services intended for contracting entities.

9. 'Open, restricted and negotiated procedures' are the procurement procedures applied by contracting entities, whereby:

(a) in the case of open procedures, any interested economic operator may submit a tender;

(b) in the case of restricted procedures, any economic operator may request to participate and only candidates invited by the contracting entity may submit a tender;

(c) in the case of negotiated procedures, the contracting entity consults the economic operators of its choice and negotiates the terms of the contract with one or more of these.

10. 'Design contests' are those procedures which enable the contracting entity to acquire, mainly in the fields of town and country planning, architecture, engineering or data processing, a plan or design selected by a jury after having been put out to competition with or without the award of prizes.

11. 'Written' or 'in writing' means any expression consisting of words or figures that can be read, reproduced and subsequently communicated. It may include information transmitted and stored by electronic means.

12. 'Electronic means' means using electronic equipment for the processing (including digital compression) and storage of data which is transmitted, conveyed and received by wire, by radio, by optical means or by other electromagnetic means.

13. 'Common Procurement Vocabulary (CPV)' means the reference nomenclature applicable to public contracts as adopted by Regulation (EC) No 2195/2002 of 5 November 2002 of the European Parliament and of the Council on the Common Procurement Vocabulary (CVP) <sup>(1)</sup> while ensuring equivalence with the other existing nomenclatures.

In the event of varying interpretations of the scope of this Directive, owing to possible differences between the CPV and NACE nomenclatures listed in Annex XII or between the CPV and CPC (provisional version) nomenclatures listed in Annex XVII, the NACE or the CPC nomenclature respectively shall take precedence.

<sup>(1)</sup> OJ L 340, 16.12.2002, p. 1.

## CHAPTER II

**Definition of the activities and entities covered**

## Section 1

## Entities

## Article 2

**Contracting entities**

1. For the purposes of this Directive,
  - (a) 'Contracting authorities' are State, regional or local authorities, bodies governed by public law, associations formed by one or several such authorities or one or several of such bodies governed by public law.

'A body governed by public law' means any body:

- established for the specific purpose of meeting needs in the general interest, not having an industrial or commercial character,
  - having legal personality and
  - financed, for the most part, by the State, regional or local authorities, or other bodies governed by public law; or subject to management supervision by those bodies; or having an administrative, managerial or supervisory board, more than half of whose members are appointed by the State, regional or local authorities, or by other bodies governed by public law;
- (b) a 'public undertaking' is any undertaking over which the contracting authorities may exercise directly or indirectly a dominant influence by virtue of their ownership of it, their financial participation therein, or the rules which govern it.

A dominant influence on the part of the contracting authorities shall be presumed when these authorities, directly or indirectly, in relation to an undertaking:

- hold the majority of the undertaking's subscribed capital, or
  - control the majority of the votes attaching to shares issued by the undertaking, or
  - can appoint more than half of the undertaking's administrative, management or supervisory body.
2. This Directive shall apply to contracting entities:
    - (a) which are contracting authorities or public undertakings and which pursue one of the activities referred to in Articles 3 to 7;
    - (b) which, when they are not contracting authorities or public undertakings, have as one of their activities any of the activities referred to in Articles 3 to 7, or any combination thereof and operate on the basis of special or exclusive rights granted by a competent authority of a Member State.
  3. For the purposes of this Directive, 'special or exclusive rights' mean rights granted by a competent authority of a

Member State by way of any legislative, regulatory or administrative provision the effect of which is to limit the exercise of activities defined in Articles 3 to 7 to one or more entities, and which substantially affects the ability of other entities to carry out such activity.

## Section 2

## Activities

## Article 3

**Gas, heat and electricity**

1. As far as gas and heat are concerned, this Directive shall apply to the following activities:

- (a) the provision or operation of fixed networks intended to provide a service to the public in connection with the production, transport or distribution of gas or heat; or
- (b) the supply of gas or heat to such networks.

2. The supply of gas or heat to networks which provide a service to the public by a contracting entity other than a contracting authority shall not be considered a relevant activity within the meaning of paragraph 1 where:

- (a) the production of gas or heat by the entity concerned is the unavoidable consequence of carrying out an activity other than those referred to in paragraphs 1 or 3 of this Article or in Articles 4 to 7; and
- (b) supply to the public network is aimed only at the economic exploitation of such production and amounts to not more than 20 % of the entity's turnover having regard to the average for the preceding three years, including the current year.

3. As far as electricity is concerned, this Directive shall apply to the following activities:

- (a) the provision or operation of fixed networks intended to provide a service to the public in connection with the production, transport or distribution of electricity; or
- (b) the supply of electricity to such networks.

4. The supply of electricity to networks which provide a service to the public by a contracting entity other than a contracting authority shall not be considered a relevant activity within the meaning of paragraph 3 where:

- (a) the production of electricity by the entity concerned takes place because its consumption is necessary for carrying out an activity other than those referred to in paragraphs 1 or 3 of this Article or in Articles 4 to 7; and
- (b) supply to the public network depends only on the entity's own consumption and has not exceeded 30% of the entity's total production of energy, having regard to the average for the preceding three years, including the current year.

## Article 4

**Water**

1. This Directive shall apply to the following activities:
  - (a) the provision or operation of fixed networks intended to provide a service to the public in connection with the production, transport or distribution of drinking water; or
  - (b) the supply of drinking water to such networks.
2. This Directive shall also apply to contracts or design contests awarded or organised by entities which pursue an activity referred to in paragraph 1 and which:
  - (a) are connected with hydraulic engineering projects, irrigation or land drainage, provided that the volume of water to be used for the supply of drinking water represents more than 20 % of the total volume of water made available by such projects or irrigation or drainage installations, or
  - (b) are connected with the disposal or treatment of sewage.
3. The supply of drinking water to networks which provide a service to the public by a contracting entity other than a contracting authority shall not be considered a relevant activity within the meaning of paragraph 1 where:
  - (a) the production of drinking water by the entity concerned takes place because its consumption is necessary for carrying out an activity other than those referred to in Articles 3 to 7; and
  - (b) supply to the public network depends only on the entity's own consumption and has not exceeded 30 % of the entity's total production of drinking water, having regard to the average for the preceding three years, including the current year.

## Article 5

**Transport services**

1. This Directive shall apply to activities relating to the provision or operation of networks providing a service to the public in the field of transport by railway, automated systems, tramway, trolley bus, bus or cable.

As regards transport services, a network shall be considered to exist where the service is provided under operating conditions laid down by a competent authority of a Member State, such as conditions on the routes to be served, the capacity to be made available or the frequency of the service.

2. This Directive shall not apply to entities providing bus transport services to the public which were excluded from the scope of Directive 93/38/EEC pursuant to Article 2(4) thereof.

## Article 6

**Postal services**

1. This Directive shall apply to activities relating to the provision of postal services or, on the conditions set out in paragraph 2(c), other services than postal services.
2. For the purpose of this Directive and without prejudice to Directive 97/67/EC:
  - (a) 'postal item': means an item addressed in the final form in which it is to be carried, irrespective of weight. In addition to items of correspondence, such items also include for instance books, catalogues, newspapers, periodicals and postal packages containing merchandise with or without commercial value, irrespective of weight;
  - (b) 'postal services': means services consisting of the clearance, sorting, routing and delivery of postal items. These services comprise:
    - 'reserved postal services': postal services which are or may be reserved on the basis of Article 7 of Directive 97/67/EC,
    - 'other postal services': postal services which may not be reserved on the basis of Article 7 of Directive 97/67/EC; and
  - (c) 'other services than postal services': means services provided in the following areas:
    - mail service management services (services both preceding and subsequent to despatch, such as 'mailroom management services'),
    - added-value services linked to and provided entirely by electronic means (including the secure transmission of coded documents by electronic means, address management services and transmission of registered electronic mail),
    - services concerning postal items not included in point (a), such as direct mail bearing no address,
    - financial services, as defined in category 6 of Annex XVII A and in Article 24(c) and including in particular postal money orders and postal giro transfers,
    - philatelic services, and
    - logistics services (services combining physical delivery and/or warehousing with other non-postal functions),

on condition that such services are provided by an entity which also provides postal services within the meaning of point (b), first or second indent, and provided that the conditions set out in Article 30(1) are not satisfied in respect of the services falling within those indents.

*Article 7***Exploration for, or extraction of, oil, gas, coal or other solid fuels, as well as ports and airports**

This Directive shall apply to activities relating to the exploitation of a geographical area for the purpose of:

- (a) exploring for or extracting oil, gas, coal or other solid fuels, or
- (b) the provision of airports and maritime or inland ports or other terminal facilities to carriers by air, sea or inland waterway.

*Article 8***Lists of contracting entities**

The non-exhaustive lists of contracting entities within the meaning of this Directive are contained in Annexes I to X. Member States shall notify the Commission periodically of any changes to their lists.

*Article 9***Contracts covering several activities**

1. A contract which is intended to cover several activities shall be subject to the rules applicable to the activity for which it is principally intended.

However, the choice between awarding a single contract and awarding a number of separate contracts may not be made with the objective of excluding it from the scope of this Directive or, where applicable, Directive 2004/18/EC.

2. If one of the activities for which the contract is intended is subject to this Directive and the other to the abovementioned Directive 2004/18/EC and if it is objectively impossible to determine for which activity the contract is principally intended, the contract shall be awarded in accordance with the abovementioned Directive 2004/18/EC.

3. If one of the activities for which the contract is intended is subject to this Directive and the other is not subject to either this Directive or the abovementioned Directive 2004/18/EC, and if it is objectively impossible to determine for which activity the contract is principally intended, the contract shall be awarded in accordance with this Directive.

## CHAPTER III

**General principles***Article 10***Principles of awarding contracts**

Contracting entities shall treat economic operators equally and non-discriminatorily and shall act in a transparent way.

## TITLE II

## RULES APPLICABLE TO CONTRACTS

## CHAPTER I

**General provisions***Article 11***Economic operators**

1. Candidates or tenderers who, under the law of the Member State in which they are established, are entitled to provide the relevant service, shall not be rejected solely on the ground that, under the law of the Member State in which the contract is awarded, they would be required to be either natural or legal persons.

However, in the case of service and works contracts as well as supply contracts covering in addition services and/or siting and installation operations, legal persons may be required to indicate, in the tender or the request to participate, the names and relevant professional qualifications of the staff to be responsible for the performance of the contract in question.

2. Groups of economic operators may submit tenders or put themselves forward as candidates. In order to submit a tender or a request to participate, these groups may not be required by the contracting entities to assume a specific legal form; however, the group selected may be required to do so when it has been awarded the contract, to the extent to which

this change is necessary for the satisfactory performance of the contract.

*Article 12***Conditions relating to agreements concluded within the World Trade Organisation**

For the purposes of the award of contracts by contracting entities, Member States shall apply in their relations conditions as favourable as those which they grant to economic operators of third countries in implementation of the Agreement. Member States shall, to this end, consult one another within the Advisory Committee for Public Contracts on the measures to be taken pursuant to the Agreement.

*Article 13***Confidentiality**

1. In the context of provision of technical specifications to interested economic operators, of qualification and selection of economic operators and of award of contracts, contracting entities may impose requirements with a view to protecting the confidential nature of information which they make available.

2. Without prejudice to the provisions of this Directive, in particular those concerning the obligations relating to the advertising of awarded contracts and to the information to candidates and tenderers set out in Articles 43 and 49, and in accordance with the national law to which the contracting entity is subject, the contracting authority shall not disclose information forwarded to it by economic operators which they have designated as confidential; such information includes, in particular, technical or trade secrets and the confidential aspects of tenders.

#### Article 14

##### Framework agreements

1. Contracting entities may regard a framework agreement as a contract within the meaning of Article 1(2) and award it in accordance with this Directive.

2. Where contracting entities have awarded a framework agreement in accordance with this Directive, they may avail themselves of Article 40(3)(i) when awarding contracts based on that framework agreement.

3. Where a framework agreement has not been awarded in accordance with this Directive, contracting entities may not avail themselves of Article 40(3)(i).

4. Contracting entities may not misuse framework agreements in order to hinder, limit or distort competition.

#### Article 15

##### Dynamic purchasing systems

1. Member States may provide that contracting entities may use dynamic purchasing systems.

2. In order to set up a dynamic purchasing system, contracting entities shall follow the rules of the open procedure in all its phases up to the award of the contracts to be concluded under this system. All tenderers who satisfy the selection criteria and have submitted an indicative tender which complies with the specification and any possible additional documents shall be admitted to the system; indicative tenders may be improved at any time provided that they continue to comply with the specification. With a view to setting up the system and to the award of contracts under that system, contracting entities shall use solely electronic means in accordance with Article 48(2) to (5).

3. For the purposes of setting up the dynamic purchasing system, contracting entities shall:

(a) publish a contract notice making it clear that a dynamic purchasing system is involved;

(b) indicate in the specification, amongst other matters, the nature of the purchases envisaged under that system, as well as all the necessary information concerning the purchasing system, the electronic equipment used and the technical connection arrangements and specifications;

(c) offer by electronic means, on publication of the notice and until the system expires, unrestricted, direct and full access to the specification and to any additional documents and shall indicate in the notice the internet address at which such documents may be consulted.

4. Contracting entities shall give any economic operator, throughout the entire period of the dynamic purchasing system, the possibility of submitting an indicative tender and of being admitted to the system under the conditions referred to in paragraph 2. They shall complete evaluation within a maximum of 15 days from the date of submission of the indicative tender. However, they may extend the evaluation period provided that no invitation to tender is issued in the meantime.

Contracting entities shall inform the tenderer referred to in the first subparagraph at the earliest possible opportunity of its admittance to the dynamic purchasing system or of the rejection of its indicative tender.

5. Each specific contract shall be the subject of an invitation to tender. Before issuing the invitation to tender, contracting entities shall publish a simplified contract notice inviting all interested economic operators to submit an indicative tender, in accordance with paragraph 4, within a time limit that may not be less than 15 days from the date on which the simplified notice was sent. Contracting entities may not proceed with tendering until they have completed evaluation of all the indicative tenders received within that time limit.

6. Contracting entities shall invite all tenderers admitted to the system to submit a tender for each specific contract to be awarded under the system. To that end, they shall set a time limit for the submission of tenders.

They shall award the contract to the tenderer which submitted the best tender on the basis of the award criteria set out in the contract notice for the establishment of the dynamic purchasing system. Those criteria may, if appropriate, be formulated more precisely in the invitation referred to in the first subparagraph.

7. A dynamic purchasing system may not last for more than four years, except in duly justified exceptional cases.

Contracting entities may not resort to this system to prevent, restrict or distort competition.

No charges may be billed to the interested economic operators or to parties to the system.

## CHAPTER II

**Thresholds and exclusion provisions**

## Section 1

## Thresholds

## Article 16

**Contract thresholds**

Save where they are ruled out by the exclusions in Articles 19 to 26 or pursuant to Article 30, concerning the pursuit of the activity in question, this Directive shall apply to contracts which have a value excluding value-added tax (VAT) estimated to be no less than the following thresholds:

- (a) EUR 499 000 in the case of supply and service contracts;
- (b) EUR 6 242 000 in the case of works contracts.

## Article 17

**Methods of calculating the estimated value of contracts, framework agreements and dynamic purchasing systems**

1. The calculation of the estimated value of a contract shall be based on the total amount payable, net of VAT, as estimated by the contracting entity. This calculation shall take account of the estimated total amount, including any form of option and any renewals of the contract.

Where the contracting entity provides for prizes or payments to candidates or tenderers it shall take them into account when calculating the estimated value of the contract.

2. Contracting entities may not circumvent this Directive by splitting works projects or proposed purchases of a certain quantity of supplies and/or services or by using special methods for calculating the estimated value of contracts.

3. With regard to framework agreements and dynamic purchasing systems, the estimated value to be taken into consideration shall be the maximum estimated value net of VAT of all the contracts envisaged for the total term of the agreement or system.

4. For the purposes of Article 16, contracting entities shall include in the estimated value of a works contract both the cost of the works and the value of any supplies or services necessary for the execution of the works, which they make available to the contractor.

5. The value of supplies or services which are not necessary for the performance of a particular works contract may not be added to the value of the works contract when to do so would result in removing the procurement of those supplies or services from the scope of this Directive.

6. (a) Where a proposed work or purchase of services may result in contracts being awarded at the same time in

the form of separate lots, account shall be taken of the total estimated value of all such lots.

Where the aggregate value of the lots is equal to or exceeds the threshold laid down in Article 16, this Directive shall apply to the awarding of each lot.

However, the contracting entities may waive such application in respect of lots the estimated value of which, net of VAT, is less than EUR 80 000 for services or EUR 1 million for works, provided that the aggregate value of those lots does not exceed 20 % of the aggregate value of the lots as a whole.

(b) Where a proposal for the acquisition of similar supplies may result in contracts being awarded at the same time in the form of separate lots, account shall be taken of the total estimated value of all such lots when applying Article 16.

Where the aggregate value of the lots is equal to or exceeds the threshold laid down in Article 16, this Directive shall apply to the awarding of each lot.

However, the contracting entities may waive such application in respect of lots, the estimated value of which, net of VAT, is less than EUR 80 000, provided that the aggregate cost of those lots does not exceed 20 % of the aggregate value of the lots as a whole.

7. In the case of supply or service contracts which are regular in nature or which are intended to be renewed within a given period, the calculation of the estimated contract value shall be based on the following:

- (a) either the total actual value of the successive contracts of the same type awarded during the preceding twelve months or financial year adjusted, if possible, to take account of the changes in quantity or value which would occur in the course of the 12 months following the initial contract;
- (b) or the total estimated value of the successive contracts awarded during the 12 months following the first delivery, or during the financial year if that is longer than 12 months.

8. The basis for calculating the estimated value of a contract including both supplies and services shall be the total value of the supplies and services, regardless of their respective shares. The calculation shall include the value of the siting and installation operations.

9. With regard to supply contracts relating to the leasing, hire, rental or hire purchase of products, the value to be taken as a basis for calculating the estimated contract value shall be as follows:

- (a) in the case of fixed-term contracts, if that term is less than or equal to 12 months, the total estimated value for the term of the contract or, if the term of the contract is greater than 12 months, the total value including the estimated residual value;

(b) in the case of contracts without a fixed term or the term of which cannot be defined, the monthly value multiplied by 48.

10. For the purposes of calculating the estimated contract value of service contracts, the following amounts shall, where appropriate, be taken into account:

- (a) the premium payable, and other forms of remuneration, in the case of insurance services;
- (b) fees, commissions, interest and other modes of remuneration, in the case of banking and other financial services;
- (c) fees, commissions payable and other forms of remuneration, in the case of contracts involving design tasks.

11. In the case of service contracts which do not indicate a total price, the value to be used as the basis for calculating the estimated contract value shall be:

- (a) in the case of fixed-term contracts, if that term is less than or equal to 48 months: the total value for their full term;
- (b) in the case of contracts without a fixed term or with a term greater than 48 months: the monthly value multiplied by 48.

## Section 2

Contracts and concessions and contracts subject to special arrangements

### SUBSECTION 1

#### Article 18

#### **Works and service concessions**

This Directive shall not apply to works and service concessions which are awarded by contracting entities carrying out one or more of the activities referred to in Articles 3 to 7, where those concessions are awarded for carrying out those activities.

### SUBSECTION 2

Exclusions applicable to all contracting entities and to all types of contract

#### Article 19

#### **Contracts awarded for purposes of resale or lease to third parties**

1. This Directive shall not apply to contracts awarded for purposes of resale or lease to third parties, provided that the contracting entity enjoys no special or exclusive right to sell or lease the subject of such contracts, and other entities are free to sell or lease it under the same conditions as the contracting entity.

2. The contracting entities shall notify the Commission at its request of all the categories of products or activities which

they regard as excluded under paragraph 1. The Commission may periodically publish in the *Official Journal of the European Union*, for information purposes, lists of the categories of products and activities which it considers to be covered by this exclusion. In so doing, the Commission shall respect any sensitive commercial aspects that the contracting entities may point out when forwarding information.

#### Article 20

#### **Contracts awarded for purposes other than the pursuit of an activity covered or for the pursuit of such an activity in a third country**

1. This Directive shall not apply to contracts which the contracting entities award for purposes other than the pursuit of their activities as described in Articles 3 to 7 or for the pursuit of such activities in a third country, in conditions not involving the physical use of a network or geographical area within the Community.

2. The contracting entities shall notify the Commission at its request of any activities which they regard as excluded under paragraph 1. The Commission may periodically publish in the *Official Journal of the European Union* for information purposes, lists of the categories of activities which it considers to be covered by this exclusion. In so doing, the Commission shall respect any sensitive commercial aspects that the contracting entities may point out when forwarding this information.

#### Article 21

#### **Contracts which are secret or require special security measures**

This Directive shall not apply to contracts when they are declared to be secret by a Member State, when their performance must be accompanied by special security measures in accordance with the laws, regulations or administrative provisions in force in the Member State concerned, or when the protection of the basic security interests of that Member State so requires.

#### Article 22

#### **Contracts awarded pursuant to international rules**

This Directive shall not apply to contracts governed by different procedural rules and awarded:

- (a) pursuant to an international agreement concluded in accordance with the Treaty between a Member State and one or more third countries and covering supplies, works, services or design contests intended for the joint implementation or exploitation of a project by the signatory States; all agreements shall be communicated to the Commission, which may consult the Advisory Committee for Public Contracts referred to in Article 68;

- (b) pursuant to a concluded international agreement relating to the stationing of troops and concerning the undertakings of a Member State or a third country;
- (c) pursuant to the particular procedure of an international organisation.

provision of such supplies to undertakings with which it is affiliated;

- (c) to works contracts provided that at least 80 % of the average turnover of the affiliated undertaking with respect to works for the preceding three years derives from the provision of such works to undertakings with which it is affiliated.

#### Article 23

#### **Contracts awarded to an affiliated undertaking, to a joint venture or to a contracting entity forming part of a joint venture**

1. For the purposes of this Article, 'affiliated undertaking' means any undertaking the annual accounts of which are consolidated with those of the contracting entity in accordance with the requirements of the Seventh Council Directive 83/349/EEC of 13 June 1983 based on the Article 44(2)(g) of the Treaty on consolidated accounts<sup>(1)</sup> (?), or, in the case of entities not subject to that Directive, any undertaking over which the contracting entity may exercise, directly or indirectly, a dominant influence within the meaning of Article 2(1)(b) hereof or which may exercise a dominant influence over the contracting entity or which, in common with the contracting entity, is subject to the dominant influence of another undertaking by virtue of ownership, financial participation, or the rules which govern it.

When, because of the date on which an affiliated undertaking was created or commenced activities, the turnover is not available for the preceding three years, it will be sufficient for that undertaking to show that the turnover referred to in points (a), (b) or (c) is credible, particularly by means of business projections.

Where more than one undertaking affiliated with the contracting entity provides the same or similar services, supplies or works, the above percentages shall be calculated taking into account the total turnover deriving respectively from the provision of services, supplies or works by those affiliated undertakings.

2. Provided that the conditions in paragraph 3 are met, this Directive shall not apply to contracts awarded:

4. This Directive shall not apply to contracts awarded:

- (a) by a contracting entity to an affiliated undertaking, or
- (b) by a joint venture, formed exclusively by a number of contracting entities for the purpose of carrying out activities within the meaning of Articles 3 to 7, to an undertaking which is affiliated with one of these contracting entities.

- (a) by a joint venture, formed exclusively by a number of contracting entities for the purpose of carrying out activities within the meaning of Articles 3 to 7, to one of these contracting entities, or

3. Paragraph 2 shall apply:

- (b) by a contracting entity to such a joint venture of which it forms part, provided that the joint venture has been set up in order to carry out the activity concerned over a period of at least three years and that the instrument setting up the joint venture stipulates that the contracting entities, which form it, will be part thereof for at least the same period.

- (a) to service contracts provided that at least 80 % of the average turnover of the affiliated undertaking with respect to services for the preceding three years derives from the provision of such services to undertakings with which it is affiliated;

5. Contracting entities shall notify to the Commission, at its request, the following information regarding the application of paragraphs 2, 3 and 4:

- (b) to supplies contracts provided that at least 80 % of the average turnover of the affiliated undertaking with respect to supplies for the preceding three years derives from the

- (a) the names of the undertakings or joint ventures concerned,
- (b) the nature and value of the contracts involved,

<sup>(1)</sup> OJ L 193, 18.7.1983, p. 1. Directive as last amended by Directive 2001/65/EC of the European Parliament and of the Council (OJ L 283, 27.10.2001, p. 28).

<sup>(?)</sup> Editorial Note: The title of the Directive has been adjusted to take account of the renumbering of the Articles of the Treaty in accordance with Article 12 of the Treaty of Amsterdam; the original reference was to Article 54(3)(g) of the Treaty.

- (c) such proof as may be deemed necessary by the Commission that the relationship between the undertaking or joint venture to which the contracts are awarded and the contracting entity complies with the requirements of this Article.

## SUBSECTION 3

Exclusions applicable to all contracting entities, but to service contracts only

## Article 24

**Contracts relating to certain services excluded from the scope of this Directive**

This Directive shall not apply to service contracts for:

- (a) the acquisition or rental, by whatever financial means, of land, existing buildings or other immovable property or concerning rights thereon; nevertheless, financial service contracts concluded at the same time as, before or after the contract of acquisition or rental, in whatever form, shall be subject to this Directive;
- (b) arbitration and conciliation services;
- (c) financial services in connection with the issue, sale, purchase or transfer of securities or other financial instruments, in particular transactions by the contracting entities to raise money or capital;
- (d) employment contracts;
- (e) research and development services other than those where the benefits accrue exclusively to the contracting entity for its use in the conduct of its own affairs, on condition that the service provided is wholly remunerated by the contracting entity.

## Article 25

**Service contracts awarded on the basis of an exclusive right**

This Directive shall not apply to service contracts awarded to an entity which is itself a contracting authority within the meaning of Article 2(1)(a) or to an association of contracting authorities on the basis of an exclusive right which they enjoy pursuant to a published law, regulation or administrative provision which is compatible with the Treaty.

## SUBSECTION 4

Exclusions applicable to certain contracting entities only

## Article 26

**Contracts awarded by certain contracting entities for the purchase of water and for the supply of energy or of fuels for the production of energy**

This Directive shall not apply:

(a) to contracts for the purchase of water if awarded by contracting entities engaged in one or both of the activities referred to in Article 4(1).

(b) to contracts for the supply of energy or of fuels for the production of energy, if awarded by contracting entities engaged in an activity referred to in Article 3(1), Article 3(3) or Article 7(a).

## SUBSECTION 5

Contracts subject to special arrangements, provisions concerning central purchasing bodies and the general procedure in case of direct exposure to competition

## Article 27

**Contracts subject to special arrangements**

Without prejudice to Article 30 the Kingdom of the Netherlands, the United Kingdom, the Republic of Austria and the Federal Republic of Germany shall ensure, by way of the conditions of authorisation or other appropriate measures, that any entity operating in the sectors mentioned in Decisions 93/676/EEC, 97/367/EEC, 2002/205/EC and 2004/73/EC:

- (a) observes the principles of non-discrimination and competitive procurement in respect of the award of supplies, works and service contracts, in particular as regards the information which the entity makes available to economic operators concerning its procurement intentions;
- (b) communicates to the Commission, under the conditions defined in Commission Decision 93/327/EEC defining the conditions under which contracting entities exploiting geographical areas for the purpose of exploring for or extracting oil, gas, coal or other solid fuels must communicate to the Commission information relating to the contracts they award<sup>(1)</sup>.

## Article 28

**Reserved contracts**

Member States may reserve the right to participate in contract award procedures to sheltered workshops or provide for such contracts to be performed in the context of sheltered employment programmes where most of the employees concerned are handicapped persons who, by reason of the nature or the seriousness of their disabilities, cannot carry on occupations under normal conditions.

The notice used to make the call for competition shall make reference to this Article.

<sup>(1)</sup> OJ L 129, 27.5.1993, p. 25.

## Article 29

**Contracts and framework agreements awarded by central purchasing bodies**

1. Member States may prescribe that contracting entities may purchase works, supplies and/or services from or through a central purchasing body.

2. Contracting entities which purchase works, supplies and/or services from or through a central purchasing body in the cases set out in Article 1(8) shall be deemed to have complied with this Directive insofar as the central purchasing body has complied with it or, where appropriate, with Directive 2004/18/EC.

## Article 30

**Procedure for establishing whether a given activity is directly exposed to competition**

1. Contracts intended to enable an activity mentioned in Articles 3 to 7 to be carried out shall not be subject to this Directive if, in the Member State in which it is performed, the activity is directly exposed to competition on markets to which access is not restricted.

2. For the purposes of paragraph 1, the question of whether an activity is directly exposed to competition shall be decided on the basis of criteria that are in conformity with the Treaty provisions on competition, such as the characteristics of the goods or services concerned, the existence of alternative goods or services, the prices and the actual or potential presence of more than one supplier of the goods or services in question.

3. For the purposes of paragraph 1, access to a market shall be deemed not to be restricted if the Member State has implemented and applied the provisions of Community legislation mentioned in Annex XI.

If free access to a given market cannot be presumed on the basis of the first subparagraph, it must be demonstrated that access to the market in question is free de facto and de jure.

4. When a Member State considers that, in compliance with paragraphs 2 and 3, paragraph 1 is applicable to a given activity, it shall notify the Commission and inform it of all relevant facts, and in particular of any law, regulation, administrative provision or agreement concerning compliance with the conditions set out in paragraph 1, where appropriate together with the position adopted by an independent national authority that is competent in relation to the activity concerned.

Contracts intended to enable the activity concerned to be carried out shall no longer be subject to this Directive if the Commission:

— has adopted a Decision establishing the applicability of paragraph 1 in accordance with paragraph 6 and within the period it provides for, or

— has not adopted a Decision concerning such applicability within that period.

However, where free access to a given market is presumed on the basis of the first subparagraph of paragraph 3, and where an independent national authority that is competent in the activity concerned has established the applicability of paragraph 1, contracts intended to enable the activity concerned to be carried out shall no longer be subject to this Directive if the Commission has not established the inapplicability of paragraph 1 by a Decision adopted in conformity with paragraph 6 and within the period it provides for.

5. When the legislation of the Member State concerned provides for it, the contracting entities may ask the Commission to establish the applicability of paragraph 1 to a given activity by a Decision in conformity with paragraph 6. In such a case, the Commission shall immediately inform the Member State concerned.

That Member State shall, taking account of paragraphs 2 and 3, inform the Commission of all relevant facts, and in particular of any law, regulation, administrative provision or agreement concerning compliance with the conditions set out in paragraph 1, where appropriate together with the position adopted by an independent national authority that is competent in the activity concerned.

The Commission may also begin the procedure for adoption of a Decision establishing the applicability of paragraph 1 to a given activity on its own initiative. In such a case, the Commission shall immediately inform the Member State concerned.

If, at the end of the period laid down in paragraph 6, the Commission has not adopted a Decision concerning the applicability of paragraph 1 to a given activity, paragraph 1 shall be deemed to be applicable.

6. For the adoption of a Decision under this Article, in accordance with the procedure under Article 68(2), the Commission shall be allowed a period of three months commencing on the first working day following the date on which it receives the notification or the request. However, this period may be extended once by a maximum of three months in duly justified cases, in particular if the information contained in the notification or the request or in the documents annexed thereto is incomplete or inexact or if the facts as reported undergo any substantive changes. This extension shall be limited to one month where an independent national authority that is competent in the activity concerned has established the applicability of paragraph 1 in the cases provided for under the third subparagraph of paragraph 4.

When an activity in a given Member State is already the subject of a procedure under this Article, further requests concerning the same activity in the same Member State before the expiry of the period opened in respect of the first request shall not be considered as new procedures and shall be treated in the context of the first request.

The Commission shall adopt detailed rules for applying paragraphs 4, 5 and 6 in accordance with the procedure under Article 68(2).

These rules shall include at least:

- (a) the publication in the Official Journal, for information, of the date on which the three-month period referred to in the first subparagraph begins, and, in case this period is prolonged, the date of prolongation and the period by which it is prolonged;
- (b) publication of the possible applicability of paragraph 1 in accordance with the second or third subparagraph of paragraph 4 or in accordance with the fourth subparagraph of paragraph 5; and
- (c) the arrangements for forwarding positions adopted by an independent authority that is competent in the activity concerned, regarding questions relevant to paragraphs 1 and 2.

#### CHAPTER III

##### **Rules applicable to service contracts**

###### *Article 31*

##### **Service contracts listed in Annex XVII A**

Contracts which have as their object services listed in Annex XVII A shall be awarded in accordance with Articles 34 to 59.

###### *Article 32*

##### **Service contracts listed in Annex XVII B**

Contracts which have as their object services listed in Annex XVII B shall be governed solely by Articles 34 and 43.

###### *Article 33*

##### **Mixed service contracts including services listed in Annexes XVII A and services listed in Annex XVII B**

Contracts which have as their subject-matter services listed both in Annex XVII A and in Annex XVII B shall be awarded in accordance with Articles 34 to 59 where the value of the services listed in Annex XVII A is greater than the value of the services listed in Annex XVII B. In other cases, contracts shall be awarded in accordance with Articles 34 and 43.

#### CHAPTER IV

##### **Specific rules governing specifications and contract documents**

###### *Article 34*

##### **Technical specifications**

1. Technical specifications as defined in point 1 of Annex XXI shall be set out in the contract documentation,

such as contract notices, contract documents or additional documents. Whenever possible these technical specifications should be defined so as to take into account accessibility criteria for people with disabilities or design for all users.

2. Technical specifications shall afford equal access for tenderers and not have the effect of creating unjustified obstacles to the opening up of public procurement to competition.

3. Without prejudice to legally binding national technical rules, to the extent that they are compatible with Community law, the technical specifications shall be formulated:

(a) either by reference to technical specifications defined in Annex XXI and, in order of preference, to national standards transposing European standards, European technical approvals, common technical specifications, international standards, other technical reference systems established by the European standardisation bodies or — when these do not exist — national standards, national technical approvals or national technical specifications relating to the design, calculation and execution of the works and use of the products. Each reference shall be accompanied by the words 'or equivalent';

(b) or in terms of performance or functional requirements; the latter may include environmental characteristics. However, such parameters must be sufficiently precise to allow tenderers to determine the subject-matter of the contract and to allow contracting entities to award the contract;

(c) or in terms of performance or functional requirements as mentioned in subparagraph (b), with reference to the specifications mentioned in subparagraph (a) as a means of presuming conformity with such performance or functional requirements;

(d) or by referring to the specifications mentioned in subparagraph (a) for certain characteristics, and by referring to the performance or functional requirements mentioned in subparagraph (b) for other characteristics.

4. Where a contracting entity makes use of the option of referring to the specifications mentioned in paragraph 3(a), it cannot reject a tender on the ground that the products and services tendered for do not comply with the specifications to which it has referred, once the tenderer proves in his tender to the satisfaction of the contracting entity, by whatever appropriate means, that the solutions which he proposes satisfy in an equivalent manner the requirements defined by the technical specifications.

An appropriate means might be constituted by a technical dossier from the manufacturer or a test report from a recognised body.

5. Where a contracting entity uses the option provided for in paragraph 3 of laying down performance or functional requirements, it may not reject a tender for products, services or works which comply with a national standard transposing a European standard, with a European technical approval, a common technical specification, an international standard, or a technical reference system established by a European standardisation body, if these specifications address the performance or functional requirements which it has laid down.

In his tender, the tenderer shall prove to the satisfaction of the contracting entity and by any appropriate means that the product, service or work in compliance with the standard meets the performance or functional requirements of the contracting entity.

An appropriate means might be constituted by a technical dossier from the manufacturer or a test report from a recognised body.

6. Where contracting entities lay down environmental characteristics in terms of performance or functional requirements as referred to in paragraph 3(b) they may use the detailed specifications, or, if necessary, parts thereof, as defined by European or (multi-) national eco-labels, or by any other eco-label, provided that:

- those specifications are appropriate to define the characteristics of the supplies or services that are the object of the contract,
- the requirements for the label are drawn up on the basis of scientific information,
- the eco-labels are adopted using a procedure in which all stakeholders, such as government bodies, consumers, manufacturers, distributors and environmental organisations can participate, and
- they are accessible to all interested parties.

Contracting entities may indicate that the products and services bearing the eco-label are presumed to comply with the technical specifications laid down in the contract documents; they must accept any other appropriate means of proof, such as a technical dossier from the manufacturer or a test report from a recognised body.

7. 'Recognised bodies', within the meaning of this Article, are test and calibration laboratories, and certification and inspection bodies which comply with applicable European standards.

Contracting entities shall accept certificates from recognised bodies established in other Member States.

8. Unless justified by the subject-matter of the contract, technical specifications shall not refer to a specific make or source, or to a particular process, or to trade marks, patents,

types or a specific origin or production with the effect of favouring or eliminating certain undertakings or certain products. Such reference shall be permitted, on an exceptional basis, where a sufficiently precise and intelligible description of the subject-matter of the contract pursuant to paragraphs 3 and 4 is not possible; such reference shall be accompanied by the words 'or equivalent'.

#### Article 35

### Communication of technical specifications

1. Contracting entities shall make available on request to economic operators interested in obtaining a contract the technical specifications regularly referred to in their supply, works or service contracts, or the technical specifications which they intend to apply to contracts covered by periodic indicative notices within the meaning of Article 41(1).

2. Where the technical specifications are based on documents available to interested economic operators, the inclusion of a reference to those documents shall be sufficient.

#### Article 36

### Variants

1. Where the criterion for the award of the contract is that of the most economically advantageous tender, contracting entities may take account of variants which are submitted by a tenderer and meet the minimum requirements specified by the contracting entities.

Contracting entities shall indicate in the specifications whether or not they authorise variants and, if so, the minimum requirements to be met by the variants and any specific requirements for their presentation.

2. In procedures for awarding supply or service contracts, contracting entities which have authorised variants pursuant to paragraph 1 may not reject a variant on the sole ground that it would, if successful, lead either to a service contract rather than a supply contract or to a supply contract rather than a service contract.

#### Article 37

### Subcontracting

In the contract documents, the contracting entity may ask, or may be required by a Member State to ask, the tenderer to indicate in his tender any share of the contract he intends to subcontract to third parties and any proposed subcontractors. This indication shall be without prejudice to the question of the principal economic operator's liability.

## Article 38

**Conditions for performance of contracts**

Contracting entities may lay down special conditions relating to the performance of a contract, provided that these are compatible with Community law and are indicated in the notice used as a means of calling for competition or in the specifications. The conditions governing the performance of a contract may, in particular, concern social and environmental considerations.

## Article 39

**Obligations relating to taxes, environmental protection, employment protection provisions and working conditions**

1. A contracting entity may state in the contract documents, or be required by a Member State so to state, the body or bodies from which a candidate or tenderer may obtain the appropriate information on the obligations relating to taxes, to environmental protection, to protection provisions and to the working conditions which are in force in the Member State, region or locality in which the services are to be provided and which shall be applicable to the works carried out on site or to the services provided during the performance of the contract.

2. A contracting entity which supplies the information referred to in paragraph 1 shall request the tenderers or candidates in the contract award procedure to indicate that they have taken account, when drawing up their tender, of the obligations relating to employment protection provisions and the working conditions which are in force in the place where the service is to be provided.

The first subparagraph shall be without prejudice to the application of Article 57.

## CHAPTER V

**Procedures**

## Article 40

**Use of open, restricted and negotiated procedures**

1. When awarding supply, works or service contracts, contracting entities shall apply the procedures adjusted for the purposes of this Directive.

2. Contracting entities may choose any of the procedures described in Article 1(9)(a), (b) or (c), provided that, subject to paragraph 3, a call for competition has been made in accordance with Article 42.

3. Contracting entities may use a procedure without prior call for competition in the following cases:

- (a) when no tenders or no suitable tenders or no applications have been submitted in response to a procedure with a prior call for competition, provided that the initial conditions of contract are not substantially altered;
- (b) where a contract is purely for the purpose of research, experiment, study or development, and not for the purpose of securing a profit or of recovering research and development costs, and insofar as the award of such contract does not prejudice the competitive award of subsequent contracts which do seek, in particular, those ends;
- (c) when, for technical or artistic reasons, or for reasons connected with the protection of exclusive rights, the contract may be executed only by a particular economic operator;
- (d) insofar as is strictly necessary when, for reasons of extreme urgency brought about by events unforeseeable by the contracting entities, the time limits laid down for open procedures, restricted procedures and negotiated procedures with a prior call for competition cannot be adhered to;
- (e) in the case of supply contracts for additional deliveries by the original supplier which are intended either as a partial replacement of normal supplies or installations or as the extension of existing supplies or installations, where a change of supplier would oblige the contracting entity to acquire material having different technical characteristics which would result in incompatibility or disproportionate technical difficulties in operation and maintenance;
- (f) for additional works or services which were not included in the project initially awarded or in the contract first concluded but have, through unforeseen circumstances, become necessary to the performance of the contract, on condition that the award is made to the contractor or service provider executing the original contract:
  - when such additional works or services cannot be technically or economically separated from the main contract without great inconvenience to the contracting entities, or
  - when such additional works or services, although separable from the performance of the original contract, are strictly necessary to its later stages;
- (g) in the case of works contracts, for new works consisting in the repetition of similar works assigned to the contractor to which the same contracting entities awarded an earlier contract, provided that such works conform to a basic project for which a first contract was awarded after a call for competition; as soon as the first project is put up for tender, notice shall be given that this procedure might be adopted and the total estimated cost of subsequent works shall be taken into consideration by the contracting entities when they apply the provisions of Articles 16 and 17;

- (h) for supplies quoted and purchased on a commodity market;
- (i) for contracts to be awarded on the basis of a framework agreement, provided that the condition referred to in Article 14(2) is fulfilled;
- (j) for bargain purchases, where it is possible to procure supplies by taking advantage of a particularly advantageous opportunity available for a very short time at a price considerably lower than normal market prices;
- (k) for purchases of supplies under particularly advantageous conditions from either a supplier definitively winding up his business activities or the receivers or liquidators of a bankruptcy, an arrangement with creditors or a similar procedure under national laws or regulations;
- (l) when the service contract concerned is part of the follow-up to a design contest organised in accordance with the provisions of this Directive and shall, in accordance with the relevant rules, be awarded to the winner or to one of the winners of that contest; in the latter case, all the winners shall be invited to participate in the negotiations.

## CHAPTER VI

### *Rules on publication and transparency*

#### Section 1

##### Publication of notices

##### *Article 41*

#### **Periodic indicative notices and notices on the existence of a system of qualification**

1. Contracting entities shall make known, at least once a year, by means of a periodic indicative notice as referred to in Annex XV A, published by the Commission or by themselves on their 'buyer profile', as described in point 2(b) of Annex XX:

- (a) where supplies are concerned, the estimated total value of the contracts or the framework agreements by product area which they intend to award over the following 12 months, where the total estimated value, taking into account the provisions of Articles 16 and 17, is equal to or greater than EUR 750 000.

The product area shall be established by the contracting entities by reference to the CPV nomenclature:

- (b) where services are concerned, the estimated total value of the contracts or the framework agreements in each of the categories of services listed in Annex XVII A which they intend to award over the following 12 months, where such estimated total value, taking into account the provisions of Articles 16 and 17, is equal to or greater than EUR 750 000;

- (c) where works are concerned, the essential characteristics of the works contracts or the framework agreements which they intend to award over the following 12 months, whose estimated value is equal to or greater than the threshold specified in Article 16, taking into account the provisions of Article 17.

The notices referred to in subparagraphs (a) and (b) shall be sent to the Commission or published on the buyer profile as soon as possible after the beginning of the budgetary year.

The notice referred to in subparagraph (c) shall be sent to the Commission or published on the buyer profile as soon as possible after the decision approving the planning of the works contracts or the framework agreements that the contracting entities intend to award.

Contracting entities which publish a periodic indicative notice on their buyer profiles shall transmit to the Commission, electronically, a notice of the publication of the periodic indicative notice on a buyer profile, in accordance with the format and procedures for the electronic transmission of notices indicated in point 3 of Annex XX.

The publication of the notices referred to in subparagraphs (a), (b) and (c) shall be compulsory only where the contracting entities take the option of reducing the time limits for the receipt of tenders as laid down in Article 45(4).

This paragraph shall not apply to procedures without prior call for competition.

2. Contracting entities may, in particular, publish or arrange for the Commission to publish periodic indicative notices relating to major projects without repeating information previously included in a periodic indicative notice, provided that it is clearly pointed out that these notices are additional ones.

3. Where contracting entities choose to set up a qualification system in accordance with Article 53, the system shall be the subject of a notice as referred to in Annex XIV, indicating the purpose of the qualification system and how to have access to the rules concerning its operation. Where the system is of a duration greater than three years, the notice shall be published annually. Where the system is of a shorter duration, an initial notice shall suffice.

##### *Article 42*

#### **Notices used as a means of calling for competition**

1. In the case of supply, works or service contracts, the call for competition may be made:

- (a) by means of a periodic indicative notice as referred to in Annex XV A; or
- (b) by means of a notice on the existence of a qualification system as referred to in Annex XIV; or
- (c) by means of a contract notice as referred to in Annex XIII A, B or C.

2. In the case of dynamic purchasing systems, the system's call for competition shall be by contract notice as referred to in paragraph 1(c), whereas calls for competition for contracts based on such systems shall be by simplified contract notice as referred to in Annex XIII D.

3. When a call for competition is made by means of a periodic indicative notice, the notice shall:

- (a) refer specifically to the supplies, works or services which will be the subject of the contract to be awarded;
- (b) indicate that the contract will be awarded by restricted or negotiated procedure without further publication of a notice of a call for competition and invite interested economic operators to express their interest in writing; and
- (c) have been published in accordance with Annex XX not more than 12 months prior to the date on which the invitation referred to in Article 47(5) is sent. Moreover, the contracting entity shall meet the time limits laid down in Article 45.

#### Article 43

##### Contract award notices

1. Contracting entities which have awarded a contract or a framework agreement shall, within two months of the award of the contract or framework agreement, send a contract award notice as referred to in Annex XVI under conditions to be laid down by the Commission in accordance with the procedure referred to in Article 68(2).

In the case of contracts awarded under a framework agreement within the meaning of Article 14(2), the contracting entities shall not be bound to send a notice of the results of the award procedure for each contract based on that agreement.

Contracting entities shall send a contract award notice based on a dynamic purchasing system within two months after the award of each contract. They may, however, group such notices on a quarterly basis. In that case, they shall send the grouped notices within two months of the end of each quarter.

2. The information provided in accordance with Annex XVI and intended for publication shall be published in accordance with Annex XX. In this connection, the Commission shall respect any sensitive commercial aspects which the contracting entities may point out when forwarding this information, concerning the number of tenders received, the identity of economic operators, or prices.

3. Where contracting entities award a research-and-development service contract ('R&D contract') by way of a procedure without a call for competition in accordance with

Article 40(3)(b), they may limit to the reference 'research and development services' the information to be provided in accordance with Annex XVI concerning the nature and quantity of the services provided.

Where contracting entities award an R&D contract which cannot be awarded by way of a procedure without a call for competition in accordance with Article 40(3)(b), they may, on grounds of commercial confidentiality, limit the information to be provided in accordance with Annex XVI concerning the nature and quantity of the services supplied.

In such cases, contracting entities shall ensure that any information published under this paragraph is no less detailed than that contained in the notice of the call for competition published in accordance with Article 42(1).

If they use a qualification system, contracting entities shall ensure in such cases that such information is no less detailed than the category referred to in the list of qualified service providers drawn up in accordance with Article 53(7).

4. In the case of contracts awarded for services listed in Annex XVII B, the contracting entities shall indicate in the notice whether they agree to publication.

5. Information provided in accordance with Annex XVI and marked as not being intended for publication shall be published only in simplified form and in accordance with Annex XX for statistical purposes.

#### Article 44

##### Form and manner of publication of notices

1. Notices shall include the information mentioned in Annexes XIII, XIV, XV A, XV B and XVI and, where appropriate, any other information deemed useful by the contracting entity in the format of standard forms adopted by the Commission in accordance with the procedure referred to in Article 68(2).

2. Notices sent by contracting entities to the Commission shall be sent either by electronic means in accordance with the format and procedures for transmission indicated in point 3 of Annex XX, or by other means.

The notices referred to in Articles 41, 42 and 43 shall be published in accordance with the technical characteristics for publication set out in point 1(a) and (b) of Annex XX.

3. Notices drawn up and transmitted by electronic means in accordance with the format and procedures for transmission indicated in point 3 of Annex XX, shall be published no later than five days after they are sent.

Notices which are not transmitted by electronic means in accordance with the format and procedures for transmission indicated in point 3 of Annex XX shall be published not later than 12 days after they are transmitted. However, in exceptional cases, the contract notices referred to in Article 42(1)(c) shall be published within five days in response to a request by the contracting entity, provided that the notice has been sent by fax.

4. Contract notices shall be published in full in an official language of the Community as chosen by the contracting entity, this original language version constituting the sole authentic text. A summary of the important elements of each notice shall be published in the other official languages.

The costs of publication of notices by the Commission shall be borne by the Community.

5. Notices and their contents may not be published at national level before the date on which they are sent to the Commission.

Notices published at national level shall not contain information other than that contained in the notices dispatched to the Commission or published on a buyer profile in accordance with the first subparagraph of Article 41(1), but shall mention the date of dispatch of the notice to the Commission or its publication on the buyer profile.

Periodic indicative notices may not be published on a buyer profile before the dispatch to the Commission of the notice of their publication in that form; they shall mention the date of that dispatch.

6. Contracting entities shall ensure that they are able to supply proof of the dates on which notices are dispatched.

7. The Commission shall give the contracting entity confirmation of the publication of the information sent, mentioning the date of that publication. Such confirmation shall constitute proof of publication.

8. Contracting entities may publish in accordance with paragraphs 1 to 7 contract notices which are not subject to the publication requirements laid down in this Directive.

## Section 2

### Time limits

#### Article 45

#### **Time limits for the receipt of requests to participate and for the receipt of tenders**

1. When fixing the time limits for requests to participate and the receipt of tenders, contracting entities shall take particular account of the complexity of the contract and the time required for drawing up tenders, without prejudice to the minimum time limits set by this Article.

2. In the case of open procedures, the minimum time limit for the receipt of tenders shall be 52 days from the date on which the contract notice was sent.

3. In restricted procedures and in negotiated procedures with a prior call for competition, the following arrangements shall apply:

(a) the time limit for the receipt of requests to participate, in response to a notice published under Article 42(1)(c), or in response to an invitation by the contracting entities under Article 47(5), shall, as a general rule, be fixed at no less than 37 days from the date on which the notice or invitation was sent and may in no case be less than 22 days if the notice is sent for publication by means other than electronic means or fax, and at no less than 15 days if the notice is transmitted by such means;

(b) the time limit for the receipt of tenders may be set by mutual agreement between the contracting entity and the selected candidates, provided that all candidates have the same time to prepare and submit their tenders;

(c) where it is not possible to reach agreement on the time limit for the receipt of tenders, the contracting entity shall fix a time limit which shall, as a general rule, be at least 24 days and shall in no case be less than 10 days from the date of the invitation to tender.

4. If the contracting entities have published a periodic indicative notice as referred to in Article 41(1) in accordance with Annex XX, the minimum time limit for the receipt of tenders in open procedures shall, as a general rule, not be less than 36 days, but shall in no case be less than 22 days from the date on which the notice was sent.

These reduced time limits are permitted, provided that the periodic indicative notice has included, in addition to the information required by Annex XV A, part I, all the information required by Annex XV A, part II, insofar as the latter information is available at the time the notice is published, and that the notice has been sent for publication between 52 days and 12 months before the date on which the contract notice referred to in Article 42(1)(c) is sent.

5. Where notices are drawn up and transmitted by electronic means in accordance with the format and procedures for transmission indicated in point 3 of Annex XX the time-limits for the receipt of requests to participate in restricted and negotiated procedures, and for receipt of tenders in open procedures, may be reduced by seven days.

6. Except in the case of a time limit set by mutual agreement in accordance with paragraph 3(b), time limits for the receipt of tenders in open, restricted and negotiated procedures may be further reduced by five days where the contracting entity offers unrestricted and full direct access to the contract documents and any supplementary documents by electronic means from the date on which the notice used as a means of calling for competition is published, in accordance with Annex XX. The notice should specify the internet address at which this documentation is accessible.

7. In open procedures, the cumulative effect of the reductions provided for in paragraphs 4, 5 and 6 may in no case result in a time limit for the receipt of tenders of less than 15 days from the date on which the contract notice is sent.

However, if the contract notice is not transmitted by fax or electronic means, the cumulative effect of the reductions provided for in paragraphs 4, 5 and 6 may in no case result in a time limit for receipt of tenders in an open procedure of less than 22 days from the date on which the contract notice is transmitted.

8. The cumulative effect of the reductions provided for in paragraphs 4, 5 and 6 may in no case result in a time limit for receipt of requests to participate, in response to a notice published under Article 42(1)(c), or in response to an invitation by the contracting entities under Article 47(5), of less than 15 days from the date on which the contract notice or invitation is sent.

In restricted and negotiated procedures, the cumulative effect of the reductions provided for in paragraphs 4, 5 and 6 may in no case, except that of a time limit set by mutual agreement in accordance with paragraph 3(b), result in a time limit for the receipt of tenders of less than 10 days from the date of the invitation to tender.

9. If, for whatever reason, the contract documents and the supporting documents or additional information, although requested in good time, have not been supplied within the time limits set in Articles 46 and 47, or where tenders can be made only after a visit to the site or after on-the-spot inspection of the documents supporting the contract documents, the time limits for the receipt of tenders shall be extended accordingly, except in the case of a time-limit set by mutual agreement in accordance with paragraph 3(b), so that all economic operators concerned may be aware of all the information needed for the preparation of a tender.

10. A summary table of the time limits laid down in this Article is given in Annex XXII.

#### Article 46

#### **Open procedures: specifications, additional documents and information**

1. In open procedures, where contracting entities do not offer unrestricted and full direct access by electronic means in accordance with Article 45(6) to the specifications and any supporting documents, the specifications and supporting documents shall be sent to economic operators within six days of

receipt of the request, provided that the request was made in good time before the time limit for the submission of tenders.

2. Provided that it has been requested in good time, additional information relating to the specifications shall be supplied by the contracting entities or competent departments not later than six days before the time limit fixed for the receipt of tenders.

#### Article 47

#### **Invitations to submit a tender or to negotiate**

1. In restricted procedures and negotiated procedures, contracting entities shall simultaneously and in writing invite the selected candidates to submit their tenders or to negotiate. The invitation to the candidates shall include either:

- a copy of the specifications and any supporting documents, or
- a reference to accessing the specifications and the supporting documents indicated in the first indent, when they are made directly available by electronic means in accordance with Article 45(6).

2. Where the specifications and/or any supporting documents are held by an entity other than the contracting entity responsible for the award procedure, the invitation shall state the address from which those specifications and documents may be requested and, if appropriate, the closing date for requesting such documents, the sum payable for obtaining them and any payment procedures. The competent department shall send that documentation to the economic operator immediately upon receipt of the request.

3. The additional information on the specifications or the supporting documents shall be sent by the contracting entity or the competent department not less than six days before the final date fixed for the receipt of tenders, provided that it is requested in good time.

4. In addition, the invitation shall include at least the following:

- (a) where appropriate, the time limit for requesting additional documents, as well as the amount and terms of payment of any sum to be paid for such documents;
- (b) the final date for receipt of tenders, the address to which they are to be sent, and the language or languages in which they are to be drawn up;
- (c) a reference to any published contract notice;
- (d) an indication of any documents to be attached;

(e) the criteria for the award of the contract, where they are not indicated in the notice on the existence of a qualification system used as a means of calling for competition;

(f) the relative weighting of the contract award criteria or, where appropriate, the order of importance of such criteria, if this information is not given in the contract notice, the notice on the existence of a qualification system or the specifications.

5. When a call for competition is made by means of a periodic indicative notice, contracting entities shall subsequently invite all candidates to confirm their interest on the basis of detailed information on the contract concerned before beginning the selection of tenderers or participants in negotiations.

This invitation shall include at least the following information:

(a) nature and quantity, including all options concerning complementary contracts and, if possible, the estimated time available for exercising these options for renewable contracts, the nature and quantity and, if possible, the estimated publication dates of future notices of competition for works, supplies or services to be put out to tender;

(b) type of procedure: restricted or negotiated;

(c) where appropriate, the date on which the delivery of supplies or the execution of works or services is to commence or terminate;

(d) the address and closing date for the submission of requests for tender documents and the language or languages in which they are to be drawn up;

(e) the address of the entity which is to award the contract and the information necessary for obtaining the specifications and other documents;

(f) economic and technical conditions, financial guarantees and information required from economic operators;

(g) the amount and payment procedures for any sum payable for obtaining tender documents;

(h) the form of the contract which is the subject of the invitation to tender: purchase, lease, hire or hire-purchase, or any combination of these; and

(i) the contract award criteria and their weighting or, where appropriate, the order of importance of such criteria, if this information is not given in the indicative notice or the specifications or in the invitation to tender or to negotiate.

### Section 3

#### Communication and information

#### Article 48

#### Rules applicable to communication

1. All communication and information exchange referred to in this Title may be carried out by post, by fax, by electronic means in accordance with paragraphs 4 and 5, by telephone in the cases and circumstances referred to in paragraph 6, or by a combination of those means, according to the choice of the contracting entity.

2. The means of communication chosen shall be generally available and thus not restrict economic operators' access to the tendering procedure.

3. Communication and the exchange and storage of information shall be carried out in such a way as to ensure that the integrity of data and the confidentiality of tenders and requests to participate are preserved, and that the contracting entities examine the content of tenders and requests to participate only after the time limit set for submitting them has expired.

4. The tools to be used for communicating by electronic means, as well as their technical characteristics, shall be non-discriminatory, generally available and interoperable with the information and communication technology products in general use.

5. The following rules are applicable to devices for the electronic transmission and receipt of tenders and to devices for the electronic receipt of requests to participate:

(a) information regarding the specifications necessary for the electronic submission of tenders and requests to participate, including encryption, shall be available to interested parties. Moreover, the devices for the electronic receipt of tenders and requests to participate shall conform to the requirements of Annex XXIV;

(b) Member States may, in compliance with Article 5 of Directive 1999/93/EC, require that electronic tenders be accompanied by an advanced electronic signature in conformity with paragraph 1 thereof;

(c) Member States may introduce or maintain voluntary accreditation schemes aiming at enhanced levels of certification service provision for these devices;

(d) tenderers or candidates shall undertake to submit, before expiry of the time limit laid down for the submission of tenders or requests to participate, the documents, certificates and declarations mentioned in Articles 52(2), 52(3), 53 and 54 if they do not exist in electronic format.

6. The following rules shall apply to the transmission of requests to participate:

- (a) requests to participate in procedures for the award of contracts may be made in writing or by telephone;
- (b) where requests to participate are made by telephone, a written confirmation must be sent before expiry of the time limit set for their receipt;
- (c) contracting entities may require that requests for participation made by fax should be confirmed by post or by electronic means, where this is necessary for the purposes of legal proof. Any such requirement, together with the time limit for sending confirmation by post or electronic means, should be stated by the contracting entity in the notice used as a means of calling for competition or in the invitation referred to in Article 47(5).

#### Article 49

#### Information to applicants for qualification, candidates and tenderers

1. Contracting entities shall as soon as possible inform the economic operators involved of decisions reached concerning the conclusion of a framework agreement, the award of the contract, or admission to a dynamic purchasing system, including the grounds for any decision not to conclude a framework agreement or award a contract for which there has been a call for competition or to recommence the procedure, or not to implement a dynamic purchasing system; this information shall be provided in writing if the contracting entities are requested to do so.

2. On request from the party concerned, contracting entities shall, as soon as possible, inform:

- any unsuccessful candidate of the reasons for the rejection of his application,
- any unsuccessful tenderer of the reasons for the rejection of his tender, including, for the cases referred to in Article 34(4) and (5), the reasons for their decision of non-equivalence or their decision that the works, supplies or services do not meet the performance or functional requirements,
- any tenderer who has made an admissible tender of the characteristics and relative advantages of the tender selected, as well as the name of the successful tenderer or the parties to the framework agreement.

The time taken to do so may under no circumstances exceed 15 days from receipt of the written enquiry.

However, contracting entities may decide that certain information on the contract award or the conclusion of the framework agreement or on admission to a dynamic purchasing system, referred to in the paragraph 1, is to be withheld where release of such information would impede law

enforcement or otherwise be contrary to the public interest or would prejudice the legitimate commercial interests of a particular economic operator, public or private, including the interests of the economic operator to whom the contract has been awarded, or might prejudice fair competition between economic operators.

3. Contracting entities which establish and operate a system of qualification shall inform applicants of their decision as to qualification within a period of six months.

If the decision will take longer than four months from the presentation of an application, the contracting entity shall inform the applicant, within two months of the application, of the reasons justifying the longer period and of the date by which his application will be accepted or refused.

4. Applicants whose qualification is refused shall be informed of this decision and the reasons for refusal as soon as possible and under no circumstances more than 15 days later than the date of the decision. The reasons shall be based on the criteria for qualification referred to in Article 53(2).

5. Contracting entities which establish and operate a system of qualification may bring the qualification of an economic operator to an end only for reasons based on the criteria for qualification referred to in Article 53(2). Any intention to bring qualification to an end shall be notified in writing to the economic operator beforehand, at least 15 days before the date on which qualification is due to end, together with the reason or reasons justifying the proposed action.

#### Article 50

#### Information to be stored concerning awards

1. Contracting entities shall keep appropriate information on each contract which shall be sufficient to permit them at a later date to justify decisions taken in connection with:

- (a) the qualification and selection of economic operators and the award of contracts;
- (b) the use of procedures without a prior call for competition by virtue of Article 40(3);
- (c) the non-application of Chapters III to VI of this Title by virtue of the derogations provided for in Chapter II of Title I and in Chapter II of this Title.

Contracting entities shall take appropriate steps to document the progress of award procedures conducted by electronic means.

2. The information shall be kept for at least four years from the date of award of the contract so that the contracting entity will be able, during that period, to provide the necessary information to the Commission if the latter so requests.

## CHAPTER VII

**Conduct of the procedure**

## Article 51

**General provisions**

1. For the purpose of selecting participants in their award procedures:

- (a) contracting entities having provided rules and criteria for the exclusion of tenderers or candidates in accordance with Article 54(1), (2) or (4) shall exclude economic operators which comply with such rules and meet such criteria;
- (b) they shall select tenderers and candidates in accordance with the objective rules and criteria laid down pursuant to Article 54;
- (c) in restricted procedures and in negotiated procedures with a call for competition, they shall where appropriate reduce in accordance with Article 54 the number of candidates selected pursuant to subparagraphs (a) and (b).

2. When a call for competition is made by means of a notice on the existence of a qualification system and for the purpose of selecting participants in award procedures for the specific contracts which are the subject of the call for competition, contracting entities shall:

- (a) qualify economic operators in accordance with the provisions of Article 53;
- (b) apply to such qualified economic operators those provisions of paragraph 1 that are relevant to restricted or negotiated procedures.

3. Contracting entities shall verify that the tenders submitted by the selected tenderers comply with the rules and requirements applicable to tenders and award the contract on the basis of the criteria laid down in Articles 55 and 57.

## Section 1

## Qualification and qualitative selection

## Article 52

**Mutual recognition concerning administrative, technical or financial conditions, and certificates, tests and evidence**

1. When selecting participants for a restricted or negotiated procedure, in reaching their decision as to qualification or when the criteria and rules are being updated, contracting entities shall not:

- (a) impose administrative, technical or financial conditions on certain economic operators which would not be imposed on others;
- (b) require tests or evidence which would duplicate objective evidence already available.

2. Where they request the production of certificates drawn up by independent bodies attesting the compliance of the economic operator with certain quality assurance standards, contracting entities shall refer to quality assurance systems based on the relevant European standards series certified by bodies conforming to the European standards series concerning certification.

Contracting entities shall recognise equivalent certificates from bodies established in other Member States. They shall also accept other evidence of equivalent quality assurance measures from economic operators.

3. For works and service contracts, and only in appropriate cases, the contracting entities may require, in order to verify the economic operator's technical abilities, an indication of the environmental management measures which the economic operator will be able to apply when carrying out the contract. In such cases, should the contracting entities require the production of certificates drawn up by independent bodies attesting the compliance of the economic operator with certain environmental management standards, they shall refer to the EMAS or to environmental management standards based on the relevant European or international standards certified by bodies conforming to Community law or the relevant European or international standards concerning certification.

Contracting entities shall recognise equivalent certificates from bodies established in other Member States. They shall also accept other evidence of equivalent environmental management measures from economic operators.

## Article 53

**Qualification systems**

1. Contracting entities which so wish may establish and operate a system of qualification of economic operators.

Contracting entities which establish or operate a system of qualification shall ensure that economic operators are at all times able to request qualification.

2. The system under paragraph 1 may involve different qualification stages.

It shall be operated on the basis of objective criteria and rules for qualification to be established by the contracting entity.

Where those criteria and rules include technical specifications, the provisions of Article 34 shall apply. The criteria and rules may be updated as required.

3. The criteria and rules for qualification referred to in paragraph 2 may include the exclusion criteria listed in Article 45 of Directive 2004/18/EC on the terms and conditions set out therein.

Where the contracting entity is a contracting authority within the meaning of Article 2(1)(a), those criteria and rules shall include the exclusion criteria listed in Article 45(1) of Directive 2004/18/EC.

4. Where the criteria and rules for qualification referred to in paragraph 2 include requirements relating to the economic and financial capacity of the economic operator, the latter may where necessary rely on the capacity of other entities, whatever the legal nature of the link between itself and those entities. In this case the economic operator must prove to the contracting entity that these resources will be available to it throughout the period of the validity of the qualification system, for example by producing an undertaking by those entities to that effect.

Under the same conditions, a group of economic operators as referred to in Article 11 may rely on the capacity of participants in the group or of other entities.

5. Where the criteria and rules for qualification referred to in paragraph 2 include requirements relating to the technical and/or professional abilities of the economic operator, the latter may where necessary rely on the capacity of other entities, whatever the legal nature of the link between itself and those entities. In this case the economic operator must prove to the contracting entity that those resources will be available to it throughout the period of the validity of the qualification system, for example by producing an undertaking by those entities to make the necessary resources available to the economic operator.

Under the same conditions, a group of economic operators referred to in Article 11 may rely on the abilities of participants in the group or of other entities.

6. The criteria and rules for qualification referred to in paragraph 2 shall be made available to economic operators on request. The updating of these criteria and rules shall be communicated to interested economic operators.

Where a contracting entity considers that the qualification system of certain other entities or bodies meets its requirements, it shall communicate to interested economic operators the names of such other entities or bodies.

7. A written record of qualified economic operators shall be kept; it may be divided into categories according to the type of contract for which the qualification is valid.

8. When establishing or operating a qualification system, contracting entities shall in particular observe the provisions of Article 41(3) concerning notices on the existence of a system of qualification, of Article 49(3), (4) and (5) concerning the information to be delivered to economic operators having applied for qualification, of Article 51(2) concerning the selection of participants when a call for competition is made by

means of a notice on the existence of a qualification system as well as the provisions of Article 52 on mutual recognition concerning administrative, technical or financial conditions, certificates, tests and evidence.

9. When a call for competition is made by means of a notice on the existence of a qualification system, tenderers in a restricted procedure or participants in a negotiated procedure shall be selected from the qualified candidates in accordance with such a system.

#### Article 54

#### Criteria for qualitative selection

1. Contracting entities which establish selection criteria in an open procedure shall do so in accordance with objective rules and criteria which are available to interested economic operators.

2. Contracting entities which select candidates for restricted or negotiated procedures shall do so according to objective rules and criteria which they have established and which are available to interested economic operators.

3. In restricted or negotiated procedures, the criteria may be based on the objective need of the contracting entity to reduce the number of candidates to a level which is justified by the need to balance the particular characteristics of the procurement procedure with the resources required to conduct it. The number of candidates selected shall, however, take account of the need to ensure adequate competition.

4. The criteria set out in paragraphs 1 and 2 may include the exclusion criteria listed in Article 45 of Directive 2004/18/EC on the terms and conditions set out therein.

Where the contracting entity is a contracting authority within the meaning of Article 2(1)(a), the criteria and rules referred to in paragraphs 1 and 2 of this Article shall include the exclusion criteria listed in Article 45(1) of Directive 2004/18/EC.

5. Where the criteria referred to in paragraphs 1 and 2 include requirements relating to the economic and financial capacity of the economic operator, the latter may where necessary and for a particular contract rely on the capacity of other entities, whatever the legal nature of the link between itself and those entities. In this case the economic operator shall prove to the contracting entity that the necessary resources will be available to it, for example by delivering an undertaking by those entities to that effect.

Under the same conditions, a group of economic operators as referred to in Article 11 may rely on the capacities of participants in the group or of other entities.

6. Where the criteria referred to in paragraphs 1 and 2 include requirements relating to the technical and/or professional abilities of the economic operator, the latter may where necessary and for a particular contract rely on the abilities of other entities, whatever the legal nature of the link between itself and those entities. In this case the economic operator must prove to the contracting entity that for the performance of the contract those resources will be available to it, for example by delivering an undertaking by those entities to make the necessary resources available to the economic operator.

Under the same conditions, a group of economic operators as referred to in Article 11 may rely on the abilities of participants in the group or of other entities.

## Section 2

### Award of the contract

#### Article 55

#### **Contract award criteria**

1. Without prejudice to national laws, regulations or administrative provisions on the remuneration of certain services, the criteria on which the contracting entities shall base the award of contracts shall:

- (a) where the contract is awarded on the basis of the most economically advantageous tender from the point of view of the contracting entity, be various criteria linked to the subject-matter of the contract in question, such as delivery or completion date, running costs, cost-effectiveness, quality, aesthetic and functional characteristics, environmental characteristics, technical merit, after-sales service and technical assistance, commitments with regard to parts, security of supply, and price or otherwise
- (b) the lowest price only.

2. Without prejudice to the provisions of the third subparagraph, in the case referred to in paragraph 1(a), the contracting entity shall specify the relative weighting which it gives to each of the criteria chosen to determine the most economically advantageous tender.

Those weightings can be expressed by providing for a range with an appropriate maximum spread.

Where, in the opinion of the contracting entity, weighting is not possible for demonstrable reasons, the contracting entity shall indicate the criteria in descending order of importance.

The relative weighting or order of importance shall be specified, as appropriate, in the notice used as a means of calling for competition, in the invitation to confirm the interest referred to in Article 47(5), in the invitation to tender or to negotiate, or in the specifications.

## Article 56

### **Use of electronic auctions**

1. Member States may provide that contracting entities may use electronic auctions.
2. In open, restricted or negotiated procedures with a prior call for competition, the contracting entities may decide that the award of a contract shall be preceded by an electronic auction when the contract specifications can be established with precision.

In the same circumstances, an electronic auction may be held on the opening for competition of contracts to be awarded under the dynamic purchasing system referred to in Article 15.

The electronic auction shall be based:

- (a) either solely on prices when the contract is awarded to the lowest price,
- (b) or on prices and/or on the new values of the features of the tenders indicated in the specification, when the contract is awarded to the most economically advantageous tender.

3. Contracting entities which decide to hold an electronic auction shall state that fact in the notice used as a means of calling for competition.

The specifications shall include, *inter alia*, the following details:

- (a) the features whose values will be the subject of electronic auction, provided that such features are quantifiable and can be expressed in figures or percentages;
- (b) any limits on the values which may be submitted, as they result from the specifications relating to the subject of the contract;
- (c) the information which will be made available to tenderers in the course of the electronic auction and, where appropriate, when it will be made available to them;
- (d) the relevant information concerning the electronic auction process;
- (e) the conditions under which the tenderers will be able to bid and, in particular, the minimum differences which will, where appropriate, be required when bidding;
- (f) the relevant information concerning the electronic equipment used and the arrangements and technical specifications for connection.

4. Before proceeding with the electronic auction, contracting entities shall make a full initial evaluation of the tenders in accordance with the award criterion/criteria set and with the weighting fixed for them.

All tenderers who have submitted admissible tenders shall be invited simultaneously by electronic means to submit new prices and/or new values; the invitation shall contain all relevant information concerning individual connection to the electronic equipment being used and shall state the date and time of the start of the electronic auction. The electronic auction may take place in a number of successive phases. The electronic auction may not start sooner than two working days after the date on which invitations are sent out.

5. When the contract is to be awarded on the basis of the most economically advantageous tender, the invitation shall be accompanied by the outcome of a full evaluation of the relevant tender carried out in accordance with the weighting provided for in the first subparagraph of Article 55(2).

The invitation shall also state the mathematical formula to be used in the electronic auction to determine automatic rerankings on the basis of the new prices and/or new values submitted. That formula shall incorporate the weighting of all the criteria established to determine the most economically advantageous tender, as indicated in the notice used as a means of calling for competition or in the specifications; for that purpose, any ranges shall, however, be reduced beforehand to a specified value.

Where variants are authorised, a separate formula shall be provided for each variant.

6. Throughout each phase of an electronic auction the contracting entities shall instantaneously communicate to all tenderers sufficient information to enable them to ascertain their relative rankings at any moment. They may also communicate other information concerning other prices or values submitted, provided that that is stated in the specifications. They may also at any time announce the number of participants in that phase of the auction. In no case, however, may they disclose the identities of the tenderers during any phase of an electronic auction.

7. Contracting entities shall close an electronic auction in one or more of the following manners:

- (a) in the invitation to take part in the auction they shall indicate the date and time fixed in advance;
- (b) when they receive no more new prices or new values which meet the requirements concerning minimum differences. In that event, the contracting entities shall state in the invitation to take part in the auction the time which they will allow to elapse after receiving the last submission before they close the electronic auction;
- (c) when the number of phases in the auction, fixed in the invitation to take part in the auction, has been completed.

When the contracting entities have decided to close an electronic auction in accordance with subparagraph (c), possibly in combination with the arrangements laid down in subparagraph (b), the invitation to take part in the auction shall indicate the timetable for each phase of the auction.

8. After closing an electronic auction the contracting entities shall award the contract in accordance with Article 55 on the basis of the results of the electronic auction.

9. Contracting entities may not have improper recourse to electronic auctions nor may they use them in such a way as to prevent, restrict or distort competition or to change the subject-matter of the contract, as defined in the notice used as a means of calling for competition and in the specification.

#### Article 57

#### Abnormally low tenders

1. If, for a given contract, tenders appear to be abnormally low in relation to the goods, works or services, the contracting entity shall, before it may reject those tenders, request in writing details of the constituent elements of the tender which it considers relevant.

Those details may relate in particular to:

- (a) the economics of the manufacturing process, of the services provided and of the construction method;
- (b) the technical solutions chosen and/or any exceptionally favourable conditions available to the tenderer for the supply of the goods or services or for the execution of the work;
- (c) the originality of the supplies, services or work proposed by the tenderer;
- (d) compliance with the provisions relating to employment protection and working conditions in force at the place where the work, service or supply is to be performed;
- (e) the possibility of the tenderer obtaining State aid.

2. The contracting entity shall verify those constituent elements by consulting the tenderer, taking account of the evidence supplied.

3. Where a contracting entity establishes that a tender is abnormally low because the tenderer has obtained State aid, the tender can be rejected on that ground alone only after consultation with the tenderer where the latter is unable to prove, within a sufficient time limit fixed by the contracting entity, that the aid in question was granted legally. Where the contracting entity rejects a tender in these circumstances, it shall inform the Commission of that fact.

## Section 3

Tenders comprising products originating in third countries and relations with those countries

## Article 58

**Tenders comprising products originating in third countries**

1. This Article shall apply to tenders covering products originating in third countries with which the Community has not concluded, whether multilaterally or bilaterally, an agreement ensuring comparable and effective access for Community undertakings to the markets of those third countries. It shall be without prejudice to the obligations of the Community or its Member States in respect of third countries.

2. Any tender submitted for the award of a supply contract may be rejected where the proportion of the products originating in third countries, as determined in accordance with Council Regulation (EEC) No 2913/92 of 12 October 1992 establishing the Community Customs Code<sup>(1)</sup>, exceeds 50 % of the total value of the products constituting the tender. For the purposes of this Article, software used in telecommunications network equipment shall be regarded as products.

3. Subject to the second subparagraph, where two or more tenders are equivalent in the light of the contract award criteria defined in Article 55, preference shall be given to those tenders which may not be rejected pursuant to paragraph 2. The prices of those tenders shall be considered equivalent for the purposes of this Article, if the price difference does not exceed 3 %.

However, a tender shall not be preferred to another pursuant to the first subparagraph where its acceptance would oblige the contracting entity to acquire equipment having technical characteristics different from those of existing equipment, resulting in incompatibility, technical difficulties in operation and maintenance, or disproportionate costs.

4. For the purposes of this Article, those third countries to which the benefit of the provisions of this Directive has been extended by a Council Decision in accordance with paragraph 1 shall not be taken into account for determining the proportion, referred to in paragraph 2, of products originating in third countries.

5. The Commission shall submit an annual report to the Council, commencing in the second half of the first year following the entry into force of this Directive, on progress made in multilateral or bilateral negotiations regarding access for Community undertakings to the markets of third countries in the fields covered by this Directive, on any result which

such negotiations may have achieved, and on the implementation in practice of all the agreements which have been concluded.

The Council, acting by a qualified majority on a proposal from the Commission, may amend the provisions of this Article in the light of such developments.

## Article 59

**Relations with third countries as regards works, supplies and service contracts**

1. Member States shall inform the Commission of any general difficulties, in law or in fact, encountered and reported by their undertakings in securing the award of service contracts in third countries.

2. The Commission shall report to the Council before 31 December 2005, and periodically thereafter, on the opening up of service contracts in third countries and on progress in negotiations with these countries on this subject, particularly within the framework of the WTO.

3. The Commission shall endeavour, by approaching the third country concerned, to remedy any situation whereby it finds, on the basis either of the reports referred to in paragraph 2 or of other information, that, in the context of the award of service contracts, a third country:

- (a) does not grant Community undertakings effective access comparable to that granted by the Community to undertakings from that country; or
- (b) does not grant Community undertakings national treatment or the same competitive opportunities as are available to national undertakings; or
- (c) grants undertakings from other third countries more favourable treatment than Community undertakings.

4. Member States shall inform the Commission of any difficulties, in law or in fact, encountered and reported by their undertakings and which are due to the non-observance of the international labour law provisions listed in Annex XXIII when these undertakings have tried to secure the award of contracts in third countries.

5. In the circumstances referred to in paragraphs 3 and 4, the Commission may at any time propose that the Council decide to suspend or restrict, over a period to be laid down in the decision, the award of service contracts to:

- (a) undertakings governed by the law of the third country in question;

<sup>(1)</sup> OJ L 302, 19.10.1992, p. 1. Regulation as last amended by Regulation (EC) No 2700/2000 of the European Parliament and of the Council (OJ L 311, 12.12.2000, p. 17).

(b) undertakings affiliated to the undertakings specified in point (a) and having their registered office in the Community but having no direct and effective link with the economy of a Member State;

(c) undertakings submitting tenders which have as their subject-matter services originating in the third country in question.

The Council shall act, by qualified majority, as soon as possible.

The Commission may propose these measures on its own initiative or at the request of a Member State.

6. This Article shall be without prejudice to the commitments of the Community in relation to third countries ensuing from international agreements on public procurement, particularly within the framework of the WTO.

### TITLE III

#### RULES GOVERNING SERVICE DESIGN CONTESTS

##### Article 60

##### General provision

1. The rules for the organisation of a design contest shall be in conformity with paragraph 2 of this Article and with Articles 61 and 63 to 66 and shall be made available to those interested in participating in the contest.

2. The admission of participants to design contests shall not be limited:

- (a) by reference to the territory or part of the territory of a Member State;
- (b) on the ground that, under the law of the Member State in which the contest is organised, they would have been required to be either natural or legal persons.

##### Article 61

##### Thresholds

1. This Title shall apply to design contests organised as part of a procurement procedure for services whose estimated value, net of VAT, is equal to or greater than EUR 499 000. For the purposes of this paragraph, 'threshold' means the estimated value net of VAT of the service contract, including any possible prizes and/or payments to participants.

2. This Title shall apply to all design contests where the total amount of contest prizes and payments to participants is equal to or greater than EUR 499 000.

For the purposes of this paragraph, 'threshold' means the total amount of the prizes and payments, including the estimated value net of VAT of the service contract which might subsequently be concluded under Article 40(3) if the contracting entity does not exclude such an award in the contest notice.

##### Article 62

##### Design contests excluded

This Title shall not apply to:

(1) contests which are organised in the same cases as referred to in Articles 20, 21 and 22 for service contracts;

(2) design contests organised for the pursuit, in the Member State concerned, of an activity to which the applicability of paragraph 1 of Article 30 has been established by a Commission decision or has been deemed applicable pursuant to paragraph 4, second or third subparagraph, or to paragraph 5, fourth subparagraph, of that Article.

##### Article 63

##### Rules on advertising and transparency

1. Contracting entities which wish to organise a design contest shall call for competition by means of a contest notice. Contracting entities which have held a design contest shall make the results known by means of a notice. The call for competition shall contain the information referred to in Annex XVIII and the notice of the results of a design contest shall contain the information referred to in Annex XIX in accordance with the format of standard forms adopted by the Commission in accordance with the procedure in Article 68(2).

The notice of the results of a design contest shall be forwarded to the Commission within two months of the closure of the design contest and under conditions to be laid down by the Commission in accordance with the procedure referred to in Article 68(2). In this connection, the Commission shall respect any sensitive commercial aspects which the contracting entities may point out when forwarding this information, concerning the number of projects or plans received, the identity of the economic operators and the prices tendered.

2. Article 44(2) to (8) shall also apply to notices relating to design contests.

##### Article 64

##### Means of communication

1. Article 48(1), (2) and (4) shall apply to all communications relating to contests.

2. Communications, exchanges and the storage of information shall be such as to ensure that the integrity and the confidentiality of all information communicated by the participants in a contest are preserved and that the jury ascertains the contents of plans and projects only after the expiry of the time-limit for their submission.

3. The following rules shall apply to the devices for the electronic receipt of plans and projects:

- (a) the information relating to the specifications which is necessary for the presentation of plans and projects by electronic means, including encryption, shall be available to the parties concerned. In addition, the devices for the electronic receipt of plans and projects shall comply with the requirements of Annex XXIV;
- (b) Member States may introduce or maintain voluntary accreditation schemes aiming at enhanced levels of certification service provision for such devices.

#### Article 65

### Rules on the organisation of design contests, the selection of participants and the jury

1. When organising design contests, contracting entities shall apply procedures which are adapted to the provisions of this Directive.

2. Where design contests are restricted to a limited number of participants, contracting entities shall establish clear and non-discriminatory selection criteria. In any event, the number

of candidates invited to participate shall be sufficient to ensure genuine competition.

3. The jury shall be composed exclusively of natural persons who are independent of participants in the contest. Where a particular professional qualification is required of participants in a contest, at least a third of the jury members shall have the same qualification or an equivalent qualification.

#### Article 66

### Decisions of the jury

1. The jury shall be autonomous in its decisions or opinions.

2. It shall examine the plans and projects submitted by the candidates anonymously and solely on the basis of the criteria indicated in the contest notice.

3. It shall record its ranking of projects in a report, signed by its members, made according to the merits of each project, together with its remarks and any points which may need clarification.

4. Anonymity must be observed until the jury has reached its opinion or decision.

5. Candidates may be invited, if need be, to answer questions which the jury has recorded in the minutes to clarify any aspects of the projects.

6. Complete minutes shall be drawn up of the dialogue between jury members and candidates.

## TITLE IV

### STATISTICAL OBLIGATIONS, EXECUTORY POWERS AND FINAL PROVISIONS

#### Article 67

### Statistical obligations

1. Member States shall ensure, in accordance with the arrangements to be laid down under the procedure provided for in Article 68(2), that the Commission receives every year a statistical report concerning the total value, broken down by Member State and by category of activity to which Annexes I to X refer, of the contracts awarded below the thresholds set out in Article 16 but which would be covered by this Directive were it not for those thresholds.

2. As regards the categories of activity to which Annexes II, III, V, IX and X refer, Member States shall ensure that the Commission receives a statistical report on contracts awarded no later than 31 October 2004 for the previous year, and before 31 October of each year thereafter, in accordance with arrangements to be laid down under the procedure provided for in Article 68(2). The statistical report shall contain the

information required to verify the proper application of the Agreement.

The information required under the first subparagraph shall not include information concerning contracts for the R & D services listed in category 8 of Annex XVII A, for telecommunications services listed in category 5 of Annex XVII A whose CPV positions are equivalent to the CPC reference numbers 7524, 7525 and 7526, or for the services listed in Annex XVII B.

3. The arrangements under paragraphs 1 and 2 shall be laid down in such a way as to ensure that:

- (a) in the interests of administrative simplification, contracts of lesser value may be excluded, provided that the usefulness of the statistics is not jeopardised;
- (b) the confidential nature of the information provided is respected.

## Article 68

**Committee procedure**

1. The Commission shall be assisted by the Advisory Committee for Public Contracts instituted by Article 1 of Council Decision 71/306/EEC<sup>(1)</sup> (hereinafter referred to as 'the Committee').

2. Where reference is made to this paragraph, Articles 3 and 7 of Decision 1999/468/EC shall apply, having regard to the provisions of Article 8 thereof.

3. The Committee shall adopt its rules of procedure.

## Article 69

**Revision of the thresholds**

1. The Commission shall verify the thresholds established in Article 16 every two years from 30 April 2004, and shall, if necessary with regard to the second subparagraph, revise them in accordance with the procedure provided for in Article 68(2).

The calculation of the value of these thresholds shall be based on the average daily value of the euro, expressed in SDR, over the 24 months terminating on the last day of August preceding the revision with effect from 1 January. The value of the thresholds thus revised shall, where necessary, be rounded down to the nearest thousand euro so as to ensure that the thresholds in force provided for by the Agreement, expressed in SDR, are observed.

2. At the same time as performing the revision under paragraph 1, the Commission shall, in accordance with the procedure provided for in Article 68(2), align the thresholds laid down in Article 61 (design contests) with the revised threshold applicable to service contracts.

The values of the thresholds laid down in accordance with paragraph 1 in the national currencies of Member States not participating in Monetary Union shall, in principle, be revised every two years from 1 January 2004. The calculation of such values shall be based on the average daily values of those currencies, expressed in euro, over the 24 months terminating on the last day of August preceding the revision with effect from 1 January.

3. The revised thresholds referred to in paragraph 1, their values in national currencies and the aligned thresholds referred to in paragraph 2 shall be published by the Commission in the *Official Journal of the European Union* at the beginning of the month of November following their revision.

<sup>(1)</sup> OJ L 185, 16.8.1971, p. 15. Decision as amended by Decision 77/63/EEC (OJ L 13, 15.1.1977, p. 15).

## Article 70

**Amendments**

The Commission may amend, in accordance with the procedure provided for in Article 68(2):

- (a) the list of contracting entities in Annexes I to X so that they fulfil the criteria set out in Articles 2 to 7;
- (b) the procedures for the drawing-up, transmission, receipt, translation, collection and distribution of the notices referred to in Articles 41, 42, 43 and 63;
- (c) the procedures for specific references to particular positions in the CPV nomenclature in the notices;
- (d) the reference numbers in the nomenclature set out in Annex XVII, in so far as this does not change the material scope of the Directive, and the procedures for reference in the notices to particular positions in this nomenclature within the categories of services listed in the Annex;
- (e) the reference numbers in the nomenclature set out in Annex XII, insofar as this does not change the material scope of the Directive, and the procedures for reference to particular positions of this nomenclature in the notices;
- (f) Annex XI;
- (g) the procedure for sending and publishing data referred to in Annex XX, on grounds of technical progress or for administrative reasons;
- (h) the technical details and characteristics of the devices for electronic receipt referred to in points (a), (f) and (g) of Annex XXIV;
- (i) in the interests of administrative simplification as provided for in Article 67(3), the procedures for the use, drawing-up, transmission, receipt, translation, collection and distribution of the statistical reports referred to in Article 67(1) and (2);
- (j) the technical procedures for the calculation methods set out in Article 69(1) and (2), second subparagraph.

## Article 71

**Implementation of the Directive**

1. Member States shall bring into force the laws, regulations and administrative provisions necessary to comply with this Directive by 31 January 2006 at the latest. They shall forthwith inform the Commission thereof.

Member States may avail themselves of an additional period of up to 35 months after expiry of the time limit provided for in the first subparagraph for the application of the provisions necessary to comply with Article 6 of this Directive.

When Member States adopt those measures, they shall contain a reference to this Directive or be accompanied by such a reference on the occasion of their official publication. The methods of making such references shall be laid down by Member States.

The provisions of Article 30 are applicable from 30 April 2004.

2. Member States shall communicate to the Commission the text of the main provisions of national law which they adopt in the field covered by this Directive.

#### Article 72

##### Monitoring mechanisms

In conformity with Council Directive 92/13/EEC of 25 February 1992 coordinating the laws, regulations and administrative provisions relating to the application of Community rules on the procurement procedures of entities operating in the water, energy, transport and telecommunications sectors<sup>(1)</sup>, Member States shall ensure implementation of this Directive by effective, available and transparent mechanisms.

For this purpose they may, among other things, appoint or establish an independent body.

#### Article 73

##### Repeal

Directive 93/38/EEC is hereby repealed, without prejudice to the obligations of the Member States concerning the time limits for transposition into national law set out in Annex XXV.

References to the repealed Directive shall be construed as being made to this Directive and shall be read in accordance with the correlation table in Annex XXVI.

#### Article 74

##### Entry into force

This Directive shall enter into force on the day of its publication in the *Official Journal of the European Union*.

#### Article 75

##### Addressees

This Directive is addressed to the Member States.

Done at Strasbourg, 31 March 2004.

*For the European Parliament*

*The President*

P. COX

*For the Council*

*The President*

D. ROCHE

<sup>(1)</sup> OJ L 76, 23.03.1992, p. 14. Directive amended by the 1994 Act of Accession (OJ 241, 29.8.1994, p. 228).

## ANNEX I

## CONTRACTING ENTITIES IN THE SECTORS OF TRANSPORT OR DISTRIBUTION OF GAS OR HEAT

**Belgium**

- Distrigaz/NV Distrigaz.
- Local authorities, or associations of local authorities, for this part of their activities.

**Denmark**

- Entities distributing gas or heat on the basis of an authorisation pursuant to § 4 of the lov om varmforsyning, see Consolidation Act No 772 of 24 July 2000.
- Entities transporting gas on the basis of a licence pursuant to § 10 of lov nr. 449 om naturgasforsyning of 31 May 2000.
- Entities transporting gas on the basis of an authorisation pursuant to bekendtgørelse nr. 141 om rørledningsanlæg på dansk kontinentalsokkelområde til transport af kulbrinter of 13 March 1974.

**Germany**

- Local authorities, public law bodies or associations of public law bodies or State-controlled undertakings supplying gas or heat to others or operating a general supply network pursuant to Article 2(3) of the Gesetz über die Elektrizitäts- und Gasversorgung (Energiewirtschaftsgesetz) of 24 April 1998, as last amended on 10 November 2001.

**Greece**

- 'Δημόσια Επιχείρηση Αερίου (Δ.Ε.Π.Α.) Α.Ε.', which transports and distributes gas in accordance with Law No 2364/95, as amended by Laws Nos 2528/97, 2593/98 and 2773/99.

**Spain**

- Enagas, S.A.
- Bahía de Bizkaia Gas, S.L.
- Gasoducto Al Andalus, S.A.
- Gasoducto de Extremadura, S.A.
- Infraestructuras Gasistas de Navarra, S.A.
- Regasificadora del Noroeste, S.A.
- Sociedad de Gas de Euskadi, S.A.
- Transportista Regional de Gas, S.A.
- Unión Fenosa de Gas, S.A.
- Bilbogas, S.A.
- Compañía Española de Gas, S.A.
- Distribución y Comercialización de Gas de Extramadura, S.A.
- Distribuidora Regional de Gas, S.A.
- Donostigas, S.A.
- Gas Alicante, S.A.

- Gas Andalucía, S.A.
- Gas Aragón, S.A.
- Gas Asturias, S.A.
- Gas Castilla – La Mancha, S.A.
- Gas Directo, S.A.
- Gas Figueres, S.A.
- Gas Galicia SDG, S.A.
- Gas Hernani, S.A.
- Gas Natural de Cantabria, S.A.
- Gas Natural de Castilla y León, S.A.
- Gas Natural SDG, S.A.
- Gas Natural de Alava, S.A.
- Gas Natural de La Coruña, S.A.
- Gas Natural de Murcia SDG, S.A.
- Gas Navarra, S.A.
- Gas Pasaia, S.A.
- Gas Rioja, S.A.
- Gas y Servicios Mérida, S.L.
- Gesa Gas, S.A.
- Meridional de Gas, S.A.U.
- Sociedad del Gas Euskadi, S.A.
- Tolosa Gas, S.A.

#### **France**

- Société nationale des gaz du Sud-Ouest, transporting gas.
- Gaz de France, set up and operated pursuant to loi n° 46-628 sur la nationalisation de l'électricité et du gaz of 8 April 1946, as amended.
- Entities distributing electricity mentioned in Article 23 of loi n° 46-628 sur la nationalisation de l'électricité et du gaz of 8 April 1946, as amended.
- Compagnie française du méthane, transporting gas.
- Local authorities or associations of local authorities, distributing heat.

#### **Ireland**

- Bord Gáis Éireann
- Other entities that may be licensed to undertake the activity of natural gas distribution or transmission by the Commission for Energy Regulation pursuant to the provisions of the Gas Acts 1976 to 2002.

- Entities licensed under the Electricity Regulation Act 1999 which as operators of 'Combined Heat and Power Plants' are engaged in the distribution of heat.

### Italy

- SNAM Rete Gas s.p.a., SGM and EDISON T&S, transporting gas.
- Entities distributing gas governed by the consolidated text of the laws on the direct assumption of control of public services by local authorities and provinces, approved by Royal Decree No. 2578 of 15 October 1925 and by Presidential Decree No. 902 of 4 October 1986.
- Entities distributing heat to the public as referred to in Article 10 of Law No. 308 of 29 May 1982 — Norme sul contenimento dei consumi energetici, lo sviluppo delle fonti rinnovabili di energia, l'esercizio di centrali elettriche alimentate con combustibili dagli idrocarburi.
- Local authorities, or associations of local authorities, distributing heat to the public.

### Luxembourg

- Société de transport de gaz SOTEG S.A.
- Gaswierk Esch-Uelzecht S.A.
- Service industriel de la Ville de Dudelange.
- Service industriel de la Ville de Luxembourg.
- Local authorities or associations formed by those local authorities responsible for the distribution of heat.

### Netherlands

- Entities producing, transporting or distributing gas on the basis of a licence (vergunning) granted by the municipal authorities pursuant to the Gemeentewet.
- Municipal or provincial authorities transporting or distributing gas pursuant to the Gemeentewet or the Provinciewet.
- Local authorities or associations of local authorities distributing heat to the public.

### Austria

- Entities authorised to transport or distribute gas pursuant to the Energiewirtschaftsgesetz, dRGBL. I, pp. 1451-1935 or the Gaswirtschaftsgesetz, BGBL. I No 121/2000, as amended.
- Entities authorised to transport or distribute heat pursuant to the Gewerbeordnung, BGBL. No 194/1994, as amended.

### Portugal

- Entities transporting or distributing gas pursuant to Article 1 of Decree-Law No 8/2000 of 8 February 2000, with the exception of subparagraphs (ii) and (iii) of paragraph 3(b) of that Article.

### Finland

- Public or other entities operating a gas network transport system and transporting or distributing gas under a licence pursuant to Chapter 3(1) or Chapter 6(1) of the maakaasumarkkinalaki/naturgasmarknadslagen (508/2000); and municipal entities or public enterprises producing, transporting or distributing heat or providing heat to networks.

### Sweden

- Entities transporting or distributing gas or heat on the basis of a concession pursuant to lagen (1978:160) om vissa rörledninggar.

**United Kingdom**

- A public gas transporter as defined in section 7(1) of the Gas Act 1986.
  - A person declared to be an undertaker for the supply of gas under Article 8 of the Gas (Northern Ireland) Order 1996.
  - A local authority which provides or operates a fixed network which provides or will provide a service to the public in connection with the production, transport or distribution of heat.
  - A person licensed under section 6(1)(a) of the Electricity Act 1989 whose licence includes the provisions referred to in section 10(3) of that Act.
  - The Northern Ireland Housing Executive.
-

## ANNEX II

**CONTRACTING ENTITIES IN THE SECTORS OF PRODUCTION, TRANSPORT OR DISTRIBUTION OF ELECTRICITY****Belgium**

- SA Electrabel/NV Electrabel.
- Local authorities and associations of local authorities, for this part of their activities.
- SA Société de Production d'Electricité/NV Elektriciteitsproductie Maatschappij.

**Denmark**

- Entities producing electricity on the basis of a licence pursuant to § 10 of the lov om elforsyning, see Consolidation Act No 767 of 28 August 2001.
- Entities transporting electricity on the basis of a licence pursuant to § 19 of the lov om elforsyning, see Consolidation Act No 767 of 28 August 2001.
- Entities undertaking responsibility for the system on the basis of a licence pursuant to § 27 of the lov om elforsyning, see Consolidation Act No 767 of 28 August 2001.

**Germany**

- Local authorities, public law bodies or associations of public law bodies or State undertakings, supplying electricity to other undertakings or operating a general supply network pursuant to Article 2(3) of the Gesetz über die Elektrizitäts- und Gasversorgung (Energiewirtschaftsgesetz) of 24 April 1998, as last amended on 10 November 2001.

**Greece**

- 'Δημόσια Επιχείρηση Ηλεκτρισμού Α.Ε.', set up by Law No 1468/1950 περί ιδρύσεως της ΔΕΗ and operates in accordance with Law No 2773/1999 and Presidential Decree No 333/1999.
- The company 'ΔΙΑΧΕΙΡΙΣΤΗΣ ΕΛΛΗΝΙΚΟΥ ΣΥΣΤΗΜΑΤΟΣ ΜΕΤΑΦΟΡΑΣ ΗΛΕΚΤΡΙΚΗΣ ΕΝΕΡΓΕΙΑΣ Α.Ε.' known as 'ΔΙΑΧΕΙΡΙΣΤΗΣ ΤΟΥ ΣΥΣΤΗΜΑΤΟΣ ή ΔΕΣΜΗΕ', set up pursuant to Article 14 of Law No 2773/1999 and Presidential Decree No 328/2000 (Greek Official Gazette 268).

**Spain**

- Red Eléctrica de España, S.A.
- Endesa, S.A.
- Iberdrola, S.A.
- Unión Fenosa, S.A.
- Hidroeléctrica del Cantábrico, S.A.
- Electra del Viesgo, S.A.
- Otras entidades encargadas de la producción, transporte y distribución de electricidad en virtud de la Ley 54/1997, de 27 de noviembre, del Sector eléctrico y su normativa de desarrollo.

**France**

- Électricité de France, set up and operating pursuant to loi n° 46-628 sur la nationalisation de l'électricité et du gaz of 8 April 1946, as amended.
- Entities distributing electricity and referred to in Article 23 of loi n° 46-628 sur la nationalisation de l'électricité et du gaz of 8 April 1946, as amended.
- Compagnie nationale du Rhône.

**Ireland**

- The Electricity Supply Board.
- ESB Independent Energy [ESBIE — electricity supply].
- Synergen Ltd. [electricity generation].
- Viridian Energy Supply Ltd. [electricity supply].
- Huntstown Power Ltd. [electricity generation].
- Bord Gáis Éireann [electricity supply].
- Electricity Suppliers and Generators licensed under the Electricity Regulation Act 1999.

**Italy**

- Companies in the Gruppo Enel authorised to produce, transmit and distribute electricity within the meaning of Legislative Decree No 79 of 16 March 1999, as subsequently amended and supplemented.
- Other undertakings operating on the basis of concessions under Legislative Decree No 79 of 16 March 1999.

**Luxembourg**

- Compagnie grand-ducale d'électricité de Luxembourg (CEGEDEL), producing or distributing electricity pursuant to the convention concernant l'établissement et l'exploitation des réseaux de distribution d'énergie électrique dans le Grand-Duché du Luxembourg of 11 November 1927, approved by the Law of 4 January 1928.
- Local authorities responsible for the transport or distribution of electricity.
- Société électrique de l'Our (SEO).
- Syndicat de communes SIDOR.

**Netherlands**

- Entities distributing electricity on the basis of a licence (vergunning) granted by the provincial authorities pursuant to the Provinciewet.

**Austria**

- Entities operating a transmission or distribution network pursuant to the Elektrizitätswirtschafts- und Organisationsgesetz, BGBl. I No 143/1998, as amended, or pursuant to the Elektrizitätswirtschafts(wesen)gesetze of the nine Länder.

**Portugal**

- BASIC LEGISLATION
  - ELECTRICIDADE DE PORTUGAL (EDP), set up pursuant to Decree-Law No 182/95 of 27 July 1995, as amended by Decree-Law No 56/97 of 14 March 1997.
  - EMPRESA ELÉCTRICA DOS AÇORES (EDA), operating pursuant to Regional Legislative Decree No 15/96/A of 1 August 1996.
  - EMPRESA DE ELECTRICIDADE DA MADEIRA (EEM), operating pursuant to Decree-Law No 99/91 and Decree-Law No 100/91, both of 2 March 1991.

— PRODUCTION OF ELECTRICITY

- Entities producing electricity pursuant to Decree-Law No 183/95 of 27 July 1995, as amended by Decree-Law No 56/97 of 14 March 1997, as further amended by Decree-Law No 198/2000 of 24 August 2000.
- Independent producers of electricity pursuant to Decree-Law No 189/88 of 27 May 1988, as amended by Decree-Laws No 168/99 of 18 May 1999, No 313/95 of 24 November 1995, No 312/2001 of 10 December 2001 and No 339-C/2001 of 29 December 2001.

— TRANSPORT OF ELECTRICITY

- Entities transporting electricity pursuant to Decree-Law No 185/95 of 27 July 1995, as amended by Decree-Law No 56/97 of 14 March 1997.

— DISTRIBUTION OF ELECTRICITY

- Entities distributing electricity pursuant to Decree-Law No 184/95 of 27 July 1995, as amended by Decree-Law No 56/97 of 14 March 1997, and pursuant to Decree-Law No 344-B/82 of 1 September 1982, as amended by Decree-Law No.297/86 of 19 September 1986 and by Decree-Law No 341/90 of 30 October 1990 and Decree-Law No 17/92 of 5 February 1992.

**Finland**

- Municipal entities and public enterprises producing electricity and entities responsible for the maintenance of electricity transport or distribution networks and for transporting electricity or for the electricity system under a licence pursuant to Section 4 or 16 of the sähkömarkkinalakisähkömarkkinalaki/ elmarknadslagen (386/1995).

- Viloría Hermanos, S.A.
- Virgilio Riesco, S.A.
- Otras entidades que operan en virtud de la Ley 22/1973, de 21 de julio, de Minas y su normativa de desarrollo.

**France**

- Entities exploring for or extracting coal or other solid fuels pursuant to the code minier and its implementing rules, particularly Decree No 95-427 of 19 April 1995.

**Ireland**

- Bord na Mona plc. set up and operating pursuant to the Turf Development Act 1946 to 1998.

**Italy**

- Carbosulcis S.p.A.

**Luxembourg**

—

**Netherlands**

—

**Austria**

- Entities authorised to explore for or extract coal or other solid fuels pursuant to the Mineralrohstoffgesetz, BGBl. I No 38/1999, as amended.

**Portugal**

- Empresa Nacional de Urânio.

**Finland**

- Entities benefiting from a special concession for the exploration for or extraction of solid fuels pursuant to the laki oikeudesta luovuttaa valtion kiinteistövarallisuutta/ lagn om rätt att överlåta statlig fastighetsförmögenhet (...).

**Sweden**

- Entities benefiting from a concession for the exploration for or extraction of coal or other solid fuels on the basis of a concession pursuant to minerallagen (1991:45) or lagen (1985:620) om vissa torvfyndigheter, or which have been granted an authorisation pursuant to lagen (1966:314) om kontinentalsockeln.

**United Kingdom**

- Any licensed operator (within the meaning of the Coal Industry Act 1994)
  - The Department of Enterprise, Trade and Investment (Northern Ireland)
  - A person operating by virtue of a prospecting licence, a mining lease, a mining licence or a mining permission as defined by section 57(1) of the Mineral Development Act (Northern Ireland) 1969
-

## ANNEX IX

**CONTRACTING ENTITIES IN THE FIELD OF MARITIME OR INLAND PORT OR OTHER TERMINAL FACILITIES****Belgium**

- Gemeentelijk Havenbedrijf van Antwerpen
- Havenbedrijf van Gent
- Maatschappij der Brugse Zeevaartinrichtigen
- Port autonome de Charleroi
- Port autonome de Namur
- Port autonome de Liège
- Port autonome du Centre et de l'Ouest
- Société régionale du Port de Bruxelles/Gewestelijk Vennootschap van de Haven van Brussel
- Zeekanaal en Watergebonden Grondbeheer Vlaanderen

**Denmark**

- Ports as defined in § 1 of lov nr. 326 om havne of 28 May 1999.

**Germany**

- Seaports owned totally or partially by territorial authorities (Länder, Kreise, Gemeinden).
- Inland ports subject to the Hafenordnung pursuant to the Wassergesetze of the Länder.

**Greece**

- 'Όργανισμός Λιμένος Πειραιώς Ανώνυμη Εταιρεία' ('Ο.Λ.Π. Α.Ε.'), pursuant to Law No 2688/99.
- 'Όργανισμός Λιμένος Θεσσαλονίκης Ανώνυμη Εταιρεία' ('Ο.Λ.Θ. Α.Ε.'), pursuant to Law No 2688/99.
- 'Όργανισμός Λιμένος Αλεξανδρούπολης Ανώνυμη Εταιρεία' ('Ο.Λ.Α. Α.Ε.'), pursuant to Law No 2932/01.
- 'Όργανισμός Λιμένος Βόλου Ανώνυμη Εταιρεία' ('Ο.Λ.Β. Α.Ε.'), pursuant to Law No 2932/01.
- 'Όργανισμός Λιμένος Ελευσίνας Ανώνυμη Εταιρεία' ('Ο.Λ.Ε. Α.Ε.'), pursuant to Law No 2932/01.
- 'Όργανισμός Λιμένος Ηγουμενίτσας Ανώνυμη Εταιρεία' ('Ο.Λ.ΗΓ. Α.Ε.'), pursuant to Law No 2932/01.
- 'Όργανισμός Λιμένος Ηρακλείου Ανώνυμη Εταιρεία' ('Ο.Λ.Η. Α.Ε.'), pursuant to Law No 2932/01.
- 'Όργανισμός Λιμένος Καβάλας Ανώνυμη Εταιρεία' ('Ο.Λ.Κ. Α.Ε.'), pursuant to Law No 2932/01.
- 'Όργανισμός Λιμένος Κέρκυρας Ανώνυμη Εταιρεία' ('Ο.Λ.ΚΕ. Α.Ε.'), pursuant to Law No 2932/01.
- 'Όργανισμός Λιμένος Πατρών Ανώνυμη Εταιρεία' ('Ο.Λ.ΠΑ. Α.Ε.'), pursuant to Law No 2932/01.
- 'Όργανισμός Λιμένος Λαυριού Ανώνυμη Εταιρεία' ('Ο.Λ.Λ. Α.Ε.'), pursuant to Law No 2932/01.
- 'Όργανισμός Λιμένος Ραφήνας Ανώνυμη Εταιρεία' ('Ο.Λ.Ρ. Α.Ε.'), pursuant to Law No 2932/01.
- Other ports, governed by Presidential Decree No 649/1977. (Εποπτεία, οργάνωση, λειτουργία και διοικητικός έλεγχος λιμένων).

**Spain**

- Ente público Puertos del Estado
- Autoridad Portuaria de Alicante
- Autoridad Portuaria de Almería – Motril

- Autoridad Portuaria de Villagarcía de Arousa
- Otras entidades Portuarias de las Comunidades Autónomas de Andalucía, Asturias, Baleares, Canarias, Cantabria, Cataluña, Galicia, Murcia, País Vasco y Valencia.

**France**

- Port autonome de Paris set up pursuant to loi n° 68-917 relative au port autonome de Paris of 24 October 1968.

- Port autonome de Strasbourg set up pursuant to the convention entre l'État et la ville de Strasbourg relative à la construction du port rhénan de Strasbourg et à l'exécution de travaux d'extension de ce port of 20 May 1923, approved by the Law of 26 April 1924.
- Ports autonomes operating pursuant to Articles L. 111-1 et seq. of the code des ports maritimes.
- Ports non autonomes operating pursuant to Articles R. 121-1 et seq. of the code des ports maritimes.
- Ports managed by the regional or département authorities or operating pursuant to a concession granted by the regional or département authorities pursuant to Article 6 of Law No 83-663 of 22 July 1983 supplementing loi n° 83-8 relative à la répartition des compétences entre les communes, les départements et l'État of 7 January 1983.
- Voies navigables de France, State-owned company subject to the provisions of Article 124 of Law No 90-1168 du 29 December 1990, as amended.

### **Ireland**

- Ports operating pursuant to Harbours Acts 1946 to 2000
- Port of Rosslare Harbour operating pursuant to the Fishguard and Rosslare Railways and Harbours Acts 1899.

### **Italy**

- National ports and other ports managed by the Capitaneria di Porto pursuant to the Codice della navigazione, Royal Decree No 327 of 30 March 1942.
- Autonomous ports (enti portuali) set up by special laws pursuant to Article 19 of the Codice della navigazione, Royal Decree No 327 of 30 March 1942.

### **Luxembourg**

- Port de Mertert, set up and operating pursuant to the loi relative à l'aménagement et à l'exploitation d'un port fluvial sur la Moselle of 22 July 1963, as amended.

### **Netherlands**

- Contracting entities in the field of sea port or inland port or other terminal equipment.

### **Austria**

- Inland ports owned totally or partially by the Länder and/or Gemeinden.

### **Portugal**

- APDL — Administração dos Portos do Douro e Leixões, S.A., pursuant to Decree-Law No 335/98 of 3 November 1998.
- APL — Administração do Porto de Lisboa, S.A., pursuant to Decree-Law No 336/98 of 3 November 1998.
- APS — Administração do Porto de Sines, S.A., pursuant to Decree-Law No 337/98 of 3 November 1998.
- APSS — Administração dos Portos de Setúbal e Sesimbra, S.A., pursuant to Decree-Law No 338/98 of 3 November 1998.
- APA — Administração do Porto de Aveiro, S.A., pursuant to Decree-Law No 339/98 of 3 November 1998.
- IPN — Instituto Portuário do Norte, pursuant to Decree-Law No 242/99 of 28 June 1999.
- ICP — Instituto Portuário do Centro, pursuant to Decree-Law No 243/99 of 28 June 1999.
- IPS — Instituto Portuário do Sul, pursuant to Decree-Law No 244/99 of 28 June 1999.
- IDN — Instituto da Navegabilidade do Douro, pursuant to Decree-Law No 138-A/97 of 3 June 1997.

**Finland**

- Ports operating pursuant to the laki kunnallisista satamajärjestyksistä ja liikennemaksuista/lagen om kommunala hamnanordningar och trafikavgifter (955/1976) and ports instituted under a licence pursuant to section 3 of the laki yksityisistä yleisistä satamista/lagen om privata allmänna hamnar (1156/1994).
- Saimaan kanavan hoitokunt/Förvaltningsnämnden för Saima kanal.

**Sweden**

- Ports and terminal facilities according to lagen (1983:293) om inrättande, utvidgning och avlysning av allmän farled och allmän hamn and förordningen (1983:744) om trafiken på Göta kanal.

**United Kingdom**

- A local authority which exploits a geographical area for the purpose of providing maritime or inland port or other terminal facilities to carriers by sea or inland waterway
  - A harbour authority within the meaning of section 57 of the Harbours Act 1964
  - British Waterways Board
  - A harbour authority as defined by section 38(1) of the Harbours Act (Northern Ireland) 1970
-

## ANNEX X

## CONTRACTING ENTITIES IN THE FIELD OF AIRPORT INSTALLATIONS

**Belgium**

- Belgocontrol
- Brussels International Airport Company
- Luchthaven van Deurne
- Luchthaven van Oostende
- SA Brussels South Charleroi Airport
- SA Société de Développement et de Promotion de l'Aéroport de Bierset

**Denmark**

- Airports operating on the basis of an authorisation pursuant to § 55(1) of the lov om luftfart, see Consolidation Act No 543 of 13 June 2001.

**Germany**

- Airports as defined in Article 38(2)(1) of the Luftverkehrs-Zulassungs-Ordnung of 19 June 1964, as last amended on 21 August 2002.

**Greece**

- 'Υπηρεσία Πολιτικής Αεροπορίας' (ΥΠΑ) operating pursuant to Legislative Decree No 714/70, as amended by Law No 1340/83; the organisation of the company is laid down by Presidential Decree No. 56/89, as amended subsequently.
- The company 'Διεθνής Αερολιμένας Αθηνών' at Spata operating pursuant to Legislative Decree No 2338/95 Κύρωση Σύμβασης Ανάπτυξης του Νέου Διεθνούς Αεροδρομίου της Αθήνας στα Σπάτα, 'ίδρυση της εταιρείας "Διεθνής Αερολιμένας Αθηνών Α.Ε." έγκριση περιβαλλοντικών όρων και άλλες διατάξεις).
- 'Φορείς Διαχείρισης' in accordance with Presidential Decree No 158/02 "Ίδρυση, κατασκευή, εξοπλισμός, οργάνωση, διοίκηση, λειτουργία και εκμετάλλευση πολιτικών αερολιμένων από φυσικά πρόσωπα, νομικά πρόσωπα ιδιωτικού δικαίου και Οργανισμούς Τοπικής Αυτοδιοίκησης' (Greek Official Gazette A 137).

**Spain**

- Ente público Aeropuertos Españoles y Navegación Aérea (AENA).

**France**

- Airports operated by State-owned companies pursuant to Articles L. 251-1, L.260-1 and L. 270-1 of the code de l'aviation civile.
- Airports operating on the basis of a concession granted by the State pursuant to Article R.223-2 of the code de l'aviation civile.
- Airports operating pursuant to an arrêté préfectoral portant autorisation d'occupation temporaire.
- Airports set up by a public authority and which are the subject of a convention as laid down in Article L. 221-1 of the code de l'aviation civile.

**Ireland**

- Airports of Dublin, Cork and Shannon managed by Aer Rianta – Irish Airports.
- Airports operating on the basis of a public use licence granted pursuant to the Irish Aviation Authority Act 1993 as amended by the Air Navigation and Transport (Amendment) Act, 1998, and at which any scheduled air services are performed by aircraft for the public transport of passengers, mail or cargo.

**Italy**

- AAAVTAG.
- Managing entities set up by special laws.
- Entities operating airport facilities on the basis of a concession granted pursuant to Article 694 of the Codice della navigazione, Royal Decree No 347 of 30 March 1942.
- R.A.I. Registro Aeronautico Italiano.

**Luxembourg**

- Aéroport du Findel.

**Netherlands**

- Airports operating pursuant to Articles 18 and following of the Luchtvaartwet.

**Austria**

- Entities authorised to provide airport facilities pursuant to the Luftfahrtgesetz, BGBl. No 253/1957, as amended.

**Portugal**

- ANA — Aeroportos de Portugal, S.A., set up pursuant to Decree-Law No 404/98 of 18 December 1998.
- NAV — Empresa Pública de Navegação Aérea de Portugal, E. P., set up pursuant to Decree-Law No 404/98 of 18 December 1998.
- ANAM — Aeroportos e Navegação Aérea da Madeira, S. A., set up pursuant to Decree-Law No 453/91 of 11 December 1991.

**Finland**

- Airports managed by the 'Ilmailulaitos/Luftfartsverket', or by a municipal or public enterprise pursuant to the ilmailulaki/luftfartslagen (281/1995).

**Sweden**

- Publicly-owned and operated airports in accordance with luftfartslagen (1957:297).
- Privately-owned and operated airports with an operating licence under the act, where this licence corresponds to the criteria of Article 2(3) of the Directive.

**United Kingdom**

- A local authority which exploits a geographical area for the purpose of providing airport or other terminal facilities to carriers by air.
  - An airport operator within the meaning of the Airports Act 1986 who has the management of an airport subject to economic regulation under Part IV of that Act.
  - An airport operator within the meaning of the Airports Act 1986 who has the management of an airport subject to economic regulation under Part IV of that Act.
  - Highland and Islands Airports Limited.
  - An airport operator within the meaning of the Airports (Northern Ireland) Order 1994.
-

## ANNEX XI

## LIST OF COMMUNITY LEGISLATION REFERRED TO IN ARTICLE 30(3)

## A. TRANSPORT OR DISTRIBUTION OF GAS OR HEAT

Directive 98/30/EC of the European Parliament and of the Council of 22 June 1998 concerning common rules for the internal market in natural gas <sup>(1)</sup>

## B. PRODUCTION, TRANSMISSION OR DISTRIBUTION OF ELECTRICITY

Directive 96/92/EC of the European Parliament and of the Council of 19 December 1996 concerning common rules for the internal market in electricity <sup>(2)</sup>

## C. PRODUCTION, TRANSPORT OR DISTRIBUTION OF DRINKING WATER

—

## D. CONTRACTING ENTITIES IN THE FIELD OF RAIL SERVICES

—

## E. CONTRACTING ENTITIES IN THE FIELD OF URBAN RAILWAY, TRAMWAY, TROLLEYBUS OR MOTOR BUS SERVICES

—

## F. CONTRACTING ENTITIES IN THE FIELD OF POSTAL SERVICES

Directive 97/67/EC of the European Parliament and of the Council of 15 December 1997 on common rules for the development of the internal market of Community postal services and the improvement of quality of service <sup>(3)</sup>

## G. EXPLORATION FOR AND EXTRACTION OF OIL OR GAS

Directive 94/22/EC of the European Parliament and of the Council of 30 May 1994 on the conditions for granting and using authorisations for the prospection, exploration and production of hydrocarbons <sup>(4)</sup>

## H. EXPLORATION FOR AND EXTRACTION OF COAL OR OTHER SOLID FUELS

—

## I. CONTRACTING ENTITIES IN THE FIELD OF SEAPORT OR INLAND PORT OR OTHER TERMINAL EQUIPMENT

—

## J. CONTRACTING ENTITIES IN THE FIELD OF AIRPORT INSTALLATIONS

—

---

<sup>(1)</sup> OJ L 204, 21.7.1998, p. 1.

<sup>(2)</sup> OJ L 27, 30.1.1997, p. 20.

<sup>(3)</sup> OJ L 15, 21.1.1998, p. 14. Directive last amended by Directive 2002/39/EC (OJ L 176, 5.7.2002, p. 21).

## ANNEX XII

LIST OF ACTIVITIES AS SET OUT IN ARTICLE 1(2), (b) <sup>(1)</sup>

NACE <sup>(1)</sup>					
SECTION F			CONSTRUCTION		CPV Code
Division	Group	Class	Subject	Notes	
45			Construction	This division includes: construction of new buildings and works, restoring and common repairs	45000000
	45.1		Site preparation		45100000
		45.11	Demolition and wrecking of buildings; earth moving	This class includes: — demolition of buildings and other structures — clearing of building sites — earth moving: excavation, landfill, levelling and grading of construction sites, trench digging, rock removal, blasting, etc. — site preparation for mining: overburden removal and other development and preparation of mineral properties and sites  This class also includes: — building site drainage — drainage of agricultural or forestry land	45110000
		45.12	Test drilling and boring	This class includes: — test drilling, test boring and core sampling for construction, geophysical, geological or similar purposes  This class excludes: — drilling of production oil or gas wells, see 11.20 — water well drilling, see 45.25 — shaft sinking, see 45.25 — oil and gas field exploration, geophysical, geological and seismic surveying, see 74.20	45120000
	45.2		Building of complete constructions or parts thereof; civil engineering		45200000

<sup>(1)</sup> In the event of any difference of interpretation between the CPV and the NACE, the NACE nomenclature will apply.

NACE (1)					
SECTION F			CONSTRUCTION		CPV Code
Division	Group	Class	Subject	Notes	
		45.21	General construction of buildings and civil engineering works	<p>This class includes:</p> <ul style="list-style-type: none"> <li>construction of all types of buildings</li> <li>construction of civil engineering constructions</li> <li>bridges, including those for elevated highways, viaducts, tunnels and subways</li> <li>long-distance pipelines, communication and power lines</li> <li>urban pipelines, urban communication and powerlines;</li> <li>ancillary urban works</li> <li>assembly and erection of prefabricated constructions on the site</li> </ul> <p>This class excludes:</p> <ul style="list-style-type: none"> <li>service activities incidental to oil and gas extraction, see 11.20</li> <li>erection of complete prefabricated constructions from self-manufactured parts not of concrete, see divisions 20, 26 and 28</li> <li>construction work, other than buildings, for stadiums, swimming pools, gymnasiums, tennis courts, golf courses and other sports installations, see 45.23</li> <li>building installation, see 45.3</li> <li>building completion, see 45.4</li> <li>architectural and engineering activities, see 74.20</li> <li>project management for construction, see 74.20</li> </ul>	45210000
		45.22	Erection of roof covering and frames	<p>This class includes:</p> <ul style="list-style-type: none"> <li>erection of roofs</li> <li>roof covering</li> <li>waterproofing</li> </ul>	45220000
		45.23	Construction of highways, roads, airfields and sport facilities	<p>This class includes:</p> <ul style="list-style-type: none"> <li>construction of highways, streets, roads, other vehicular and pedestrian ways</li> <li>construction of railways</li> <li>construction of airfield runways</li> <li>construction work, other than buildings, for stadiums, swimming pools, gymnasiums, tennis courts, golf courses and other sports installations</li> <li>painting of markings on road surfaces and car parks</li> </ul> <p>This class excludes:</p> <ul style="list-style-type: none"> <li>preliminary earth moving, see 45.11</li> </ul>	45230000

NACE (1)					
SECTION F			CONSTRUCTION		CPV Code
Division	Group	Class	Subject	Notes	
		45.24	Construction of water projects	This class includes construction of: waterways, harbour and river works, pleasure ports (marinas), locks, etc. dams and dykes dredging subsurface work	45240000
		45.25	Other construction work involving special trades	This class includes: construction activities specialising in one aspect common to different kinds of structures, requiring specialised skill or equipment: construction of foundations, including pile driving water well drilling and construction, shaft sinking erection of non-self-manufactured steel elements steel bending bricklaying and stone setting scaffolds and work platform erecting and dismantling, including renting of scaffolds and work platforms erection of chimneys and industrial ovens This class excludes: renting of scaffolds without erection and dismantling, see 71.32	45250000
	45.3		Building installation		45300000
		45.31	Installation of electrical wiring and fittings	This class includes: installation in buildings or other construction projects of: electrical wiring and fittings telecommunications systems electrical heating systems residential antennas and aerials fire alarms burglar alarm systems lifts and escalators lightning conductors, etc.	45310000

NACE (1)					
SECTION F			CONSTRUCTION		CPV Code
Division	Group	Class	Subject	Notes	
		45.32	Insulation work activities	<p>This class includes:</p> <p>installation in buildings or other construction projects of thermal, sound or vibration insulation</p> <p>This class excludes:</p> <p>waterproofing, see 45.22</p>	45320000
		45.33	Plumbing	<p>This class includes:</p> <p>installation in buildings or other construction projects of:</p> <p>plumbing and sanitary equipment</p> <p>gas fittings</p> <p>heating, ventilation, refrigeration or air-conditioning equipment and ducts</p> <p>sprinkler systems</p> <p>This class excludes:</p> <p>installation of electrical heating systems, see 45.31</p>	45330000
		45.34	Other building installation	<p>This class includes:</p> <p>installation of illumination and signalling systems for roads, railways, airports and harbours</p> <p>installation in buildings or other construction projects of fittings and fixtures n.e.c.</p>	45340000
	45.4		Building completion		45400000
		45.41	Plastering	<p>This class includes:</p> <p>application in buildings or other construction projects of interior and exterior plaster or stucco, including related lathing materials</p>	45410000
		45.42	Joinery installation	<p>This class includes:</p> <p>installation of not self-manufactured doors, windows, door and window frames, fitted kitchens, staircases, shop fittings and the like, of wood or other materials</p> <p>interior completion such as ceilings, wooden wall coverings, movable partitions, etc.</p> <p>This class excludes:</p> <p>laying of parquet and other wood floor coverings, see 45.43</p>	45420000

NACE <sup>(1)</sup>					
SECTION F			CONSTRUCTION		CPV Code
Division	Group	Class	Subject	Notes	
		45.43	Floor and wall covering	<p>This class includes:</p> <p>laying, tiling, hanging or fitting in buildings or other construction projects of:</p> <p>ceramic, concrete or cut stone wall or floor tiles</p> <p>parquet and other wood floor coverings</p> <p>carpets and linoleum floor coverings, including of rubber or plastic</p> <p>terrazzo, marble, granite or slate floor or wall coverings</p> <p>wallpaper</p>	45430000
		45.44	Painting and glazing	<p>This class includes:</p> <p>interior and exterior painting of buildings, painting of civil engineering structures</p> <p>installation of glass, mirrors, etc</p> <p>This class excludes:</p> <p>installation of windows, see 45.42</p>	45440000
		45.45	Other building completion	<p>This class includes:</p> <p>installation of private swimming pools</p> <p>steam cleaning, sand blasting and similar activities for building exteriors</p> <p>other building completion and finishing work n.e.c</p> <p>This class excludes:</p> <p>interior cleaning of buildings and other structures, see 74.70</p>	45450000
	45.5		Renting of construction or demolition equipment with operator		45500000
		45.50	Renting of construction or demolition equipment with operator	<p>This class excludes:</p> <p>renting of construction or demolition machinery and equipment without operators, see 71.32</p>	45500000

<sup>(1)</sup> Council Regulation (EEC) No 3037/90 of 9 October 1990 on the statistical classification of economic activities in the European Community (OJ L 293, 24.10.1990, p. 1), Regulation as last amended by Commission Regulation (EEC) No 761/93 (OJ L 83, 3.4.1993, p. 1).

## ANNEX XIII

## INFORMATION TO BE INCLUDED IN CONTRACT NOTICES

## A. OPEN PROCEDURES

1. Name, address, telegraphic address, electronic address, telephone number, telex and fax number of the contracting entity.
2. Where appropriate, state whether the contract is reserved for sheltered workshops or whether its performance is reserved in the context of sheltered employment programmes.
3. Nature of the contract (supply, works or service, where appropriate, state if it is a framework agreement or a dynamic purchasing system).

Category of service within the meaning of Annex XVII A or XVII B and description (nomenclature reference No(s)).

Where appropriate, state whether tenders are requested for purchase, lease, rental or hire purchase or any combination of these.

4. Place of delivery, site or place of performance of service.
5. For supplies and works:
  - (a) Nature and quantity of the goods to be supplied (nomenclature reference No(s)), including any options for further procurement and, if possible, the estimated time available for exercising these options as well as the number of renewals, if any. In the case of recurring contracts, also, if possible, an estimate of the timing of the subsequent calls for competition for the goods to be procured or the nature and extent of the services to be provided and general nature of the work (nomenclature reference No(s));
  - (b) Indication of whether the suppliers may tender for some and/or all the goods required.

If, for works contracts, the work or the contract is subdivided into several lots, the order of size of the different lots and the possibility of tendering for one, for several or for all the lots;
  - (c) For works contracts: information concerning the purpose of the work or the contract where the latter also involves the drawing-up of projects.

## 6. For services:

- (a) The nature and quantity of the goods to be supplied, including any options for further procurement and, if possible, the estimated time available for exercising these options as well as the number of renewals, if any. In the case of recurring contracts, also, if possible, an estimate of the timing of the subsequent calls for competition for the services to be procured;
- (b) Indication of whether the performance of the service is reserved by law, regulation or administrative provision to a particular profession;
- (c) Reference of the law, regulation or administrative provision;
- (d) Indication of whether legal persons should indicate the names and professional qualifications of the staff to be responsible for the performance of the service;
- (e) Indication of whether service providers may tender for a part of the services concerned.

## 7. Where known, indication of whether authorisation to submit variants exists or not.

## 8. Time limits for delivery or completion or duration of service contract and, as far as possible, the starting date.

9. (a) Address from which the contract documents and additional documents may be requested;
- (b) Where appropriate, the amount and terms of payment of the sum to be paid to obtain such documents.
10. (a) Final date for receipt of tenders or indicative tenders where a dynamic purchasing system is introduced;
- (b) Address to which they should be sent;
- (c) Language or languages in which they should be drawn up.
11. (a) Where applicable, the persons authorised to be present at the opening of tenders;
- (b) Date, time and place of such opening.
12. Where applicable, any deposits and guarantees required.
13. Main terms concerning financing and payment and/or references to the provisions in which these are contained.
14. Where appropriate, the legal form to be taken by the grouping of economic operators to whom the contract is awarded.
15. Minimum economic and technical conditions required of the economic operator to whom the contract is awarded.
16. Period during which the tenderer is bound to keep open his tender.
17. Where appropriate, particular conditions to which performance of the contract is subject.
18. Criteria referred to in Article 55 to be used for award of the contract: 'lowest price' or 'most economically advantageous tender'. Criteria representing the most economically advantageous tender as well as their weighting or, where appropriate, the order of importance of these criteria shall be mentioned where they do not appear in the specifications.
19. Where appropriate, the reference to publication in the Official Journal of the European Union of the periodic information notice or of the notice of the publication of this notice on the buyer profile to which the contract refers.
20. Name and address of the body responsible for appeal and, where appropriate, mediation procedures. Precise information concerning time limits for lodging appeals, or, if need be, the name, address, telephone number, fax number and e-mail address of the department from which this information may be obtained.
21. Date of dispatch of the notice by the contracting entity.
22. Date of receipt of the notice by the Office for Official Publications of the European Communities (to be supplied by that Office).
23. Any other relevant information.

#### B. RESTRICTED PROCEDURES

1. Name, address, telegraphic address, electronic address, telephone number, telex and fax number of the contracting entity.
2. Where appropriate, state whether the contract is reserved for sheltered workshops or whether its performance is reserved in the context of sheltered employment programmes.
3. Nature of the contract (supplies, works or services; where appropriate, state if it is a framework agreement).

Category of service within the meaning of Annex XVII A or XVII B and description (nomenclature reference No(s)).

Where appropriate, state whether tenders are requested for purchase, lease, rental or hire purchase or any combination of these.

4. Place of delivery, site or place of performance of service.
5. For supplies and works:
  - (a) The nature and quantity of the goods to be supplied (nomenclature reference No(s)), including any options for further procurement and, if possible, the estimated time available for exercising these options as well as the number of renewals, if any. In the case of recurring contracts, also, if possible, an estimate of the timing of the subsequent calls for competition for the goods to be procured or the nature and extent of the services to be provided and general nature of the work (nomenclature reference No(s));
  - (b) Indication of whether the suppliers may tender for some and/or all the goods required.

If, for works contracts, the work or the contract is subdivided into several lots, the order of size of the different lots and the possibility of tendering for one, for several or for all the lots;
  - (c) Information concerning the purpose of the work or the contract where the latter also involves the drawing-up of projects.
6. For services:
  - (a) The nature and quantity of the goods to be supplied, including any options for further procurement and, if possible, the estimated time available for exercising these options as well as the number of renewals, if any. In the case of recurring contracts, also, if possible, an estimate of the timing of the subsequent calls for competition for the services to be procured;
  - (b) Indication of whether the performance of the service is reserved by law, regulation or administrative provision to a particular profession;
  - (c) Reference to the law, regulation or administrative provision;
  - (d) Indication of whether legal persons should indicate the names and professional qualifications of the staff to be responsible for the performance of the service;
  - (e) Indication of whether service providers may tender for a part of the services concerned.
7. Where known, indication of whether authorisation to submit variants exists or not.
8. Time limits for delivery or completion or duration of service contract and, as far as possible, for starting.
9. Where appropriate, the legal form to be taken by the grouping of economic operators to whom the contract is awarded.
10. (a) Final date for receipt of requests to participate;
  - (b) Address to which they should be sent;
  - (c) Language or languages in which they should be drawn up.
11. Final date for dispatch of invitations to tender.
12. Where applicable, any deposits and guarantees required.
13. Main terms concerning financing and payment and/or references to the provisions in which these are contained.

14. Information concerning the economic operator's position and the minimum economic and technical conditions required of him.
15. Criteria referred to in Article 55 to be used for award of the contract: 'lowest price' or 'most economically advantageous tender'. Criteria representing the most economically advantageous tender as well as their weighting or, where appropriate, the order of importance of these criteria shall be mentioned where they do not appear in the specifications or will not be indicated in the invitation to tender.
16. Where appropriate, particular conditions to which performance of the contract is subject.
17. Where appropriate, the reference to publication in the *Official Journal of the European Union* of the periodic information notice or of the notice of the publication of this notice on the buyer profile to which the contract refers.
18. Name and address of the body responsible for appeal and, where appropriate, mediation procedures. Precise information concerning time limits for lodging appeals, or, if need be, the name, address, telephone number, fax number and e-mail address of the service from which this information may be obtained.
19. Date of dispatch of the notice by the contracting entities.
20. Date of receipt of the notice by the Office for Official Publications of the European Communities (to be supplied by that Office).
21. Any other relevant information.

#### C. NEGOTIATED PROCEDURES

1. Name, address, telegraphic address, electronic address, telephone number, telex and fax number of the contracting entity.
2. Where appropriate, state whether the contract is reserved for sheltered workshops or whether its performance is reserved in the context of sheltered employment programmes.
3. Nature of the contract (supplies, works or services; where appropriate, state if it is a framework agreement).

Category of service within the meaning of Annex XVII A or XVII B and description (nomenclature reference No(s)).

Where appropriate, state whether tenders are requested for purchase, lease, rental or hire purchase or any combination of these.

4. Place of delivery, site or place of performance of service.
5. For supplies and works:
  - (a) The nature and quantity of the goods to be supplied (nomenclature reference No(s)), including any options for further procurement and, if possible, the estimated time available for exercising these options as well as the number of renewals, if any. In the case of recurring contracts, also, if possible, an estimate of the timing of the subsequent calls for competition for the goods to be procured or the nature and extent of the services to be provided and general nature of the work (nomenclature reference No(s));
  - (b) Indication of whether the suppliers may tender for some and/or all the goods required.

If, for works contracts, the work or the contract is subdivided into several lots, the order of size of the different lots and the possibility of tendering for one, for several or for all the lots;

- (c) For works contracts: information concerning the purpose of the work or the contract where the latter also involves the drawing-up of projects.

6. For services:
  - (a) The nature and quantity of the goods to be supplied, including any options for further procurement and, if possible, the estimated time available for exercising these options as well as the number of renewals, if any. In the case of recurring contracts, also, if possible, an estimate of the timing of the subsequent calls for competition for the services to be procured;
  - (b) Indication of whether the performance of the service is reserved by law, regulation or administrative provision to a particular profession;
  - (c) Reference of the law, regulation or administrative provision;
  - (d) Indication of whether legal persons should indicate the names and professional qualifications of the staff to be responsible for the performance of the service;
  - (e) Indication of whether service providers may tender for a part of the services concerned.
7. Where known, indication of whether authorisation to submit variants exists or not.
8. Time limits for delivery or completion or duration of service contract and, as far as possible, for starting.
9. Where appropriate, the legal form to be taken by the grouping of economic operators to whom the contract is awarded.
10.
  - (a) Final date for receipt of requests to participate;
  - (b) Address to which they should be sent;
  - (c) Language or languages in which they should be drawn up.
11. Where appropriate, any deposits and guarantees required.
12. Main terms concerning financing and payment and/or references to the provisions in which these are contained.
13. Information concerning the economic operator's position and the minimum economic and technical conditions required of him.
14. Criteria referred to in Article 55 to be used for award of the contract: 'lowest price' or 'most economically advantageous tender'. Criteria representing the most economically advantageous tender as well as their weighting or, where appropriate, the order of importance of these criteria shall be mentioned where they do not appear in the specifications or will not be indicated in the invitation to negotiate.
15. Where appropriate, the names and addresses of the economic operators already selected by the contracting entity.
16. Where applicable, date(s) of previous publications in the *Official Journal of the European Union*.
17. Where appropriate, particular conditions to which performance of the contract is subject.
18. Where appropriate, the reference to publication in the *Official Journal of the European Union* of the periodic information notice or of the notice of the publication of this notice on the buyer profile to which the contract refers.
19. Name and address of the body responsible for appeal and, where appropriate, mediation procedures. Precise information concerning time limits for lodging appeals, or, if need be, the name, address, telephone number, fax number and e-mail address of the service from which this information may be obtained.
20. Date of dispatch of the notice by the contracting entity.
21. Date of receipt of the notice by the Office for Official Publications of the European Communities (to be supplied by that Office).
22. Any other relevant information.

D. SIMPLIFIED CONTRACT NOTICE FOR USE IN A DYNAMIC PURCHASING SYSTEM <sup>(1)</sup>

1. Country of contracting entity.
  2. Name and e-mail address of contracting entity.
  3. Publication reference of the contract notice on the dynamic purchasing system.
  4. E-mail address at which the contract documents and additional documents relating to the dynamic purchasing system are available.
  5. Subject-matter of contract: description by reference number(s) of CPV nomenclature and quantity or extent of the contract to be awarded.
  6. Timeframe for submitting indicative tenders.
- 

---

<sup>(1)</sup> With a view to admission to the system in order to be able subsequently to participate in the invitation to tender for the specific contract.

## ANNEX XIV

**INFORMATION TO BE INCLUDED IN THE NOTICE ON THE EXISTENCE OF A QUALIFICATION SYSTEM**

1. Name, address, telegraphic address, electronic address, telephone number, telex and fax number of the contracting entity.
  2. Where appropriate, state whether the contract is reserved for sheltered workshops or whether its performance is reserved in the context of sheltered employment programmes.
  3. Purpose of the qualification system (description of the goods, services or works or categories thereof to be procured through the system — nomenclature reference No(s)).
  4. Conditions to be fulfilled by the economic operators in view of their qualification pursuant to the system and the methods according to which each of those conditions will be verified. Where the description of such conditions and verification methods is voluminous and based on documents available to interested economic operators, a summary of the main conditions and methods and a reference to those documents shall be sufficient.
  5. Period of validity of the qualification system and the formalities for its renewal.
  6. Reference to the fact that the notice acts as the call for competition.
  7. Address where further information and documentation concerning the qualification system can be obtained (if different from the addresses mentioned under 1).
  8. Name and address of the body responsible for appeal and, where appropriate, mediation procedures. Precise information concerning time-limits for lodging appeals, or, if need be, the name, address, telephone number, fax number and e-mail address of the service from which this information may be obtained.
  9. Where known, criteria referred to in Article 55 to be used for award of the contract: 'lowest price' or 'most economically advantageous tender'. Criteria representing the most economically advantageous tender as well as their weighting or, where appropriate, the order of importance of these criteria, shall be mentioned where they do not appear in the specifications or will not be indicated in the invitation to tender or to negotiate.
  10. Any other relevant information.
-

## ANNEX XV A

**A INFORMATION TO BE INCLUDED IN THE PERIODIC INDICATIVE NOTICE**

## I. HEADINGS TO BE COMPLETED IN ALL CASES

1. Name, address, telegraphic address, electronic address, telephone number, telex and fax number of the contracting entity or the service from which additional information may be obtained.
2. (a) For supply contracts: nature and quantity or value of the services or products to be supplied (nomenclature reference No(s)).  
  
(b) For works contracts: nature and extent of the services to be provided, the general characteristics of the work or of the lots by reference to the work (nomenclature reference No(s)).  
  
(c) For service contracts: intended total procurement in each of the service categories listed in Annex XVII A (nomenclature reference No(s)).
3. Date of dispatch of the notice or of dispatch of the notice of the publication of this notice on the buyer profile.
4. Date of receipt of the notice by the Office for Official Publications of the European Communities (to be supplied by that Office).
5. Any other relevant information.

## II. INFORMATION WHICH SHOULD BE SUPPLIED WHERE THE NOTICE IS USED AS A MEANS OF CALLING FOR COMPETITION OR PERMITS THE REDUCTION OF THE TIME LIMITS FOR THE RECEIPT OF TENDERS

6. A reference to the fact that interested suppliers should advise the entity of their interest in the contract or contracts.
7. Where appropriate, state whether the contract is reserved for sheltered workshops or whether its performance is reserved in the context of sheltered employment programmes.
8. Time limit for the receipt of applications for an invitation to tender or to negotiate.
9. Nature and quantity of the goods to be supplied or general nature of the work or category of service within the meaning of Annex XVII A and description, stating if framework agreement(s) are envisaged, including any options for further procurement and the estimated time available for exercising these options as well as the number of renewals, if any. In the case of recurring contracts, also, an estimate of the timing of the subsequent calls for competition.
10. State whether purchase, lease, rental or hire-purchase or any combination of these is involved.
11. Time limits for delivery or completion or duration of service contract and, as far as possible, for starting.
12. Address to which interested undertakings should send their expressions of interest in writing.  
  
Time limit for receipt of expressions of interest.  
  
Language or languages authorised for the presentation of candidatures or tenders.
13. Economic and technical conditions, and financial and technical guarantees required of suppliers.
14. (a) Estimated date for initiating the award procedures in respect of the contract or contracts (if known);  
  
(b) Type of award procedure (restricted or negotiated);  
  
(c) The amount of and payment details for any sum to be paid to obtain documents concerning the consultation.

15. Where appropriate, particular conditions to which performance of the contract is subject.
  16. Name and address of the body responsible for appeal and, where appropriate, mediation procedures. Precise information concerning time limits for lodging appeals, or, if need be, the name, address, telephone number, fax number and e-mail address of the service from which this information may be obtained.
  17. Where known, criteria referred to in Article 55 to be used for award of the contract: 'lowest price' or 'most economically advantageous tender'. Criteria representing the most economically advantageous tender as well as their weighting or, where appropriate, the order of importance of these criteria shall be mentioned, where they do not appear in the specifications, or will not be indicated in the invitation to confirm interest referred to in Article 47(5) or in the invitation tender or to negotiate.
-

## ANNEX XV B

**INFORMATION TO BE INCLUDED IN NOTICES OF PUBLICATION OF A PERIODIC INDICATIVE NOTICE  
ON A BUYER PROFILE NOT USED AS A MEANS OF CALLING FOR COMPETITION**

1. Country of the contracting entity.
  2. Name of the contracting entity.
  3. Internet address of the 'buyer profile' (URL).
  4. CPV Nomenclature reference No(s).
-

## ANNEX XVI

## INFORMATION TO BE INCLUDED IN THE CONTRACT AWARD NOTICE

**I. Information for publication in the *Official Journal of the European Union* <sup>(1)</sup>**

1. Name and address of the contracting entity.
2. Nature of the contract (supplies, works or services and Nomenclature reference No(s); where appropriate state if it is a framework agreement).
3. At least a summary indication of the nature and quantity of the products, works or services provided.
4. (a) Form of the call for competition (notice on the existence of a system of qualification; periodic notice; call for tenders);  
  
(b) Reference of publication of the notice in the *Official Journal of the European Union*;  
  
(c) In the case of contracts awarded without a prior call for competition, indication of the relevant provision of Article 40(3) or Article 32.
5. Award procedure (open, restricted or negotiated).
6. Number of tenders received.
7. Date of award of the contract.
8. Price paid for bargain purchases pursuant to Article 40(3)(j).
9. Name and address of the economic operator(s).
10. State, where appropriate, whether the contract has been, or may be, subcontracted.
11. Price paid or the prices of the highest and lowest tenders taken into account in the award of the contract.
12. Name and address of the body responsible for the appeal and, where appropriate, mediation procedures. Precise information concerning the time limit for lodging appeals, or, if need be, the name, address, telephone number, fax number and e-mail address of the service from which this information may be obtained.
13. Optional information:
  - value and share of the contract which has been or may be subcontracted to third parties,
  - award criteria.

**II. Information not intended for publication**

14. Number of contracts awarded (where an award has been split between several suppliers).
15. Value of each contract awarded.
16. Country of origin of the product or service (Community origin or non-Community origin; if the latter, broken down by third country).
17. Which award criteria were used (most economically advantageous; lowest price)?

<sup>(1)</sup> Information in headings 6, 9 and 11 is deemed information not intended for publication where the awarding entity considers that publication thereof might be detrimental to a sensitive commercial interest.

18. Was the contract awarded to a tenderer who submitted a variant, in accordance with Article 36(1)?
  19. Were any tenders excluded on the grounds that they were abnormally low, in accordance with Article 57?
  20. Date of transmission of the notice by the contracting entity.
  21. In the case of contracts for services listed in Annex XVII B, agreement by the contracting entity to publication of the notice (Article 43(4)).
-

ANNEX XVII A <sup>(1)</sup>

## SERVICES WITHIN THE MEANING OF ARTICLE 31

Category No	Subject	CPC Reference No <sup>(1)</sup>	CPV Reference No
1	Maintenance and repair services	6112, 6122, 633, 886	From 50100000 to 50982000 (except for 50310000 to 50324200 and 50116510-9, 50190000-3, 50229000-6, 50243000-0)
2	Land transport services <sup>(2)</sup> , including armoured car services, and courier services, except transport of mail	712 (except 71235), 7512, 87304	From 60112000-6 to 60129300-1 (except 60121000 to 60121600, 60122200-1, 60122230-0), and from 64120000-3 to 64121200-2
3	Air transport services of passengers and freight, except transport of mail	73 (except 7321)	From 62100000-3 to 62300000-5 (except 62121000-6, 62221000-7)
4	Transport of mail by land <sup>(2)</sup> and by air	71235, 7321	60122200-1, 60122230-0 62121000-6, 62221000-7
5	Telecommunications services	752	From 64200000-8 to 64228200-2, 72318000-7, and from 72530000-9 to 72532000-3
6	Financial services: (a) Insurances services (b) Banking and investment services <sup>(3)</sup>	ex 81, 812, 814	From 66100000-1 to 66430000-3 and From 67110000-1 to 67262000-1 <sup>(3)</sup>
7	Computer and related services	84	From 50300000-8 to 50324200-4, From 72100000-6 to 72591000-4 (except 72318000-7 and from 72530000-9 to 72532000-3)
8	Research and development services <sup>(4)</sup>	85	From 73000000-2 to 73300000-5 (except 73200000-4, 73210000-7, 7322000-0)
9	Accounting, auditing and bookkeeping services	862	From 74121000-3 to 74121250-0
10	Market research and public opinion polling services	864	From 74130000-9 to 74133000-0, and 74423100-1, 74423110-4
11	Management consulting services <sup>(5)</sup> and related services	865, 866	From 73200000-4 to 73220000-0, From 74140000-2 to 74150000-5 (except 74142200-8), and 74420000-9, 74421000-6, 74423000-0, 74423200-2, 74423210-5, 74871000-5, 93620000-0

<sup>(1)</sup> In the event of any difference of interpretation between the CPV and the CPC, the CPC nomenclature will apply.

Category No	Subject	CPC Reference No (1)	CPV Reference No
12	Architectural services; engineering services and integrated engineering services; urban planning and landscape engineering services; related scientific and technical consulting services; technical testing and analysis services	867	From 74200000-1 to 74276400-8, and From 74310000-5 to 74323100-0, and 74874000-6
13	Advertising services	871	From 74400000-3 to 74422000-3 (except 74420000-9 and 74421000-6)
14	Building-cleaning services and property management services	874, 82201 to 82206	From 70300000-4 to 70340000-6, and From 74710000-9 to 74760000-4
15	Publishing and printing services on a fee or contract basis	88442	From 78000000-7 to 78400000-1
16	Sewage and refuse disposal services; sanitation and similar services	94	From 90100000-8 to 90320000-6, and 50190000-3, 50229000-6, 50243000-0

(1) CPC Nomenclature (provisional version), used to define the scope of Directive 93/38/EEC.

(2) Except for rail transport services covered by category 18.

(3) Except financial services in connection with the issue, sale, purchase or transfer of securities or other financial instruments, and central bank services. Also excluded: services involving the acquisition or rental, by whatever financial procedures, of land, existing buildings, or other immovable property or concerning rights thereon; nevertheless, financial services supplied at the same time as, before or after the contract of acquisition or rental, in whatever form, shall be subject to this Directive.

(4) Except research and development services other than those where the benefits accrue exclusively to the contracting authority for its use in the conduct of its own affairs on condition that the service provided is wholly remunerated by the contracting authority.

(5) Except arbitration and conciliation services.

## ANNEX XVII B

## SERVICES WITHIN THE MEANING OF ARTICLE 32

Category No	Subject	CPC Reference No	CPV Reference No
17	Hotel and restaurant services	64	From 55000000-0 to 55524000-9, and From 93400000-2 to 93411000-2
18	Rail transport services	711	60111000-9, and from 60121000-2 to 60121600-8
19	Water transport services	72	From 61000000-5 to 61530000-9, and From 63370000-3 to 63372000-7
20	Supporting and auxiliary transport services	74	62400000-6, 62440000-8, 62441000-5, 62450000-1, From 63000000-9 to 63600000-5 (except 63370000-3, 63371000-0, 63372000-7), and 74322000-2, 93610000-7
21	Legal services	861	From 74110000-3 to 74114000-1

25	Health and social services	93	74511000-4, and from 85000000-9 to 85323000-9 (except 85321000-5 and 85322000-2)
26	Recreational, cultural and sporting services	96	From 74875000-3 to 74875200-5, and From 92000000-1 to 92622000-7 (except 92230000-2)
27	Other services		

<sup>(1)</sup> Except employment contracts.

## ANNEX XVIII

**INFORMATION TO BE INCLUDED IN THE DESIGN CONTEST NOTICE**

1. Name, address, electronic address telephone, telex and fax numbers of the contracting authority and of the service from which additional documents may be obtained.
  2. Project description (nomenclature reference No(s)).
  3. Nature of the contest: open or restricted.
  4. In the case of open contests: final date for receipt of projects.
  5. In the case of restricted contests:
    - (a) the number of participants envisaged, or range;
    - (b) where applicable, names of participants already selected;
    - (c) criteria for the selection of participants;
    - (d) final date for receipt of requests to participate.
  6. Where applicable, indication of whether participation is reserved to a particular profession.
  7. Criteria to be applied in the evaluation of projects.
  8. Where applicable, names of the selected members of the jury.
  9. Indication of whether the decision of the jury is binding on the authority.
  10. Where applicable, number and value of prizes.
  11. Where applicable, details of payments to all participants.
  12. Indication of whether the prize-winners are permitted any follow-up contracts.
  13. Name and address of the body responsible for the appeal and, where appropriate, mediation procedures. Precise information concerning the time limit for lodging appeals, or, if need be, the name, address, telephone number, fax number and e-mail address of the service from which this information may be obtained.
  14. Date of dispatch of the notice.
  15. Date of receipt of the notice by the Office for Official Publications of the European Communities.
  16. Any other relevant information
-

## ANNEX XIX

**INFORMATION TO BE INCLUDED IN THE RESULTS OF DESIGN CONTEST NOTICES**

1. Name, address, telegraphic address and telephone, telex and fax numbers of the contracting authority.
  2. Project description (nomenclature reference No(s)).
  3. Total number of participants.
  4. Number of foreign participants.
  5. Winner(s) of the contest.
  6. Where applicable, the prize(s).
  7. Other information.
  8. Reference of the design contest notice.
  9. Name and address of the body responsible for the appeal and, where appropriate, mediation procedures. Precise information concerning the time limit for lodging appeals, or, if need be, the name, address, telephone number, fax number and e-mail address of the service from which this information may be obtained.
  10. Date of dispatch of the notice.
  11. Date of receipt of the notice by the Office for Official Publications of the European Communities.
-

## ANNEX XX

**FEATURES CONCERNING PUBLICATION****1. Publication of notices**

- (a) Notices referred to in Articles 41, 42, 43 and 63 must be sent by the contracting entities to the Office for Official Publications of the European Communities in the format required by Commission Directive 2001/78/EC of 13 September 2001 amending Annex IV to Council Directive 93/36/EEC, Annexes IV, V and VI to Council Directive 93/37/EEC, Annexes III and IV to Council Directive 92/50/EEC, as amended by Directive 97/52/EC, and Annexes XII to XV, XVII and XVIII to Council Directive 93/38/EEC, as amended by Directive 98/4/EC (Directive on the use of standard forms in the publication of public contract notices) <sup>(1)</sup>. The periodic indicative notices referred to in Article 41(1), published on a buyer profile as described in paragraph 2(b), must also use that format, as must the notice of such publication;
- (b) Notices referred to in Articles 41, 42, 43 and 63 must be published by the Office for Official Publications of the European Communities or by the contracting entities in the event of a periodic indicative notice published on a buyer profile in accordance with Article 41(1).
- In addition, contracting authorities may publish this information on the Internet on a 'buyer profile' as referred to in point 2(b);
- (c) The Office for Official Publications of the European Communities will give the contracting authority the confirmation referred to in Article 44(7).

**2. Publication of complementary or additional information**

- (a) Contracting entities are encouraged to publish the specifications and the additional documents in their entirety on the Internet;
- (b) The buyer profile may include periodic indicative notices as referred to in Article 41(1), information on ongoing invitations to tender, scheduled purchases, contracts concluded, procedures cancelled and any useful general information, such as a contact point, a telephone and a fax number, a postal address and an e-mail address.

**3. Format and procedures for the electronic transmission of notices**

The format and procedure for sending notices electronically are accessible at the Internet address '<http://simap.eu.int>'.

## ANNEX XXI

**DEFINITION OF CERTAIN TECHNICAL SPECIFICATIONS**

For the purposes of this Directive,

1. (a) 'Technical specification', in the case of service or supply contracts, means a specification in a document defining the required characteristics of a product or a service, such as quality levels, environmental performance levels, design for all requirements (including accessibility for disabled persons) and conformity assessment, performance, use of the product, safety or dimensions, including requirements relevant to the product as regards the name under which the product is sold, terminology, symbols, testing and test methods, packaging, marking and labelling, user instructions, production processes and methods and conformity assessment procedures;
  - (b) 'Technical specification', in the case of works contracts, means the totality of the technical prescriptions contained in particular in the tender documents, defining the characteristics required of a material, product or supply, which permits a material, a product or a supply to be described in a manner such that it fulfils the use for which it is intended by the contracting entity. These characteristics shall include levels of environmental performance, design for all requirements (including accessibility for disabled persons) and conformity assessment, performance, safety or dimensions, including the procedures concerning quality assurance, terminology, symbols, testing and test methods, packaging, marking and labelling, user instructions, and production processes and methods. They shall also include rules relating to design and costing, the test, inspection and acceptance conditions for works and methods or techniques of construction and all other technical conditions which the contracting entity is in a position to prescribe, under general or specific regulations, in relation to the finished works and to the materials or parts which they involve;
  2. 'Standard' means a technical specification approved by a recognised standardisation body for repeated or continuous application, compliance with which is not compulsory and which falls into one of the following categories:
    - 'international standard': a standard adopted by an international standards organisation and made available to the general public;
    - 'European standard': a standard adopted by a European standards organisation and made available to the general public;
    - 'national standard': a standard adopted by a national standards organisation and made available to the general public;
  3. 'European technical approval' means a favourable technical assessment of the fitness for use of a product, based on the fulfilment of the essential requirements for building works, by means of the inherent characteristics of the product and the defined conditions of application and use. European technical approvals are issued by an approval body designated for this purpose by the Member State;
  4. 'Common technical specifications' means a technical specification laid down in accordance with a procedure recognised by the Member States which has been published in the *Official Journal of the European Union*;
  5. 'Technical reference': any product produced by European standardisation bodies, other than official standards, according to procedures adapted to developments in market needs.
-

## ANNEX XXII

## SUMMARY TABLE OF THE TIME-LIMITS LAID DOWN IN ARTICLE 45

## Open procedures

<i>Time limit for receipt of tenders — without a periodic indicative notice</i>					
Time limit	Electronic transmission of the notice	Contract documents available electronically	Electronic transmission plus 'electronic' contract documents	Effect on first subparagraph of paragraph 7	Effect on second subparagraph of paragraph 7
52	45	47	40	none	none

*With publication of a periodic indicative notice*

A: Time limit in general	Electronic transmission of the notice	Contract documents available electronically	Electronic transmission plus 'electronic' contract documents	Effect on first subparagraph of paragraph 7	Effect on second subparagraph of paragraph 7
36	29	31	24	none	none
B: Minimum time limit	Electronic transmission of the notice	Contract documents available electronically	Electronic transmission plus 'electronic' contract documents	Effect on first subparagraph of paragraph 7	Effect on second subparagraph of paragraph 7
22	15	17	10	The period of 10 days is extended to 15 days	The period of 17 days is extended to 22 days

## Restricted and negotiated procedures

<i>Time limit for the receipt of requests to participate:</i>					
General time limit	Electronic transmission of the notice	Contract documents available electronically	Electronic transmission plus 'electronic' contract documents	Effect on first subparagraph of paragraph 8	Effect on second subparagraph of paragraph 8
37	30	Not applicable (n.a.)	n.a.	none	n.a.

Minimum time limit	Electronic transmission of the notice	Contract documents available electronically	Electronic transmission plus 'electronic' contract documents	Effect on first subparagraph of paragraph 8	Effect on second subparagraph of paragraph 8
22	15	n.a.	n.a.	none	n.a.
Minimum time limit	Electronic transmission of the notice	Contract documents available electronically	Electronic transmission plus 'electronic' contract documents	Effect on first subparagraph of paragraph 8	Effect on second subparagraph of paragraph 8
15	8	n.a.	n.a.	The period of 8 days is extended to 15 days	n.a.

*Time limit for the receipt of tenders*

A: Time limit in general	Electronic transmission of the notice	Contract documents available electronically	Electronic transmission plus 'electronic' contract documents	Effect on first subparagraph of paragraph 8	Effect on second subparagraph of paragraph 8
24	n.a.	19	n.a.	n.a.	none
B: Minimum time limit	Electronic transmission of the notice	Contract documents available electronically	Electronic transmission plus 'electronic' contract documents	Effect on first subparagraph of paragraph 8	Effect on second subparagraph of paragraph 8
10	n.a.	5	n.a.	n.a.	The period of 5 days is extended to 10 days
C: Time limit set by agreement	Electronic transmission of the notice	Contract documents available electronically	Electronic transmission plus 'electronic' contract documents	Effect on first subparagraph of paragraph 8	Effect on second subparagraph of paragraph 8
	n.a.	n.a.	n.a.	n.a.	n.a.

## ANNEX XXIII

**INTERNATIONAL LABOUR LAW PROVISIONS WITHIN THE MEANING OF ARTICLE 59(4)**

- Convention 87 on Freedom of Association and the Protection of the Right to Organise;
  - Convention 98 on the Right to Organise and Collective Bargaining;
  - Convention 29 on Forced Labour;
  - Convention 105 on the Abolition of Forced Labour;
  - Convention 138 on Minimum Age;
  - Convention 111 on Discrimination (Employment and Occupation);
  - Convention 100 on Equal Remuneration;
  - Convention 182 on Worst Forms of Child Labour.
-

## ANNEX XXIV

**REQUIREMENTS RELATING TO DEVICES FOR THE ELECTRONIC RECEIPT OF TENDERS, REQUESTS TO PARTICIPATE, APPLICATIONS FOR QUALIFICATION AS WELL AS PLANS AND PROJECTS IN CONTESTS**

Devices for the electronic receipt of tenders, requests to participate, applications for qualification as well as plans and projects in contests must guarantee, through technical means and appropriate procedures, at least that:

- (a) electronic signatures relating to tenders, requests to participate and applications for qualification as well as to the forwarding of plans and projects comply with national provisions adopted pursuant to Directive 1999/93/EC<sup>(1)</sup>;
- (b) the exact time and date of the receipt of tenders, requests to participate, applications for qualification as well as the submission of plans and projects can be determined precisely;
- (c) it may be reasonably ensured that, before the time limits laid down, no-one can have access to data transmitted under these requirements;
- (d) if that access prohibition is infringed, it may be reasonably ensured that the infringement is clearly detectable;
- (e) only authorised persons may set or change the dates for opening data received;
- (f) during the various stages of the qualification procedure, the contract award procedure or contest, access to all data submitted, or to part thereof, must be possible only through simultaneous action by authorised persons;
- (g) simultaneous action by authorised persons must give access to data transmitted only after the prescribed date;
- (h) data received and opened in accordance with these requirements must remain accessible only to persons authorised to acquaint themselves therewith.

---

<sup>(1)</sup> Directive 1999/93/EC of the European Parliament and of the Council on a Community framework for electronic signatures (OJ L 13, 19.1.2000, p. 12).

## ANNEX XXV

## TIME LIMITS FOR TRANSPOSITION AND IMPLEMENTATION

Directive	Time limits for transposition	Time limits for implementation
93/38/EEC (OJ L 199, 9.8.1993, p. 84)	1.7.1994	Spain: 1.1.1997; Greece and Portugal: 1.1.1998
98/4/EC (OJ L 101, 1.4.1998, p. 1)	16.2.1999	Greece and Portugal: 16.2.2000

EUROPEAN COMMISSION

Brussels, 20.12.2011  
COM(2011) 895 final

2011/0439 (COD)

Proposal for a

**DIRECTIVE OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL**

**on procurement by entities operating in the water, energy, transport and postal services  
sectors**

(Text with EEA relevance)

{SEC(2011) 1585}

{SEC(2011) 1586}

## EXPLANATORY MEMORANDUM

### 1. CONTEXT OF THE PROPOSAL

- **Grounds for and objectives of the proposal**

The Europe 2020 strategy for smart, sustainable and inclusive growth [COM(2010) 2020] is based on three interlocking and mutually reinforcing priorities: developing an economy based on knowledge and innovation; promoting a low-carbon, resource-efficient and competitive economy; and fostering a high-employment economy delivering social and territorial cohesion.

Public procurement plays a key role in the Europe 2020 strategy as one of the market-based instruments to be used to achieve those objectives by improving the business environment and conditions for business to innovate and by encouraging wider use of green procurement supporting the shift towards a resource efficient and low-carbon economy. At the same time, the Europe 2020 strategy stresses that public procurement policy must ensure the most efficient use of funds and that procurement markets must be kept open Union-wide.

In the face of those challenges, the existing public procurement legislation needs to be revised and modernised in order to make it better suited to deal with the evolving political, social and economic context. This concerns not only procurement by the State and public authorities, but also contract awards by utilities operators which have their own specific procurement regime.

In its communication of 13 April 2011 on “The Single Market Act: Twelve levers to boost growth and confidence”, the European Commission included among its twelve key priority actions to be adopted by the EU institutions before the end of 2012, a revised and modernised public procurement legislative framework to make the award of contracts more flexible and enable public contracts to be put to better use in support of other policies.

This proposal has two complementary objectives:

- Increase the efficiency of spending to ensure the best possible procurement outcomes in terms of value for money. This implies in particular a simplification and flexibilisation of the existing public procurement rules. Streamlined, more efficient procedures will benefit all economic operators and facilitate the participation of SMEs and cross-border bidders.
- Allow procurers to make better use of procurement in support of common societal goals such as protection of the environment, higher resource and energy efficiency, combating climate change, promoting innovation, employment and social inclusion and ensuring the best possible conditions for the provision of high quality social services.

- **General context**

Public procurement plays an important role in the overall economic performance of the European Union. In Europe, public purchasers spend around 18% of GDP on supplies, works and services. Given the volume of purchases, public procurement can be used as a powerful lever for achieving a Single Market fostering smart, sustainable and inclusive growth.

The current generation of public procurement Directives – Directives 2004/17/EC<sup>1</sup> and 2004/18/EC<sup>2</sup> – are the product of a long evolution that started in 1971 with the adoption of Directive 71/305/EEC. By guaranteeing transparent and non-discriminatory procedures, those Directives principally aim to ensure that economic operators from across the Single Market benefit fully from the basic freedoms in competing for public contracts.

A comprehensive economic evaluation has shown that the procurement Directives have achieved their objectives to a considerable extent. They have resulted in greater transparency and higher levels of competition while achieving measurable savings through lower prices.

Stakeholders have nevertheless voiced demand for a review of the public procurement directives to simplify the rules, increase their efficiency and effectiveness and make them better suited to deal with the evolving political, social and economic context. Streamlined, more efficient procedures will increase flexibility for contracting authorities, benefit all economic operators and facilitate the participation of SMEs and cross-border bidders. Improved procurement rules will also allow contracting entities to make better use of procurement in support of common societal goals, such as the protection of the environment, higher resource and energy efficiency and combating climate change, promoting innovation and social inclusion, and ensuring the best possible conditions for the provision of high quality social services. Those orientations were confirmed by the results of a consultation of stakeholders conducted by the European Commission in spring 2011, where a very large majority of stakeholders supported the proposal to review the procurement Directives in order to adapt them better to the new challenges faced by procurers and economic operators alike.

- **Existing provisions in the area of the proposal**

Together with the proposed new Directive on procurement by public authorities, the proposal will replace Directives 2004/17/EC and 2004/18/EC as the core elements of the European Union public procurement legislative framework.

The Directive will be complemented by the further elements of that legislative framework:

- Directive 2009/81/EC<sup>3</sup> sets specific rules for defence and sensitive security procurement,
- Directive 92/13/EEC<sup>4</sup> establishes common standards for national review procedures to ensure that rapid and effective means of redress is available in all EU countries in cases where bidders consider that contracts have been awarded unfairly.

---

<sup>1</sup> Directive 2004/17/EC of 31 March 2004 coordinating the procurement procedures of entities in the water, energy, transport and postal services sectors, OJ L 134, 30.4.2004, p. 1.

<sup>2</sup> Directive 2004/18/EC of 31 March 2004 on the coordination of procedures for the award of public works contracts, public supply contracts and public service contracts, OJ L 134, 30.4.2004, p. 114.

<sup>3</sup> Directive 2009/81/EC of 13 July 2009 on the coordination of procedures for the award of certain works contracts, supply contracts and service contracts by contracting authorities or entities in the fields of defence and security, and amending Directives 2004/17/EC and 2004/18/EC, OJ L 216, 20.8.2009, p. 76.

<sup>4</sup> Directive 92/13/EEC of 25 February 1992 coordinating the laws, regulations and administrative provisions relating to the application of Community rules on the procurement procedures of entities operating in the water, energy, transport and telecommunication sectors, OJ L 76, 23.3.1992, p. 14.

- **Consistency with the other policies and objectives of the Union**

This initiative implements the Europe 2020 strategy for smart, sustainable and inclusive growth [COM(2010) 2020] and the Europe 2020 Flagship Initiatives on a Digital Agenda for Europe [COM(2010) 245], the Innovation Union [COM(2010) 546], an Integrated Industrial Policy for the Globalisation Era [COM(2010) 614], Energy 2020 [COM(2010) 639] and a Resource Efficient Europe [COM(2011) 21]. It also implements the Single Market Act [COM(2011) 206], in particular its twelfth key action “Revised and Modernised Public Procurement Legislative Framework”. It is a CWP 2011 strategic initiative.

## 2. CONSULTATION OF INTERESTED PARTIES AND IMPACT ASSESSMENT

- **Consultation of interested parties**

### *Consultation methods, main sectors targeted and general profile of respondents*

The European Commission published on 27 January 2011 a *Green Paper on the modernisation of EU public procurement policy – Towards a more efficient European Procurement Market*<sup>5</sup> launching a broad public consultation on options for legislative changes to make the award of contracts easier and more flexible and enable public contracts to be put to better use in support of other policies. The purpose of the Green Paper was to identify a number of key areas for reform and ask for stakeholders’ views on concrete options for legislative change. Among the issues covered were the needs for simplifying and flexibilising procedures, strategic use of public procurement to promote other policy objectives, improving access for SMEs to public contracts and combating favouritism, corruption and conflicts of interest.

The public consultation closed on 18 April 2011 and met with a high response. In total, 623 replies were received, coming from a wide variety of stakeholder groups including central Member State authorities, local and regional public purchasers and their associations, undertakings, industry associations, academics, civil society organisations (including trade unions) and individual citizens. The majority of replies originated from the United Kingdom, Germany, France and, to a lesser degree, Belgium, Italy, the Netherlands, Austria, Sweden, Spain and Denmark.

The results of the consultation were summarised in a synthesis paper<sup>6</sup> and presented and discussed at a public conference on 30 June 2011<sup>7</sup>.

### *Summary of responses and how they have been taken into account*

A very large majority of stakeholders appreciated the initiative of the European Commission to review the current procurement policy. Amongst the different subjects discussed in the Green Paper, stakeholders put a particularly strong emphasis on the need to simplify procedures and make them more flexible. There was also consensus among all stakeholder

<sup>6</sup>

[http://ec.europa.eu/internal\\_market/consultations/docs/2011/public\\_procurement/synthesis\\_document\\_en.pdf](http://ec.europa.eu/internal_market/consultations/docs/2011/public_procurement/synthesis_document_en.pdf)

<sup>7</sup>

[http://ec.europa.eu/internal\\_market/publicprocurement/modernising\\_rules/conferences/index\\_en.htm](http://ec.europa.eu/internal_market/publicprocurement/modernising_rules/conferences/index_en.htm)

groups that the rules on procurement by utilities were still relevant. A clear majority of respondents agreed that there was still a need for a specific set of rules to be applied to public utilities operators and that the different rules applying to utilities operators adequately reflect the specific character of utilities procurement.

In the same vein, a clear majority of respondents agree that the criteria used for defining the entities subject to the utilities rules (activities carried out by the entities concerned, their legal statute and, where they are private, the existence of special or exclusive rights) are still appropriate and should be maintained. Most respondents are also in agreement that the profit-seeking or commercial ethos of private companies cannot be regarded as sufficient to guarantee objective and fair procurement, if those companies are operating on the basis of special or exclusive rights.

On the strategic use of public procurement to achieve the societal goals of the Europe 2020 strategy, stakeholders' opinions were mixed. Many stakeholders, especially businesses, showed a general reluctance to the idea of using public procurement in support of other policy objectives. Other stakeholders, notably civil society organisations, were strongly in favour of such strategic use and advocated far-reaching changes to the very principles of the European Union public procurement policy.

- **Collection and use of expertise**

In addition to the Green Paper consultation, the European Commission conducted in 2010/2011 a comprehensive evaluation of the impact and effectiveness of EU procurement legislation drawing on an extensive body of evidence and new independent research. The studies assessed mainly the cost and effectiveness of procurement procedures, issues of cross border procurement, SMEs' access to procurement markets and the strategic use of procurement in Europe. With regard to utilities procurement, the evaluation examined whether the utilities sectors are now more exposed to competition than they were at the time of adoption of the procurement regime.

The findings of the evaluation showed that legislative activity to liberalise access to utility sectors has not yet translated into sustained or effective competitive pressure on incumbent operators. In many utility sectors, high levels of market concentration or anaemic competition continue to be observed. The evaluations concluded that conditions have not evolved to the extent that competition can be deemed to be sufficiently strong on a sector wide basis to permit the exclusion of sectors from the scope of the utilities procurement Directive. The rationale of the Directive continues to apply in general while specific exemptions from the application of the procurement rules may be justified on the basis of an in-depth, case by case analysis.

- **Impact assessment**

The impact assessment and its executive summary give an overview of the different options for each of the five groups of basic problems (administrative organisation, scope, procedures, strategic procurement and access to procurement markets). Based on an analysis of the advantages and disadvantages of the different options, a package of preferred options was identified that should optimise the synergies between the different solutions allowing savings due to one type of action to neutralise related costs caused by another (e.g. possible increased procedural requirements caused by strategic procurement actions could partially be

neutralised by savings related to the improved design of procurement procedures). Those preferred options form the basis of the present proposal.

The draft Impact Assessment report was scrutinised by the Impact Assessment Board, who asked for amendments concerning in particular the identification of the specific elements of the legislative framework to be addressed, the description of the options under discussion, a more in-depth cost-benefit analysis of the selected headline actions and the systematic integration of stakeholder views, both in the problem definition and to complement the analysis of impacts. Those recommendations for improvement were integrated in the final report. The opinion of the Impact Assessment Board on the report is published together with this proposal, as well as the final Impact Assessment report and its executive summary.

### **3. LEGAL ELEMENTS OF THE PROPOSAL**

- **Legal basis**

The proposal is based on Articles 53(1), 62 and 114 of the Treaty on the Functioning of the European Union (TFEU).

- **Subsidiarity principle**

The subsidiarity principle applies insofar as the proposal does not fall under the exclusive competence of the EU.

The objectives of the proposal cannot be sufficiently achieved by the Member States for the following reason:

The coordination of procurement procedures above certain thresholds has proven an important tool for the achievement of the Internal Market in the field of purchasing by utilities. It ensures effective and equal access to contracts for economic operators across the Internal Market. Experience with Directives 2004/17/EC and 2004/18/EC and the earlier generations of procurement Directives has shown that European-wide procurement procedures provide transparency and objectivity in procurement resulting in considerable savings and improved procurement outcomes that benefit utilities operators, their customers and, ultimately, the European taxpayer.

This objective could not be sufficiently achieved through action by Member States which would inevitably result in divergent requirements and possibly conflicting procedural regimes increasing regulatory complexity and causing unwarranted obstacles for cross-border activities.

The proposal therefore complies with the subsidiarity principle.

- **Proportionality principle**

The proposal complies with the proportionality principle since it does not go beyond what is necessary in order to achieve the objective of ensuring the proper functioning of the Internal Market through a set of European-wide coordinated procurement procedures. Moreover, the proposal is based on a “tool box” approach, allowing Member State a maximum of flexibility in adapting the procedures and tools to their specific situation.

Compared to the current procurement Directives, the proposal will reduce administrative burden related to the conduct of the procedure both for contracting entities and economic operators; where new requirements are foreseen (for instance, in the context of strategic procurement), those will be compensated by the removal of constraints in other areas.

- **Choice of instruments**

Since the proposal is based on Articles 53(1), 62 and 114 TFEU the use of a Regulation for the provisions applying both to the procurement of goods and services would not be permitted by the Treaty. The instrument proposed is therefore a Directive.

During the impact assessment process, non-legislative options were discarded for reasons set out in detail in the impact assessment.

#### **4. BUDGETARY IMPLICATION**

The proposal has no budgetary implications.

#### **5. ADDITIONAL INFORMATION**

- **Repeal of existing legislation**

The adoption of the proposal will lead to the repeal of existing legislation (Directive 2004/17/EEC).

- **Review/revision/sunset clause**

The proposal contains a review clause concerning the economic effects of the threshold amounts.

- **Transposition measures and explanatory documents**

The proposal concerns an area where Union legislation has a coordination purpose, with a significant impact on a wide range of national legal sectors. Notwithstanding the coordination purpose, many provisions constitute full harmonisation and the proposal includes a large number of legal obligations. Member States supplement Union rules with national additional provisions so as the whole system becomes operational.

In this context, the Commission has identified a number of factors which render explanations by Member States necessary both for the correct understanding of transposing measures and for the functioning of the whole picture of procurement rules at national level:

- transposing and implementing measures are adopted at different institutional levels (national / federal, regional, local);
- in addition to the different regulatory layers, in many Member States rules are also established according to the sector involved or the type of procurement concerned;
- administrative measures of general or specific nature complement and in some cases overlap the main legal framework.

Only Member States can explain how the different measures transpose the Union directives in the public procurement sector and how the same measures interact each with the others.

For those reasons, the communication of documents explaining the relationship between the various parts of this directive and the corresponding parts of national transposition measures should be communicated together with the transposing measures, in particular concordance tables, which constitute an operational tool for the analysis of the national measures.

- **European Economic Area**

The proposed act concerns an EEA matter and should therefore extend to the European Economic Area.

- **Detailed explanation of the proposal**

*1) Simplification and flexibilisation of procurement procedures*

The proposed Directive provides for a simplification and flexibilisation of the procedural regime set by the current public procurement Directives. For this purpose, it contains the following measures:

*Clarification of scope:* The basic concept of “procurement” which appears also in the title of the proposed Directive has been newly introduced in order to better determine the scope and purpose of procurement law and to facilitate the application of the thresholds. The definitions of certain key notions determining the scope of the Directive (such as body governed by public law, public works and service contracts, mixed contracts) have been revised in the light of the case-law of the Court of Justice. At the same time, the proposal endeavours to keep continuity in the use of notions and concepts that have been developed over the years through the Court’s case-law and are well known to practitioners. In this context, it should be noted that minor deviations from the wording or presentation known from the previous Directives do not necessarily imply a change of substance, but may be due to simplification of texts.

The notion of special or exclusive rights is central to the definition of the scope of this Directive, since entities which are neither contracting authorities nor public undertakings within the meaning of this Directive are subject to this Directive only to the extent that they exercise one of the activities covered on the basis of such rights. It is therefore appropriate to clarify that rights which have been granted by means of a procedure in which adequate publicity has been ensured and where the granting of those rights was based on objective criteria, notably pursuant to Union legislation, do not constitute special or exclusive rights for the purposes of this Directive.

The traditional distinction between so-called priority and non-priority services (“A” and “B” services) will be abolished. The results of the evaluation have shown that it is no longer justified to restrict the full application of procurement law to a limited group of services. However, it became also clear that the regular procurement regime is not adapted to social services which need a specific set of rules (see below).

Following the results of the evaluation, the scope in terms of sectors covered remains largely unchanged. However, procurement made for the purpose of exploring oil and gas has been withdrawn from the scope as that sector has been found to be subject to such competitive pressure that the procurement discipline brought about by the Directive is no longer needed.

The competitive situation in this sector of activity has been examined in the context of four different requests for exemption under the current Article 30<sup>8</sup>. In all four cases, the relevant geographical market was consistently found to be worldwide, which is furthermore in accordance with well-established practice in merger cases<sup>9</sup>. The conclusions have consistently been that the exploration market is not highly concentrated. Apart from state owned companies, the market is characterised by the presence of three international vertically integrated private players named the super majors (BP, ExxonMobil and Shell) as well as a certain number of so-called ‘majors’ and the individual market share of even super majors is well below one percent. All of this has consistently been found to constitute indications of direct exposure to competition and access to the market is furthermore liberalised through the provisions of the Hydrocarbon Licensing Directive<sup>10</sup>. It therefore appropriate to simplify the legal situation and to lessen the administrative burden on all concerned (contracting entities, Member States, the European Commission, the European Parliament and Council) by avoiding the need to adopt individual Article 30 Decisions in respect of each of the remaining 23 Member States.

*Toolbox approach:* Member State systems will provide the three basic forms of procedure which already exist under current Directives: open and restricted procedures as well as negotiated procedures with prior call for competition. They may, in addition, foresee either as standard procedure or subject to certain conditions the innovation partnership, a new form of procedure for innovative procurement (see below).

Contracting entities will furthermore have at their disposal a set of six specific procurement techniques and tools intended for aggregated and electronic procurement: framework agreements, dynamic purchasing systems, electronic auctions, electronic catalogues, central purchasing bodies and joint procurement. Compared to the existing Directive, those tools have been improved and clarified with a view to facilitating e-procurement.

---

<sup>8</sup> European Commission Implementing Decision 2011/481/EU of 28 July 2011 exempting exploration for oil and gas and exploitation of oil in Denmark, excluding Greenland and the Faroe Islands, from the application of Directive 2004/17/EC of the European Parliament and of the Council coordinating the procurement procedures of entities operating in the water, energy, transport and postal services sectors, OJ L 197 of 29.7.2011, p. 20; European Commission Implementing Decision 2011/372/EU of 24 June 2011 exempting exploration for oil and gas and exploitation of oil in Italy from the application of Directive 2004/17/EC of the European Parliament and of the Council coordinating the procurement procedures of entities operating in the water, energy, transport and postal services sectors, OJ L 166 of 25.6.2011, p. 28; European Commission Decision 2010/192/EU of 29 March 2010 exempting exploration for and exploitation of oil and gas in England, Scotland and Wales from the application of Directive 2004/17/EC of the European Parliament and of the Council coordinating the procurement procedures of entities operating in the water, energy, transport and postal services sectors; OJ L 84 of 31.03.2010, p. 52; European Commission Decision 2009/546/EC of 8 July 2009 exempting exploration for and exploitation of oil and gas in the Netherlands from the application of Directive 2004/17/EC of the European Parliament and of the Council coordinating the procurement procedures of entities operating in the water, energy, transport and postal services sectors, OJ L 181 of 14.07.2009, p. 53.

<sup>9</sup> See in particular European Commission Decision 2004/284/EC of 29 September 1999 declaring a concentration compatible with the common market and the EEA Agreement (Case No IV/M.1383 — Exxon/Mobil) and subsequent decisions, inter alia, European Commission Decision of 03/05/2007 declaring a concentration to be compatible with the common market (Case No COMP/M.4545 — STATOIL/HYDRO) according to Council Regulation (EEC) No 139/2004.

<sup>10</sup> Directive 94/22/EEC of the European Parliament and of the Council of 30 May 1994 on the conditions for granting and using authorizations for the prospecting, exploration and production of hydrocarbons, OJ L 79 of 29.3.1996, p. 30.

*Promotion of e-procurement:* The use of electronic communications and transaction processing by purchasers can deliver significant savings and improved procurement outcomes while reducing waste and error. The proposal aims at helping Member States to achieve the switchover to e-procurement enabling suppliers to take part in online procurement procedures across the Internal Market. For this purpose, the proposed Directive provides for the mandatory transmission of notices in electronic form, the mandatory electronic availability of the procurement documents and imposes the switch to fully electronic communication, in particular e-submission, in all procurement procedures within a transition period of two years. It streamlines and improves Dynamic Purchasing Systems and electronic catalogues, fully electronic procurement tools that are particularly adapted to highly aggregated procurement done by Central Purchasing Bodies. The e-procurement instrument would also enable contracting authorities to prevent, detect and correct errors generally due to wrong understanding or interpretation of public procurement rules.

*Modernisation of procedures:* The proposal provides a more flexible and user-friendly approach for certain important features of procurement procedures. Time-limits for participations and submission of offers have been shortened, allowing for quicker and more streamlined procurement. The distinction between selection of tenderers and award of the contract which is often a source of errors and misunderstandings has been made more flexible, allowing contracting entities to decide on the most practical sequencing by examining award criteria before selection criteria and to take into account the organisation and quality of the staff assigned to performing the contract as an award criterion.

The procedure for exemption of contracts awarded in sufficiently competitive markets (the current “Article 30 decisions”) has been simplified and streamlined. A number of exemptions, in particular the intra-group and joint venture exemptions which are important in practice have also been reviewed and clarified.

The modification of contracts during their term has become an increasingly relevant and problematic issue for practitioners. A specific provision on modification of contracts takes up the basic solutions developed by case-law and provides a pragmatic solution for dealing with unforeseen circumstances requiring an adaption of a public contract during its term.

## 2) *Strategic use of public procurement in response to new challenges*

The proposed Directive is based on *enabling approach* providing contracting entities with the instruments needed to contribute to the achievement of the Europe 2020 strategic goals by using their purchasing power to procure goods and services that foster innovation, respect the environment and combat climate change while improving employment, public health and social conditions.

*Life-cycle costing:* The proposal gives purchasers the possibility to base their award decisions on life-cycle costs of the products, services or works to be purchased. The life cycle covers all stages of the existence of a product or works or provision of a service, from raw material acquisition or generation of resources until disposal, clearance and finalisation. The costs to be taken into account do not only include direct monetary expenses, but also external environmental costs if they can be monetised and verified. Where a common European Union methodology for the calculation of life-cycle costs has been developed, contracting entities are obliged to make use of it.

*Production process:* Contracting entities may refer to all factors directly linked to the production process in the technical specifications and in the award criteria, as long as they refer to aspects of the production process which are closely related to the specific production or provision of the good or service purchased. This excludes requirements that are not related to the process of producing the products, works or services covered by the procurement, such as a general corporate social responsibility requirement covering the whole operation of the contractor.

*Labels:* Contracting entities may require that works, supplies or services bear specific labels certifying environmental, social or other characteristics, provided that they accept also equivalent labels. This applies for instance to European or (multi-)national eco-labels or labels certifying that a product is free of child-labour. The certification schemes in question must concern characteristics linked to the subject-matter of the contract and be drawn up on the basis of scientific information, established in an open and transparent procedure and accessible to all interested parties.

*Sanctioning violations of mandatory social, labour or environmental law:* Under the proposed Directive, a contracting entity can exclude economic operators from the procedure, if it identifies infringements of obligations established by Union legislation in the field of social, labour or environmental law or of international labour law provisions. Moreover, contracting entities will be obliged to reject tenders if they have established that they are abnormally low because of violations of Union legislation in the field of social, labour or environmental law.

*Social services:* The evaluation on the impact and effectiveness of EU public procurement legislation has shown that social, health and education services have specific characteristics which make them inappropriate for the application of the regular procedures for the award of public service contracts. Those services are typically provided within a specific context that varies widely between Member States due to different administrative, organisational and cultural circumstances. The services have, by their very nature, only a very limited cross-border dimension. Member States should therefore have large discretion to organise the choice of service providers. The proposal takes account of this by providing a specific regime for contracts for those services, with a higher threshold of EUR 1 000 000 and imposing only the respect of basic principles of transparency and equal treatment. A quantitative analysis of the values of contracts for the relevant services awarded to economic operators from abroad has shown that contracts below this value have typically no cross-border interest in the particular context of procurement in the utilities' sectors.

*Innovation:* Research and innovation play a central role in the Europe 2020 strategy for smart, sustainable and inclusive growth. Purchasers should be enabled to buy innovative products and services promoting future growth and improving efficiency and quality of public services. The proposal provides for this purpose the innovation partnership, a new special procedure for the development and subsequent purchase of new, innovative products, works and services, provided they can be delivered to agreed performance levels and costs. In addition, the proposal improves and simplifies the competitive dialogue procedure and facilitates cross-border joint procurement which is an important instrument for innovative purchasing.

### *3) Better access to the market for SMEs and Start-ups*

Small and medium-sized enterprises (SMEs) have a huge potential for job creation, growth and innovation. Easy access to procurement markets can help them unlock this potential while allowing contracting entities to broaden their supplier base, with positive effects of higher

competition for public contracts. In order to make public contracts as accessible as possible to SMEs, the European Commission published in 2008 the “European Code of Best Practices facilitating access by SMEs to public procurement contracts”<sup>11</sup>. The proposal builds on this work and provides concrete measures to remove barriers for market access by SMEs.

*Simplification of information obligations:* It is therefore foreseen that contracting entities may apply the selection criteria provided for in the proposed Directive on public procurement and that, where they do, they are then obliged to apply the provisions concerning notably the ceiling to requirements on minimum turnover as well as the provisions on in particular self-certification.

*Better access to framework agreements:* Under the current Directives, there is no limitation to the duration of framework agreements concluded in the utilities sectors. This can lead to market foreclosure. The proposal limits the duration to four years (except in duly justified circumstances), improving access to business opportunities and enhancing competition, also to the benefit of SMEs.

*Direct payment of subcontractors:* In addition, Member State can provide that subcontractors may request for direct payment by the contracting entity of supplies, works and services provided to the main contractor in the context of the contract performance. This offers subcontractors which are often SMEs an efficient way of protecting their interest in being paid.

#### 4) Sound procedures

The financial interests at stake and the interaction between the public and the private sector make procurement a risk area for unsound business practices such as conflict of interest, favouritism and corruption. The proposal improves the existing safeguards against such risks and provides for additional protection.

*Conflicts of interest:* The proposal contains a specific provision on conflicts of interest covering actual, potential or perceived conflict of interest situations affecting staff members of the contracting authority or of procurement service providers intervening in the procedure and members of the contracting authority's management who may influence the outcome of a procurement procedure even if they are not formally involved in it. Given the differences in the decision-making processes of respectively contracting authorities and undertakings, it is appropriate to limit such provisions to procurement carried out by the former.

*Illicit conduct:* The proposal contains a specific provision against illicit behaviour by candidates and tenderers, such as attempts to improperly influence the decision-making process or entering into agreements with other participants to manipulate the outcome of the procedure have to be excluded from the procedure. Such illicit activities violate basic principles of European Union law and can result in serious distortions of competition.

*Unfair advantages:* Market consultations are a useful instrument for contracting entities to obtain information on the structure, capability and capacity of a market while at the same time informing market actors on purchasers' procurement projects and requirements. However, preliminary contacts with market participants must not result in unfair advantages and distortions of competitions. The proposal contains therefore a specific provision on safeguards

---

<sup>11</sup> European Commission Staff Working Document SEC(2008) 2193.

against undue preference in favour of participants who have advised the contracting entity or have been involved in the preparation of the procedure.

## 5) Governance

*National oversight bodies:* The evaluation has shown that not all Member States are consistently and systematically monitoring the implementation and functioning of the procurement rules. This compromises the efficient and uniform application of European Union law. The proposal provides therefore that Member States designate a single national authority in charge of monitoring, implementation and control of procurement law. Only a single body with overarching tasks will ensure an overview of main implementation difficulties and will be able to suggest appropriate remedies to more structural problems. It will be in the position to provide immediate feedback on the functioning of the policy and the potential weaknesses in national legislation and practice, thus contributing to the quick identification of solutions and the improvement of the procurement procedures.

*Knowledge centres:* In many cases, contracting entities do not have the internal expertise to deal with complex procurement projects. Appropriate and independent professional support by administrative structures could considerably improve procurement outcomes by expanding the knowledge base and the professionalism of public procurers and delivering assistance to businesses, notably SMEs. The proposal obliges therefore Member States to provide support structures offering legal and economic advice, guidance, training and assistance in preparing and conducting procurement procedures. Support structures or mechanisms exist already at national level, although organised in very different manners and covering different areas of interest for contracting authorities and contracting entities. Member states will therefore be able to use those mechanisms, build on their expertise and promote their services as an appropriate and modern tool capable to provide appropriate support to contracting authorities, contracting entities and economic operators. To reinforce the fight against corruption and favouritism, contracting authorities will be obliged to transmit the text of concluded contracts to the oversight body, which will thus be able to scrutinize these contracts for suspicious patterns, and give access to these documents to interested persons to the extent that legitimate public or private interests are not jeopardized. Because of the evident problems of protecting legitimate commercial interests and avoid distortion of competition, this obligation should not be extended to undertakings (public or private) operating in these sectors. Furthermore, the creation of disproportionate administrative burden must be avoided; the obligation to transmit the full text of concluded contracts should therefore remain limited to relatively high value contracts. The thresholds proposed would strike the right balance between increasing administrative burden and ensuring greater transparency: with a threshold of 1 000 000 EUR for supplies and services, and of 10 000 000 EUR, this obligation would apply to 10 - 20 % of all procurement published in the Official Journal.

It is not foreseen that requirements concerning oversight bodies and knowledge centres will generate overall an additional financial burden for Member States. If some costs are expected to re-organise or fine tune the activities of existing mechanisms and structures, they will be neutralised by a reduction of litigation costs (both for contracting entities and business), costs related to delays in the attribution of contracts, due to misapplication of public procurement rules or to the bad preparation of the procurement procedures, as well as costs related to the fact that advice to contracting entities is currently provided in a fragmented and inefficient manner.

*Administrative cooperation:* The proposal provides also for effective cooperation allowing national oversight bodies to share information and best practices and to cooperate through the Internal Market Information System (IMI).

Proposal for a

**DIRECTIVE OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL**

**on procurement by entities operating in the water, energy, transport and postal services sectors**

(Text with EEA relevance)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 53(1) and Article 62 and Article 114 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national Parliaments<sup>12</sup>,

Having regard to the opinion of the European Economic and Social Committee<sup>13</sup>,

Having regard to the opinion of the Committee of the Regions<sup>14</sup>,

Acting in accordance with the ordinary legislative procedure,

Whereas:

- (1) In the light of the results of the Evaluation on the Impact and Effectiveness of EU Public Procurement Legislation<sup>15</sup> it appears appropriate to maintain rules on procurement by entities operating in the water, energy, transport and postal services sectors, since national authorities continue to be able to influence the behaviour of those entities, including participation in their capital and representation in the entities' administrative, managerial or supervisory bodies. Another reason to continue to regulate procurement in those sectors is the closed nature of the markets in which they operate, due to the existence of special or exclusive rights granted by the Member States concerning the supply to, provision or operation of networks for providing the service concerned.
- (2) In order to guarantee the opening up to competition of procurement by entities operating in the water, energy, transport and postal services sectors, provisions should be drawn up coordinating procurement procedures in respect of contracts above a

<sup>12</sup> OJ C

<sup>13</sup> OJ C

<sup>14</sup> OJ C

<sup>15</sup> SEC(2011) 853 Final of 27.6.2011

certain value. Such coordination is needed to ensure the effect of the principles of the Treaty on the Functioning of the European Union and in particular the free movement of goods, the freedom of establishment and the freedom to provide services as well as the principles deriving therefrom, such as equal treatment, non-discrimination, mutual recognition, proportionality and transparency. In view of the nature of the sectors affected by such coordination, the latter should, while safeguarding the application of those principles, establish a framework for sound commercial practice and should allow maximum flexibility.

- (3) For procurement the value of which is lower than the thresholds triggering the application of the provisions of Union coordination, it is advisable to recall the case-law developed by the Court of Justice according to which the rules and principles of the Treaty apply.
- (4) Public procurement plays a key role in the Europe 2020 strategy<sup>16</sup> as one of the market-based instruments to be used to achieve a smart, sustainable and inclusive growth while ensuring the most efficient use of public funds. For that purpose, the current public procurement rules adopted pursuant to Directive 2004/17/EC of the European Parliament and of the Council of 31 March 2004 coordinating the procurement procedures of entities operating in the water, energy, transport and postal services sectors<sup>17</sup> and Directive 2004/18/EC of the European Parliament and of the Council of 31 March 2004 on the coordination of procedures for the award of public works contracts, public supply contracts and public service contracts<sup>18</sup> have to be revised and modernised in order to increase the efficiency of public spending, facilitating in particular the participation of small and medium-sized enterprises in public procurement and to enable procurers to make better use of public procurement in support of common societal goals. There is also a need to clarify basic notions and concepts to ensure better legal certainty and to incorporate certain aspects of related well-established case-law of the Court of Justice of the European Union.
- (5) Under Article 11 of the Treaty on the Functioning of the European Union, environmental protection requirements must be integrated into the definition and implementation of the Union policies and activities, in particular with a view to promoting sustainable development. This Directive clarifies how the contracting entities may contribute to the protection of the environment and the promotion of sustainable development, whilst ensuring that they can obtain the best value for money for their contracts.
- (6) It is appropriate that the notion of procurement or the definition of what constitutes a single procurement are as close as possible to those applied pursuant to Directive [...] of the European Parliament and of the Council of [...] on public procurement<sup>19</sup>, having due regard for the specificities of the sectors covered by this Directive. The concept of single procurement encompasses all supplies, works and services needed to carry out a particular project, for instance a works project or an entirety of works, supplies and/or services. Indications for the existence of one single project can for instance consist in overall prior planning and conception by the contracting entity, the fact that the

<sup>16</sup> COM(2010) 2020 final, 3.3-2010.

<sup>17</sup> OJ L 134, 30.4.2004, p. 1.

<sup>18</sup> OJ L 134, 30.4.2004, p. 114.

<sup>19</sup> See p. [ ] of this Official Journal.

different elements purchased fulfil a single economic and technical function or that they are otherwise logically interlinked and carried out in a narrow time frame.

- (7) To ensure a real opening up of the market and a fair balance in the application of procurement rules in the water, energy, transport and postal services sectors it is necessary for the entities covered to be identified on a basis other than their legal status. It should be ensured, therefore, that the equal treatment of contracting entities operating in the public sector and those operating in the private sector is not prejudiced. It is also necessary to ensure, in keeping with Article 345 of the Treaty on the Functioning of the European Union, that the rules governing the system of property ownership in Member States are not prejudiced.
- (8) The notion of special or exclusive rights is central to the definition of the scope of this Directive, since entities which are neither contracting authorities nor public undertakings within the meaning of this Directive are subject to its provisions only to the extent that they exercise one of the activities covered on the basis of such rights. It is therefore appropriate to clarify that rights which have been granted by means of a procedure based on objective criteria, notably pursuant to Union legislation, and for which adequate publicity has been ensured do not constitute special or exclusive rights for the purposes of this Directive. This legislation should include Directive 98/30/EC of the European Parliament and of the Council of 22 June 1998 concerning common rules for the internal market in natural gas<sup>20</sup>, Directive 96/92/EC of the European Parliament and of the Council of 19 December 1996 concerning common rules for the internal market in electricity<sup>21</sup>, Directive 97/67/EC of the European Parliament and of the Council of 15 December 1997 on common rules for the development of the internal market of Community postal services and the improvement of quality of service<sup>22</sup>, Directive 94/22/EC of the European Parliament and of the Council of 20 May 1994 on the conditions for granting and using authorisations for the prospection, exploration and production of hydrocarbons<sup>23</sup> and Regulation (EC) No 1370/2007 of the European Parliament and of the Council of 23 October 2007 on public passenger transport services by rail and by road and repealing Council Regulations (EEC) Nos 1191/69 and 1107/70<sup>24</sup>.
- (9) Contracting entities that operate in the drinking water sector may also deal with other activities relating to water, such as projects in the field of hydraulic engineering, irrigation, land drainage or the disposal and treatment of sewage. In such case, contracting entities should be able to apply the procurement procedures provided for in this Directive in respect of all their activities relating to water, whichever part of the "water cycle" is concerned. However, procurement rules of the type proposed for supplies of goods are inappropriate for purchases of water, given the need to procure water from sources near the area in which it will be used.
- (10) It is appropriate to exclude procurement made for the purpose of exploring for oil and gas as that sector has consistently been found to be subject to such competitive

---

<sup>20</sup> OJ L 204, 21.7.1998, p. 1

<sup>21</sup> OJ L 27, 30.1.1997, p. 20.

<sup>22</sup> OJ L 15, 21.1.1998, p. 14.

<sup>23</sup> OJ L 164, 30.6.1994, p. 3.

<sup>24</sup> OJ L 315, 3.12.2007, p. 1.

pressure that the procurement discipline brought about by the EU procurement rules is no longer needed.

- (11) Contracts may be awarded for the purpose of meeting the requirements of several activities, possibly subject to different legal regimes. It should be clarified that the legal regime applicable to a single contract intended to cover several activities should be subject to the rules applicable to the activity for which it is principally intended. Determination of the activity for which the contract is principally intended may be based on an analysis of the requirements which the specific contract must meet, carried out by the contracting entity for the purposes of estimating the contract value and drawing up the procurement documents. In certain cases, such as the purchase of a single piece of equipment for the pursuit of activities for which information allowing an estimation of the respective rates of use would be unavailable, it might be objectively impossible to determine for which activity the contract is principally intended. The rules applicable to such cases should be indicated.
- (12) Even if they do not necessarily lead to corrupt conduct, actual, potential or perceived conflicts of interest have a high potential to improperly influence public procurement decisions with the effect of distorting competition and jeopardising equal treatment of tenderers. Effective mechanisms should therefore be set up to prevent, identify and remedy conflicts of interest. Given the differences in the decision-making processes of respectively contracting authorities and undertakings, it is appropriate to limit such provisions to procurement carried out by the former.
- (13) Illicit conduct by participants in a procurement procedure, such as attempts to unduly influence the decision-making process or to enter into agreements with other candidates to manipulate the outcome of the procedure can result in violations of the basic principles of Union law and in serious distortions of competition. Economic operators should therefore be required to submit a declaration on honour that they do not engage in such illicit activities and be excluded if this declaration proves to be false.
- (14) Council Decision 94/800/EC of 22 December 1994 concerning the conclusion on behalf of the European Community, as regards matters within its competence, of the Agreements reached in the Uruguay Round multilateral negotiations (1986 to 1994)<sup>25</sup>, approved in particular the World Trade Organisation Agreement on Government Procurement, hereinafter referred to as the "Agreement". The aim of the Agreement is to establish a multilateral framework of balanced rights and obligations relating to public contracts with a view to achieving the liberalisation and expansion of world trade. For contracts covered by the Agreement, as well as by other relevant international agreements by which the Union is bound, contracting entities fulfil the obligations under those agreements by applying this Directive to economic operators of third countries that are signatories to the agreements.
- (15) The Agreement applies to contracts above certain thresholds, set in the Agreement and expressed as special drawing rights. The thresholds laid down by this Directive should be aligned to ensure that they correspond to the euro equivalents of the thresholds of the Agreement. Provision should also be made for periodic reviews of the thresholds

---

<sup>25</sup> OJ L 336, 23.12.1994, p. 1.

expressed in euros so as to adjust them, by way of a purely mathematical operation, to possible variations in the value of the euro in relation to the special drawing right. To avoid a multiplication of thresholds it is furthermore appropriate, without prejudice to the international commitments of the Union, to continue to apply the same thresholds to all contracting entities, regardless of the sector in which they operate.

- (16) The results of the Evaluation demonstrated that the exclusion of certain services from the full application of this directive should be reviewed. As a result, the full application of the Directive is extended to a number of services (such as hotel and legal services, which both showed a particularly high percentage of cross-border trade).
- (17) Other categories of services continue by their very nature to have a limited cross-border dimension, namely what are known as services to the person such as certain social, health and educational services. Those services are provided within a particular context that varies widely amongst Member States, due to different cultural traditions. A specific regime should therefore be established for contracts for those services, with a higher threshold of EUR 1 000 000. In the particular context of procurement in those sectors, services to the person with values below this threshold will typically not be of interest to providers from other Member States unless there are concrete indications to the contrary, such as Union financing for transborder projects. Contracts for services to the person above this threshold should be subject to Union-wide transparency. Given the importance of the cultural context and the sensitivity of those services, Member States should be given wide discretion to organise the choice of the service providers in the way they consider most appropriate. The rules of this directive take account of that imperative, imposing only observance of basic principles of transparency and equal treatment and making sure that contracting entities are able to apply specific quality criteria for the choice of service providers, such as the criteria set out in the voluntary European Quality Framework for Social Services of the European Union's Social Protection Committee<sup>26</sup>. Member States and/or contracting entities remain free to provide those services themselves or to organise social services in a way that does not entail the conclusion of public contracts, for example through the mere financing of such services or by granting licences or authorisations to all economic operators meeting the conditions established beforehand by the contracting entity, without any limits or quotas, provided such a system ensures sufficient advertising and complies with the principles of transparency and non-discrimination.
- (18) Being addressed to Member States, this directive does not apply to procurement carried out by international organisations on their own behalf and for their own account. There is, however, a need to clarify to what extent this directive should be applied to procurement governed by specific international rules.
- (19) There is considerable legal uncertainty as to how far cooperation between public authorities should be covered by public procurement rules. The relevant case-law of the Court of Justice of the European Union is interpreted divergently between Member States and even between contracting authorities. As this jurisprudence would be equally applicable to public authorities when operating in the sectors covered by this

---

<sup>26</sup> SPC/2010/10/8 Final of 6.10.2010.

directive, it is appropriate to ensure that the same rules apply in both this directive and Directive [.../.../EU][on public procurement].

- (20) It is appropriate to exclude certain service, supply and works contracts awarded to an affiliated undertaking having as its principal activity the provision of such services, supply or works to the group of which it is part, rather than offering them on the market. It is also appropriate to exclude certain service, supply and works contracts awarded by a contracting entity to a joint venture which is formed by a number of contracting entities for the purpose of carrying out activities covered by this Directive and of which that entity is part. However, it is appropriate to ensure that this exclusion does not give rise to distortions of competition to the benefit of the undertakings or joint ventures that are affiliated with the contracting entities; it is appropriate to provide a suitable set of rules, in particular as regards the maximum limits within which the undertakings may obtain a part of their turnover from the market and above which they would lose the possibility of being awarded contracts without calls for competition, the composition of joint ventures and the stability of links between those joint ventures and the contracting entities of which they are composed.
- (21) It is also appropriate to clarify the relations between the provisions on cooperation between public authorities and the provisions on the award of contracts to affiliated undertakings or in the context of joint ventures.
- (22) This Directive should apply neither to contracts intended to permit the performance of an activity referred to in Articles 5 to 11 nor to design contests organised for the pursuit of such an activity if, in the Member State in which this activity is carried out, it is directly exposed to competition on markets to which access is not limited. It is therefore appropriate to maintain the procedure, applicable to all sectors covered by this Directive that will enable the effects of current or future opening up to competition to be taken into account. Such a procedure should provide legal certainty for the entities concerned, as well as an appropriate decision-making process, ensuring, within short time limits, uniform application of Union law in this area.
- (23) Direct exposure to competition should be assessed on the basis of objective criteria, taking account of the specific characteristics of the sector concerned. This assessment is, however, limited by the applicable short deadlines and by having to be based on the information available to the Commission – either from already available sources or from the information obtained in the context of the application pursuant to Article 28 - which can not be supplemented by more time consuming methods, including notably public inquiries of economic operators concerned. The assessment of direct exposure to competition that can be carried out in the context of this directive is consequently without prejudice to the full-fledged application of competition law.
- (24) The implementation and application of appropriate Union legislation opening a given sector, or a part of it, will be considered to provide sufficient grounds for assuming that there is free access to the market in question. Such appropriate legislation should be identified in an annex which can be updated by the Commission. It is appropriate that this annex should currently refer to Directive 2009/73/EC of the European Parliament and of the Council of 13 July 2009 concerning common rules for the

internal market in natural gas and repealing Directive 2003/55/EC<sup>27</sup>, Directive 2009/72/EC of the European Parliament and of the Council of 13 July 2009 concerning common rules for the internal market in electricity and repealing Directive 2003/54/EC<sup>28</sup> and Directive 94/22/EC.

- (25) Research and innovation, including eco-innovation and social innovation, are among the main drivers of future growth and have been put at the centre of the Europe 2020 strategy for smart, sustainable and inclusive growth. Contracting entities should make the best strategic use of public procurement to spur innovation. Buying innovative goods and services plays a key role in improving the efficiency and quality of public services while addressing major societal challenges. It contributes to achieving best value for money as well as wider economic, environmental and societal benefits in terms of generating new ideas, translating them into innovative products and services and thus promoting sustainable economic growth. This directive should contribute to facilitating procurement of innovation and help Member States in achieving the Innovation Union targets. A specific procurement procedure should therefore be provided for which allows contracting entities to establish a long-term innovation partnership for the development and subsequent purchase of a new, innovative product, service or works provided it can be delivered to agreed performance levels and costs. The partnership should be structured in such a way that it can provide the necessary “market-pull” incentivising the development of an innovative solution without foreclosing the market.
- (26) In view of the detrimental effects on competition, negotiated procedures without a call for competition should only be used in very exceptional circumstances. This exception should be limited to cases where publication is either not possible, for reasons of force majeure in line with the standing case-law of the Court of Justice of the European Union, or where it is clear from the outset that publication would not trigger more competition, not least because there is objectively only one economic operator that can perform the contract. Only situations of objective exclusivity can justify the use of the negotiated procedure without a call for competition, where the situation of exclusivity has not been created by the contracting entity itself with a view to the future procurement procedure, and where there are no adequate substitutes, the availability of which should be assessed thoroughly.
- (27) Electronic means of information and communication can greatly simplify the publication of contracts and increase the efficiency and transparency of procurement processes. They should become the standard means of communication and information exchange in procurement procedures. The use of electronic means also leads to time savings. As a result, provision should be made for reducing the minimum periods where electronic means are used, subject, however, to the condition that they are compatible with the specific mode of transmission envisaged at Union level. Moreover, electronic means of information and communication including adequate functionalities can enable contracting authorities to prevent, detect and correct errors that occur during procurement procedures.

---

<sup>27</sup> OJ L 211, 14.8.2009, p. 94

<sup>28</sup> OJ L 211, 14.8.2009, p. 55

- (28) There is a strong trend emerging across Union public procurement markets towards the aggregation of demand by public purchasers, with a view to obtaining economies of scale, including lower prices and transaction costs, and to improving and professionalising procurement management. This can be achieved by concentrating purchases either by the number of contracting entities involved or by volume and value over time. However, the aggregation and centralisation of purchases should be carefully monitored in order to avoid excessive concentration of purchasing power and collusion, and to preserve transparency and competition, as well as market access opportunities for small and medium-sized enterprises.
- (29) The instrument of framework agreements can be an efficient procurement technique throughout Europe; however, there is a need to enhance competition by improving transparency of and access to procurement carried out by means of framework agreements. It is therefore appropriate to revise the provisions applicable to those agreements, notably by providing for mini-competitions for the award of specific contracts based on the agreement and by limiting the duration of framework agreements.
- (30) In view of the experience acquired, there is also a need to adjust the rules governing dynamic purchasing systems to enable contracting entities to take full advantage of the possibilities afforded by this instrument. The systems need to be simplified, in particular by operating them in the form of a restricted procedure, hence eliminating the need for indicative tenders, which have been identified as one of the major burdens associated with those systems. Thus any economic operator who submits a request to participate and meets the selection criteria should be allowed to take part in procurement procedures carried out through the dynamic purchasing system. This purchasing technique allows the contracting entity to have a particularly broad range of tenders and hence to ensure optimum use of funds through broad competition.
- (31) In addition, new electronic purchasing techniques are constantly being developed, such as electronic catalogues. They help to increase competition and streamline public purchasing, particularly in terms of savings in time and money. Certain rules should however be laid down to ensure that such use complies with the rules of this Directive and the principles of equal treatment, non-discrimination and transparency. In particular where competition has been reopened under a framework agreement or where a dynamic purchasing system is being used and where sufficient guarantees are offered in respect of ensuring traceability, equal treatment and predictability, contracting entities should be allowed to generate tenders in relation to specific purchases on the basis of previously transmitted electronic catalogues. In line with the requirements of the rules for electronic means of communication, contracting entities should avoid unjustified obstacles to economic operators' access to procurement procedures in which tenders are to be presented in the form of electronic catalogues and which guarantee compliance with the general principles of non-discrimination and equal treatment.
- (32) Centralised purchasing techniques are increasingly used in most Member States. Central purchasing bodies are responsible for making acquisitions or awarding contracts/framework agreements for other contracting authorities or for contracting entities. In view of the large volumes purchased, such techniques help increase competition and professionalise public purchasing. Provision should therefore be made for a Union definition of central purchasing bodies dedicated to contracting entities,

without preventing the continuation of less institutionalised and systematic common purchasing or the established practice of having recourse to service providers that prepare and manage procurement procedures on behalf and for the account of a contracting entity. Rules should also be laid down for allocating responsibility for the observance of the obligations pursuant to this Directive, also in the case of remedies, among the central purchasing body and the contracting entities procuring from or through the central purchasing body. Where the latter has sole responsibility for the conduct of the procurement procedures, it should also be solely and directly responsible for the legality of the procedures. Where a contracting entity conducts certain parts of the procedure, for instance the reopening of competition under a framework agreement or the award of individual contracts based on a dynamic purchasing system, it should continue to be responsible for the stages it conducts.

- (33) Electronic means of communication are particularly well suited to support centralised purchasing practices and tools because of the possibility they offer to re-use and automatically process data and to minimise information and transaction costs. The use of such electronic means of communication should therefore, as a first step, be rendered compulsory for central purchasing bodies, while also facilitating converging practices across the Union. This should be followed by a general obligation to use electronic means of communication in all procurement procedures after a transition period of two years.
- (34) Joint awarding of contracts by contracting entities from different Member States currently encounters specific legal difficulties, with special reference to conflicts of national laws. Despite the fact that Directive 2004/17/EC implicitly allowed for cross-border joint public procurement, in practice several national legal systems have explicitly or implicitly rendered cross-border joint procurement legally uncertain or impossible. Contracting entities from different Member States may be interested in cooperating and in jointly awarding contracts in order to derive maximum benefit from the potential of the internal market in terms of economies of scale and risk-benefit sharing, not least for innovative projects involving a greater amount of risk than reasonably bearable by a single contracting entity. Therefore new rules on cross-border joint procurement designating the applicable law should be established in order to facilitate cooperation between contracting entities across the Single Market. In addition, contracting entities from different Member States may set up joint legal bodies established under national or Union law. Specific rules should be established for such form of joint procurement.
- (35) The technical specifications drawn up by purchasers need to allow public procurement to be opened up to competition. To that end, it should be possible to submit tenders that reflect the diversity of technical solutions so as to obtain a sufficient level of competition. Consequently, technical specifications should be drafted in such a way to avoid artificially narrowing down competition through requirements that favour a specific economic operator by mirroring key characteristics of the supplies, services or works habitually offered by that economic operator. Drawing up the technical specifications in terms of functional and performance requirements generally allows this objective to be achieved in the best way possible and favours innovation. Where reference is made to a European standard or, in the absence thereof, to a national standard, tenders based on other equivalent arrangements which meet the requirements of the contracting entities and are equivalent in terms of safety must be considered by the contracting entities. To demonstrate equivalence, tenderers can be required to

provide third-party verified evidence; however, other appropriate means of proof such as a technical dossier of the manufacturer should also be allowed where the economic operator concerned has no access to such certificates or test reports, or no possibility of obtaining them within the relevant time limits.

- (36) Contracting entities that wish to purchase works, supplies or services with specific environmental, social or other characteristics should be able to refer to particular labels, such as the European Eco-label, (multi-) national eco-labels or any other label provided that the requirements for the label are linked to the subject-matter of the contract, such as the description of the product and its presentation, including packaging requirements. It is furthermore essential that those requirements are drawn up and adopted on the basis of objectively verifiable criteria, using a procedure in which stakeholders, such as government bodies, consumers, manufacturers, distributors and environmental organisations can participate, and that the label is accessible and available to all interested parties.
- (37) For all procurement intended for use by persons, whether general public or staff of the contracting entity, it is necessary that contracting entities lay down technical specifications so as to take into account accessibility criteria for people with disabilities or design for all users except in duly justified cases.
- (38) In order to encourage the involvement of small and medium-sized enterprises (SMEs) in the procurement market, it should be provided explicitly that contracts may be divided into lots, whether homogenous or heterogeneous. Where contracts are divided into lots, contracting entities may, for instance in order to preserve competition or to ensure security of supply, limit the number of lots for which an economic operator may tender; they may also limit the number of lots that may be awarded to any one tenderer.
- (39) Insofar as compatible with the need to ensure the objective of sound commercial practice while allowing for maximum flexibility, it is appropriate to provide for the application of Directive [2004/18/EC] on public procurement in respect of requirements concerning economic and financial capacity and documentary evidence. It is therefore foreseen that contracting entities may apply the selection criteria provided for in Directive [2004/18/EC] and that, where they do, they are then obliged to apply the provisions concerning notably the ceiling to requirements on minimum turnover as well as on self-certification.
- (40) Public contracts should not be awarded to economic operators that have participated in a criminal organisation or have been found guilty of corruption, fraud to the detriment of the Union's financial interests or money laundering. Non-payment of taxes or social security contributions should also be sanctioned by mandatory exclusion at the level of the Union. Given that contracting entities, which are not contracting authorities, might not have access to indisputable proof on the matter, it is appropriate to leave the choice of whether or not to apply the exclusion criteria listed in Directive [2004/18] to such contracting entities. The obligation to apply Article 55(1) and (2) of Directive [2004/18] should therefore be limited to contracting entities that are contracting authorities. Furthermore, contracting entities should be given the possibility to exclude candidates or tenderers for violations of environmental or social obligations, including rules on accessibility for disabled persons or other forms of grave professional misconduct, such as violations of competition rules or of intellectual property rights.

- (41) Where contracting entities are obliged or choose to apply the just mentioned exclusion criteria, they should apply Directive [2004/18] concerning the possibility that economic operators adopt compliance measures aimed at remedying the consequences of any criminal offences or misconduct and at effectively preventing further occurrences of the misbehaviour.
- (42) Contracting entities may require that environmental management measures or schemes are to be applied during the performance of a contract. Environmental management schemes, whether or not they are registered under Union instruments such as Regulation (EC) No 1221/2009 of the European Parliament and of the Council of 25 November 2009 on the voluntary participation by organisations in a Community eco-management and audit scheme (EMAS)<sup>29</sup>, can demonstrate that the economic operator has the technical capability to perform the contract. A description of the measures implemented by the economic operator to ensure the same level of environmental protection should be accepted as an alternative to environmental management registration schemes as a form of evidence, where the economic operator concerned has no access to such environmental management registration schemes or no possibility of obtaining them within the relevant time limits.
- (43) Contracts should be awarded on the basis of objective criteria that ensure compliance with the principles of transparency, non-discrimination and equal treatment. Those criteria should guarantee that tenders are assessed in conditions of effective competition, also where contracting entities require high-quality works, supplies and services that are optimally suited to their needs. As a result, contracting entities should be allowed to adopt as award criteria either "the most economically advantageous tender" or "the lowest cost", taking into account that in the latter case they are free to set adequate quality standards by using technical specifications or contract performance conditions.
- (44) Where contracting entities choose to award a contract to the most economically advantageous tender, they must determine the award criteria on the basis of which they will assess tenders in order to identify which one offers the best value for money. The determination of those criteria depends on the subject-matter of the contract, since they must allow the level of performance offered by each tender to be assessed in the light of the subject-matter of the contract, as defined in the technical specifications, and the value for money of each tender to be measured. Furthermore, the chosen award criteria should not confer an unrestricted freedom of choice on the contracting entity and they should ensure the possibility of effective competition and be accompanied by requirements that allow the information provided by the tenderers to be effectively verified.
- (45) It is of utmost importance to fully exploit the potential of public procurement to achieve the objectives of the Europe 2020 Strategy for sustainable growth. In view of the important differences between individual sectors and markets, it would however not be appropriate to set general mandatory requirements for environmental, social and innovation procurement. The Union legislature has already set mandatory procurement requirements for obtaining specific goals in the sectors of road transport vehicles (Directive 2009/33/EC of the European Parliament and the Council of 23 April 2009

---

<sup>29</sup> OJ L 342, 22.12.2009, p. 1.

on the promotion of clean and energy-efficient road transport vehicles<sup>30</sup>) and office equipment (Regulation (EC) No 106/2008 of the European Parliament and the Council of 15 January 2008 on a Community energy-efficiency labelling programme for office equipment<sup>31</sup>). In addition, the definition of common methodologies for life cycle costing has significantly advanced. It therefore appears appropriate to continue on that path, leaving it to sector-specific legislation to set mandatory objectives and targets in function of the particular policies and conditions prevailing in the relevant sector and to promote the development and use of European approaches to life-cycle costing as a further underpinning for the use of public procurement in support of sustainable growth.

- (46) Those sector-specific measures must be complemented by an adaptation of the public procurement Directives empowering contracting entities to pursue the objectives of the Europe 2020 Strategy in their purchasing strategies. It should hence be made clear that contracting entities can determine the most economically advantageous tender and the lowest cost using a life-cycle costing approach, provided that the methodology to be used is established in an objective and non-discriminatory manner and accessible to all interested parties. The notion of life-cycle costing includes all costs over the life-cycle of a works, supplies or services, both their internal costs (such as development, production, use, maintenance and end-of-life disposal costs) and their external costs, provided they can be monetised and monitored. Common methodologies should be developed at the level of the Union for the calculation of life-cycle costs for specific categories of supplies or services; whenever such a methodology is developed its use should be made compulsory.
- (47) Furthermore, in technical specifications and in award criteria, contracting entities should be allowed to refer to a specific production process, a specific mode of provision of services, or a specific process for any other stage of the life-cycle of a product or service, provided that they are linked to the subject-matter of the contract. In order to better integrate social considerations in public procurement, procurers may also be allowed to include, in the award criterion of the most economically advantageous tender characteristics related to the working conditions of the persons directly participating in the process of production or provision in question. Those characteristics may only concern the protection of health of the staff involved in the production process or the favouring of social integration of disadvantaged persons or members of vulnerable groups amongst the persons assigned to performing the contract, including accessibility for persons with disabilities. Any award criteria which include those characteristics should in any event remain limited to characteristics that have immediate consequences on staff members in their working environment. They should be applied in accordance with Directive 96/71/EC of the European Parliament and of the Council of 16 December 1996 concerning the posting of workers in the framework of the provision of services<sup>32</sup> and in a way that does not discriminate directly or indirectly against economic operators from other Member States or from third countries parties to the Agreement or to Free Trade Agreements to which the Union is party.

---

<sup>30</sup> OJ L 120, 15.5.2009, p. 5.

<sup>31</sup> OJ L 39, 13.2.2008, p. 1.

<sup>32</sup> OJ L 18, 21.1.1997, p.1.

- (48) For service contracts and for contracts involving the design of works, contracting entities should also be allowed to use as an award criterion the organisation qualification and experience of the staff assigned to performing the contract in question, as this may affect the quality of the contract performance and, as a result, the economic value of the tender.
- (49) Tenders that appear abnormally low in relation to the works, supplies or services might be based on technically, economically or legally unsound assumptions or practices. In order to prevent possible disadvantages during contract performance, contracting entities should be obliged to ask for an explanation of the price charged where a tender significantly undercuts the prices demanded by other tenderers. Where the tenderer cannot provide a sufficient explanation, the contracting entity should be entitled to reject the tender. Rejection should be mandatory in cases where the contracting entity has established that the abnormally low price results from non-compliance with mandatory Union legislation in the fields of social, labour or environmental law or international labour law provisions.
- (50) Contract performance conditions are compatible with this Directive provided that they are not directly or indirectly discriminatory, are linked to the subject-matter of the contract and are indicated in the notice used to make the call for competition, or in the procurement documents. They may, in particular, be intended to favour on-site vocational training, the employment of people experiencing particular difficulty in achieving integration, the fight against unemployment, protection of the environment or animal welfare. For example, mention may be made of the requirements applicable during the performance of the contract to recruit long-term job-seekers or to implement training measures for the unemployed or for young persons, to comply in substance with fundamental International Labour Organisation (ILO) Conventions, even where such Conventions have not been implemented in national law, and to recruit more disadvantaged persons than are required under national legislation.
- (51) The laws, regulations and collective agreements, at both national and Union level, that are in force in the areas of employment conditions and safety at work apply during the performance of a contract, provided that such rules, and their application, comply with Union law. In cross-border situations where workers from one Member State provide services in another Member State for the purpose of performing a contract, Directive 96/71/EC of the European Parliament and of the Council of 16 December 1996 concerning the posting of workers in the framework of the provision of services<sup>33</sup> lays down the minimum conditions that must be observed by the host country in respect of such posted workers. Where national law contains provisions to this effect, non-compliance with those obligations may be considered to be grave misconduct on the part of the economic operator concerned, liable to lead to the exclusion of that economic operator from the procedure for the award of a public contract.
- (52) Council Regulation (EEC, Euratom) No 1182/71 of 3 June 1971 determining the rules applicable to periods, dates and time limits<sup>34</sup> should apply to the calculation of the time limits contained in this Directive.

---

<sup>33</sup> OJ L 18, 21.1.1997, p. 1.

<sup>34</sup> OJ L 124, 8.6.1971, p. 1.

- (53) It is necessary to clarify the conditions under which modifications of a contract during its performance require a new procurement procedure, taking into account the relevant case-law of the Court of Justice of the European Union. A new procurement procedure is required in case of material changes to the initial contract, in particular to the scope and content of the mutual rights and obligations of the parties, including the distribution of intellectual property rights. Such changes demonstrate the parties' intention to renegotiate essential terms or conditions of that contract. This is the case in particular if the amended conditions would have had an influence on the outcome of the procedure, had they been part of the initial procedure.
- (54) Contracting entities can be faced with external circumstances that they could not foresee when they awarded the contract. In this case, a certain degree of flexibility is needed to adapt the contract to those circumstances without a new procurement procedure. The notion of unforeseeable circumstances refers to circumstances that could not have been predicted despite reasonably diligent preparation of the initial award by the contracting entity, taking into account its available means, the nature and characteristics of the specific project, good practice in the field in question and the need to ensure an appropriate relationship between the resources spent in preparing the award and its foreseeable value. However, this cannot apply in cases where a modification results in an alteration of the nature of the overall procurement, for instance by replacing the works, supplies or services to be procured by something different or by fundamentally changing the type of procurement since, in such a situation, a hypothetical influence on the outcome may be assumed.
- (55) In line with the principles of equal treatment and transparency, the successful tenderer should not be replaced by another economic operator without reopening the contract to competition. However, the successful tenderer performing the contract may undergo certain structural changes during the performance of the contract, such as purely internal reorganisations, mergers and acquisitions or insolvency. Such structural changes should not automatically require new procurement procedures for all contracts performed by that undertaking.
- (56) Contracting entities should, in the individual contracts themselves, have the possibility to provide for modifications by way of review clauses, but such clauses should not give them unlimited discretion. This directive should therefore set out to what extent modifications may be provided for in the initial contract.
- (57) The evaluation has shown that Member States do not consistently and systematically monitor the implementation and the functioning of public procurement rules. This has a negative impact on the correct implementation of provisions stemming from those directives, which is a major source of cost and uncertainty. Several Member States have appointed a national central body dealing with public procurement issues, but the functions that such bodies are empowered with vary considerably across Member States. Clearer, more consistent and authoritative monitoring and control mechanisms would increase knowledge of the functioning of procurement rules, legal certainty for businesses and contracting entities, and contribute to establish a level playing field. Such mechanisms could serve as tools for detection and early resolution of problems, especially with regard to projects cofunded by the Union, and for the identification of structural deficiencies. There is in particular a strong need to coordinate those mechanisms to ensure consistent application, controls and monitoring of public

procurement policy, as well as systematic assessment of the outcomes of procurement policy across the Union.

- (58) Member States should designate a single national authority in charge of monitoring, implementation and control of public procurement. Such a central body should have first hand and timely information particularly in relation to different problems affecting the implementation of public procurement law. It should be able to provide immediate feedback on the functioning of the policy, the potential weaknesses in national legislation and practice and contribute to the quick identification of solutions. In view of efficiently fighting corruption and fraud, this central body and the general public should also have the possibility to inspect the texts of concluded contracts. High-value contracts should hence be transmitted to the oversight body with a possibility of interested persons to have access to these documents, to the extent that legitimate public or private interests are not jeopardized.
- (59) Not all contracting entities may have the internal expertise to deal with economically or technically complex contracts. Against this background, appropriate professional support would be an effective complement to monitoring and control activities. On the one hand, this objective can be achieved by knowledge sharing tools (knowledge centres) offering technical assistance to contracting entities; on the other hand, business, not least SMEs, should benefit from administrative assistance, in particular when participating in procurement procedures on a cross-border basis.
- (60) Monitoring, oversight and support structures or mechanisms exist already at national level and can of course be used to ensure monitoring, implementation and control of public procurement and to provide the required support to contracting entities and economic operators.
- (61) Effective cooperation is necessary to ensure consistent advice and practice within each Member State and across the Union. Bodies designated for monitoring, implementation, control and technical assistance should be able to share information and cooperate; in the same context, the national authority designated by each Member State should act as the preferred contact point with the Commission services for the purpose of collecting data, exchanging information and monitoring the implementation of Union public procurement law.
- (62) In order to adapt to rapid technical, economic and regulatory developments, the power to adopt acts in accordance with Article 290 of the Treaty on the Functioning of the European Union should be delegated to the Commission in respect of a number of non-essential elements of this Directive. In fact, due to the need to comply with international agreements, the Commission should be empowered to modify the technical procedures for the calculation methods concerning thresholds as well as to periodically revise the thresholds themselves; references to the CPV nomenclature may undergo regulatory changes at EU level and it is necessary to reflect those changes into the text of this Directive; the technical details and characteristics of the devices for electronic receipt should be kept up to date with technological developments and administrative needs; it is also necessary to empower the Commission to make mandatory certain technical standards for electronic communication to ensure the interoperability of technical formats, processes and messaging in procurement procedures conducted using electronic means of communication taking into account technological developments and administrative

needs; the Commission should also be empowered to adapt the mandatory content of the information to be included in notices to reflect administrative needs and regulatory changes at both national and EU level; the list of legislative acts of the Union establishing common methodologies for the calculation of life-cycle costs, referred to in article 77(3); the list of International Social and Environmental Conventions referred to in Articles 70 And 79 and the list of Union legislation referred to in article 27(3) whose implementation creates a presumption of free access to a given market as well as Annex II, referred to in Article 4(4), setting out a list of legislative acts to be taken into account when assessing the existence of special or exclusive rights should be quickly adapted to incorporate the measures adopted on a sectoral basis. In order to satisfy this need, the Commission should be empowered to keep the lists up-to date.

- (63) It is of particular importance that the Commission carry out appropriate consultations during its preparatory work, including at expert level. When preparing and drawing up delegated acts, the Commission should ensure simultaneous, timely and appropriate transmission of relevant documents to the European Parliament and the Council.
- (64) In order to ensure uniform conditions for the implementation of this Directive, as for the procedure for sending and publishing data referred to in Annex IX and the procedures for drawing up and transmitting notices, the standard forms for the publication of notices as well as of process and messaging standards and the common template to be used by the oversight bodies for drawing up the implementation and statistical report, implementing powers should be conferred on the Commission. Those powers should be exercised in accordance with Regulation (EU) No. 182/2011 of the European Parliament and of the Council of 16 February 2011 laying down the rules and general principles concerning mechanisms for control by the Member States of the Commission's exercise of implementing powers<sup>35</sup>. The advisory procedure should be used for the adoption of those implementing acts, which do not have any impact either from the financial point of views or on the nature and scope of obligations stemming from this Directive. On the contrary, those acts are characterised by a mere administrative purpose and serve to facilitate the application of the rules set by this Directive. Furthermore, decisions to establish whether a given activity is directly exposed to competition on markets to which access is free should be adopted under conditions ensuring uniform conditions for implementing that provision. Implementing powers should therefore be conferred on the Commission also in respect of the detailed provisions for the implementation of the procedure, provided for under Article 28, for establishing whether Article 27 is applicable as well as the Decisions themselves. Those powers should be exercised in accordance with Regulation (EU) 182/2011 of the European Parliament and of the Council of 16 February 2011 laying down the rules and general principles concerning mechanisms for control by the Member States of the Commission's exercise of implementing powers<sup>36</sup>. The advisory procedure should be used for the adoption of those implementing acts.
- (65) Since the objective of this Directive, namely the coordination of laws, regulations and administrative provisions of the Member States applying to certain public procurement procedures, cannot be sufficiently achieved by the Member States and can therefore be better achieved at Union level, the Union may adopt measures, in accordance with the

---

<sup>35</sup> OJ L 55, 28.2.2011, p. 13.

<sup>36</sup> OJ L 55, 28.2.2011, p. 13.

principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with the principle of proportionality, as set out in that Article, this Directive does not go beyond what is necessary in order to achieve that objective.

(66) Directive 2004/17/EC should therefore be repealed.

(67) In accordance with the Joint Political Declaration of Member States and the Commission on explanatory documents of [date], Member States have undertaken to accompany, in justified cases, the notification of their transposition measures with one or more documents explaining the relationship between the components of a directive and the corresponding parts of national transposition instruments. With regard to this Directive, the legislator considers the transmission of such documents to be justified,

HAVE ADOPTED THIS DIRECTIVE:

## **TITLE I: SCOPE, DEFINITIONS AND GENERAL PRINCIPLES**

### **CHAPTER I Subject-matter and definitions**

Article 1: Subject-matter and scope

Article 2: Definitions

Article 3: Mixed procurement and procurement covering several activities

### **CHAPTER II: Personal scope: definition of the activities and entities covered**

#### SECTION 1: ENTITIES

Article 4: Contracting entities

#### SECTION 2: ACTIVITIES

Article 5: Gas and heat

Article 6: Electricity

Article 7: Water

Article 8: Transport services

Article 9: Ports and airports

Article 10: Postal services

Article 11: Extraction of oil and gas and exploration for, or extraction of, coal or other solid fuels

### **CHAPTER III: Material scope**

#### SECTION 1: THRESHOLDS

Article 12: Thresholds

Article 13: Methods for calculating the estimated value of procurement

Article 14: Revision of the thresholds

## SECTION 2: EXCLUDED CONTRACTS AND DESIGN CONTESTS

Subsection 1: Exclusions applicable to all contracting entities and special exclusions for the water and energy sectors

Article 15: Contracts awarded for purposes of resale or lease to third parties

Article 16: Contracts and design contests awarded or organised for purposes other than the pursuit of a covered activity or for the pursuit of such an activity in a third country

Article 17: Defence and security

Article 18: Contracts awarded and design contest organised pursuant to international rules

Article 19: Specific exclusions for service contracts

Article 20: Contracts awarded by certain contracting entities for the purchase of water and for the supply of energy or of fuels for the production of energy

Subsection 2: Special relations (Controlled entities, cooperation, affiliated undertakings and joint ventures)

Article 21: Relations between public authorities

Article 22: Contracts awarded to an affiliated undertaking

Article 23: Contracts awarded to a joint venture or to a contracting entity forming part of a joint venture

Article 24: Notification of information

Subsection 3 : Specific situations

Article 25: Research and development services

Article 26: Contracts subject to special arrangements

Subsection 4: Activities directly exposed to competition and procedural provisions relating thereto

Article 27: Activities directly exposed to competition

Article 28: Procedure for establishing whether Article 27 is applicable

## **CHAPTER IV: General principles**

Article 29: Principles of procurement

Article 30: Economic operators

Article 31: Reserved contracts

Article 32: Confidentiality

Article 33: Rules applicable to communication

Article 34: General obligation to use electronic means of communication

Article 35: Nomenclatures

Article 36: Conflicts of interests

Article 37: Illicit conduct

## **TITLE II: RULES APPLICABLE TO CONTRACTS**

### **CHAPTER I: Procedures**

Article 38: Conditions relating to the Government Procurement Agreement and other international agreements

Article 39: Choice of procedures

Article 40: Open procedure

Article 41: Restricted procedure

Article 42: Negotiated procedure with prior call for competition

Article 43: Innovation Partnership

Article 44: Use of the negotiated procedure without prior call for competition

Article 103: Review

Article 104: Entry into force

Article 105: Addressees

### **ANNEXES**

ANNEX I: List of activities as set out in point 8(a) of Article 2

ANNEX II: List of Union legislation referred to in Article 4(2)

ANNEX III: List of Union legislation referred to in Article 27(3)

ANNEX IV: Requirements relating to devices for the electronic receipt of tenders, requests to participate, applications for qualification as well as plans and projects in contests

Annex V: List of International Agreements referred to in Articles 38

ANNEX VI Part A: Information to be included in the periodic indicative notice (as referred to in Article 61)

ANNEX VI Part B: Information to be included in notices of publication of a periodic indicative notice on a buyer profile not used as a means of calling for competition (as referred to in Article 61(1))

ANNEX VII: Information to be included in the specifications in electronic auctions (Article 47(4))

ANNEX VIII: Definition of certain technical specifications

ANNEX IX: Features concerning publication

ANNEX X: Information to be included in the notice on the existence of a qualification system (as referred to in point (b) of Article 39(2) and in Article 62)

ANNEX XI: Information to be included in contract notices (as referred to in Article 63)

ANNEX XII: Information to be included in the contract award notice (as referred to in Article 64)

ANNEX XIII: Contents of the invitations to submit a tender, to negotiate or to confirm interest provided for under Article 68

ANNEX XIV: List of International Social and Environmental Conventions referred to in Articles 70 And 79

ANNEX XV: List of EU legislation referred to in Article 77(3)

ANNEX XVI: Information to be included in notices of modifications of a contract during its term (as referred to in Article 82(6))

ANNEX XVII: Services referred to in article 84

ANNEX XVIII: Information to be included in notices concerning contracts for social and other specific services (as referred to in Article 85)

ANNEX XIX: Information to be included in the design contest notice (as referred to in Article 89(1))

ANNEX XX: Information to be included in the results of design contest notices (as referred to in Article 89(1))

ANNEX XXI: Correlation table

# TITLE I

## SCOPE, DEFINITIONS AND GENERAL PRINCIPLES

### CHAPTER I

#### *Subject-matter and definitions*

##### *Article 1*

###### *Subject-matter and scope*

1. This Directive establishes rules on the procedures for procurement by contracting entities as defined in Article 4 with respect to contracts as well as design contests, whose value is estimated to be not less than the thresholds defined in Article 12.
2. Procurement within the meaning of this Directive is the purchase or other forms of acquisition of works, supplies or services by one or more contracting entities from economic operators chosen by those contracting entities, provided that the works, supplies or services are intended for the pursuit of one of the activities referred to in Articles 5 to 11.

An entirety of works, supplies and/or services, even if purchased through different contracts, constitutes a single procurement within the meaning of this Directive, if the contracts are part of one single project.

##### *Article 2*

###### *Definitions*

For the purposes of this Directive, the following definitions shall apply:

- (1) "contracting authorities" means State, regional or local authorities, bodies governed by public law, associations formed by one or more such authorities or one or more such bodies governed by public law;
- (2) "regional authorities" include all authorities of the administrative units falling under NUTS 1 and 2, as referred to by Regulation (EC) No. 1059/2003 of the European Parliament and of the Council<sup>37</sup>;
- (3) "local authorities" include all authorities of the administrative units falling under NUTS 3 and smaller administrative units, as referred to by Regulation (EC) No. 1059/2003;
- (4) a "body governed by public law" means any body that has all of the following characteristics:

---

<sup>37</sup> OJ L 154, 21.6.2003, p. 1

- (a) It is established for or has the specific purpose of meeting needs in the general interest, not having an industrial or commercial character; for that purpose, a body which operates in normal market conditions, aims to make a profit, and bears the losses resulting from the exercise of its activity does not have the purpose of meeting needs in the general interest, not having an industrial or commercial character;
  - (b) it has legal personality;
  - (c) it is financed, for the most part, by the State, regional or local authorities, or other bodies governed by public law; or subject to management supervision by those bodies; or has an administrative, managerial or supervisory board, more than half of whose members are appointed by the State, regional or local authorities, or by other bodies governed by public law;
- (5) a "public undertaking" means any undertaking over which the contracting authorities may exercise directly or indirectly a dominant influence by virtue of their ownership of it, their financial participation therein, or the rules which govern it;
- (6) "special or exclusive rights" mean rights granted by a competent authority of a Member State by way of any legislative, regulatory or administrative provision the effect of which is to limit the exercise of activities defined in Articles 5 to 11 to one or more entities, and which substantially affects the ability of other entities to carry out such activity;
- (7) "supply, works and service contracts" means contracts for pecuniary interest concluded in writing between one or more of the contracting entities referred to in Article 4(3), and one or more economic operators and having as their object the execution of works, the supply of products or the provision of services within the meaning of this Directive;
- (8) "works contracts" means contracts having as their object one of the following:
- (a) the execution, or both the design and execution, of works related to one of the activities within the meaning of Annex I;
  - (b) the execution, or both the design and execution, of a work;
  - (c) the realisation by whatever means of a work corresponding to the requirements specified by the contracting entity exercising a decisive influence on the type or design of the work;
- (9) "a work" means the outcome of building or civil engineering works taken as a whole which is sufficient in itself to fulfil an economic or technical function;
- (10) "supply contracts" means contracts having as their object the purchase, lease, rental or hire-purchase, with or without an option to buy, of products. A supply contract may include, as an incidental matter, siting and installation operations;
- (11) "service contracts" means contracts having as their object the provision of services other than those referred to in paragraph 8;

- (12) "economic operator" means any natural or legal person, or a contracting entity, or a group of such persons and/or entities which offers the execution of works and/or a work, the supply of products or the provision of services on the market;
- (13) "tenderer" means an economic operator that has submitted a tender;
- (14) "candidate" means an economic operator that has sought an invitation or has been invited to take part in a restricted or negotiated procedure or in an innovation partnership;
- (15) 'procurement documents' means all documents produced or referred to by the contracting entity to describe or determine elements of the procurement or the procedure, including the contract notice, the prior information notice or the notices on the existence of a qualification system where they are used as a means of calling for competition, the technical specifications, proposed conditions of contract, formats for the presentation of documents by candidates and tenderers, information on generally applicable obligations and any additional documents;
- (16) "centralised purchasing activities" means activities conducted on a permanent basis, in one of the following forms:
- (a) the acquisition of supplies and/or services intended for contracting entities,
  - (b) the award of contracts or the conclusion of framework agreements for works, supplies or services intended for contracting entities;
- (17) "ancillary purchasing activities" means activities consisting in the provision of support to purchasing activities, in particular in the following forms:
- (a) technical infrastructure enabling contracting entities to award public contracts or to conclude framework agreements for works, supplies or services;
  - (b) advice on the conduct or design of procurement procedures;
  - (c) preparation and management of procurement procedures on behalf and for the account of the contracting entity concerned;
- (18) "central purchasing body" means a contracting authority within the meaning of point 1 of Article 2 or a contracting authority within the meaning of point 1 of Article 2 of Directive [2004/18/EC] providing centralised purchasing activities and, possibly, ancillary purchasing activities;
- (19) "procurement service provider" means a public or private body, which offers ancillary purchasing activities on the market;
- (20) "written" or "in writing" means any expression consisting of words or figures which can be read, reproduced and subsequently communicated, including information transmitted and stored by electronic means;
- (21) "electronic means" means electronic equipment for the processing (including digital compression) and storage of data which is transmitted, conveyed and received by wire, by radio, by optical means or by other electromagnetic means;

- (22) 'life cycle' means all consecutive and/or interlinked stages, including production, transport, use and maintenance, throughout the existence of a product or a works or the provision of a service, from raw material acquisition or generation of resources to disposal, clearance and finalisation;
- (23) "Design contests" means those procedures which enable the contracting entity to acquire, mainly in the fields of town and country planning, architecture, engineering or data processing, a plan or design selected by a jury after being put out to competition with or without the award of prizes.

### *Article 3*

#### *Mixed procurement and procurement covering several activities*

1. Contracts which have as their subject two or more types of procurement (works, services or supplies) shall be awarded in accordance with the provisions applicable to the type of procurement that characterises the main subject of the contract in question.

In the case of mixed contracts consisting of services within the meaning of Chapter I of Title III and other services or of services and supplies, the main object shall be determined by a comparison of the values of the respective services or supplies.

In the case of mixed contracts containing elements of supply, works and service contracts and of concessions, the part of the contract which constitutes a contract covered by this Directive shall be awarded in accordance with the provisions of this Directive.

Where the different parts of the contract in question are objectively not separable, the application of this Directive shall be determined on the basis of the main subject of that contract.

2. A contract which is intended to cover several activities shall be subject to the rules applicable to the activity for which it is principally intended.

However, the choice between awarding a single contract and awarding a number of separate contracts shall not be made with the objective of excluding it from the scope of this Directive or, where applicable, [2004/18/EC].

3. If one of the activities for which the contract is intended is subject to this Directive and the other to the abovementioned [2004/18] and if it is objectively impossible to determine for which activity the contract is principally intended, the contract shall be awarded in accordance with the abovementioned Directive [2004/18].
4. If one of the activities for which the contract is intended is subject to this Directive and the other is not subject to either this Directive or to Directive [2004/18] or Directive 2009/81/EC of the European Parliament and of the Council<sup>38</sup>, and if it is objectively impossible to determine for which activity the contract is principally intended, the contract shall be awarded in accordance with this Directive.

---

<sup>38</sup> OJ L 217, 20.8.2009, p. 76.

## **CHAPTER II**

### **Personal scope: *definition of the activities and entities covered***

#### **SECTION 1**

#### **ENTITIES**

##### *Article 4*

##### *Contracting entities*

1. A dominant influence within the meaning of point 5 of Article 2 on the part of the contracting authorities shall be presumed in any of the following cases in which those authorities, directly or indirectly:
  - (a) hold the majority of the undertaking's subscribed capital;
  - (b) control the majority of the votes attaching to shares issued by the undertaking,
  - (c) can appoint more than half of the undertaking's administrative, management or supervisory body.
  
2. Rights which have been granted by means of a procedure in which adequate publicity has been ensured and where the granting of those rights was based on objective criteria shall not constitute "special or exclusive rights" within the meaning of point 6 of Article 2.

This includes:

  - (a) procurement procedures with a prior call for competition in conformity with Directive [2004/18/EC], [Directive ... (concessions)] or this Directive;
  - (b) procedures pursuant to other legislative acts of the Union listed in Annex II, ensuring adequate prior transparency for granting authorisations on the basis of objective criteria.
  
3. This Directive shall apply to contracting entities:
  - (a) which are contracting authorities or public undertakings and which pursue one of the activities referred to in Articles 5 to 11;
  - (b) which, when they are not contracting authorities or public undertakings, have as one of their activities any of the activities referred to in Articles 5 to 11, or any combination thereof and operate on the basis of special or exclusive rights granted by a competent authority of a Member State.
  
4. The Commission shall be empowered to adopt delegated acts in accordance with Article 98 concerning the amendment/modification of the list of Union legislation set out in Annex II, when on the basis of the adoption of new legislation, repeal or modification of such legislation, such amendments prove necessary.

## SECTION 2 ACTIVITIES

### *Article 5 Gas and heat*

1. As far as gas and heat are concerned, this Directive shall apply to the following activities:
  - (a) the provision or operation of fixed networks intended to provide a service to the public in connection with the production, transport or distribution of gas or heat;
  - (b) the supply of gas or heat to such networks.
2. The supply of gas or heat to networks which provide a service to the public by a contracting entity other than a contracting authority shall not be considered a relevant activity within the meaning of paragraph 1 where all of the following conditions are met:
  - (a) the production of gas or heat by the entity concerned is the unavoidable consequence of carrying out an activity other than those referred to in paragraph 1 or in Articles 6 to 8;
  - (b) the supply to the public network is aimed only at the economic exploitation of such production and amounts to not more than 20 % of the entity's turnover on the basis of the average for the preceding three years, including the current year.

### *Article 6 Electricity*

1. As far as electricity is concerned, this Directive shall apply to the following activities:
  - (a) the provision or operation of fixed networks intended to provide a service to the public in connection with the production, transport or distribution of electricity;
  - (b) the supply of electricity to such networks.

For the purposes of this Directive, supply of electricity includes generation (production) and wholesale of electricity.

2. The supply of electricity to networks which provide a service to the public by a contracting entity other than a contracting authority shall not be considered a relevant activity within the meaning of paragraph 1 where all of the following conditions are met:

- (a) the production of electricity by the entity concerned takes place because its consumption is necessary for carrying out an activity other than those referred to in paragraph 1 or in Articles 5 and 7 to 8;
- (b) supply to the public network depends only on the entity's own consumption and has not exceeded 30% of the entity's total production of energy, on the basis of the average for the preceding three years, including the current year.

*Article 7*  
*Water*

1. This Directive shall apply to the following activities:
  - (a) the provision or operation of fixed networks intended to provide a service to the public in connection with the production, transport or distribution of drinking water;
  - (b) the supply of drinking water to such networks.
2. This Directive shall also apply to contracts or design contests awarded or organised by entities which pursue an activity referred to in paragraph 1 and which are connected with one of the following:
  - (a) hydraulic engineering projects, irrigation or land drainage, provided that the volume of water to be used for the supply of drinking water represents more than 20 % of the total volume of water made available by such projects or irrigation or drainage installations,
  - (b) the disposal or treatment of sewage.
3. The supply of drinking water to networks which provide a service to the public by a contracting entity other than a contracting authority shall not be considered a relevant activity within the meaning of paragraph 1 where all of the following conditions are met:
  - (a) the production of drinking water by the entity concerned takes place because its consumption is necessary for carrying out an activity other than those referred to in Articles 5 to 8;
  - (b) the supply to the public network depends only on the entity's own consumption and has not exceeded 30 % of the entity's total production of drinking water, on the basis of the average for the preceding three years, including the current year.

*Article 8*  
*Transport services*

This Directive shall apply to activities relating to the provision or operation of networks providing a service to the public in the field of transport by railway, automated systems, tramway, trolley bus, bus or cable.

As regards transport services, a network shall be considered to exist where the service is provided under operating conditions laid down by a competent authority of a Member State, such as conditions on the routes to be served, the capacity to be made available or the frequency of the service.

*Article 9*  
*Ports and airports*

This Directive shall apply to activities relating to the exploitation of a geographical area for the purpose of the provision of airports and maritime or inland ports or other terminal facilities to carriers by air, sea or inland waterway.

*Article 10*  
*Postal services*

1. This Directive shall apply to activities relating to the provision of:
  - (a) postal services;
  - (b) other services than postal services, on condition that such services are provided by an entity which also provides postal services within the meaning of point (b) of paragraph 2 and provided that the conditions set out in Article 27(1) are not satisfied in respect of the services falling within point (b) of paragraph 2.
2. For the purpose of this Directive and without prejudice to Directive 97/67/EC:
  - (a) "postal item": means an item addressed in the final form in which it is to be carried, irrespective of weight. In addition to items of correspondence, such items also include for instance books, catalogues, newspapers, periodicals and postal packages containing merchandise with or without commercial value, irrespective of weight;
  - (b) "postal services": means services consisting of the clearance, sorting, routing and delivery of postal items. This shall include both services falling within as well as services falling outside the scope of the universal service set up in conformity with Directive 97/67/EC;
  - (c) "other services than postal services": means services provided in the following areas:
    - (i) mail service management services (services both preceding and subsequent to despatch, including "mailroom management services");
    - (ii) added-value services linked to and provided entirely by electronic means (including the secure transmission of coded documents by electronic means, address management services and transmission of registered electronic mail);
    - (iii) services concerning postal items not included in point (a), such as direct mail bearing no address;

- (iv) financial services, as defined in the CPV under the reference numbers from 66100000-1 to 66720000-3 and in Article 19(c) and including in particular postal money orders and postal giro transfers;
- (v) philatelic services;
- (vi) logistics services (services combining physical delivery and/or warehousing with other non-postal functions).

#### *Article 11*

#### *Extraction of oil and gas and exploration for, or extraction of, coal or other solid fuels*

This Directive shall apply to activities relating to the exploitation of a geographical area for the purpose of:

- (a) extracting oil or gas;
- (b) exploring for or extracting coal or other solid fuels.

### **Chapter III: Material scope**

#### **SECTION 1 THRESHOLDS**

#### *Article 12 Thresholds*

Save where they are ruled out by the exclusions in Articles 15 to 20 or pursuant to Article 27, concerning the pursuit of the activity in question, this Directive shall apply to procurements with a value exclusive of value-added tax (VAT) estimated to be no less than the following thresholds:

- (a) EUR 400 000 for supply and service contracts as well as for design contests;
- (b) EUR 5 000 000 for works contracts;
- (c) EUR 1 000 000 for contracts for social and other specific services listed in Annex XVII.

#### *Article 13 Methods for calculating the estimated value of procurement*

1. The calculation of the estimated value of a procurement shall be based on the total amount payable, net of VAT, as estimated by the contracting entity, including any form of option and any renewals of the contract.

Where the contracting entity provides for prizes or payments to candidates or tenderers it shall take them into account when calculating the estimated value of the contract.

2. The choice of the method used to calculate the estimated value of a procurement shall not be made with the intention of excluding it from the scope of this Directive. A single procurement shall therefore not be subdivided with the effect of preventing it from falling within the scope of this Directive, unless justified by objective reasons.
3. This estimate shall be valid at the moment at which the call for competition is sent or, in cases where such notice is not foreseen, at the moment at which the contracting entity commences the contract procurement procedure, in particular by defining the essential characteristics of the intended procurement.
4. With regard to framework agreements and dynamic purchasing systems, the value to be taken into consideration shall be the maximum estimated value net of VAT of all the contracts envisaged for the total term of the agreement or system.
5. In the case of innovation partnerships, the value to be taken into consideration shall be the maximum estimated value net of VAT of the research and development activities to take place during the all stages of the envisaged partnership as well as of the supplies, services or works to be developed and procured at the end of the envisaged partnership.
6. For the purposes of Article 12, contracting entities shall include in the estimated value of a works contract both the cost of the works and the total estimated value of any supplies or services that are made available to the contractor by the contracting entities provided that they are necessary for the execution of the works.
7. Where a proposed work or purchase of services may result in contracts being awarded at the same time in the form of separate lots, account shall be taken of the total estimated value of all such lots.

Where the aggregate value of the lots is equal to or exceeds the threshold laid down in Article 12, this Directive shall apply to the awarding of each lot.

8. Where a proposal for the acquisition of similar supplies may result in contracts being awarded at the same time in the form of separate lots, account shall be taken of the total estimated value of all such lots when applying Article 12.

Where the aggregate value of the lots is equal to or exceeds the threshold laid down in Article 12, this Directive shall apply to the awarding of each lot.

9. Contracting entities may award contracts for individual lots without applying the procedures provided for under this Directive, provided that the estimated value net of VAT of the lot concerned is less than EUR 80 000 for supplies or services or EUR 1 million for works. However, the aggregate value of the lots thus awarded without applying this Directive shall not exceed 20 % of the aggregate value of all the lots into which the proposed work, the proposed acquisition of similar supplies or the proposed purchase of services has been divided.

10. In the case of supply or service contracts which are regular in nature or which are intended to be renewed within a given period, the calculation of the estimated contract value shall be based on the following:
  - (a) either the total actual value of the successive contracts of the same type awarded during the preceding 12 months or financial year adjusted, if possible, to take account of the changes in quantity or value which would occur in the course of the 12 months following the initial contract;
  - (b) or the total estimated value of the successive contracts awarded during the 12 months following the first delivery, or during the financial year where that is longer than 12 months.
11. With regard to supply contracts relating to the leasing, hire, rental or hire purchase of products, the value to be taken as a basis for calculating the estimated contract value shall be as follows:
  - (a) in the case of fixed-term contracts, if that term is less than or equal to 12 months, the total estimated value for the term of the contract or, where the term of the contract is greater than 12 months, the total value including the estimated residual value;
  - (b) in the case of contracts without a fixed term or the term of which cannot be defined, the monthly value multiplied by 48.
12. With regard to service contracts, the basis for calculating the estimated contract value shall, where appropriate, be the following:
  - (a) insurance services: the premium payable, and other forms of remuneration;
  - (b) banking and other financial services: the fees, commissions, interest and other forms of remuneration;
  - (c) design contracts: fees, commission payable and other forms of remuneration.
13. With regard to service contracts which do not indicate a total price, the basis for calculating the estimated contract value shall be the following:
  - (a) in the case of fixed-term contracts, where that term is less than or equal to 48 months: the total value for their full term;
  - (b) in the case of contracts without a fixed term or with a term greater than 48 months: the monthly value multiplied by 48.

*Article 14*  
*Revision of the thresholds*

1. Every two years from 30 June 2014, the Commission shall verify that the thresholds set out in points (a) and (b) of Article 12 correspond to the thresholds established in the Government Procurement Agreement, and shall, where necessary, revise them.

In accordance with the calculation method set out in the Government Procurement Agreement, the Commission shall calculate the value of those thresholds on the basis of the average daily value of the euro in terms of the special drawing rights (SDRs), over a period of 24 months terminating on the last day of August preceding the revision with effect from 1 January. The value of the thresholds thus revised shall, where necessary, be rounded down to the nearest thousand euros so as to ensure that the thresholds in force provided for by the Agreement, expressed in SDR, are observed.

2. Every two years from 1 January 2014, the Commission shall determine the values, in the national currencies of Member States not participating in Monetary Union, of the thresholds referred to in points (a) and (b) of Article 12, revised pursuant to paragraph 1 of this Article.

At the same time, the Commission shall determine the value, in the national currencies of the Member States which are not participating in monetary union, of the threshold referred to in point (c) of Article 12.

In accordance with the calculation method set out in the Government Procurement Agreement, the determination of such values shall be based on the average daily values of those currencies, corresponding to the applicable threshold expressed in euros over the 24 months terminating on the last day of August preceding the revision with effect from 1 January.

3. The revised thresholds referred to in paragraph 1 and their values in national currencies shall be published by the Commission in the *Official Journal of the European Union* at the beginning of the month of November following their revision.
4. The Commission shall be empowered to adopt delegated acts in accordance with Article 98 to adapt the methodology set out in the second subparagraph of paragraph 1 to any change in the methodology provided in the Government Procurement Agreement for the revision of the thresholds referred to in points (a) and (b) of Article 12 and for the determination of the thresholds in the national currencies of the Member States not participating in monetary union, as referred to in paragraph 2 of this Article.

It shall also be empowered to adopt delegated acts in accordance with Article 98 to revise the thresholds referred to in points (a) and (b) of Article 12 when necessary.

5. Where it is necessary to revise the thresholds referred to in points (a) and (b) of Article 12 and time constraints prevent the use of the procedure set in article 98 and therefore imperative grounds of urgency so require, the procedure provided for in Article 99 shall apply to delegated acts adopted pursuant to the second subparagraph of paragraph 4 of this Article.

## SECTION 2 EXCLUDED CONTRACTS AND DESIGN CONTESTS

### *Subsection 1*

#### *Exclusions applicable to all contracting entities and special exclusions for the water and energy sectors*

### *Article 15*

#### *Contracts awarded for purposes of resale or lease to third parties*

1. This Directive shall not apply to contracts awarded for purposes of resale or lease to third parties, provided that the contracting entity enjoys no special or exclusive right to sell or lease the subject of such contracts, and other entities are free to sell or lease it under the same conditions as the contracting entity.
2. The contracting entities shall notify the Commission or the national oversight body at their request of all the categories of products or activities which they regard as excluded under paragraph 1. The Commission may periodically publish in the *Official Journal of the European Union*, for information purposes, lists of the categories of products and activities which it considers to be covered by this exclusion. In so doing, the Commission shall respect any sensitive commercial aspects that the contracting entities may point out when forwarding information.

### *Article 16*

#### *Contracts and design contests awarded or organised for purposes other than the pursuit of a covered activity or for the pursuit of such an activity in a third country*

1. This Directive shall not apply to contracts which the contracting entities award for purposes other than the pursuit of their activities as described in Articles 5 to 11 or for the pursuit of such activities in a third country, in conditions not involving the physical use of a network or geographical area within the Union nor shall it apply to design contests organised for such purposes.
2. The contracting entities shall notify the Commission or the national oversight body at their request of any activities which they regard as excluded under paragraph 1. The Commission may periodically publish in the *Official Journal of the European Union* for information purposes, lists of the categories of activities which it considers to be covered by this exclusion. In so doing, the Commission shall respect any sensitive commercial aspects that the contracting entities may point out when forwarding this information.

### *Article 17*

#### *Defence and security*

1. In respect of contracts awarded and design contests organised in the fields of defence and security, this Directive shall not apply to:
  - (a) contracts to which Directive 2009/81/EC applies;

- (b) contracts to which Directive 2009/81/EC does not apply pursuant to Articles 8, 12 and 13 thereof.
2. This Directive shall not apply to contracts and design contests other than those mentioned in the first paragraph to the extent that the protection of the essential security interests of a Member State cannot be guaranteed in an procurement procedure as provided for in Article 39(1).

#### *Article 18*

##### *Contracts awarded and design contests organised pursuant to international rules*

This Directive shall not apply to contracts or design contests which the contracting entity is obliged to award or organise in accordance with procurement procedures different from those of this Directive established by any of the following:

- (a) an international agreement concluded in accordance with the Treaty between a Member State and one or more third countries and covering works, supplies or services intended for the joint implementation or exploitation of a project by the signatory States.;
- (b) an international agreement relating to the stationing of troops and concerning the undertakings of a Member State or a third country;
- (c) a particular procedure of an international organisation;
- (d) procurement rules provided by an international organisation or international financing institution for contracts or design contests fully financed by this organisation or institution; in the case of contracts or design contests co-financed to a considerable extent by an international organisation or international financing institution the parties shall agree on applicable procurement procedures, which shall be in conformity with the Treaty.

All agreements referred to in point (a) of the first subparagraph shall be communicated to the Commission, which may consult the Advisory Committee for Public Contracts referred to in Article 100.

#### *Article 19*

##### *Specific exclusions for service contracts*

This Directive shall not apply to service contracts for:

- (a) the acquisition or rental, by whatever financial means, of land, existing buildings or other immovable property or concerning rights thereon; however, financial service contracts concluded at the same time as, before or after the contract of acquisition or rental, in whatever form, shall be subject to this Directive;
- (b) arbitration and conciliation services;
- (c) financial services in connection with the issue, sale, purchase or transfer of securities or other financial instruments within the meaning of Directive 2004/39/EC of the

European Parliament and of the Council<sup>39</sup> and operations conducted with the European Financial Stability Facility;

- (d) employment contracts;
- (e) public passenger transport services by rail or metro;
- (f) contracts for broadcasting time that are awarded to broadcasters.

The broadcasting referred to in point (f) of the first paragraph shall include any transmission and distribution using any form of electronic network.

#### *Article 20*

*Contracts awarded by certain contracting entities for the purchase of water and for the supply of energy or of fuels for the production of energy*

This Directive shall not apply:

- (a) to contracts for the purchase of water if awarded by contracting entities engaged in one or both of the activities relating to drinking water referred to in Article 7(1).
- (b) to contracts awarded by contracting entities themselves being active in the energy sector by being engaged in an activity referred to in Article 5(1), Article 6(1) or Article 11 for the supply:
  - (i) of energy;
  - (ii) of fuels for the production of energy.

#### *Subsection 2*

*Special relations (Controlled entities, cooperation, affiliated undertakings and joint ventures)*

#### *Article 21*

*Relations between public authorities*

1. A contract awarded by a contracting authority to another legal person shall fall outside the scope of this Directive where the following cumulative conditions are fulfilled:
  - (a) the contracting authority exercises over the legal person concerned a control which is similar to that which it exercises over its own departments.
  - (b) at least 90 % of the activities of that legal person are carried out for the controlling contracting authority or for other legal persons controlled by that contracting authority;
  - (c) there is no private participation in the controlled legal person.

---

<sup>39</sup> OJ L 145, 30.04.2004, p. 1.

A contracting authority shall be deemed to exercise over a legal person a control similar to that which it exercises over its own departments within the meaning of point (a) of the first subparagraph where it exercises a decisive influence over both strategic objectives and significant decisions of the controlled legal person.

2. Paragraph 1 also applies where a controlled entity which is a contracting authority awards a contract to its controlling entity, or to another legal person controlled by the same contracting authority, provided that there is no private participation in the legal person being awarded the public contract.
3. A contracting authority, which does not exercise over a legal person control within the meaning of paragraph 1, may nevertheless award a contract without applying this Directive to a legal person which it controls jointly with other contracting authorities, where the following conditions are fulfilled:
  - (a) the contracting authorities exercise jointly over the legal person a control which is similar to that which they exercise over their own departments.
  - (b) at least 90 % of the activities of that legal person are carried out for the controlling contracting authorities or other legal persons controlled by the same contracting authorities;
  - (c) there is no private participation in the controlled legal person.

For the purposes of point (a) contracting authorities shall be deemed to jointly control a legal person where the following cumulative conditions are fulfilled:

- (a) the decision-making bodies of the controlled legal person are composed of representatives of all participating contracting authorities;
  - (b) those contracting authorities are able to jointly exert decisive influence over the strategic objectives and significant decisions of the controlled legal person;
  - (c) the controlled legal person does not pursue any interests which are distinct from that of the public authorities affiliated to it;
  - (d) the controlled legal person does not draw any gains other than the reimbursement of actual costs from the public contracts with the contracting authorities.
4. An agreement concluded between two or more contracting authorities shall not be deemed to be a “works, supply or service contract” within the meaning of point 7 of Article 2 of this Directive, where the following cumulative conditions are met:
  - (a) the agreement establishes a genuine co-operation between the participating contracting authorities aimed at carrying out jointly their public service tasks and involving mutual rights and obligations of the parties;
  - (b) the agreement is governed only by considerations relating to the public interest;

- (c) the participating contracting authorities do not perform on the open market more than 10 % in terms of turnover of the activities which are relevant in the context of the agreement;
  - (d) the agreement does not involve financial transfers between the participating contracting authorities, other than those corresponding to the reimbursement of actual costs of the works, services or supplies;
  - (e) there is no private participation in any of the contracting authorities involved.
5. The absence of private participation referred to in paragraphs 1 to 4 shall be verified at the time of the award of the contract or of the conclusion of the agreement.

The exclusions provided for in paragraphs 1 to 4 shall cease to apply from the moment any private participation takes place, with the effect that ongoing contracts need to be opened to competition through regular procurement procedures.

#### *Article 22*

##### *Contracts awarded to an affiliated undertaking*

1. For the purposes of this Article, "affiliated undertaking" means any undertaking the annual accounts of which are consolidated with those of the contracting entity in accordance with the requirements of the Seventh Council Directive 83/349/EEC<sup>40</sup>.
2. In the case of entities not subject to that Directive, "affiliated undertaking" shall mean any undertaking that:
  - (a) may be, directly or indirectly, subject to a dominant influence by the contracting entity within the meaning of point (5) of Article 2 and Article 4(1) of this Directive;
  - (b) may exercise a dominant influence over the contracting entity;
  - (c) in common with the contracting entity, is subject to the dominant influence of another undertaking by virtue of ownership, financial participation, or the rules which govern it.
3. Article 21 notwithstanding and provided that the conditions in paragraph 4 are met, this Directive shall not apply to contracts awarded:
  - (a) by a contracting entity to an affiliated undertaking, or
  - (b) by a joint venture, formed exclusively by a number of contracting entities for the purpose of carrying out activities within the meaning of Articles 5 to 11, to an undertaking which is affiliated with one of those contracting entities.
4. Paragraph 3 shall apply:

---

<sup>40</sup> OJ L 193, 18.7.1983, p. 1. Directive as last amended by Directive 2001/65/EC of the European Parliament and of the Council (OJ L 283, 27.10.2001, p. 28).

- (a) to service contracts provided that at least 80 % of the average total turnover of the affiliated undertaking with respect to services in general for the preceding three years derives from the provision of services to undertakings with which it is affiliated;
  - (b) to supply contracts provided that at least 80 % of the average total turnover of the affiliated undertaking with respect to supplies in general for the preceding three years derives from the provision of supplies to undertakings with which it is affiliated;
  - (c) to works contracts provided that at least 80 % of the average total turnover of the affiliated undertaking with respect to works in general for the preceding three years derives from the provision of works to undertakings with which it is affiliated.
5. When, because of the date on which an affiliated undertaking was created or commenced activities, the turnover is not available for the preceding three years, it will be sufficient for that undertaking to show that the turnover referred to in points (a), (b) or (c) of paragraph 4 is credible, particularly by means of business projections.

Where more than one undertaking affiliated with the contracting entity provides the same or similar services, supplies or works, the above percentages shall be calculated taking into account the total turnover deriving respectively from the provision of services, supplies or works by those affiliated undertakings.

#### *Article 23*

##### *Contracts awarded to a joint venture or to a contracting entity forming part of a joint venture*

Article 21 notwithstanding and provided that the joint venture has been set up in order to carry out the activity concerned over a period of at least three years and that the instrument setting up the joint venture stipulates that the contracting entities, which form it, will be part thereof for at least the same period, this Directive shall not apply to contracts awarded by any of the following:

- (a) by a joint venture, formed exclusively by a number of contracting entities for the purpose of carrying out activities within the meaning of Articles 5 to 11, to one of those contracting entities, or
- (b) by a contracting entity to such a joint venture of which it forms part.

#### *Article 24*

##### *Notification of information*

Contracting entities shall notify to the Commission or the national oversight body, at their request, the following information regarding the application of Article 22, paragraphs 2, 3 and Article 23:

- (a) the names of the undertakings or joint ventures concerned,

- (b) the nature and value of the contracts involved,
- (c) proof deemed necessary by the Commission or the national oversight body that the relationship between the undertaking or joint venture to which the contracts are awarded and the contracting entity complies with the requirements of Articles 22 or 23.

*Subsection 3  
Specific situations*

*Article 25  
Research and development services*

1. This Directive shall apply to service contracts for research and development services with CPV reference numbers 73000000-2 to 73436000-7, except 73200000-4, 73210000-7 or 73220000-0, provided that the following conditions are both fulfilled:
  - (a) the benefits accrue exclusively to the contracting entity for its use in the conduct of its own affairs,
  - (b) the service provided is wholly remunerated by the contracting entity.

This Directive shall not apply to service contracts for research and development services with CPV reference numbers 73000000-2 to 73436000-7, except 73200000-4, 73210000-7 or 73220000-0 where one of the conditions referred to in points (a) or (b) of the first subparagraph is not met.

2. The Commission shall be empowered to adopt delegated acts in accordance with Article 98 to amend the CPV reference numbers referred to in paragraph 1 to reflect changes in the CPV nomenclature provided that such amendments do not imply a modification of the scope of this Directive.

*Article 26  
Contracts subject to special arrangements*

1. Without prejudice to Article 27 the Republic of Austria and the Federal Republic of Germany shall ensure, by way of the conditions of authorisation or other appropriate measures, that any entity operating in the sectors mentioned in Decisions 2002/205/EC and 2004/73/EC:
  - (a) observes the principles of non-discrimination and competitive procurement in respect of the award of supplies, works and service contracts, in particular as regards the information which the entity makes available to economic operators concerning its procurement intentions;

- (b) communicates to the Commission, under the conditions defined in Commission Decision 93/327/EEC<sup>41</sup>, information relating to the contracts they award.
2. Without prejudice to Article 27, the United Kingdom shall ensure, by way of the conditions of authorisation or other appropriate measures, that any entity operating in the sectors mentioned in Decision 97/367/EEC applies points (a) and (b) of paragraph 1 in respect of contracts awarded for the pursuit of said activity in Northern Ireland.
  3. Paragraphs 1 and 2 shall not apply to contracts awarded for the purpose of exploring for oil or gas.

#### *Subsection 4*

#### *Activities directly exposed to competition and procedural provisions relating thereto*

#### *Article 27*

#### *Activities directly exposed to competition*

1. Contracts intended to enable an activity mentioned in Articles 5 to 11 to be carried out shall not be subject to this Directive if the Member State or the contracting entities having introduced the request pursuant to Article 28 can demonstrate that, in the Member State in which it is performed, the activity is directly exposed to competition on markets to which access is not restricted; nor shall design contests that are organised for the pursuit of such an activity in that geographic area be subject to this Directive. Such competition assessment, which will be made in the light of the information available to the Commission and for the purposes of this Directive, is without prejudice to the application of competition law.
2. For the purposes of paragraph 1, the question of whether an activity is directly exposed to competition shall be decided on the basis of criteria that are in conformity with the provisions on competition of the Treaty; those may include the characteristics of the goods or services concerned, the existence of alternative goods or services, the prices and the actual or potential presence of more than one supplier of the goods or provider of the services in question.

The geographical reference market, on the basis of which exposure to competition is assessed, shall consist of the area in which the undertakings concerned are involved in the supply and demand of products or services, in which the conditions of competition are sufficiently homogeneous and which can be distinguished from neighbouring areas because, in particular, conditions of competition are appreciably different in those areas. This assessment shall take account in particular of the nature and characteristics of the products or services concerned, of the existence of entry barriers or of consumer preferences, of appreciable differences of the undertakings'

---

<sup>41</sup> European Commission Decision of 13 May 1993 defining the conditions under which contracting entities exploiting geographical areas for the purpose of exploring for or extracting oil, gas, coal or other solid fuels must communicate to the European Commission information relating to the contracts they award, OJ L 129, 27.5.1993, p. 25.

market shares between the area concerned and neighbouring areas or of substantial price differences.

3. For the purposes of paragraph 1, access to a market shall be deemed not to be restricted if the Member State has implemented and applied the Union legislation listed in Annex III.

If free access to a given market cannot be presumed on the basis of the first subparagraph, it must be demonstrated that access to the market in question is free de facto and de jure.

#### *Article 28*

##### *Procedure for establishing whether Article 27 is applicable*

1. Where a Member State or, where the legislation of the Member State concerned provides for it, a contracting entity considers that, on the basis of the criteria set out in Article 27(2) and (3), a given activity is directly exposed to competition on markets to which access is not restricted, it may submit a request to establish that this Directive does not apply to the award of contracts or the organisation of desing contests for the pursuit of that activity.

Requests shall be accompanied by a reasoned and substantiated position adopted by an independent national authority that is competent in relation to the activity concerned. This position shall thoroughly analyse the conditions for the possible applicability of Article 27(1) to the activity concerned in accordance with its paragraphs 2 and 3.

The Member State or contracting entity concerned shall inform the Commission of all relevant facts, and in particular of any law, regulation, administrative provision or agreement concerning compliance with the conditions set out in Article 27(1).

2. Upon request submitted in accordance with paragraph 1 of this Article, the Commission may, by way of an implementing decision adopted within the periods set out in paragraph 4 of this Article, establish whether an activity referred to in Articles 5 to 11 is directly exposed to competition on the basis of the criteria set out in Article 27. Those implementing decisions shall be adopted in accordance with the advisory procedure referred to in Article 100(2) .

Contracts intended to enable the activity concerned to be carried out and design contests that are organised for the pursuit of such an activity shall cease to be subject to this Directive in any of the following cases:

- (a) The Commission has adopted the implementing decision referred to in the first subparagraph of this paragraph establishing the applicability of Article 27(1) within the period provided for in paragraph 3 of this Article;
  - (b) has not adopted the implementing decision referred to in the first subparagraph of this paragraph within the period provided for in paragraph 3 of this Article.
3. The implementing decisions referred to in paragraph 2 shall be adopted within the following periods:

- (a) 90 working days where free access to a given market is presumed on the basis of the first subparagraph of Article 27(3);
- (b) 130 working days in cases other than those referred to in point (a).

Those deadlines shall commence on the first working day following the date on which the Commission receives the request referred to in paragraph 1 or, where the information to be supplied with the request is incomplete, on the working day following the receipt of the complete information.

The periods set out in the first subparagraph may be extended by the Commission with the agreement of the Member State or contracting entity which has presented the request.

The Commission may require the Member State or the contracting entity concerned or the independent national authority referred to under paragraph 1 of this Article or any other competent national authority, including the oversight body referred to in Article 93, to provide all necessary information or to supplement or clarify information given within an appropriate time limit. In the event of late or incomplete answers, the periods set out in the first subparagraph shall be suspended for the period between the expiry of the time limit set in the request for information, and the receipt of the complete and correct information.

- 4. Where an activity in a given Member State is already the subject of a procedure under paragraphs 1, 2 and 3, further requests concerning the same activity in the same Member State before the expiry of the period opened in respect of the first request shall not be considered as new procedures and shall be treated in the context of the first request.
- 5. The Commission shall adopt an implementing act establishing detailed rules for the application of paragraphs 1 to 4. That implementing act shall include at least:
  - (a) The publication in the *Official Journal of the European Union*, for information, of the date on which the period set out in the first subparagraph of paragraph 3 begins and ends, including prolongations or suspensions of those periods, if any, as provided for in paragraph 3 of this Article;
  - (b) publication of the possible applicability of Article 27(1) in accordance with point b of the second subparagraph of paragraph 2 of this Article;
  - (c) implementing provisions concerning the form, content and other details of requests pursuant to paragraph 1 of this Article;
  - (d) rules concerning the periods set out in paragraph 3 of this Article.

Those implementing acts shall be adopted in accordance with the advisory procedure referred to in Article 100(2).

## **CHAPTER IV**

### ***General principles***

#### *Article 29*

##### *Principles of procurement*

Contracting entities shall treat economic operators equally and without discrimination and shall act in a transparent and proportionate way.

The design of the procurement shall not be made with the objective of excluding it from the scope of this Directive or of artificially narrowing competition.

#### *Article 30*

##### *Economic operators*

1. Economic operators that, under the law of the Member State in which they are established, are entitled to provide the relevant service, shall not be rejected solely on the ground that, under the law of the Member State in which the contract is awarded, they would be required to be either natural or legal persons.

However, in the case of service and works contracts as well as supply contracts covering in addition services or siting and installation operations, legal persons may be required to indicate, in the tender or the request to participate, the names and relevant professional qualifications of the staff responsible for the performance of the contract in question.

2. Groups of economic operators may submit tenders or put themselves forward as candidates. Contracting entities shall not establish specific conditions for participation of such groups in procurement procedures which are not imposed on individual candidates. In order to submit a tender or a request to participate, those groups shall not be required by the contracting entities to assume a specific legal form.

Contracting entities may establish specific conditions for the performance of the contract by a group, provided that those conditions are justified by objective reasons and proportionate. Those conditions may require a group to assume a specific legal form once it has been awarded the contract, to the extent that this change is necessary for the satisfactory performance of the contract.

#### *Article 31*

##### *Reserved contracts*

Member States may reserve the right to participate in procurement procedures to sheltered workshops and economic operators whose main aim is the social and professional integration of disabled and disadvantaged workers or provide for such contracts to be performed in the context of sheltered employment programmes, provided that more than 30% of the employees

of those workshops, economic operators or programmes are disabled or disadvantaged workers.

The call for competition shall make reference to this Article.

*Article 32*  
*Confidentiality*

1. Contracting entities may impose on economic operators requirements aimed at protecting the confidential nature of information which the contracting entities make available throughout the procurement procedure, including information made available in connection with the operation of a qualification system, whether or not this has been the subject of a notice on the existence of a qualification system used as a means of calling for competition.
2. Unless otherwise provided in this Directive or in the national law concerning access to information, and without prejudice to the obligations relating to the advertising of awarded contracts and to the information to candidates and tenderers set out in Articles 64 and 69 of this directive the contracting entity shall not disclose information forwarded to it by economic operators which they have designated as confidential, including, but not limited to, technical or trade secrets and the confidential aspects of tenders.

*Article 33*  
*Rules applicable to communication*

1. Except where use of electronic means is mandatory pursuant to Articles 46, 47, 48, 49(4), 65(2) or 67 of this Directive contracting entities may choose between the following means of communication for all communication and information exchange:
  - (a) electronic means in accordance with paragraphs 3, 4 and 5;
  - (b) post or fax;
  - (c) telephone in the cases and circumstances referred to in paragraph 6;
  - (d) a combination of those means.

Member States may make mandatory the use of electronic means of communication in other situations than those provided for in Articles 46, 47, 48, 49(4), 65(2) or 67 of this Directive.

2. The means of communication chosen shall be generally available and not restrict economic operators' access to the procurement procedure.

In all communication, exchange and storage of information, contracting entities shall ensure that the integrity of data and the confidentiality of tenders and requests to participate are preserved. They shall examine the content of tenders and requests to participate only after the time limit set for submitting them has expired.

3. The tools to be used for communicating by electronic means, as well as their technical characteristics, shall be non-discriminatory, generally available and interoperable with the information and communication technology products in general use and shall not restrict economic operators' access to the procurement procedure. The technical details and characteristics of the devices for the electronic receipts to be deemed in compliance with the first subparagraph of this paragraph are set out in Annex IV.

The Commission shall be empowered to adopt delegated acts in accordance with Article 98 to amend the technical details and characteristics set out in Annex IV due to technical developments or administrative reasons.

To ensure the interoperability of technical formats as well as of process and messaging standards, especially in a cross-border context, the Commission shall be empowered to adopt delegated acts in accordance with Article 98 to establish the mandatory use of certain technical standards, at least with regard to the use of e-submission, electronic catalogues and means for electronic authentication.

4. Contracting entities may, where necessary, require the use of tools which are not generally available, provided that they offer alternative means of access.

Contracting entities shall be deemed to offer suitable alternative means of access in any of the following situations:

- (a) they offer unrestricted and full direct access by electronic means to those tools from the date of publication of the notice in accordance with Annex IX or from the date on which the invitation to confirm interest is sent. The text of the notice or the invitation to confirm interest shall specify the internet address at which those tools are accessible;
  - (b) they ensure that tenderers established in other Member States than the contracting entity's may access the procurement procedure through the use of provisional tokens made available online at no extra cost;
  - (c) they support an alternative channel for electronic submission of tenders.
5. The following rules shall apply to devices for the electronic transmission and receipt of tenders and for the electronic receipt of requests to participate:
    - (a) information on specifications for the electronic submission of tenders and requests to participate, including encryption and time-stamping, shall be available to interested parties;
    - (b) the devices, methods for authentication and electronic signatures shall comply with the requirements of Annex IV;
    - (c) contracting entities shall specify the level of security required for the electronic means of communication to be used in the various stages of the specific procurement procedure; the level shall be proportionate to the risks attached;

- (d) where advanced Electronic Signatures as defined by Directive 1999/93/EC<sup>42</sup> are required, contracting entities shall, as long as the signature is valid, accept signatures supported by a qualified electronic certificate referred to in the Trusted List as provided for in the Commission Decision 2009/767/EC<sup>43</sup>, created with or without a secure signature creation device, subject to compliance with the following conditions:
  - (i) they must establish the required advanced signature format on the basis of formats established in Commission Decision 2011/130/EU<sup>44</sup> and shall put in place necessary measures to be able to process those formats technically;
  - (ii) where a tender is signed with the support of a qualified certificate that is included in the Trusted list, they must not apply additional requirements that may hinder the use of those signatures by tenderers.

6. The following rules shall apply to the transmission of requests to participate:

- (a) requests to participate in procedures for the award of contracts may be made in writing or by telephone; in the latter case, a written confirmation must be sent before expiry of the time limit set for their receipt;
- (b) contracting entities may require that requests for participation made by fax must be confirmed by post or by electronic means, where this is necessary for the purposes of legal proof.

For the purposes of point (b) the contracting entity shall indicate in the notice used as a means of calling for competition or in the invitation to confirm interest that it requires requests to participate made by fax to be confirmed by post or by electronic means and the time limit for sending such confirmation.

7. Contracting entities may use the data processed electronically for public procurement procedures in order to prevent, detect and correct errors occurring at each stage by developing appropriate tools.

#### *Article 34*

##### *General obligation to use electronic means of communication*

Member States shall ensure that, at the latest 2 years after the date provided for in Article 101(1), all procurement procedures under this Directive are performed using electronic means of communication, in particular e-submission, in accordance with the requirements of this Article.

This obligation shall not apply where the use of electronic means would require specialised tools or file formats that are not generally available in all the Member States within the

---

<sup>42</sup> Directive 1999/93/EC of the European Parliament and of the Council of 13 December 1999 on a Community framework for electronic signatures, OJ L 13, 19.1.2000, p. 12.

<sup>43</sup> OJ L 274, 20.10.2009, p. 36.

<sup>44</sup> OJ L 53, 26.2.2011, p. 66.

meaning of paragraph 3. It is the responsibility of the contracting entities using other means of communication for submission of tenders to demonstrate in the procurement documents that the use of electronic means, due to the particular nature of the information to be exchanged with the economic operators, would require specialised tools or file formats that are not generally available in all the Member States.

Contracting entities shall be deemed to have legitimate reasons not to request electronic means of communication in the submission process where the following apply:

- (a) the description of the technical specifications, due to the specialised nature of the procurement, cannot be rendered using file formats that are generally supported by commonly used applications;
- (b) the applications supporting file formats that are suitable for the description of the technical specifications are under a proprietary licensing schema and cannot be made available for downloading or remote use by the contracting entity;
- (c) the applications supporting file formats that are suitable for the description of the technical specifications use file formats that cannot be handled by any other open or downloadable applications.

#### *Article 35* *Nomenclatures*

1. Any references to nomenclatures in the context of public procurement shall be made using the "Common Procurement Vocabulary (CPV)" as adopted by Regulation (EC) No 2195/2002<sup>45</sup>.
2. The Commission shall be empowered to adopt delegated acts in accordance with Article 98 to adapt the reference numbers used in Annex II and XVI, whenever changes in the CPV nomenclature have to be reflected in this Directive and they do not imply a modification of the scope of this Directive.

#### *Article 36* *Conflicts of interests*

1. Member States shall, in respect of contracting authorities within the meaning of point 1 of Article 2, provide for rules to effectively prevent, identify and immediately remedy conflicts of interests arising in the conduct of procurement procedures that are subject to this Directive, including the design and preparation of the procedure, the drawing-up of the procurement documents, the selection of candidates and tenderers and the award of the contract, so as to avoid any distortion of competition and ensure equal treatment of all tenderers.

The notion of conflict of interests shall at least cover any situation where the categories of persons referred to in paragraph 2 have, directly or indirectly, a private

---

<sup>45</sup> OJ L 340, 16.12.2002, p. 1.

interest in the outcome of the procurement procedure, which may be perceived to impair the impartial and objective performance of their duties.

For the purposes of this Article, "private interests" means any family, emotional life, economic, political or other shared interests with the candidates or the tenderers, including conflicting professional interests.

2. The rules referred to in paragraph 1 shall apply to conflicts of interests involving at least the following categories of persons:
  - (a) staff members of the contracting authority, procurement service providers or staff members of other service providers who are involved in the conduct of the procurement procedure;
  - (b) the chairperson of the contracting authority and members of decision-making bodies of the contracting authority who, without necessarily being involved in the conduct of the procurement procedure, may nevertheless influence the outcome of that procedure.
3. Member States shall ensure in particular:
  - (a) that staff members referred to in paragraph 2(a) are required to disclose any conflict of interests in relation to any of the candidates or tenderers, as soon as they become aware of such conflicts, in order to enable the contracting authority to take remedial action,
  - (b) that candidates and tenderers are required to submit at the beginning of the procurement procedure a declaration on the existence of any privileged links with the persons referred to in paragraph 2(b), which are likely to place those persons in a situation of conflict of interests; the contracting authority shall indicate in the individual report referred to in Article 94 whether any candidate or tenderer has submitted a declaration.

In the event of a conflict of interests, the contracting authority shall take appropriate measures. Those measures may include the recusal of the staff member in question from involvement in the affected procurement procedure or the re-assignment of the staff member's duties and responsibilities. Where a conflict of interests cannot be effectively remedied by other means, the candidate or tenderer concerned shall be excluded from the procedure.

Where privileged links are identified, the contracting authority shall immediately inform the oversight body designated in accordance with Article 93 and take appropriate measures to avoid any undue influence on the award process and ensure equal treatment of candidates and tenderers. If the conflict of interests cannot be effectively remedied by other means, the candidate or tenderer concerned shall be excluded from the procedure.

4. All measures taken pursuant to this Article shall be documented in the individual report referred to in Article 94.

*Article 37*  
*Illicit conduct*

Candidates shall be required at the beginning of the procedure to provide a declaration on honour that they have not undertaken and will not undertake to:

- (a) unduly influence the decision-making process of the contracting entity or obtain confidential information that may confer upon them undue advantages in the procurement procedure;
- (b) enter into agreements with other candidates and tenderers aimed at distorting competition, or
- (c) deliberately provide misleading information that may have a material influence on decisions concerning exclusion, selection or award.

# TITLE II

## RULES APPLICABLE TO CONTRACTS

### CHAPTER I

#### *Procedures*

#### *Article 38*

#### *Conditions relating to the Government Procurement Agreement and other international agreements*

1. As far as covered by Annexes III, IV and V and the General Notes to the European Union's Appendix 1 to the Government Procurement Agreement and by the other international agreements by which the Union is bound, as listed in Annex V to this Directive, contracting entities within the meaning of Article 4(3)(a) shall accord to the works, supplies, services and economic operators of the signatories to those agreements treatment no less favourable than the treatment accorded to the works, supplies, services and economic operators of the Union. By applying this Directive to economic operators of the signatories to those agreements contracting entities shall comply with those agreements.
2. The Commission shall be empowered to adopt delegated acts in accordance with Article 98 to amend the list in Annex V, where necessary due to the conclusion of new international agreements or modification of existing international agreements.

#### *Article 39*

#### *Choice of procedures*

1. When awarding supply, works or service contracts, contracting entities shall apply the procedures adjusted to be in conformity with this Directive, provided that, without prejudice to Article 42, a call for competition has been published in accordance with this Directive.

Member States shall provide that contracting entities may apply open or restricted procedures or negotiated procedures with prior call for competition as regulated in this Directive.

2. The call for competition may be made by one of the following means:
  - (a) a periodic indicative notice pursuant to Article 61 where the contract is awarded by restricted or negotiated procedure;
  - (b) a notice on the existence of a qualification system pursuant to Article 62 where the contract is awarded by restricted or negotiated procedure or by an innovation partnership,
  - (c) by means of a contract notice pursuant to Article 63.

In the case referred to in point (a), economic operators having expressed their interest following the publication of the periodic indicative notice shall subsequently be invited to confirm their interest in writing by means of an 'invitation to confirm interest' in conformity with Article 68.

3. Member States may provide that contracting entities may apply a negotiated procedure without prior call for competition only in the specific cases and circumstances referred to expressly in Article 42.

*Article 40*  
*Open procedure*

1. In open procedures any interested economic operator may submit a tender in response to a call for competition.

The minimum time limit for the receipt of tenders shall be 40 days from the date on which the contract notice was sent.

The tender shall be accompanied by the requested information for qualitative selection.

2. Where contracting entities have published a periodic indicative notice which is not used as a means of calling for competition, the minimum time limit for the receipt of tenders, as laid down in the second subparagraph of paragraph 1 of this Article, may be shortened to 20 days, provided that both of the following conditions are fulfilled:

- (a) the periodic indicative notice has included, in addition to the information required by Section I of Part A of Annex VI, all the information required by Section II of Part A of Annex VI, insofar as the latter information is available at the time the periodic indicative notice is published;

- (b) it was sent for publication between 45 days and 12 months before the date on which the contract notice was sent.

3. Where a state of urgency duly substantiated by the contracting entities renders impracticable the time limit laid down in the second subparagraph of paragraph 1, they may fix a time limit which shall be not less than 20 days from the date on which the contract notice was sent.

4. The contracting entity may reduce by five days the time limit for receipt of tenders set out in the second subparagraph of paragraph 1 where it accepts that tenders may be submitted by electronic means in accordance with Article 33(3), (4) and (5).

*Article 41*  
*Restricted procedure*

1. In restricted procedures, any economic operator may submit a request to participate in response to a call for competition by providing the requested information for qualitative selection.

The minimum time limit for the receipt of requests to participate shall, as a general rule, be fixed at no less than 30 days from the date on which the contract notice or the invitation to confirm interest is sent and may in no case be less than 15 days.

2. Only those economic operators invited by the contracting entity following their assessment of the requested information may submit a tender. Contracting entities may limit the number of suitable candidates to be invited to participate in the procedure in accordance with Article 72(2).

The time limit for the receipt of tenders may be set by mutual agreement between the contracting entity and the selected candidates, provided that all candidates have the same time to prepare and submit their tenders;

Where it is not possible to reach agreement on the time limit for the receipt of tenders, the contracting entity shall fix a time limit which shall in no case be less than 10 days from the date on which the invitation to tender is sent.

#### *Article 42*

##### *Negotiated procedure with prior call for competition*

1. In negotiated procedures with prior call for competition, any economic operator may submit a request to participate in response to a call for competition by providing the requested information for qualitative selection.

The minimum time limit for the receipt of requests to participate shall, as a general rule, be fixed at no less than 30 days from the date on which the contract notice or, where a periodic indicative notice is used as a means of calling for competition, the invitation to confirm interest is sent and may in no case be less than 15 days.

2. Only those economic operators invited by the contracting entity following their assessment of the requested information may participate in the negotiations. Contracting entities may limit the number of suitable candidates to be invited to participate in the procedure in accordance with Article 72(2).

The time limit for the receipt of tenders may be set by mutual agreement between the contracting entity and the selected candidates, provided that all candidates have the same time to prepare and submit their tenders;

Where it is not possible to reach agreement on the time limit for the receipt of tenders, the contracting entity shall fix a time limit which shall in no case be less than 10 days from the date on which the invitation to tender is sent.

#### *Article 43*

##### *Innovation partnership*

1. Member States may provide that contracting entities may apply innovation partnerships as regulated in this Directive. Member States may decide not to transpose into their national law innovation partnerships or to restrict the use of it to certain types of procurement.

In innovation partnerships, any economic operator may submit a request to participate in response to a call for competition in accordance with points (b) and (c) of Article 39(2) with a view to establishing a structured partnership for the development of an innovative product, service or works and the subsequent purchase of the resulting supplies, services or works, provided that they correspond to the agreed performance levels and costs.

2. The partnership shall be structured in successive stages following the sequence of steps in the research and innovation process, possibly up to the manufacturing of the supply or the provision of the services. It shall provide for intermediate targets to be attained by the partner and provide for payment of the remuneration in appropriate instalments. Based on those targets, the contracting entity can decide after each stage to terminate the partnership and launch a new procurement procedure for the remaining phases, provided that it has acquired the relevant intellectual property rights.
3. The contract shall be awarded in accordance with the rules for a negotiated procedure with prior call for competition set out in Article 42.

In selecting candidates, contracting entities shall pay particular attention to criteria concerning the tenderers' capacity and experience in the field of research and development or of developing innovative solutions. They may limit the number of suitable candidates to be invited to participate in the procedure in accordance with Article 72(2).

Only those economic operators invited by the contracting entity following its assessment of the requested information may submit research and innovation projects, aimed at meeting the needs identified by the contracting entity that cannot be met by existing solutions. The contract shall be awarded on the sole basis of the award criterion of the most economically advantageous tender in accordance with Article 76 (1)(a).

4. The structure of the partnership and, in particular the duration and value of the different phases shall reflect the degree of innovation of the proposed solution and the sequence of the research and innovation activities required for the development of an innovative solution not yet available on the market. The value and duration of a contract for the purchase of the resulting supply, service or works shall remain within appropriate limits, taking into account the need to recover the costs, including those incurred in developing an innovative solution, and to achieve an adequate profit.

Contracting entities shall not use innovation partnerships in such a way as to prevent, restrict or distort competition.

#### *Article 44*

##### *Use of the negotiated procedure without prior call for competition*

Contracting entities may use a negotiated procedure without prior call for competition in the following cases:

- (a) where no tenders or no suitable tenders or no requests to participate have been submitted in response to a procedure with a prior call for competition, provided that the initial conditions of the contract are not substantially altered;
- (b) where a contract is purely for the purpose of research, experiment, study or development, and not for the purpose of securing a profit or of recovering research and development costs, and insofar as the award of such contract does not prejudice the competitive award of subsequent contracts which do seek, in particular, those ends;
- (c) where the aim of the procurement is the creation or obtention of a work of art;
- (d) where the works, supplies or services can be supplied only by a particular economic operator for any of the following reasons:
  - (i) the absence of competition for technical reasons;
  - (ii) the protection of patents, copyrights or other intellectual property rights;
  - (iii) the protection of other exclusive rights.

This exception only applies when no reasonable alternative or substitute exists and the absence of competition is not the result of an artificial narrowing down of the parameters of the procurement;

- (e) insofar as is strictly necessary where, for reasons of extreme urgency brought about by force majeure, the time limits laid down for open procedures, restricted procedures and negotiated procedures with prior call for competition cannot be complied with. The circumstances invoked to justify extreme urgency must not in any event be attributable to the contracting entity;
- (f) in the case of supply contracts for additional deliveries by the original supplier which are intended either as a partial replacement of normal supplies or installations or as the extension of existing supplies or installations, where a change of supplier would oblige the contracting entity to acquire material having different technical characteristics which would result in incompatibility or disproportionate technical difficulties in operation and maintenance;
- (g) for new works or services consisting in the repetition of similar works or services assigned to the contractor to which the same contracting entities awarded an earlier contract, provided that such works or services conform to a basic project for which a first contract was awarded according to a procedure in accordance with Article 39(1).
- (h) for supplies quoted and purchased on a commodity market or other similar markets such as electricity exchanges;
- (i) for bargain purchases, where it is possible to procure supplies by taking advantage of a particularly advantageous opportunity available for a very short time at a price considerably lower than normal market prices;
- (j) for purchases of supplies under particularly advantageous conditions from either a supplier definitively winding up its business activities or the liquidators in an

insolvency procedure, an arrangement with creditors or a similar procedure under national laws or regulations;

- (k) where the service contract concerned follows a design contest organised in accordance with this Directive and is to be awarded, under the applicable rules, be awarded to the winner or to one of the winners of that contest; in the latter case, all the winners shall be invited to participate in the negotiations.

For the purposes of point (a), a tender shall be considered not to be suitable where:

- (a) it is irregular or unacceptable, and
- (b) it is completely irrelevant to the contract, being incapable of meeting the contracting entity's needs as specified in the procurement documents.

In particular, tenders shall be considered to be irregular, where they do not comply with the procurement documents or where the prices offered are sheltered from normal competitive forces;

In particular, tenders shall be considered to be unacceptable in any of the following cases:

- (a) they have been received late;
- (b) they have been submitted by tenderers that do not have the requisite qualifications;
- (c) their price either exceeds the contracting entity's budget as determined prior to the launching of the procurement procedure; the prior determination of the budget must be documented in writing;
- (d) they have been found to be abnormally low in accordance with Article 79.

For the purposes of point (g) of paragraph 1 of this Article, the basic project shall indicate the extent of possible additional works or services and the conditions under which they will be awarded. As soon as the first project is put up for tender, notice shall be given that this procedure might be adopted and the total estimated cost of subsequent works or services shall be taken into consideration by the contracting entities when they apply Articles 12 and 13.

## **CHAPTER II**

### **Techniques and instruments for electronic and aggregated procurement**

#### *Article 45* *Framework agreements*

1. Contracting entities may conclude framework agreements, provided that they apply the procedures provided for in this Directive.

A framework agreement means an agreement between one or more contracting entities and one or more economic operators, the purpose of which is to establish the

terms governing contracts to be awarded during a given period, in particular with regard to price and, where appropriate, the quantities envisaged.

The term of a framework agreement shall not exceed four years, save in exceptional cases duly justified, in particular by the subject of the framework agreement.

2. Contracts based on a framework agreement shall be awarded in accordance with the procedures laid down in this paragraph and paragraphs 3 and 4.

Those procedures may be applied only between those contracting entities clearly identified for this purpose in the call for competition, in the invitation to confirm interest or, where a notice on the existence of a qualification system is used as a means of calling for competition, in the invitation to tender and those economic operators originally party to the framework agreement.

Contracts based on a framework agreement may under no circumstances make substantial modifications to the terms laid down in that framework agreement, in particular in the case referred to in paragraph 3.

Contracting entities shall not use framework agreements improperly or in such a way as to prevent, restrict or distort competition.

3. Where a framework agreement is concluded with a single economic operator, contracts based on that agreement shall be awarded within the limits of the terms laid down in the framework agreement.

For the award of those contracts, contracting entities may consult the operator party to the framework agreement in writing, requesting it to supplement its tender as necessary.

4. Where a framework agreement is concluded with more than one economic operator, it may be performed in one of the two following ways:
  - (a) following the terms and conditions of the framework agreement, without reopening competition, where it sets out all the terms governing the provision of the works, services and supplies concerned and the objective conditions for determining which of the economic operators, party to the framework agreement, shall perform them; the latter conditions shall be indicated in the procurement documents;
  - (b) where not all the terms governing the provision of the works, services and supplies are laid down in the framework agreement, through reopening competition amongst the economic operators parties to the framework agreement.

5. The competition referred to in paragraph (4)(b) shall be based on the same terms as applied for the award of the framework agreement and, where necessary, more precisely formulated terms, and, where appropriate, other terms referred to in the specifications of the framework agreement, in accordance with the following procedure:

- (a) for every contract to be awarded, contracting entities shall consult in writing the economic operators capable of performing the contract;
- (b) contracting entities shall fix a time limit which is sufficiently long to allow tenders for each specific contract to be submitted, taking into account factors such as the complexity of the subject-matter of the contract and the time needed to send in tenders;
- (c) tenders shall be submitted in writing, and their content shall not be opened until the stipulated time limit for reply has expired;
- (d) contracting entities shall award each contract to the tenderer that has submitted the best tender on the basis of the award criteria set out in the specifications of the framework agreement.

*Article 46*  
*Dynamic purchasing systems*

1. For commonly used purchases, the characteristics of which, as generally available on the market, meet the requirements of the contracting entities, they may use a dynamic purchasing system. The dynamic purchasing system shall be operated as a completely electronic process, open throughout its validity to any economic operator that satisfies the selection criteria.
2. In order to award contracts under a dynamic purchasing system, contracting entities shall follow the rules of the restricted procedure. All the candidates who satisfy the selection criteria shall be admitted to the system; the number of candidates to be admitted to the system shall not be limited in accordance with Article 72 (2). All communications in the context of a dynamic purchasing system shall only be made with electronic means in accordance with Article 33(2) to (6).
3. For the purposes of awarding contracts under a dynamic purchasing system, contracting entities shall:
  - (a) publish a call for competition making it clear that a dynamic purchasing system is involved;
  - (b) indicate in the specifications, at least the nature and estimated quantity of the purchases envisaged, as well as all the necessary information concerning the purchasing system, the electronic equipment used and the technical connection arrangements and specifications;
  - (c) offer unrestricted and full direct access, as long as the system is valid, to the specifications and to any additional documents in accordance with Article 67.
4. Contracting entities shall give any economic operator, throughout the entire duration of the dynamic purchasing system, the possibility of requesting to participate in the system under the conditions referred to in paragraph 2. Contracting entities shall finalise their assessment of such requests according to the selection criteria within 10 working days following their receipt.

Contracting entities shall inform the economic operator referred to in the first subparagraph at the earliest possible opportunity of whether or not it has been admitted to the dynamic purchasing system.

5. Contracting entities shall invite all qualified participants to submit a tender for each specific procurement under the dynamic purchasing system, in accordance with Article 68.

They shall award the contract to the tenderer that submitted the best tender on the basis of the award criteria set out in the contract notice for the dynamic purchasing system, in the invitation to confirm interest, or, where the means of calling for competition is a notice on the existence of a qualification system, in the invitation to tender. Those criteria may, where appropriate, be formulated more precisely in the invitation to tender.

6. Contracting entities shall indicate the duration of the dynamic purchasing system in the call for competition. They shall notify the Commission of any change in duration, using the following standard forms:
  - (a) where the duration is changed without terminating the system, the form used initially for the call for competition for the dynamic purchasing system;
  - (b) where the system is terminated, a contract award notice referred to in Article 64.
7. No charges may be billed to the interested economic operators or to parties to the dynamic purchasing system.

#### *Article 47* *Electronic auctions*

1. Contracting entities may use electronic auctions in which new prices, revised downwards, and/or new values concerning certain elements of tenders are presented.

For this purpose, contracting entities shall use a repetitive electronic process (electronic auction), which occurs after an initial full evaluation of the tenders, enabling them to be ranked using automatic evaluation methods.

2. In open, restricted or negotiated procedures with a prior call for competition, the contracting entities may decide that the award of a contract shall be preceded by an electronic auction when the tender specifications can be established with precision.

In the same circumstances, an electronic auction may be held on the reopening of competition among the parties to a framework agreement as provided for in point (b) of Article 45(4) and on the opening for competition of contracts to be awarded under the dynamic purchasing system referred to in Article 46.

3. The electronic auction shall be based on one of the the following criteria:
  - (a) solely on prices where the contract is awarded to the lowest cost,

- (b) on prices and/or on the new values of the features of the tenders indicated in the specifications, where the contract is awarded to the most economically advantageous tender.
4. Contracting entities which decide to hold an electronic auction shall state that fact in the contract notice, in the invitation to confirm interest or, where a notice on the existence of a qualification system is used as a means of calling for competition, in the invitation to tender. The specifications shall include at least the information set out in Annex VII.
  5. Before proceeding with the electronic auction, contracting entities shall make a full initial evaluation of the tenders in accordance with the award criterion or criteria and with the weighting fixed for them.

A tender shall be considered admissible where it has been submitted by a qualified tenderer and is in conformity with the technical specifications.

All tenderers that have submitted admissible tenders shall be invited simultaneously by electronic means to participate in the electronic auction using, as of the specified date and time, the connections in accordance with the instructions set out in the invitation. The electronic auction may take place in a number of successive phases. The electronic auction shall not start sooner than two working days after the date on which invitations are sent out.

6. Where the contract is to be awarded on the basis of the most economically advantageous tender, the invitation shall be accompanied by the outcome of a full evaluation of the relevant tender carried out in accordance with the weighting provided for in the first subparagraph of Article 76(5).

The invitation shall also state the mathematical formula to be used in the electronic auction to determine automatic re-rankings on the basis of the new prices and/or new values submitted. That formula shall incorporate the weighting of all the criteria established to determine the most economically advantageous tender, as indicated in the notice used as a means of calling for competition or in the specifications. For that purpose, any ranges shall, however, be reduced beforehand to a specified value.

Where variants are authorised, a separate formula shall be provided for each variant.

7. Throughout each phase of an electronic auction the contracting entities shall instantaneously communicate to all tenderers sufficient information to enable them to ascertain their relative rankings at any moment. They may also communicate other information concerning other prices or values submitted, provided that that is stated in the specifications. They may also at any time announce the number of participants in that phase of the auction. In no case, however, may they disclose the identities of the tenderers during any phase of an electronic auction.
8. Contracting entities shall close an electronic auction in one or more of the following manners:
  - (a) at the previously indicated date and time;

- (b) when they receive no more new prices or new values which meet the requirements concerning minimum differences, provided that they have previously stated the time which they will allow to elapse after receiving the last submission before they close the electronic auction;
- (c) when the previously indicated number of phases in the auction has been completed.

Where the contracting entities have decided to close an electronic auction in accordance with point (c), possibly in combination with the arrangements laid down in point (b), the invitation to take part in the auction shall indicate the timetable for each phase of the auction.

9. After closing an electronic auction the contracting entities shall award the contract in accordance with Article 76 on the basis of the results of the electronic auction.

#### *Article 48* *Electronic catalogues*

1. Where contracting entities require the use of electronic means of communication pursuant to Article 33 , they may require tenders to be presented in the format of an electronic catalogue.

Member States may render the use of electronic catalogues mandatory in connection with certain types of procurement.

Tenders presented in the form of an electronic catalogue may be accompanied by other documents, completing the tender.

2. Electronic catalogues shall be established by the candidates or tenderers with a view to participating in a specific procurement procedure in accordance with the technical specifications and format established by the contracting entity.

Furthermore, electronic catalogues shall comply with the requirements for electronic communication tools as well as with any additional requirements set by the contracting entity in accordance with Article 33.

3. Where the presentation of tenders in the form of electronic catalogues is accepted or required, contracting entities shall:
  - (a) state so in the contract notice, in the invitation to confirm interest, or, where the means of calling for competition is a notice on the existence of a qualification system, in the invitation to tender or to negotiate;
  - (b) indicate in the specifications all the necessary information pursuant to Article 33(5) concerning the format, the electronic equipment used and the technical connection arrangements and specifications for the catalogue.
4. Where a framework agreement has been concluded with more than one economic operator following the submission of tenders in the form of electronic catalogues, contracting entities may provide that the reopening of competition for specific

contracts takes place on the basis of updated catalogues. In such case, contracting entities shall use one of the following alternative methods:

- (a) invite tenderers to resubmit their electronic catalogues, adapted to the requirements of the specific contract in question;
- (b) notify tenderers that they intend to collect from the catalogues which have already been submitted the information needed to constitute tenders adapted to the requirements of the specific contract in question (hereinafter "punch out"), provided that the use of this method has been announced in the procurement documents for the framework agreement.

5. Where contracting entities reopen competition for specific contracts in accordance with point (b) of paragraph (4), they shall specify the date and time at which they intend to collect the information needed to constitute tenders adapted to the requirements of the specific contract in question and shall give tenderers the possibility to refuse such collection of information.

Contracting entities shall allow for an adequate period between the notification and the actual collection of information.

Before awarding the contract, contracting entities shall present the collected information to the tenderer concerned so as to give it the opportunity to contest or confirm the correctness of the tender thus constituted.

6. Contracting entities may award contracts based on a dynamic purchasing system through a punch out provided that the request for participation in the dynamic purchasing system is accompanied by an electronic catalogue in accordance with the technical specifications and format established by the contracting entity. This catalogue shall be completed subsequently by the candidates, when they are informed of the contracting entity's intention to constitute tenders by means of a punch out. The punch out shall be conducted in conformity with point (b) of paragraph 4 and paragraph 5.

#### *Article 49*

##### *Centralised purchasing activities and central purchasing bodies*

1. Contracting entities may purchase works, supplies and/or services from or through a central purchasing body.
2. Member States shall provide for the possibility for contracting entities to have recourse to centralised purchasing activities offered by central purchasing bodies established in another Member State.
3. A contracting entity fulfills its obligations pursuant to this Directive when it procures by having recourse to centralised purchasing activities, to the extent that the procurement procedures concerned and their performance are conducted by the central procurement body alone in all its stages from the publication of the call for competition to the end of the execution of the ensuing contract or contracts.

However, where certain stages of the procurement procedure or the performance of the ensuing contracts are carried out by the contracting entity concerned, the contracting entity continues to be responsible for fulfilling the obligations pursuant to this Directive in respect of the stages it conducts.

4. All procurement procedures conducted by a central purchasing body shall be performed using electronic means of communication, in accordance with the requirements of Article 33.
5. Contracting entities may, without applying the procedures provided for in this Directive, choose a central purchasing body to provide centralised purchasing activities, including where the central purchasing body is remunerated for so doing.
6. Central purchasing bodies shall also ensure the documentation of all transactions performed in the course of the execution of the contracts, framework agreements or dynamic purchasing systems they conclude in the course of their central purchasing activities.

*Article 50*  
*Ancillary purchasing activities*

The providers of ancillary purchasing activities shall be chosen in accordance with the procurement procedures set out in this Directive.

*Article 51*  
*Occasional joint procurement*

1. One or more contracting entities may agree to perform certain specific procurements jointly.
2. Where one contracting entity alone conducts the procurement procedures concerned in all its stages from the publication of the call for competition to the end of the performance of the ensuing contract or contracts, that contracting entity shall have sole responsibility for fulfilling the obligations pursuant to this Directive.

However, where the conduct of the procurement procedures and the performance of the ensuing contracts is carried out by more than one of the participating contracting entities, each shall continue to be responsible for fulfilling its obligations pursuant to this Directive in respect of the stages it conducts.

*Article 52*  
*Joint procurement between contracting entities from different Member States*

1. Without prejudice to Title I, Chapter III, Section 2, Subsection 2: Special relations, contracting entities from different Member States may jointly award contracts by using one of the means described in this Article.
2. Several contracting entities may purchase works, supplies and/or services from or through a central purchasing body located in another Member State. In that case, the

procurement procedure shall be conducted in accordance with the national provisions of the Member State where the central purchasing body is located.

3. Several contracting entities from different Member States may jointly award a contract. In that case, the participating contracting entities shall conclude an agreement that determines
  - (a) which national provisions shall apply to the procurement procedure;
  - (b) the internal organisation of the procurement procedure, including the management of the procedure, the sharing of responsibilities, the distribution of the works, supplies or services to be procured, and the conclusion of contracts.

When determining the applicable national law in accordance with point (a), contracting entities may choose the national provisions of any Member State in which at least one of the participating entities is located.

4. Where several contracting entities from different Member States have set up a joint legal entity, including European Groupings of territorial cooperation under Regulation (EC) No° 1082/2006 of the European Parliament and of the Council<sup>46</sup> or other entities established under Union law, the participating contracting entities shall, by a decision of the competent body of the joint legal entity, agree on the applicable national procurement rules of one of the following Member States:
  - (a) the national provisions of the Member State where the joint legal entity has its registered office;
  - (b) the national provisions of the Member State where the joint legal entity is carrying out its activities.

This agreement may either apply for an undetermined period, when fixed in the constitutive act of the joint legal entity, or may be limited to a certain period of time, certain types of contracts or to one or more individual contract awards.

5. In the absence of an agreement determining the applicable public procurement law, the national legislation governing the contract award shall be determined following the rules set out below:
  - (a) where the procedure is conducted or managed by one participating contracting entity on behalf of the others, the national provisions of the Member State of that contracting entity shall apply;
  - (b) where the procedure is not conducted or managed by one participating contracting entity on behalf of the others, and
    - (i) concerns a works contract, contracting entities shall apply the national provisions of the Member State where most of the works are located;

---

<sup>46</sup> OJ L 210 of 31.7.2006, p. 19

- (ii) concerns a service or supply contract, contracting entities shall apply the national provisions of the Member State where the major part of the services or supplies is provided;
  - (c) where it is not possible to determine the applicable national law pursuant to points (a) or (b), contracting entities shall apply the national provisions of the Member State of the contracting entity which bears the biggest share of the costs.
- 6. In the absence of an agreement determining the applicable public procurement law under paragraph 4, the national legislation governing procurement procedures conducted by joint legal entities set up by several contracting entities from different Member States shall be determined following the following rules:
  - (a) where the procedure is conducted or managed by the competent organ of the joint legal entity, the national provisions of the Member State where the legal entity has its registered office shall apply;
  - (b) where the procedure is conducted or managed by a member of the legal entity on behalf of that legal entity, the rules set out in points (a) and (b) of paragraph 5 shall apply;
  - (c) where it is not possible to determine the applicable national law pursuant to points (a) or (b) of paragraph 5, the contracting entities shall apply the national provisions of the Member State where the legal entity has its registered office.
- 7. One or more contracting entities may award individual contracts under a framework agreement concluded by or jointly with a contracting entity located in another Member State, provided that the framework agreement contains specific provisions enabling the respective contracting entity or entities to award the individual contracts.
- 8. Decisions on the award of contracts in cross-border public procurement shall be subject to the ordinary review mechanisms available under the national law applicable.
- 9. In order to enable the effective operation of review mechanisms, Member States shall ensure that the decisions of review bodies within the meaning of Council Directive 92/13/EEC<sup>47</sup> located in other Member States are fully executed in their domestic legal order, where such decisions involve contracting entities established on their territory participating in the relevant cross-border public procurement procedure.

---

<sup>47</sup> OJ L 76, 23.03.1992, p. 14.

## **CHAPTER III**

### ***Conduct of the procedure***

#### **SECTION 1 PREPARATION**

##### *Article 53*

##### *Preliminary market consultations*

1. Before launching a procurement procedure, contracting entities may conduct market consultations in order to assess the structure, capability and capacity of the market and to inform economic operators of their procurement plans and requirements.

For this purpose, contracting entities may seek or accept advice from administrative support structures or from third parties or market participants, provided that such advice does not have the effect of precluding competition and does not result in a violation of the principles of non-discrimination and transparency.

2. Where a candidate or tenderer or an undertaking related to a candidate or tenderer has advised the contracting entity or has otherwise been involved in the preparation of the procurement procedure, the contracting entity shall take appropriate measures to ensure that competition is not distorted by the participation of that candidate or tenderer.

Such measures shall include the communication to the other candidates and tenderers of any relevant information exchanged in the context of or resulting from the involvement of the candidate or tenderer in the preparation of the procurement procedure and the fixing of adequate time limits for the receipt of tenders. The candidate or tenderer concerned shall only be excluded from the procedure where there are no other means to ensure compliance with the duty to observe the principle of equal treatment.

Prior to any such exclusion, candidates or tenderers shall be given the opportunity to prove that their involvement in preparing the procurement procedure is not capable of distorting competition. The measures taken shall be documented in the individual report required by to Article 94.

##### *Article 54*

##### *Technical specifications*

1. The technical specifications as defined in point 1 of Annex VIII shall be set out in the procurement documents. They shall define the characteristics required of a works, service or supply.

These characteristics may also refer to the specific process of production or provision of the requested works, supplies or services or of any other stage of its life cycle as referred to in point (22) of Article 2.

The technical specifications shall also specify whether the transfer of intellectual property rights will be required.

For all procurement, the subject of which is intended for use by persons, whether general public or staff of the contracting entity, those technical specifications shall, except in duly justified cases, be drawn up so as to take into account accessibility criteria for people with disabilities or design for all users.

Where mandatory accessibility standards are adopted by a legislative act of the Union, technical specifications shall, as far as accessibility criteria are concerned, be defined by reference thereto.

2. Technical specifications shall guarantee equal access of economic operators to the procurement procedure and not have the effect of creating unjustified obstacles to the opening up of public procurement to competition.
3. Without prejudice to mandatory national technical rules, to the extent that they are compatible with Union law, the technical specifications shall be formulated in one of the following ways:
  - (a) in terms of performance or functional requirements, including environmental characteristics, provided that the parameters are sufficiently precise to allow tenderers to determine the subject-matter of the contract and to allow contracting entities to award the contract;
  - (b) by reference to technical specifications and, in order of preference, to national standards transposing European standards, European technical approvals, common technical specifications, international standards, other technical reference systems established by the European standardisation bodies or - when those do not exist - national standards, national technical approvals or national technical specifications relating to the design, calculation and execution of the works and use of the supplies; each reference shall be accompanied by the words "or equivalent";
  - (c) in terms of performance or functional requirements referred to in point (a), with reference to the technical specifications referred to in point (b) as a means of presuming conformity with such performance or functional requirements;
  - (d) by reference to the technical specifications referred to in point (b) for certain characteristics, and by reference to the performance or functional requirements referred to in point (a) for other characteristics.
4. Unless justified by the subject-matter of the contract, technical specifications shall not refer to a specific make or source, or to a particular process, or to trade marks, patents, types or a specific origin or production with the effect of favouring or eliminating certain undertakings or certain products. Such reference shall be permitted, on an exceptional basis, where a sufficiently precise and intelligible description of the subject-matter of the contract pursuant to paragraph 3 is not possible. Such reference shall be accompanied by the words "or equivalent".
5. Where a contracting entity uses the option of referring to the specifications referred to in point (b) of paragraph 3, it shall not reject a tender on the ground that the works,

supplies and services tendered for do not comply with the specifications to which it has referred, once the tenderer proves in its tender, by whatever appropriate means, including the means of proof referred to in Article 56, that the solutions which it proposes satisfy in an equivalent manner the requirements defined by the technical specifications.

6. Where a contracting entity uses the option provided for in point (a) of paragraph 3 to formulate technical specifications in terms of performance or functional requirements, it shall not reject a tender for supplies, services or works which comply with a national standard transposing a European standard, with a European technical approval, a common technical specification, an international standard, or a technical reference system established by a European standardisation body, where those specifications address the performance or functional requirements which it has laid down.

In its tender, the tenderer shall prove by any appropriate means including those referred to in Article 56, that the supplies, service or work in compliance with the standard meets the performance or functional requirements of the contracting entity.

#### *Article 55* *Labels*

1. Where contracting entities lay down environmental, social or other characteristics of a works, service or supply in terms of performance or functional requirements as referred to in point (a) of Article 54 paragraph 3, they may require that those works, supplies or services bear a specific label, provided that all of the following conditions are fulfilled:
  - (a) the requirements for the label only concern characteristics which are linked to the subject-matter of the contract and are appropriate to define the characteristics of the works, supplies or services that are the subject-matter of the contract;
  - (b) the requirements for the label are drawn up on the basis of scientific information or based on other objectively verifiable and non-discriminatory criteria;
  - (c) the labels are established in an open and transparent procedure in which all stakeholders, including government bodies, consumers, manufacturers, distributors and environmental organisations may participate,
  - (d) the labels are accessible to all interested parties;
  - (e) the criteria of the label are set by a third party which is independent from the economic operator applying for the label.

Contracting entities requiring a specific label shall accept all equivalent labels that fulfil the requirements of the label indicated by the contracting entities. For products that do not bear the label, contracting entities shall also accept a technical dossier of the manufacturer or other appropriate means of proof.

2. Where a label fulfils the conditions of provided in points (b), (c), (d) and (e) of paragraph 1 but also sets out requirements not linked to the subject-matter of the contract, contracting entities may use those of the detailed specifications of that label, or, if necessary, parts thereof, that are linked to the subject-matter of the contract and are appropriate to define characteristics of this subject-matter.

#### *Article 56*

##### *Test reports, certification and other means of proof.*

1. Contracting entities may require that economic operators provide a test report from a recognised body or a certificate issued by such a body as means of proof of conformity with the technical specifications.

Where contracting entities require the submission of certificates drawn up by recognised bodies attesting conformity with a particular technical specification, certificates from equivalent other recognised bodies shall also be accepted by the contracting entities.

2. Contracting entities shall accept other appropriate means of proof than those referred to in paragraph 1, such as a technical dossier of the manufacturer where the economic operator concerned has no access to such certificates or test reports referred to in paragraph 1, or no possibility of obtaining them within the relevant time limits.
3. "Recognised bodies" within the meaning of paragraph 1 of this Article shall be test and calibration laboratories, and any certification and inspection bodies accredited in accordance with Regulation (EC) No 765/2008 of the European Parliament and of the Council<sup>48</sup>.
4. Member States shall make available to other Member States, upon request, any information related to the evidence and documents submitted in accordance with Article 54(6), Article 55 and paragraphs 1, 2 and 3 of this Article to prove compliance with technical requirements. The competent authorities of the Member State of establishment shall provide this information in accordance with Article 96.

#### *Article 57*

##### *Communication of technical specifications*

1. On request from economic operators interested in obtaining a contract, contracting entities shall make available the technical specifications regularly referred to in their supply, works or service contracts, or the technical specifications which they intend to apply to contracts for which the call for competition is a periodic indicative notice. Those specifications shall be made available by electronic means through unrestricted and full direct access free of charge.
2. Where the technical specifications are based on documents available by electronic means through unrestricted and full direct access free of charge to interested

---

<sup>48</sup> OJ L 218, 13.8.2008, p. 30.

economic operators, the inclusion of a reference to those documents shall be sufficient.

*Article 58*  
*Variants*

1. Contracting entities may take account of variants which are submitted by a tenderer and meet the minimum requirements specified by the contracting entities.

Contracting entities shall indicate in the specifications whether or not they authorise variants and, if so, the minimum requirements to be met by the variants and any specific requirements for their presentation. Where variants are authorised, they shall also ensure that the chosen award criteria can be usefully applied to variants meeting those minimum requirements as well as to conforming tenders which are not variants.

2. In procedures for awarding supply or service contracts, contracting entities that have authorised variants shall not reject a variant on the sole ground that it would, where successful, lead either to a service contract rather than a supply contract or to a supply contract rather than a service contract.

*Article 59*  
*Division of contracts into lots*

1. Contracts may be subdivided into homogenous or heterogeneous lots. Article 13(7) applies.

Contracting entities shall indicate, in the contract notice, in the invitation to confirm interest, or, where the means of calling for competition is a notice on the existence of a qualification system, in the invitation to tender or to negotiate, whether tenders are limited to one or more lots only.

2. Contracting entities may, even where the possibility to tender for all lots has been indicated, limit the number of lots that may be awarded to a tenderer provided that the maximum number is stated in the contract notice or in the invitation to confirm interest. Contracting entities shall determine and indicate in the procurement documents the objective and non-discriminatory criteria or rules for awarding the different lots where the application of the chosen award criteria would result in the award to one tenderer of more lots than the maximum number.
3. Where more than one lot may be awarded to the same tenderer, contracting entities may provide that they will either award a contract per lot or one or more contracts, covering several or all lots.

Contracting entities shall specify in the procurement documents whether they reserve the right to make such a choice and, if so, which lots may be grouped together under one contract.

Contracting entities shall first determine the tenders fulfilling best the award criteria set out pursuant to Article 76 for each individual lot. They may award a contract for

more than one lot to a tenderer that is not ranked first in respect of all individual lots covered by this contract, provided that the award criteria set out pursuant to Article 76 are better fulfilled with regard to all the lots covered by that contract. Contracting entities shall specify the methods they intend to use for such comparison in the procurement documents. Such methods shall be transparent, objective and non-discriminatory.

4. Contracting entities may require that all contractors coordinate under the direction of the economic operator to which a lot involving the coordination of the entire project or its relevant parts has been awarded.

*Article 60*  
*Setting time limits*

1. When fixing the time limits for requests to participate and the receipt of tenders, contracting entities shall take particular account of the complexity of the contract and the time required for drawing up tenders, without prejudice to the minimum time limits set out in Articles 39 to 44.
2. Where tenders can be made only after a visit to the site or after on-the-spot inspection of the documents supporting the procurement documents, the time limits for the receipt of tenders shall be extended, so that all economic operators concerned may be aware of all the information needed to produce tenders.

**Section 2**  
***Publication and transparency***

*Article 61*  
*Periodic indicative notices*

1. Contracting entities may make known their intentions of planned procurement through the publication of a periodic indicative notice as soon as possible after the beginning of the budgetary year. Those notices shall contain the information set out in part A, section I of Annex VI. They shall be published either by the Commission or by the contracting entities on their buyer profiles in accordance with point 2(b) of Annex IX. Where the notice is published by the contracting entities on their buyer profile, they shall send a notice of the publication of the periodic indicative notice on a buyer profile in accordance with point 3 of Annex IX.
2. When a call for competition is made by means of a periodic indicative notice in respect of restricted procedures and negotiated procedures with prior call for competition, the notice shall meet all the following requirements:
  - (a) it refers specifically to the supplies, works or services that will be the subject of the contract to be awarded;

- (b) it indicates that the contract will be awarded by restricted or negotiated procedure without further publication of a call for competition and invite interested economic operators to express their interest in writing;
- (c) it contains, in addition to the information set out in part A, section I of Annex VI, the information set out in part A, section II of Annex VI;
- (d) it has been published not more than 12 months prior to the date on which the invitation to confirm interest is sent.

#### *Article 62*

##### *Notices on the existence of a qualification system*

Where contracting entities choose to set up a qualification system in accordance with Article 71, the system shall be the subject of a notice as referred to in Annex X, indicating the purpose of the qualification system and how to have access to the rules concerning its operation. Where the system is of a duration greater than three years, the notice shall be published annually. Where the system is of a shorter duration, an initial notice shall suffice.

#### *Article 63*

##### *Contract notices*

Contract notices may be used as a means of calling for competition in respect of all procedures. They shall contain the information set out in the relevant part of Annex XI and shall be published in accordance with Article 65.

#### *Article 64*

##### *Contract award notices*

1. Within two months of the award of a contract or the conclusion of a framework agreement, contracting entities shall send a contract award notice on the results of the procurement procedure.

Such notice shall contain the information set out in Annex XII and shall be published in accordance with Article 65.

2. Where the call for competition for the contract concerned has been made in the form of a periodic indicative notice and the contracting entity does not intend to award further contracts during the 12 month period covered by the periodic indicative notice, the contract award notice shall contain a specific indication to that effect.

In the case of framework agreements concluded in accordance with Article 45, contracting entities shall not be bound to send a notice of the results of the procurement procedure for each contract based on that agreement.

Contracting entities shall send a contract award notice within two months after the award of each contract based on a dynamic purchasing system. They may, however, group such notices on a quarterly basis. In that case, they shall send the grouped notices within two months of the end of each quarter.

3. The information provided in accordance with Annex XII and intended for publication shall be published in accordance with Annex IX. Certain information on the contract award or the conclusion of the framework agreement may be withheld from publication where its release would impede law enforcement or otherwise be contrary to the public interest or would prejudice the legitimate commercial interests of a particular economic operator, public or private, including the interests of the economic operator to whom the contract has been awarded, or might prejudice fair competition between economic operators.

In the case of contracts for research-and-development services ("R&D services"), the information concerning the nature and quantity of the services may be respectively limited to:

- (a) the indication "R&D services" where the contract has been awarded by a negotiated procedure without a call for competition in accordance with Article 44(b);
  - (b) at least as detailed information as was indicated in the notice that was used as a means of calling for competition.
4. Information provided in accordance with Annex XII and marked as not being intended for publication shall be published only in simplified form and in accordance with Annex IX for statistical purposes.

#### *Article 65*

##### *Form and manner of publication of notices*

1. Notices referred to in Articles 61 to 64 shall include the information set out in Annexes XI, X, VI A, VI B and XII and in the format of standard forms, including standard forms for corrigenda.

The Commission shall establish those standard forms. Those implementing acts shall be adopted in accordance with the advisory procedure referred to in Article 100.

2. Notices referred to in Articles 61 to 64 shall be drawn up, transmitted by electronic means to the Commission and published in accordance with Annex IX. Notices shall be published not later than five days after they are sent. The costs of publication of the notices by the Commission shall be borne by the Union.
3. Calls for competition within the meaning of Article 39(2) shall be published in full in an official language of the Union as chosen by the contracting entity. That language version shall constitute the sole authentic text. A summary of the important elements of each notice shall be published in the other official languages.
4. The Commission shall ensure that the full text and the summary of periodic indicative notices referred to in Article 61(2), calls for competition setting up a dynamic purchasing system as referred to in Article 46(3)(a) and notices on the existence of a qualification system used as a means of calling for competition in accordance with Article 39(2)(b) continue to be published:

- (a) in the case of periodic indicative notices for 12 months or until receipt of a contract award notice as provided for in Article 64 (2) indicating that no further contracts will be awarded during the 12 month period covered by the call for competition;
  - (b) in the case of calls for competition setting up a dynamic purchasing system for the period of validity of the dynamic purchasing system;
  - (c) in the case of notices on the existence of a qualification system for its period of validity.
5. Contracting entities shall be able to supply proof of the dates on which notices are dispatched.

The Commission shall give the contracting entity confirmation of the receipt of the notice and of the publication of the information sent, indicating the date of that publication. Such confirmation shall constitute proof of publication.

6. Contracting entities may publish notices for works, supply or service contracts that are not subject to the publication requirements laid down in this Directive provided that those notices are sent to the Commission by electronic means in accordance with the format and procedures for transmission indicated in Annex IX.

#### *Article 66* *Publication at national level*

1. Notices referred to in Articles 61 to 64 and the information contained therein shall not be published at national level before the publication pursuant to Article 65.
2. Notices published at national level shall not contain information other than that contained in the notices dispatched to the Commission or published on a buyer profile, but shall indicate the date of dispatch of the notice to the Commission or its publication on the buyer profile.
3. Periodic indicative notices shall not be published on a buyer profile before the dispatch to the Commission of the notice of their publication in that form; they shall indicate the date of that dispatch.

#### *Article 67* *Electronic availability of procurement documents*

1. Contracting entities shall offer unrestricted and full direct access free of charge by electronic means to the procurement documents from the date of publication of the notice in accordance with Article 65 or the date on which the invitation to confirm interest is sent. Where the means of calling for competition is a notice on the existence of a qualification system, such access shall be offered as soon as possible and at the latest when the invitation to tender or to negotiate is sent. The text of the notice or of those invitations shall specify the internet address at which this documentation is accessible.

2. Provided that it has been requested in good time, the contracting entities or competent departments shall supply additional information relating to the specifications and any supporting documents not later than six days before the time limit fixed for the receipt of tenders. In the event of an accelerated open procedure as referred to in Article 40(3), that period shall be four days.

#### *Article 68*

##### *Invitations to submit a tender or to negotiate; invitations to confirm interest*

1. In restricted procedures, innovation partnerships and negotiated procedures with prior call for competition, contracting entities shall simultaneously and in writing invite the selected candidates to submit their tenders or to negotiate.

Where a periodic indicative notice is used as a call for competition pursuant to point (a) of Article 39(2), contracting entities shall simultaneously and in writing invite the economic operators having expressed their interest to confirm their continuing interest.

2. The invitations referred to in paragraph 1 shall include a reference to the electronic address on which the specifications and any other supporting document have been made directly available by electronic means. In addition, they shall include the information set out in Annex XIII.

#### *Article 69*

##### *Informing applicants for qualification, candidates and tenderers*

1. Contracting entities shall as soon as possible inform each candidate and tenderer of decisions reached concerning the conclusion of a framework agreement, the award of the contract, or admission to a dynamic purchasing system, including the grounds for any decision not to conclude a framework agreement or award a contract for which there has been a call for competition or to recommence the procedure, or not to implement a dynamic purchasing system.
2. On request from the party concerned, contracting entities shall, as soon as possible, and in any case within 15 days from receipt of a written request, inform:
  - (a) any unsuccessful candidate of the reasons for the rejection of its request to participate;
  - (b) any unsuccessful tenderer of the reasons for the rejection of its tender, including, for the cases referred to in Article 54(5) and (6), the reasons for their decision of non-equivalence or their decision that the works, supplies or services do not meet the performance or functional requirements;
  - (c) any tenderer that has made an admissible tender of the characteristics and relative advantages of the tender selected, as well as the name of the successful tenderer or the parties to the framework agreement;
  - (d) any tenderer that has made an admissible tender of the conduct and progress of negotiations and dialogue with tenderers.

3. Contracting entities may decide that certain information on the contract award or the conclusion of the framework agreement or the admission to a dynamic purchasing system, referred to in paragraph 1, is to be withheld where its release would impede law enforcement or otherwise be contrary to the public interest or would prejudice the legitimate commercial interests of a particular economic operator, public or private, including the interests of the economic operator to whom the contract has been awarded, or might prejudice fair competition between economic operators.
4. Contracting entities which establish and operate a system of qualification shall inform applicants of their decision as to qualification within a period of six months.  
  
If the decision will take longer than four months from the presentation of an application, the contracting entity shall inform the applicant, within two months of the application, of the reasons justifying the longer period and of the date by which his application will be accepted or refused.
5. Applicants whose qualification is refused shall be informed of this decision and the reasons for refusal as soon as possible and under no circumstances more than 15 days later than the date of the decision. The reasons shall be based on the criteria for qualification referred to in Article 71(2).
6. Contracting entities which establish and operate a system of qualification may bring the qualification of an economic operator to an end only for reasons based on the criteria for qualification referred to in Article 71(2). Any intention to bring qualification to an end shall be notified in writing to the economic operator beforehand, at least 15 days before the date on which qualification is due to end, together with the reason or reasons justifying the proposed action.

### **SECTION 3**

#### **CHOICE OF PARTICIPANTS AND AWARD OF CONTRACTS**

##### *Article 70*

##### *General principles*

1. For the purpose of selecting participants in their procurement procedures, the following cumulative rules apply:
  - (a) contracting entities having provided rules and criteria for the exclusion of tenderers or candidates in accordance with Article 72(1) or Article 74(2) shall exclude economic operators identified in accordance with such rules and fulfilling such criteria;
  - (b) they shall select tenderers and candidates in accordance with the objective rules and criteria laid down pursuant to Articles 72 and 74;
  - (c) in restricted procedures, in negotiated procedures with a call for competition and in innovation partnerships, they shall where appropriate reduce in accordance with Article 72(2) the number of candidates selected pursuant to points (a) and (b) of this paragraph.

2. When a call for competition is made by means of a notice on the existence of a qualification system and for the purpose of selecting participants in procurement procedures for the specific contracts which are the subject of the call for competition, contracting entities shall:
  - (a) qualify economic operators in accordance with Article 71;
  - (b) apply to such qualified economic operators those provisions of paragraph 1 that are relevant to restricted or negotiated procedures or to innovation partnerships.
3. When selecting participants for a restricted or negotiated procedure or an innovation partnership, in reaching their decision as to qualification or when the criteria and rules are being updated, contracting entities shall not:
  - (a) impose administrative, technical or financial conditions on certain economic operators which would not be imposed on others;
  - (b) require tests or evidence which would duplicate objective evidence already available.
4. Contracting entities shall verify that the tenders submitted by the selected tenderers comply with the rules and requirements applicable to tenders and award the contract on the basis of the criteria laid down in Articles 76 and 79, taking into account Article 58.
5. Contracting entities may decide not to award a contract to the tenderer submitting the best tender where they have established that the tender does not comply, at least in an equivalent manner, with obligations established by Union legislation in the field of social and labour law or environmental law or of the international social and environmental law provisions listed in Annex XIV.
6. In open procedures, contracting entities may decide to examine tenders before verifying the suitability of tenderers, provided that the relevant provisions of Articles 70 to 79 are observed, including the rule that the contract shall not be awarded to a tenderer who should have been excluded pursuant to Article 74 or who does not meet the selection criteria set out by the contracting entity in accordance with Article 72(1) and Article 74.
7. The Commission shall be empowered to adopt delegated acts in accordance with Article 98 to amend the list in Annex XIV, where necessary due to the conclusion of new international agreements or modification of existing international agreements.

## **SUBSECTION 1**

### **QUALIFICATION AND QUALITATIVE SELECTION**

#### *Article 71*

#### *Qualification systems*

1. Contracting entities which so wish may establish and operate a system of qualification of economic operators.

Contracting entities which establish or operate a system of qualification shall ensure that economic operators are at all times able to request qualification.

2. The system under paragraph 1 may involve different qualification stages.

Contracting entities shall establish objective rules and criteria for the exclusion and selection of economic operators requesting qualification and objective criteria and rules for the operation of the qualification system, covering matters such as inscription in the system, periodic updating of the qualifications, if any, and the duration of the system.

Where those criteria and rules include technical specifications, Articles 54 to 56 shall apply. The criteria and rules may be updated as required.

3. The criteria and rules referred to in paragraph 2 shall be made available to economic operators on request. Those those updated criteria and rules shall be communicated to interested economic operators.

Where a contracting entity considers that the qualification system of certain other entities or bodies meets its requirements, it shall communicate to interested economic operators the names of such other entities or bodies.

4. A written record of qualified economic operators shall be kept; it may be divided into categories according to the type of contract for which the qualification is valid.
5. When a call for competition is made by means of a notice on the existence of a qualification system, specific contracts for the works, supplies or services covered by the qualification system shall be awarded by restricted procedures or negotiated procedures, in which all tenderers and participants are selected among the candidates already qualified in accordance with such a system.
6. Any charges that are billed in connection with requests for qualification or with updating or conserving an already obtained qualification pursuant to the system shall be proportionate to the generated costs.

#### *Article 72*

##### *Criteria for qualitative selection*

1. Contracting entities may establish objective rules and criteria for the exclusion and selection of tenderers or candidates; those rules and criteria shall be available to interested economic operators.
2. Where contracting entities need to ensure an appropriate balance between the particular characteristics of the procurement procedure and the resources required to conduct it, they may, in restricted or negotiated procedures or in innovation partnerships, establish objective rules and criteria that reflect this need and enable the contracting entity to reduce the number of candidates that will be invited to tender or to negotiate. The number of candidates selected shall, however, take account of the need to ensure adequate competition.

*Article 73*  
*Reliance on the capacities of other entities*

1. Where the objective rules and criteria for the exclusion and selection of economic operators requesting qualification in a qualification system include requirements relating to the economic and financial capacity of the economic operator, or to its technical and professional abilities, the economic operator may where necessary rely on the capacity of other entities, whatever the legal nature of the link between itself and those entities. In this case the economic operator shall prove to the contracting entity that those resources will be available to it throughout the period of the validity of the qualification system, for example by producing an undertaking by those entities to that effect. In the case of economic and financial standing, contracting entities may require that the economic operator and those entities are jointly liable for the execution of the contract.

Under the same conditions, a group of economic operators as referred to in Article 30 may rely on the capacity of participants in the group or of other entities.

2. Where the objective rules and criteria for the exclusion and selection of candidates and tenderers in open, restricted or negotiated procedures or in innovation partnerships include requirements relating to the economic and financial capacity of the economic operator, or to its technical and professional abilities the economic operator may where necessary and for a particular contract rely on the capacity of other entities, whatever the legal nature of the link between itself and those entities. In this case the economic operator shall prove to the contracting entity that the necessary resources will be available to it, for example by delivering an undertaking by those entities to that effect. In the case of economic and financial standing, contracting entities may require that the economic operator and those entities are jointly liable for the execution of the contract.

Under the same conditions, a group of economic operators as referred to in Article 30 may rely on the capacities of participants in the group or of other entities.

3. In the case of works contracts, service contracts and siting and installation operations in the context of a supply contract, contracting entities may require that certain critical tasks be performed directly by the tenderer itself or, where a tender is submitted by a group of economic operators as referred to in Article 30, a participant in the group.

*Article 74*

*Use of exclusion grounds and selection criteria provided for under [Directive 2004/18]*

1. The objective rules and criteria for the exclusion and selection of economic operators requesting qualification in a qualification system and the objective rules and criteria for the exclusion and selection of candidates and tenderers in open, restricted or negotiated procedures or in innovation partnerships may include the exclusion grounds listed in Article 55 of Directive 2004/18 on the terms and conditions set out therein.

Where the contracting entity is a contracting authority, those criteria and rules shall include the exclusion grounds listed in Article 55(1) and (2) of Directive 2004/18 on the terms and conditions set out in that Article.

2. The criteria and rules referred to in paragraph 1 may include the selection criteria set out in Article 56 of Directive 2004/18/EC on the terms and conditions set out therein, notably as regards the limits to requirements concerning yearly turnovers, as provided for under the second subparagraph of paragraph 3 of that Article.
3. For the purpose of applying paragraphs 1 and 2 of this Article, Articles 57 to 60 of Directive 2004/18/EC shall apply.

#### *Article 75*

##### *Quality assurance standards and environmental management standards*

1. Where they request the production of certificates drawn up by independent bodies attesting that the economic operator complies with certain quality assurance standards, including on accessibility for disabled persons, contracting entities shall refer to quality assurance systems based on the relevant European standards series certified by bodies conforming to the European standards series concerning certification.

Contracting entities shall recognise equivalent certificates from bodies established in other Member States. They shall also accept other evidence of equivalent quality assurance measures from economic operators that have no access to such certificates, or no possibility of obtaining them within the relevant time limits.

2. Where contracting entities require the production of certificates drawn up by independent bodies attesting that the economic operator complies with certain environmental management schemes or standards, they shall refer to the European Union Eco-Management and Audit Scheme (EMAS) or to other environmental management schemes as recognized in accordance with Article 45 of Regulation (EC) No 1221/2009 of the European Parliament and of the Council<sup>49</sup> or other environmental management standards based on the relevant European or international standards by accredited bodies.

Contracting entities shall recognise equivalent certificates from bodies established in other Member States. They shall also accept other evidence of equivalent environmental management measures from economic operators that have no access to such certificates, or no possibility of obtaining them within the relevant time limits.

3. Upon request, Member States shall make available to other Member States, in accordance with Article 97, any information relating to the documents produced as evidence of compliance with quality and environmental standards referred to in paragraphs 1 and 2 of this Article.

---

<sup>49</sup> OJ L 342, 22.12.2009, p. 1.

## SUBSECTION 2 AWARD OF THE CONTRACT

### *Article 76 Contract award criteria*

1. Without prejudice to national laws, regulations or administrative provisions on the remuneration of certain services, the criteria on which contracting entities shall base the award of contracts shall be one of the following:

- (a) the most economically advantageous tender;
- (b) the lowest cost.

Costs may be assessed, at the choice of the contracting entity, on the basis of the price only or using a cost-effectiveness approach, such as a life-cycle costing approach, under the conditions set out in Article 77.

2. The most economically advantageous tender referred to in point (a) of paragraph 1) from the point of view of the contracting entity shall be identified on the basis of criteria linked to the subject-matter of the contract in question.

Those criteria shall include in addition to the price or costs referred to in point (b) of paragraph 1, other criteria linked to the subject-matter of the contract in question, such as:

- (a) quality, including technical merit, aesthetic and functional characteristics, accessibility, design for all users, environmental characteristics and innovative character;
- (b) for service contracts and contracts involving the design of works, the organisation, qualification and experience of the staff assigned to performing the contract in question may be taken into consideration, with the consequence that, following the award of the contract, such staff may only be replaced with the consent of the contracting entity which must verify that replacements ensure equivalent organisation and quality;
- (c) after-sales service and technical assistance, delivery date and delivery period or period of completion, commitments with regard to parts and security of supply;
- (d) the specific process of production or provision of the requested works, supplies or services or of any other stage of its life cycle, as referred to in point 22 of Article 2, to the extent that those criteria are specified in accordance with paragraph 4 and they concern factors directly involved in those processes and characterise the specific process of production or provision of the requested works, supplies or services.

3. Member States may provide that the award of certain types of contracts shall be based on the most economically advantageous tender referred to in point (a) of paragraph 1 and in paragraph 2.

4. Award criteria shall not confer an unrestricted freedom of choice on the contracting entity. They shall ensure the possibility of effective competition and shall be accompanied by requirements which allow the information provided by the tenderers to be effectively verified. Contracting entities shall verify effectively, on the basis of the information and proof provided by the tenderers, whether the tenders meet the award criteria.
5. In the case referred to in point (a) of paragraph 1, the contracting entity shall specify the relative weighting which it gives to each of the criteria chosen to determine the most economically advantageous tender.

Those weightings may be expressed by providing for a range with an appropriate maximum spread.

Where weighting is not possible for objective reasons, the contracting entity shall indicate the criteria in descending order of importance.

The relative weighting or order of importance shall be specified, as appropriate, in the notice used as a means of calling for competition, in the invitation to confirm interest, in the invitation to tender or to negotiate, or in the specifications.

#### *Article 77* *Life-cycle costing*

1. Life-cycle costing shall to the extent relevant cover the following costs over the life cycle of a product, service or works as defined in point 22 of Article 2:
  - (a) internal costs, including costs relating to acquisition, such as production costs, use, such as energy consumption, maintenance costs and end of life, such as collection and recycling costs and
  - (b) external environmental costs directly linked to the life cycle, provided their monetary value can be determined and verified, which may include the cost of emissions of greenhouse gases and of other pollutant emissions and other climate change mitigation costs.
2. Where contracting entities assess the costs using a life-cycle costing approach, they shall indicate in the procurement documents the methodology used for the calculation of the life-cycle costs. The methodology used must fulfil all of the following conditions:
  - (a) it has been drawn up on the basis of scientific information or is based on other objectively verifiable and non-discriminatory criteria;
  - (b) it has been established for repeated or continuous application;
  - (c) it is accessible to all interested parties.

Contracting entities shall allow economic operators, including economic operators from third countries, to apply a different methodology for establishing the life-cycle costs of their offer, provided that they prove that this methodology complies with the

requirements set out in points a, b and c and is equivalent to the methodology indicated by the contracting entity.

3. Whenever a common methodology for the calculation of life-cycle costs is adopted as part of a legislative act of the Union, including by delegated acts pursuant to sector specific legislation, it shall be applied where life-cycle costing is included in the award criteria referred to in Article 76 (1).

A list of such legislative and delegated acts is set out in Annex XV. The Commission, shall be empowered to adopt delegated acts in accordance with Article 98 concerning the update of this list, when on the basis of the adoption of new legislation, repeal or modification of such legislation, such amendments prove necessary.

#### *Article 78 Impediments to award*

Contracting entities shall not conclude the contract with a successful tenderer where one of the following conditions is fulfilled:

- (a) the tenderer is not able to provide the certificates and documents required pursuant to Article 74(3);
- (b) the declaration provided by the tenderer pursuant to Article 37 is false;
- (c) the declaration provided by the tenderer pursuant to Article 36(3)(b) is false.

#### *Article 79 Abnormally low tenders*

1. The contracting entity shall request economic operators to explain the price or costs charged, where all of the following conditions are fulfilled:
  - (a) the price or cost charged is more than 50 % lower than the average price or costs of the remaining tenders;
  - (b) the price or cost charged is more than 20 % lower than the price or costs of the second lowest tender;
  - (c) at least five tenders have been submitted.
2. Where tenders appear to be abnormally low for other reasons, contracting entities may also request such explanations.
3. The explanations referred to in paragraphs 1 and 2 may in particular relate to:
  - (a) the economics of the manufacturing process, of the services provided and of the construction method;

- (b) the technical solutions chosen or any exceptionally favourable conditions available to the tenderer for the supply of the goods or services or for the execution of the work;
  - (c) the originality of the supplies, services or work proposed by the tenderer;
  - (d) compliance, at least in an equivalent manner, with obligations established by Union legislation in the field of social and labour law or environmental law or of the international social and environmental law provisions listed in Annex XIV or, where not applicable, with other provisions ensuring an equivalent level of protection;
  - (e) the possibility of the tenderer obtaining State aid.
4. The contracting entity shall verify the information provided by consulting the tenderer.
- It may only reject the tender where the evidence does not justify the low level of price or costs charged, taking into account the elements referred to in paragraph 3.
- Contracting entities shall reject the tender, where they have established that the tender is abnormally low because it does not comply with obligations established by Union legislation in the field of social and labour law or environmental law or by the international social and environmental law provisions listed in Annex XIV.
5. Where a contracting entity establishes that a tender is abnormally low because the tenderer has obtained State aid, the tender may be rejected on that ground alone only after consultation with the tenderer where the latter is unable to prove, within a sufficient time limit fixed by the contracting entity, that the aid in question was compatible with the internal market within the meaning of Article 107 of the Treaty. Where the contracting entity rejects a tender in those circumstances, it shall inform the Commission thereof.
6. Upon request, Member States shall make available to other Member States, in accordance with Article 97, any information relating to the evidence and documents produced in relation to details listed in paragraph 3.

## **Chapter IV**

### **Contract performance**

#### *Article 80*

#### *Conditions for performance of contracts*

Contracting entities may lay down special conditions relating to the performance of a contract, provided that they are indicated in the call for competition or in the specifications. Those conditions may, in particular, concern social and environmental considerations. They may also include the requirement that economic operators foresee compensations for risks of price increases that are the result of price fluctuations (hedging) and that could substantially impact the performance of a contract.

*Article 81*  
*Subcontracting*

1. In the procurement documents, the contracting entity may ask, or may be required by a Member State to ask, the tenderer to indicate in its tender any share of the contract it may intend to subcontract to third parties and any proposed subcontractors.
2. Member States may provide that, at the request of the subcontractor and where the nature of the contract so allows, the contracting entity shall transfer due payments directly to the subcontractor for services, supplies or works provided to the main contractor. In such case, Member States shall put in place appropriate mechanisms permitting the main contractor to object to undue payments. The arrangements concerning that mode of payment shall be set out in the procurement documents.
3. Paragraphs 1 and 2 shall be without prejudice to the question of the principal economic operator's liability.

*Article 82*  
*Modification of contracts during their term*

1. A substantial modification of the provisions of a works, supply or service contract during its term shall be considered as a new award for the purposes of this Directive and shall require a new procurement procedure in accordance with this Directive.
2. A modification of a contract during its term shall be considered substantial within the meaning of paragraph 1, where it renders the contract substantially different from the one initially concluded. In any case, without prejudice to paragraph 3 and 4, a modification shall be considered substantial where one of the following conditions is met:
  - (a) the modification introduces conditions which, had they been part of the initial procurement procedure, would have allowed for the selection of other candidates than those initially selected or would have allowed for awarding the contract to another tenderer;
  - (b) the modification changes the economic balance of the contract in favour of the contractor;
  - (c) the modification extends the scope of the contract considerably to encompass supplies, services or works not initially covered.
3. The replacement of the contractual partner shall be considered a substantial modification within the meaning of paragraph 1.

However, the first subparagraph shall not apply in the event of universal or partial succession into the position of the initial contractor, following corporate restructuring operations or insolvency, of another economic operator that fulfils the criteria for qualitative selection initially established provided that this does not entail other substantial modifications to the contract and is not aimed at circumventing the application of this Directive.

4. Where the value of a modification can be expressed in monetary terms, the modification shall not be considered to be substantial within the meaning of paragraph 1, where its value does not exceed the thresholds set out in Article 12 and where it is below 5% of the price of the initial contract, provided that the modification does not alter the overall nature of the contract. Where several successive modifications are made, the value shall be assessed on the basis of the cumulative value of the successive modifications.
5. Contract modifications shall not be considered substantial within the meaning of paragraph 1 where they have been provided for in the procurement documents in clear, precise and unequivocal review clauses or options. Such clauses shall state the scope and nature of possible modifications or options as well as the conditions under which they may be used. They shall not provide for modifications or options that would alter the overall nature of the contract.
6. By way of derogation from paragraph 1, a substantial modification shall not require a new procurement procedure where the following cumulative conditions are fulfilled:
  - (a) the need for modification has been brought about by circumstances which a diligent contracting entity could not foresee;
  - (b) the modification does not alter the overall nature of the contract.

Contracting entities shall publish in the *Official Journal of the European Union* a notice on such modifications. Such notices shall contain the information set out in Annex XVI and be published in accordance with Article 65.

7. Contracting entities shall not have recourse to modifications of the contract in the following cases:
  - (a) where the modification would aim at remedying deficiencies in the performance of the contractor or the consequences, which can be remedied through the enforcement of contractual obligations;
  - (b) where the modification would aim at compensating risks of price increases that have been hedged by the contractor.

### *Article 83* *Termination of contracts*

Member States shall ensure that contracting entities have the possibility, under the conditions determined by the applicable national contract law, to terminate a works, supply or service contract during its term, where one of the following conditions is fulfilled:

- (a) the exceptions provided for in Article 21 cease to apply following a private participation in the legal person awarded the contract pursuant to Article 21 (4);
- (b) a modification of the contract constitutes a new award within the meaning of Article 82;

- (c) the Court of Justice of the European Union finds, in a procedure under Article 258 of the Treaty, that a Member State has failed to fulfil its obligations under the Treaties due to the fact that a contracting entity belonging to that Member State has awarded the contract in question without complying with its obligations under the Treaties and this Directive.

# TITLE III

## PARTICULAR PROCUREMENT REGIMES

### CHAPTER I

#### *Social and other specific services*

##### *Article 84*

###### *Award of contracts for social and other specific services*

Contracts for social and other specific services listed in Annex XVII shall be awarded in accordance with this Chapter where the value of the contracts is equal to or greater than the threshold indicated in Article 12(c).

##### *Article 85*

###### *Publication of notices*

1. Contracting entities intending to award a contract for the services referred to in Article 84 shall make known their intention by means of a contract notice.
2. Contracting entities that have awarded a contract for the services referred to in Article 84 shall make known the results by means of contract award notice.
3. The notices referred to in paragraphs 1 and 2 shall contain the information referred to in Annex XVIII in accordance with the standard model notices. The Commission shall establish the standard forms. Those implementing acts shall be adopted in accordance with the advisory procedure referred to in Article 100.
4. The notices referred to in paragraphs 1 and 2 shall be published in accordance with Article 65.

##### *Article 86*

###### *Principles of awarding contracts*

1. Member States shall put in place appropriate procedures for the award of contracts subject to this Chapter, ensuring full compliance with the principles of transparency and equal treatment of economic operators and allowing contracting entities to take into account the specificities of the services in question.
2. Member States shall ensure that contracting entities may take into account the need to ensure quality, continuity, accessibility, availability and comprehensiveness of the services, the specific needs of different categories of users, the involvement and empowerment of users and innovation. Member States may also provide that the choice of the service provider shall not be made solely on the basis of the price for the provision of the service.

## **CHAPTER II**

# **RULES GOVERNING DESIGN CONTESTS**

### *Article 87* *General provisions*

1. The rules for the organisation of design contests shall be in conformity with this Chapter and shall be made available to those interested in participating in the contest.
2. The admission of participants to design contests shall not be limited:
  - (a) by reference to the territory or part of the territory of a Member State;
  - (b) on the grounds that, under the law of the Member State in which the contest is organised, they would be required to be either natural or legal persons.

### *Article 88* *Scope*

1. This Chapter shall apply to design contests organised as part of a procurement procedure for a service contract, provided that the estimated value of the contract, net of VAT, and including any possible prizes or payments to participants, is equal to or greater than the amount set out in point (a) of Article 12.
2. This Chapter shall apply to all design contests where the total amount of contest prizes and payments to participants, including the estimated value net of VAT of the service contract which might subsequently be concluded under point (k) of Article 44 if the contracting entity does not exclude such an award in the contest notice, is equal to or greater than the amount set out in point (a) of Article 12.

### *Article 89* *Notices*

1. Contracting entities that intend to organise a design contest shall call for competition by means of a contest notice. Where they intend to award a subsequent service contract pursuant to point (k) of Article 44, this shall be indicated in the design contest notice. Contracting entities that have held a design contest shall make the results known by means of a notice.
2. The call for competition shall include the information set out in Annex XIX and the notice of the results of a design contest shall include the information set out in Annex XX in the format of standard forms. The Commission shall establish the standard forms. Those implementing acts shall be adopted in accordance with the advisory procedure referred to in Article 100.

The notice of the results of a design contest shall be forwarded to the Commission within two months of the closure of the design contest.

Where release of information on the outcome of the contest would impede law enforcement or otherwise be contrary to the public interest or would prejudice the legitimate commercial interests of a particular economic operator, public or private, including the interests of the economic operator to whom the contract has been awarded, or might prejudice fair competition between economic operators, such information may be withheld from publication.

3. Paragraphs (2) to (6) of Article 65 shall also apply to notices relating to design contests.

#### *Article 90*

##### *Rules on the organisation of design contests, the selection of participants and the jury*

1. When organising design contests, contracting entities shall apply procedures which are adapted to this Directive.
2. Where design contests are restricted to a limited number of participants, contracting entities shall establish clear and non-discriminatory selection criteria. In any event, the number of candidates invited to participate shall be sufficient to ensure genuine competition.
3. The jury shall be composed exclusively of natural persons who are independent of participants in the contest. Where a particular professional qualification is required of participants in a contest, at least a third of the jury members shall have the same qualification or an equivalent qualification.

#### *Article 91*

##### *Decisions of the jury*

1. The jury shall be autonomous in its decisions or opinions.
2. The jury shall examine the plans and projects submitted by the candidates anonymously and solely on the basis of the criteria indicated in the contest notice.
3. The jury shall record its ranking of projects in a report, signed by its members, made according to the merits of each project, together with its remarks and any points that may need clarification.
4. Anonymity shall be observed until the jury has reached its opinion or decision.
5. Candidates may be invited, if need be, to answer questions that the jury has recorded in the minutes to clarify any aspects of the projects.
6. Complete minutes shall be drawn up of the dialogue between jury members and candidates.

# TITLE IV

## GOVERNANCE

### *Article 92* *Enforcement*

In conformity with Council Directive 92/13/EEC, Member States shall ensure correct application of this Directive by effective, available and transparent mechanisms which complement the system in place for the review of decisions taken by contracting entities.

### *Article 93* *Public oversight*

1. Member States shall appoint a single independent body responsible for the oversight and coordination of implementation activities (hereinafter "the oversight body"). Member States shall inform the Commission of their designation.

All contracting entities shall be subject to such oversight.

2. The competent authorities involved in the implementation activities shall be organised in such a manner that conflicts of interests are avoided. The system of public oversight shall be transparent. For this purpose, all guidance and opinion documents and an annual report illustrating the implementation and application of rules laid down in this Directive shall be published.

The annual report shall include the following:

- (a) an indication of the success rate of small and medium-sized enterprises (SMEs) in procurement; where the percentage is lower than 50 % in terms of values of contracts awarded to SMEs, the report shall provide an analysis of the reasons therefore;
  - (b) a global overview of the implementation of sustainable procurement policies, including on procedures taking into account considerations linked to the protection of the environment, social inclusion including accessibility for persons with disabilities or fostering innovation;
  - (c) centralized data about reported cases of fraud, corruption, conflict of interests and other serious irregularities in the field of public procurement, including those affecting projects cofinanced by the budget of the Union.
3. The oversight body shall be responsible for the following tasks:
  - (a) monitoring the application of public procurement rules and the related practice by contracting entities and in particular by central purchasing bodies;

- (b) providing legal advice to contracting entities on the interpretation of public procurement rules and principles and on the application of public procurement rules in specific cases;
- (c) issuing own initiative opinions and guidance on questions of general interest pertaining to the interpretation and application of public procurement rules, on recurring questions and on systemic difficulties related to the application of public procurement rules, in the light of the provisions of this Directive and of the relevant case-law of the Court of Justice of the European Union;
- (d) establishing and applying comprehensive, actionable 'red flag' indicator systems to prevent, detect and adequately report instances of procurement fraud, corruption, conflict of interest and other serious irregularities;
- (e) drawing the attention of the national competent institutions, including auditing authorities, to specific violations detected and to systemic problems;
- (f) examining complaints from citizens and businesses on the application of public procurement rules in specific cases and transmitting the analysis to the competent contracting entities, which shall have the obligation to take it into account in their decisions or, where the analysis is not followed, to explain the reasons for disregarding it;
- (g) monitoring the decisions taken by national courts and authorities following a ruling given by the Court of Justice of the European Union on the basis of Article 267 of the Treaty or findings of the European Court of Auditors establishing violations of Union public procurement rules related to projects cofinanced by the Union; the oversight body shall report to the European Anti-Fraud Office any infringement to Union procurement procedures where these were related to contracts directly or indirectly funded by the European Union.

The tasks referred to in point (e) shall be without prejudice to the exercise of rights of appeal under national law or under the system established on the basis of directive 92/13/EEC.

Member States shall empower the oversight body to seize the jurisdiction competent according to national law for the review of contracting entities' decisions where it has detected a violation in the course of its monitoring and legal advising activity.

4. Without prejudice to the general procedures and working methods established by the Commission for its communications and contacts with Member States, the oversight body shall act as a specific contact point for the Commission when it monitors the application of Union law and the implementation of the budget from the Union on the basis of Article 17 of the Treaty on the European Union and Article 317 of the Treaty on the Functioning of the European Union. It shall report to the Commission any violation of this Directive in procurement procedures for the award of contracts directly or indirectly funded by the Union.

The Commission may in particular refer to the oversight body the treatment of individual cases where the contract is not yet concluded or a review procedure can still be carried out. It may also entrust the oversight body with the monitoring

activities necessary to ensure the implementation of the measures to which Member States are committed in order to remedy a violation of Union public procurement rules and principles identified by the Commission.

The Commission may require the oversight body to analyse alleged breaches to Union public procurement rules affecting projects co-financed by the budget of the Union. The Commission may entrust the oversight body to follow-up certain cases and to ensure that the appropriate consequences of breaches to Union public procurement rules affecting projects co-financed are taken by the competent national authorities which will be obliged to follow its instructions.

5. The investigation and enforcement activities carried out by the oversight body to ensure that contracting entities' decisions comply with this Directive and the general principles of the Treaty on the Functioning of the European Union shall not replace or prejudice the institutional role of the Commission as guardian of the Treaty. When the Commission decides to refer the treatment of an individual case, it shall also retain the right to intervene in accordance with the powers conferred to it by the Treaty.
6. Contracting authorities shall transmit to the national oversight body the full text of all concluded contracts with a value equal to or greater than
  - (a) 1 000 000 EUR in the case of supply contracts or service contracts;
  - (b) 10 000 000 EUR in the case of works contracts.
7. Without prejudice to the national law concerning access to information, and in accordance with national and EU legislation on data protection, the oversight body shall, upon written request, give unrestricted and full direct access, free of charge, to the concluded contracts referred to in paragraph 6. Access to certain parts of the contracts may be refused where their disclosure would impede law enforcement or otherwise be contrary to the public interest, would harm the legitimate commercial interests of economic operators, public or private, or might prejudice fair competition between them.

Access to the parts that may be released shall be given within a reasonable delay and no later than 45 days from the date of the request.

The applicants filing a request for access to a contract shall not need to show any direct or indirect interest related to that particular contract. The recipient of information should be allowed to make it public.

8. A summary of all the activities carried out by the oversight body in accordance with paragraphs 1 to 7 shall be included in the annual report mentioned in paragraph 2.

#### *Article 94*

##### *Individual reports on procedures for the award of contracts*

1. Contracting entities shall keep appropriate information on each contract, framework agreement and each time a dynamic purchasing system is established. This

information shall be sufficient to permit them at a later date to justify decisions taken in connection with:

- (a) the qualification and selection of economic operators and the award of contracts;
- (b) the use of negotiated procedures without a call for competition by virtue of Article 44;
- (c) the non-application of Chapters II to IV of Title II by virtue of the derogations provided for in Chapters II and III of Title I.

Contracting entities shall document the progress of all procurement procedures, whether or not the procedures are conducted by electronic means. To that end, they shall document all stages in the procurement procedure, including all communications with economic operators and internal deliberations, preparation of the tenders, dialogue or negotiation if any, selection and award of the contract.

2. The information shall be kept for at least four years from the date of award of the contract so that the contracting entity will be able, during that period, to provide the necessary information to the Commission or the national oversight body where they so request it.

#### *Article 95* *National reporting*

1. The bodies established or appointed in accordance with Article 93 shall forward to the Commission an implementation and statistical report on each year, based on a standard form, not later than 31 October of the following year.
2. The report referred to in paragraph 1 shall contain at least the total value, broken down by category of activity to which Articles 5 to 11 refer, of the contracts awarded below the thresholds set out in Article 12 but which would be covered by this Directive if their value exceeded the threshold.
3. Member States shall ensure that this report contains at least the number and value of contracts awarded, broken down by categories of activity to which Articles 5 to 11 refer and any other information required to verify the proper application of the Agreement. This shall include the number and value of contracts awarded pursuant to a negotiated procedure without a call for competition, broken down according to the circumstances referred to in Article 44 and by categories of activity to which Articles 5 to 11 refer. It shall also specify the Member State or third country of the successful contractor.
4. The yearly report shall furthermore, for each of the activities to which Articles 5 to 11 refers, contain a list of contracting entities exercising the activity concerned, indicating for each entity the unique identification number where such number is provided for in national legislation.

The Commission may periodically publish the list of those contracting entities for information in the *Official Journal of the European Union*.

5. The Commission shall establish the standard form for the drawing-up of the annual implementation and statistical report referred to in paragraph 1. Those implementing acts shall be adopted in accordance with the advisory procedure referred to in Article 100.
6. The acts referred to under paragraph 5 shall ensure that:
  - (a) in the interests of administrative simplification, the statistical data may be collected on the basis of sampling, provided that its representativeness is not jeopardised;
  - (b) the confidential nature of the information provided is respected.

#### *Article 96*

##### *Assistance to contracting entities and businesses*

1. Member States shall make available technical support structures in order to provide legal and economic advice, guidance and assistance to contracting entities in preparing and carrying out procurement procedures. Member States shall also ensure that each contracting entity can obtain competent assistance and advice on individual questions.
2. With a view to improving access to public procurement for economic operators, in particular SMEs, and in order to facilitate correct understanding of the provisions of this Directive, Member States shall ensure that appropriate assistance can be obtained, including by electronic means or using existing networks dedicated to business assistance.
3. Specific administrative assistance shall be available to economic operators intending to participate in a procurement procedure in another Member State. Such assistance shall at least cover administrative requirements in the Member State concerned, as well as possible obligations related to electronic procurement.

Member States shall ensure that interested economic operators have easy access to appropriate information on the obligations relating to taxes, environmental protection and to social and labour law obligations, which are in force in the Member State, in the region or locality where the works are to be carried out or the services are to be provided and which will be applicable to the works carried out on site or to the services provided during the performance of the contract.

4. For the purposes of paragraphs 1, 2 and 3, Member States may appoint a single body or several bodies or administrative structures. Member States shall ensure case due coordination between those bodies and structures.

#### *Article 97*

##### *Administrative cooperation*

1. Member States shall provide mutual assistance to each other, and shall put in place measures for effective cooperation with one another, in order to ensure exchange of

information on issues referred to in Articles 56, 75 and 79. They shall ensure the confidentiality of the information which they exchange.

2. The competent authorities of all Member States concerned shall exchange information in compliance with personal data protection legislation provided for in Directives 95/46/EC of the European Parliament and of the Council<sup>50</sup> and 2002/58/EC of the European Parliament and of the Council<sup>51</sup>.
3. For the purposes of this Article, Member States shall designate one or more liaison points, the contact details of which shall be communicated to the other Member States, the oversight bodies and the Commission. Member States shall publish and regularly update the list of liaison points. The oversight body shall be in charge of the coordination of such liaison points.
4. The exchange of information shall take place via the Internal Market Information system established pursuant to Regulation (EU) N° XXX/XXXX of the European Parliament and Council<sup>52</sup> [*proposal for a Regulation of the European Parliament and Council on the administrative cooperation through the Internal Market Information System ('the IMI Regulation') COM(2011)522*]. Member States shall supply information requested by other Member States within the shortest possible period of time.

# TITLE V

## DELEGATED POWERS, IMPLEMENTING POWERS AND FINAL PROVISIONS

### *Article 98*

#### *Exercise of the delegation*

1. The power to adopt delegated acts is conferred on the Commission subject to the conditions laid down in this Article.
2. The delegation of power referred to in Articles 4, 35, 33, 38, 25, 65, 70, 77, 85 and 95 shall be conferred on the Commission for an indeterminate period of time from the [date of entry into force of this Directive].
3. The delegation of power referred to in Articles 4, 35, 33, 38, 25, 65, 70, 77, 85 and 95 may be revoked at any time by the European Parliament or by the Council. A revocation decision shall put an end to the delegation of the power specified in that decision. It shall take effect the day following the publication of the decision in the *Official Journal of the European Union* or at a later date specified therein. It shall not affect the validity of any delegated acts already in force.
4. As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.
5. A delegated act adopted pursuant to Article 98 shall enter into force only if no objection has been expressed either by the European Parliament or by the Council within a period of 2 months of notification of the act to the European Parliament and the Council or if, before the expiry of that period, the European Parliament and the Council have both informed the Commission that they will not object. That period shall be extended by 2 months at the initiative of the European Parliament or the Council.

### *Article 99*

#### *Urgency procedure*

1. Delegated acts adopted under this Article shall enter into force without delay and shall apply as long as no objection is expressed in accordance with paragraph 2. The notification of a delegated act to the European Parliament and to the Council shall state the reasons for the use of the urgency procedure.
2. Either the European Parliament or the Council may object to a delegated act in accordance with the procedure referred to in Article 98(5). In such a case, the Commission shall repeal the act without delay following the notification of the decision to object by the European Parliament or the Council.

*Article 100*  
*Committee procedure*

1. The Commission shall be assisted by the Advisory Committee for Public Contracts established by Council Decision 71/306/EEC<sup>53</sup>. That committee shall be a committee within the meaning of Regulation (EU) No 182/2011.
2. Where reference is made to this Article, Article 4 of Regulation (EU) No 182/2011 shall apply.

*Article 101*  
*Transposition*

1. Member States shall bring into force the laws, regulations and administrative provisions necessary to comply with this Directive by 30 June 2014 at the latest. They shall forthwith communicate to the Commission the text of those provisions.

When Member States adopt those measures, they shall contain a reference to this Directive or be accompanied by such a reference on the occasion of their official publication. Member States shall determine how such reference is to be made.

2. Member States shall communicate to the Commission the text of the main provisions of national law which they adopt in the field covered by this Directive.

*Article 102*  
*Repeal*

Directive 2004/17/EC is hereby repealed with effect from 30 June 2014.

References to the repealed Directive shall be construed as being made to this Directive and shall be read in accordance with the correlation table in Annex XXI.

*Article 103*  
*Review*

The Commission shall review the economic effects on the internal market resulting from the application of the thresholds set in Article 12 and report thereon to the European Parliament and the Council by 30 June 2017.

In the event of any change to the threshold amounts applicable under the Agreement, the report shall, if appropriate, be followed by a legislative proposal amending the thresholds set out in this Directive.

---

<sup>53</sup> OJ L 185, 16.8.1971, p. 15

*Article 104*  
*Entry into force*

This Directive shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

*Article 105*  
*Addressees*

This Directive is addressed to the Member States.

Done at Brussels,

*For the European Parliament*  
*The President*

*For the Council*  
*The President*

**ANNEX I**  
**LIST OF ACTIVITIES AS SET OUT IN POINT 8(a) OF ARTICLE 2**

In the event of any difference of interpretation between the CPV and the NACE, the CPV nomenclature will apply.

NACE <sup>(1)</sup>					CPV code
SECTION F			CONSTRUCTION		
Division	Group	Class	Subject	Notes	
45			Construction	This division includes:  construction of new buildings and works, restoring and common repairs.	45000000
	45.1		Site preparation		45100000
		45.11	Demolition and wrecking of buildings; earth moving	This class includes:  — demolition of buildings and other structures,  — clearing of building sites,  — earth moving: excavation, landfill, levelling and grading of construction sites, trench digging, rock removal, blasting, etc.  — site preparation for mining:  — overburden removal and other development and preparation of mineral properties and sites.  This class also includes:  — building site drainage.  — drainage of agricultural or forestry land.	45110000
		45.12	Test drilling and boring	This class includes:  — test drilling, test boring and core sampling for construction, geophysical, geological or similar purposes.  This class excludes:  — drilling of production oil or gas wells, see 11.20.  — water well drilling, see 45.25,  — shaft sinking, see 45.25,  — oil and gas field exploration, geophysical, geological and seismic surveying, see 74.20.	45120000
	45.2		Building of complete constructions		45200000

			or parts thereof; civil engineering		
		45.21	General construction of buildings and civil engineering works	<p>This class includes:</p> <ul style="list-style-type: none"> <li>— construction of all types of buildings construction of civil engineering constructions,</li> <li>— bridges, including those for elevated highways, viaducts, tunnels and subways,</li> <li>— long-distance pipelines, communication and power lines,</li> <li>— urban pipelines, urban communication and power lines,</li> <li>— ancillary urban works,</li> <li>— assembly and erection of prefabricated constructions on the site.</li> </ul> <p>This class excludes:</p> <ul style="list-style-type: none"> <li>— service activities incidental to oil and gas extraction, see 11.20,</li> <li>— erection of complete prefabricated constructions from self-manufactured parts not of concrete, see divisions 20, 26 and 28,</li> <li>— construction work, other than buildings, for stadiums, swimming pools, gymnasiums, tennis courts, golf courses and other sports installations, see 45.23,</li> <li>— building installation, see 45.3,</li> <li>— building completion, see 45.4,</li> <li>— architectural and engineering activities, see 74.20,</li> <li>— project management for construction, see 74.20.</li> </ul>	<p>45210000</p> <p>Except:</p> <p>-</p> <p>45213316</p> <p>45220000</p> <p>45231000</p> <p>45232000</p>
		45.22	Erection of roof covering and frames	<p>This class includes:</p> <ul style="list-style-type: none"> <li>— erection of roofs,</li> <li>— roof covering,</li> <li>— waterproofing.</li> </ul>	45261000
		45.23	Construction of highways, roads, airfields and sport facilities	<p>This class includes:</p> <ul style="list-style-type: none"> <li>— construction of highways, streets, roads, other vehicular and pedestrian ways,</li> <li>— construction of railways,</li> <li>— construction of airfield runways,</li> <li>— construction work, other than buildings, for stadiums, swimming pools, gymnasiums, tennis courts, golf courses and</li> </ul>	<p>45212212 and DA03</p> <p>45230000</p> <p>except:</p> <p>-</p> <p>45231000</p> <p>-</p>

			<p>other sports installations,</p> <p>— painting of markings on road surfaces and car parks.</p> <p>This class excludes:</p> <p>— preliminary earth moving, see 45.11.</p>	<p>45232000</p> <p>-</p> <p>45234115</p>
		45.24	<p>Construction of water projects</p> <p>This class includes</p> <p>— construction of:</p> <p>— waterways, harbour and river works, pleasure ports (marinas), locks, etc.,</p> <p>— dams and dykes,</p> <p>— dredging,</p> <p>— subsurface work.</p>	45240000
		45.25	<p>Other construction work involving special trades</p> <p>This class includes:</p> <p>— construction activities specialising in one aspect common to different kinds of structures, requiring specialised skill or equipment,</p> <p>— construction of foundations, including pile driving,</p> <p>— water well drilling and construction, shaft sinking,</p> <p>— erection of non-self-manufactured steel elements,</p> <p>— steel bending,</p> <p>— bricklaying and stone setting,</p> <p>— scaffolds and work platform erecting and dismantling, including renting of scaffolds and work platforms,</p> <p>— erection of chimneys and industrial ovens.</p> <p>This class excludes:</p> <p>— renting of scaffolds without erection and dismantling, see 71.32</p>	<p>45250000</p> <p>45262000</p>
	45.3		Building installation	45300000
		45.31	<p>Installation of electrical wiring and fittings</p> <p>This class includes:</p> <p>installation in buildings or other construction projects of:</p> <p>— electrical wiring and fittings,</p> <p>— telecommunications systems,</p> <p>— electrical heating systems,</p> <p>— residential antennas and aerials,</p>	<p>45213316</p> <p>45310000</p> <p>Except:</p> <p>-</p> <p>45316000</p>

				<ul style="list-style-type: none"> <li>— fire alarms,</li> <li>— burglar alarm systems,</li> <li>— lifts and escalators,</li> <li>— lightning conductors, etc.</li> </ul>	
		45.32	Insulation work activities	<p>This class includes:</p> <ul style="list-style-type: none"> <li>— installation in buildings or other construction projects of thermal, sound or vibration insulation.</li> </ul> <p>This class excludes:</p> <ul style="list-style-type: none"> <li>— waterproofing, see 45.22.</li> </ul>	45320000
		45.33	Plumbing	<p>This class includes:</p> <ul style="list-style-type: none"> <li>— installation in buildings or other construction projects of:</li> <li>— plumbing and sanitary equipment,</li> <li>— gas fittings,</li> <li>— heating, ventilation, refrigeration or air-conditioning equipment and ducts,</li> <li>— sprinkler systems.</li> </ul> <p>This class excludes:</p> <ul style="list-style-type: none"> <li>— installation of electrical heating systems, see 45.31.</li> </ul>	45330000
		45.34	Other building installation	<p>This class includes:</p> <ul style="list-style-type: none"> <li>— installation of illumination and signalling systems for roads, railways, airports and harbours,</li> <li>— installation in buildings or other construction projects of fittings and fixtures n.e.c.</li> </ul>	45234115 45316000 45340000
	45.4		Building completion		45400000
		45.41	Plastering	<p>This class includes:</p> <ul style="list-style-type: none"> <li>— application in buildings or other construction projects of interior and exterior plaster or stucco, including related lathing materials.</li> </ul>	45410000
		45.42	Joinery installation	<p>This class includes:</p> <ul style="list-style-type: none"> <li>— installation of not self-manufactured doors, windows, door and window frames, fitted kitchens, staircases, shop fittings and the like, of wood or other materials,</li> <li>— interior completion such as ceilings, wooden wall coverings, movable partitions, etc.</li> </ul>	45420000

				<p>This class excludes:</p> <ul style="list-style-type: none"> <li>— laying of parquet and other wood floor coverings, see 45.43.</li> </ul>	
		45.43	Floor and wall covering	<p>This class includes:</p> <ul style="list-style-type: none"> <li>— laying, tiling, hanging or fitting in buildings or other construction projects of:</li> <li>—</li> <li>— ceramic, concrete or cut stone wall or floor tiles,</li> <li>— parquet and other wood floor coverings carpets and linoleum floor coverings,</li> <li>— including of rubber or plastic,</li> <li>— terrazzo, marble, granite or slate floor or wall coverings,</li> <li>— wallpaper.</li> </ul>	45430000
		45.44	Painting and glazing	<p>This class includes:</p> <ul style="list-style-type: none"> <li>— interior and exterior painting of buildings,</li> <li>— painting of civil engineering structures,</li> <li>— installation of glass, mirrors, etc.</li> </ul> <p>This class excludes:</p> <ul style="list-style-type: none"> <li>— installation of windows, see 45.42,</li> </ul>	45440000
		45.45	Other building completion	<p>This class includes:</p> <ul style="list-style-type: none"> <li>— installation of private swimming pools,</li> <li>— steam cleaning, sand blasting and similar activities for building exteriors,</li> <li>— other building completion and finishing work n.e.c.</li> </ul> <p>This class excludes:</p> <ul style="list-style-type: none"> <li>— interior cleaning of buildings and other structures, see 74.70.</li> </ul>	45212212 and DA04 45450000
	45.5		Renting of construction or demolition equipment with operator		45500000
		45.50	Renting of construction or	<p>This class excludes:</p> <ul style="list-style-type: none"> <li>— renting of construction or demolition machinery and</li> </ul>	45500000

		demolition equipment with operator	equipment without operators, see 71.32.	
<p>(i) Council Regulation (EEC) No 3037/90 of 9 October 1990 (OJ L 293, 24.10.1990, p. 1), Regulation as amended by Commission Regulation (EEC) No 761/93 (OJ L 83, 3.4.1993, p. 1).</p>				

**ANNEX II**  
**LIST OF UNION LEGISLATION REFERRED TO IN ARTICLE 4(2)**

Rights which have been granted by means of a procedure in which adequate publicity has been ensured and where the granting of those rights was based on objective criteria shall not constitute "special or exclusive rights" within the meaning of this Directive. The following lists procedures, ensuring adequate prior transparency, for granting authorisations on the basis of other legislative acts of the European Union which do not constitute "special or exclusive rights" within the meaning of this Directive:

- (a) granting authorisation to operate natural gas installations in accordance with the procedures laid down in Article 4 of Directive 98/30/EC;
- (b) authorisation or an invitation to tender for the construction of new electricity production installations in accordance with Directive 96/92/EC;
- (c) the granting in accordance with the procedures laid down in Article 9 of Directive 97/67/EC of authorisations in relation to a postal service which is not or shall not be reserved;
- (d) a procedure for granting an authorisation to carry on an activity involving the exploitation of hydrocarbons in accordance with Directive 94/22/EC;
- (e) public service contracts within the meaning of Regulation (EC) No 1370/2007 which have been awarded on the basis of a competitive tendering procedure in accordance with its Article 5(3).

**ANNEX III**  
**LIST OF UNION LEGISLATION REFERRED TO IN ARTICLE 27(3)**

A. TRANSPORT OR DISTRIBUTION OF GAS OR HEAT

Directive 2009/73/EC

B. PRODUCTION, TRANSMISSION OR DISTRIBUTION OF ELECTRICITY

Directive 2009/72/EC

C. PRODUCTION, TRANSPORT OR DISTRIBUTION OF DRINKING WATER

None

D. CONTRACTING ENTITIES IN THE FIELD OF RAIL SERVICES

Rail Freight transport

Council Directive 91/440/EEC of 29 July 1991 on the development of the Community's railways<sup>54</sup>

Rail passenger transport

None

E. CONTRACTING ENTITIES IN THE FIELD OF URBAN RAILWAY, TRAMWAY, TROLLEYBUS OR MOTOR BUS SERVICES

None

F. CONTRACTING ENTITIES IN THE FIELD OF POSTAL SERVICES

Directive 97/67/EC

**ANNEX IV**  
**REQUIREMENTS RELATING TO DEVICES FOR THE ELECTRONIC RECEIPT**  
**OF TENDERS, REQUESTS TO PARTICIPATE, APPLICATIONS FOR**  
**QUALIFICATION AS WELL AS PLANS AND PROJECTS IN CONTESTS**

Devices for the electronic receipt of tenders, requests to participate, applications for qualification as well as plans and projects in contests must guarantee, through technical means and appropriate procedures, at least that:

- (a) the exact time and date of the receipt of tenders, requests to participate, applications for qualification as well as the submission of plans and projects can be determined precisely;
- (b) it may be reasonably ensured that, before the time limits laid down, no-one can have access to data transmitted under those requirements;
- (c) where that access prohibition is infringed, it may be reasonably ensured that the infringement is clearly detectable;
- (d) only authorised persons may set or change the dates for opening data received;
- (e) during the various stages of the qualification procedure, the procurement procedure or contest, access to all data submitted, or to part thereof, must be possible only through simultaneous action by authorised persons;
- (f) simultaneous action by authorised persons must give access to data transmitted only after the prescribed date;
- (g) data received and opened in accordance with those requirements must remain accessible only to persons authorised to acquaint themselves therewith and
- (h) authentication of tenders must conform to the requirements set out in this Annex.

**ANNEX V**  
**LIST OF INTERNATIONAL AGREEMENTS REFERRED TO IN ARTICLE 38**

Agreements with the following countries or groupings of countries:

- Albania (OJ L 107, 28.4.2009)
- Former Yugoslav Republic of Macedonia (OJ L 87, 20.03.2004)
- CARIFOUM (OJ L 289, 30.10.2008)
- Chile (OJ L352, 30.12.2002)
- Croatia (OJ L 26, 28.1.2005)
- Mexico (OJ L 276, 28.10.2000, L 157/30.6.2000)
- Montenegro (OJ L 345 of 28.12.2007)
- South Korea - (OJ L 127/14.5.2011)
- Switzerland (OJ L 300, 31/12/1972)

**ANNEX VI**  
**PART A**  
**INFORMATION TO BE INCLUDED IN THE PERIODIC INDICATIVE NOTICE**  
(as referred to in Article 61)

**I. INFORMATION TO BE INCLUDED IN ALL CASES**

1. Name, identification number (where provided for in national legislation), address including NUTS code, telephone, fax number, email and internet address of the contracting entity and, where different, of the service from which additional information may be obtained.
2. Main activity exercised.
3.
  - (a) For supply contracts: nature and quantity or value of the services or products to be supplied (nomenclature reference No(s)).
  - (b) For works contracts: nature and extent of the services to be provided, the general characteristics of the work or of the lots by reference to the work (nomenclature reference No(s)).
  - (c) For service contracts: intended total procurement in each of the service categories envisaged (nomenclature reference No(s)).
4. Date of dispatch of the notice or of dispatch of the notice of the publication of this notice on the buyer profile.
5. Any other relevant information.

**II. ADDITIONAL INFORMATION TO BE SUPPLIED WHERE THE NOTICE IS USED AS A MEANS OF CALLING FOR COMPETITION OR PERMITS THE REDUCTION OF THE TIME LIMITS FOR THE RECEIPT OF TENDERS (Article 61(2))**

6. A reference to the fact that interested economic operators shall advise the entity of their interest in the contract or contracts.
7. Email or internet address at which the specifications and any supporting documents will be available for unrestricted and full direct access, free of charge.
8. Where appropriate, state whether the contract is reserved for sheltered workshops or whether its performance is reserved in the context of sheltered employment programmes.
9. Time limit for the receipt of applications for an invitation to tender or to negotiate.
10. Nature and quantity of the goods to be supplied or general nature of the work or category of service and description, stating if framework agreement(s) are envisaged, including any options for further procurement and the estimated time available for exercising those options as well as the number of renewals, if any. In the case of recurring contracts, also, an estimate of the timing of the subsequent calls for competition. State whether purchase, lease, rental or hire-purchase or any combination of those is involved.

11. NUTS code for the main location of works in case of works or NUTS code for the main place of delivery or performance in supplies and service ; if the contract is divided into lots, this information shall be provided for each lot.
12. Time limits for delivery or completion or duration of service contract and, as far as possible, for starting.
13. Address to which interested undertakings shall send their expressions of interest in writing.
14. Time limit for receipt of expressions of interest.
15. Language or languages authorised for the presentation of candidatures or tenders.
16. Economic and technical conditions, and financial and technical guarantees required of suppliers.
17.
  - (a) Estimated date for initiating the procurement procedures in respect of the contract or contracts (if known);
  - (b) Type of procurement procedure (restricted or negotiated);
  - (c) The amount of and payment details for any sum to be paid to obtain documents concerning the consultation.
18. Where appropriate, particular conditions to which the performance of the contract is subject.
19. Where appropriate, indication whether:
  - (a) E-submission of tenders or requests to participate will be required/accepted,
  - (b) E-ordering will be used,
  - (c) E-invoicing will be used,
  - (d) E-payment will be accepted.
20. Name and address of the body responsible for appeal and, where appropriate, mediation procedures. Precise information concerning time limits for lodging appeals, or, if need be, the name, address, telephone number, fax number and e-mail address of the service from which this information may be obtained.
21. Where known, criteria referred to in Article 76 to be used for award of the contract: "lowest cost" or "most economically advantageous tender". Criteria representing the most economically advantageous tender as well as their weighting or, where appropriate, the order of importance of those criteria shall be mentioned, where they do not appear in the specifications, or will not be indicated in the invitation to confirm interest referred to in Article 61(2)(b) or in the invitation tender or to negotiate.

**PART B**  
**INFORMATION TO BE INCLUDED IN NOTICES OF PUBLICATION OF A**  
**PERIODIC INDICATIVE NOTICE ON A BUYER PROFILE NOT USED AS A**  
**MEANS OF CALLING FOR COMPETITION**  
**(as referred to in Article 61(1))**

1. Name, identification number (where provided for in national legislation), address including NUTS code, telephone, fax number, email and internet address of the contracting entity and, where different, of the service from which additional information may be obtained.
2. Main activity exercised.
3. CPV Nomenclature reference No(s).
4. Internet address of the "buyer profile" (URL).
5. Date of dispatch of the notice of the publication of the prior information notice on the buyer profile

**ANNEX VII**  
**INFORMATION TO BE INCLUDED IN THE SPECIFICATIONS IN ELECTRONIC AUCTIONS (ARTICLE 47(4))**

The specifications to be used where contracting entities have decided to hold an electronic auction shall include at least the following details:

- (a) the features whose values will be the subject of electronic auction, provided that such features are quantifiable and can be expressed in figures or percentages;
- (b) any limits on the values which may be submitted, as they result from the specifications relating to the subject of the contract;
- (c) the information which will be made available to tenderers in the course of the electronic auction and, where appropriate, when it will be made available to them;
- (d) the relevant information concerning the electronic auction process;
- (e) the conditions under which the tenderers will be able to bid and, in particular, the minimum differences which will, where appropriate, be required when bidding;
- (f) the relevant information concerning the electronic equipment used and the arrangements and technical specifications for connection.

**ANNEX VIII**  
**DEFINITION OF CERTAIN TECHNICAL SPECIFICATIONS**

For the purposes of this Directive,

- (1) "technical specification" means one of the following:
  - (e) in the case of service or supply contracts a specification in a document defining the required characteristics of a product or a service, such as quality levels, environmental and climate performance levels, design for all requirements (including accessibility for disabled persons) and conformity assessment, performance, use of the product, safety or dimensions, including requirements relevant to the product as regards the name under which the product is sold, terminology, symbols, testing and test methods, packaging, marking and labelling, user instructions, production processes and methods at any stage of the life cycle of the supply or service and conformity assessment procedures;
  - (b) in the case of works contracts, the totality of the technical prescriptions contained in particular in the procurement documents, defining the characteristics required of a material, product or supply, which permits a material, a product or a supply to be described in a manner such that it fulfils the use for which it is intended by the contracting entity; those characteristics include levels of environmental and climate performance, design for all requirements (including accessibility for disabled persons) and conformity assessment, performance, safety or dimensions, including the procedures concerning quality assurance, terminology, symbols, testing and test methods, packaging, marking and labelling, user instructions, and production processes and methods at any stage of the life cycle of the works; those characteristics also include rules relating to design and costing, the test, inspection and acceptance conditions for works and methods or techniques of construction and all other technical conditions which the contracting entity is in a position to prescribe, under general or specific regulations, in relation to the finished works and to the materials or parts which they involve;
- (2) "Standard" means a technical specification approved by a recognised standardisation body for repeated or continuous application, compliance with which is not compulsory and which falls into one of the following categories:
  - (a) "international standard": a standard adopted by an international standards organisation and made available to the general public;
  - (b) "European standard": a standard adopted by a European standards organisation and made available to the general public;
  - (c) "national standard": a standard adopted by a national standards organisation and made available to the general public;
- (3) "European technical approval" means a favourable technical assessment of the fitness for use of a product, based on the fulfilment of the essential requirements for building works, by means of the inherent characteristics of the product and the

defined conditions of application and use. European technical approvals are issued by an approval body designated for this purpose by the Member State;

- (4) "Common technical specifications" means a technical specification laid down in accordance with a procedure recognised by the Member States or in accordance with Articles 9 and 10 of Parliament and Council Regulation [XXX] on European standardisation [and amending Council Directives 89/686/EEC and 93/15/EEC and Directives 94/9/EC, 94/25/EC, 95/16/EC, 97/23/EC, 98/34/EC, 2004/22/EC, 2007/23/EC, 2009/105/EC and 2009/23/EC of the European Parliament and the Council] which has been published in the *Official Journal of the European Union*;
- (5) "Technical reference" means any deliverable produced by European standardisation bodies, other than official standards, according to procedures adapted to developments in market needs.

**ANNEX IX**  
**FEATURES CONCERNING PUBLICATION**

1. Publication of notices

The notices referred to in Articles 61, 62, 63, 64, 85 and 89 must be sent by the contracting entities to the Publications Office of the European Union and published in accordance with the following rules:

- (a) Notices referred to in Articles 61, 62, 63, 64, 85 and 89 shall be published by the Publications Office of the European Union or by the contracting entities in the event of a periodic indicative notice published on a buyer profile in accordance with Article 61 (1).

In addition, contracting entities may publish this information on the Internet on a "buyer profile" as referred to in point 2(b) below;

- (b) The Publications Office of the European Union will give the contracting entity the confirmation referred to in the second subparagraph of Article 65 (5).

2. Publication of complementary or additional information

- (a) Contracting entities shall publish the specifications and the additional documents in their entirety on the Internet;

- (b) The buyer profile may include periodic indicative notices as referred to in Article 61 (1), information on ongoing invitations to tender, scheduled purchases, contracts concluded, procedures cancelled and any useful general information, such as a contact point, a telephone and a fax number, a postal address and an e-mail address.

3. Format and procedures for the electronic transmission of notices

The format and procedure for sending notices electronically as established by the Commission are made accessible at the Internet address "<http://simap.eu.int>".

**ANNEX X**  
**INFORMATION TO BE INCLUDED IN THE NOTICE ON THE EXISTENCE OF A**  
**QUALIFICATION SYSTEM**  
**(as referred to in point (b) of Article 39(2) and in Article 62)**

1. Name, identification number (where provided for in national legislation), address including NUTS code, telephone, fax number, email and internet address of the contracting entity and, where different, of the service from which additional information may be obtained.
2. Main activity exercised.
3. Where appropriate, state whether the contract is reserved for sheltered workshops or whether its performance is reserved in the context of sheltered employment programmes.
4. Purpose of the qualification system (description of the goods, services or works or categories thereof to be procured through the system - nomenclature reference No(s)). NUTS code for the main location of works in case of works or NUTS code for the main place of delivery or performance in supplies and service.
5. Conditions to be fulfilled by the economic operators in view of their qualification pursuant to the system and the methods according to which each of those conditions will be verified. Where the description of such conditions and verification methods is voluminous and based on documents available to interested economic operators, a summary of the main conditions and methods and a reference to those documents shall be sufficient.
6. Period of validity of the qualification system and the formalities for its renewal.
7. Reference to the fact that the notice acts as the call for competition.
8. Address where further information and documentation concerning the qualification system can be obtained (where different from the addresses mentioned under 1).
9. Name and address of the body responsible for appeal and, where appropriate, mediation procedures. Precise information concerning time-limits for lodging appeals, or, if need be, the name, address, telephone number, fax number and e-mail address of the service from which this information may be obtained.
10. Where known, criteria referred to in Article 76 to be used for award of the contract: "lowest cost" or "most economically advantageous tender". Criteria representing the most economically advantageous tender as well as their weighting or, where appropriate, the order of importance of those criteria, shall be mentioned where they do not appear in the specifications or will not be indicated in the invitation to tender or to negotiate.
11. Where appropriate, indication whether:
  - (a) E-submission of tenders or requests to participate will be required/accepted,

- (b) E-ordering will be used,
- (c) E-invoicing will be used,
- (d) E-payment will be accepted.

12. Any other relevant information.

**ANNEX XI**  
**INFORMATION TO BE INCLUDED IN CONTRACT NOTICES**  
**(as referred to in Article 63)**

A. OPEN PROCEDURES

1. Name, identification number (where provided for in national legislation), address including NUTS code, telephone, fax number, email and internet address of the contracting entity and, where different, of the service from which additional information may be obtained.
2. Main activity exercised.
3. Where appropriate, state whether the contract is reserved for sheltered workshops or whether its performance is reserved in the context of sheltered employment programmes.
4. Nature of the contract (supply, works or service, where appropriate, state if it is a framework agreement or a dynamic purchasing system), description (nomenclature reference No(s)). Where appropriate, state whether tenders are requested for purchase, lease, rental or hire purchase or any combination of those.
5. NUTS code for the main location of works in case of works or NUTS code for the main place of delivery or performance in supplies and service.
6. For supplies and works:
  - (a) Nature and quantity of the goods to be supplied (nomenclature reference No(s)), including any options for further procurement and, if possible, the estimated time available for exercising those options as well as the number of renewals, if any. In the case of recurring contracts, also, if possible, an estimate of the timing of the subsequent calls for competition for the goods to be procured or the nature and extent of the services to be provided and general nature of the work (nomenclature reference No(s));
  - (b) Indication of whether the suppliers may tender for some and/or all the goods required.

If, for works contracts, the work or the contract is subdivided into several lots, the order of size of the different lots and the possibility of tendering for one, for several or for all the lots;
  - (c) For works contracts: information concerning the purpose of the work or the contract where the latter also involves the drawing-up of projects.
7. For services:
  - (a) The nature and quantity of the goods to be supplied, including any options for further procurement and, if possible, the estimated time available for exercising those options as well as the number of renewals, if any. In the case of recurring

contracts, also, if possible, an estimate of the timing of the subsequent calls for competition for the services to be procured;

- (b) Indication of whether the performance of the service is reserved by law, regulation or administrative provision to a particular profession;
  - (c) Reference of the law, regulation or administrative provision;
  - (d) Indication of whether legal persons shall indicate the names and professional qualifications of the staff to be responsible for the performance of the service;
  - (e) Indication of whether service providers may tender for a part of the services concerned.
8. Where known, indication of whether authorisation to submit variants exists or not.
  9. Time limits for delivery or completion or duration of service contract and, as far as possible, the starting date.
  10. Email or internet address at which the specifications and any supporting documents will be available for unrestricted and full direct access, free of charge
  11.
    - (a) Final date for receipt of tenders or indicative tenders where a dynamic purchasing system is introduced;
    - (b) Address to which they shall be sent;
    - (c) Language or languages in which they shall be drawn up.
  12.
    - (a) Where applicable, the persons authorised to be present at the opening of tenders;
    - (b) Date, time and place of such opening.
  13. Where applicable, any deposits and guarantees required.
  14. Main terms concerning financing and payment and/or references to the provisions in which those are contained.
  15. Where appropriate, the legal form to be taken by the grouping of economic operators to whom the contract is awarded.
  16. Minimum economic and technical conditions required of the economic operator to whom the contract is awarded.
  17. Period during which the tenderer is bound to keep open his tender.
  18. Where appropriate, particular conditions to which the performance of the contract is subject.
  19. Criteria referred to in Article 76 to be used for award of the contract: "lowest cost" or "most economically advantageous tender". Criteria representing the most economically advantageous tender as well as their weighting or, where appropriate,

the order of importance of those criteria shall be indicated where they do not appear in the specifications.

20. Where appropriate, date(s) and the reference(s) to publication in the *Official Journal of the European Union* of the periodic information notice or of the notice of the publication of this notice on the buyer profile to which the contract refers.
21. Name and address of the body responsible for appeal and, where appropriate, mediation procedures. Precise information concerning time limits for lodging appeals, or, if need be, the name, address, telephone number, fax number and e-mail address of the department from which this information may be obtained.
22. Date of dispatch of the notice by the contracting entity.
23. Any other relevant information.

## B. RESTRICTED PROCEDURES

1. Name, identification number (where provided for in national legislation), address including NUTS code, telephone, fax number, email and internet address of the contracting entity and, where different, of the service from which additional information may be obtained.
2. Main activity exercised.
3. Where appropriate, state whether the contract is reserved for sheltered workshops or whether its performance is reserved in the context of sheltered employment programmes.
4. Nature of the contract (supplies, works or services; where appropriate, state if it is a framework agreement); description (nomenclature reference No(s)). Where appropriate, state whether tenders are requested for purchase, lease, rental or hire purchase or any combination of those.
5. NUTS code for the main location of works in case of works or NUTS code for the main place of delivery or performance in supplies and service.
6. For supplies and works:
  - (a) The nature and quantity of the goods to be supplied (nomenclature reference No(s)), including any options for further procurement and, if possible, the estimated time available for exercising those options as well as the number of renewals, if any. In the case of recurring contracts, also, if possible, an estimate of the timing of the subsequent calls for competition for the goods to be procured or the nature and extent of the services to be provided and general nature of the work (nomenclature reference No(s));
  - (b) Indication of whether the suppliers may tender for some and/or all the goods required.

If, for works contracts, the work or the contract is subdivided into several lots, the order of size of the different lots and the possibility of tendering for one, for several or for all the lots;

- (c) Information concerning the purpose of the work or the contract where the latter also involves the drawing-up of projects.

7. For services:

- (a) The nature and quantity of the goods to be supplied, including any options for further procurement and, if possible, the estimated time available for exercising those options as well as the number of renewals, if any. In the case of recurring contracts, also, if possible, an estimate of the timing of the subsequent calls for competition for the services to be procured;
- (b) Indication of whether the performance of the service is reserved by law, regulation or administrative provision to a particular profession;
- (c) Reference to the law, regulation or administrative provision;
- (d) Indication of whether legal persons shall indicate the names and professional qualifications of the staff to be responsible for the performance of the service;
- (e) Indication of whether service providers may tender for a part of the services concerned.

8. Where known, indication of whether authorisation to submit variants exists or not.

9. Time limits for delivery or completion or duration of the contract and, as far as possible, for starting.

10. Where appropriate, the legal form to be taken by the grouping of economic operators to whom the contract is awarded.

11. (a) Final date for receipt of requests to participate;

(b) Address to which they shall be sent;

(c) Language or languages in which they shall be drawn up.

12. Final date for dispatch of invitations to tender.

13. Where applicable, any deposits and guarantees required.

14. Main terms concerning financing and payment and/or references to the provisions in which those are contained.

15. Information concerning the economic operator's position and the minimum economic and technical conditions required of him.

16. Criteria referred to in Article 76 to be used for award of the contract: "lowest cost" or "most economically advantageous tender". Criteria representing the most economically advantageous tender as well as their weighting or, where appropriate,

the order of importance of those criteria shall be indicated where they do not appear in the specifications or will not be indicated in the invitation to tender.

17. Where appropriate, particular conditions to which the performance of the contract is subject.
18. Where appropriate, the date(s) and reference(s) to publication in the *Official Journal of the European Union* of the periodic information notice or of the notice of the publication of this notice on the buyer profile to which the contract refers.
19. Name and address of the body responsible for appeal and, where appropriate, mediation procedures. Precise information concerning time limits for lodging appeals, or, if need be, the name, address, telephone number, fax number and e-mail address of the service from which this information may be obtained.
20. Date of dispatch of the notice by the contracting entities.
21. Any other relevant information.

### C. NEGOTIATED PROCEDURES

1. Name, identification number (where provided for in national legislation), address including NUTS code, telephone, fax number, email and internet address of the contracting entity and, where different, of the service from which additional information may be obtained.
2. Main activity exercised.
3. Where appropriate, state whether the contract is reserved for sheltered workshops or whether its performance is reserved in the context of sheltered employment programmes.
4. Nature of the contract (supplies, works or services; where appropriate, state if it is a framework agreement); description (nomenclature reference No(s)). Where appropriate, state whether tenders are requested for purchase, lease, rental or hire purchase or any combination of those.
5. NUTS code for the main location of works in case of works or NUTS code for the main place of delivery or performance in supplies and service.
6. For supplies and works:
  - (a) The nature and quantity of the goods to be supplied (nomenclature reference No(s)), including any options for further procurement and, if possible, the estimated time available for exercising those options as well as the number of renewals, if any. In the case of recurring contracts, also, if possible, an estimate of the timing of the subsequent calls for competition for the goods to be procured or the nature and extent of the services to be provided and general nature of the work (nomenclature reference No(s));
  - (b) Indication of whether the suppliers may tender for some and/or all the goods required.

If, for works contracts, the work or the contract is subdivided into several lots, the order of size of the different lots and the possibility of tendering for one, for several or for all the lots;

- (c) For works contracts: information concerning the purpose of the work or the contract where the latter also involves the drawing-up of projects.

7. For services:

- (a) The nature and quantity of the services to be supplied, including any options for further procurement and, if possible, the estimated time available for exercising those options as well as the number of renewals, if any. In the case of recurring contracts, also, if possible, an estimate of the timing of the subsequent calls for competition for the services to be procured;
- (b) Indication of whether the performance of the service is reserved by law, regulation or administrative provision to a particular profession;
- (c) Reference of the law, regulation or administrative provision;
- (d) Indication of whether legal persons shall indicate the names and professional qualifications of the staff to be responsible for the performance of the service;
- (e) Indication of whether service providers may tender for a part of the services concerned.

8. Where known, indication of whether authorisation to submit variants exists or not.

9. Time limits for delivery or completion or duration of the contract and, as far as possible, for starting.

10. Where appropriate, the legal form to be taken by the grouping of economic operators to whom the contract is awarded.

11. (a) Final date for receipt of requests to participate;

(b) Address to which they shall be sent;

(c) Language or languages in which they shall be drawn up.

12. Where appropriate, any deposits and guarantees required.

13. Main terms concerning financing and payment and/or references to the provisions in which those are contained.

14. Information concerning the economic operator's position and the minimum economic and technical conditions required of him.

15. Criteria referred to in Article 76 to be used for award of the contract: "lowest cost" or "most economically advantageous tender". Criteria representing the most economically advantageous tender as well as their weighting or, where appropriate,

the order of importance of those criteria shall be indicated where they do not appear in the specifications or will not be indicated in the invitation to negotiate.

16. Where appropriate, the names and addresses of the economic operators already selected by the contracting entity.
17. Where appropriate, particular conditions to which the performance of the contract is subject.
18. Where appropriate, the dates and reference(s) of publication in the *Official Journal of the European Union* of the periodic information notice or of the notice of the publication of this notice on the buyer profile to which the contract refers.
19. Name and address of the body responsible for appeal and, where appropriate, mediation procedures. Precise information concerning time limits for lodging appeals, or, if need be, the name, address, telephone number, fax number and e-mail address of the service from which this information may be obtained.
20. Date of dispatch of the notice by the contracting entity.
21. Any other relevant information.

**ANNEX XII**  
**INFORMATION TO BE INCLUDED IN THE CONTRACT AWARD NOTICE**  
**(as referred to in Article 64)**

I. Information for publication in the *Official Journal of the European Union*<sup>55</sup>

1. Name, identification number (where provided for in national legislation), address including NUTS code, telephone, fax number, email and internet address of the contracting entity and, where different, of the service from which additional information may be obtained.
2. Main activity exercised.
3. Nature of the contract (supplies, works or services and Nomenclature reference No(s); where appropriate state if it is a framework agreement).
4. At least a summary indication of the nature and quantity of the products, works or services provided.
5.
  - (a) Form of the call for competition (notice on the existence of a system of qualification; periodic notice; call for tenders);
  - (b) Date(s) and reference(s) of publication of the notice in the *Official Journal of the European Union*;
  - (c) In the case of contracts awarded without a prior call for competition, indication of the relevant provision of Article 44.
6. Procurement procedure (open, restricted or negotiated).
7. Number of tenders received, specifying
  - (a) number of tenders received from economic operators which are small and medium-sized enterprises,
  - (b) number of tenders received from abroad,
  - (c) number of tenders received electronically.

In the case of multiple awards (lots, multiple framework agreements), this information shall be given for each award.
8. Date of award of the contract(s).
9. Price paid for bargain purchases pursuant to Article 44(i).
10. For each award, name, address including NUTS code, telephone, fax number, email address and internet address of the successful tenderer(s) including:

---

<sup>55</sup> Information in headings 6, 9 and 11 is deemed information not intended for publication where the awarding entity considers that publication thereof might be detrimental to a sensitive commercial interest.

- (a) information whether the successful tenderer is small and medium-sized enterprise,
  - (b) information whether the contract was awarded to a consortium.
11. State, where appropriate, whether the contract has been, or may be, subcontracted.
  12. Price paid or the prices of the highest and lowest tenders taken into account in the award of the contract.
  13. Name and address of the body responsible for the appeal and, where appropriate, mediation procedures. Precise information concerning the time limit for lodging appeals, or, if need be, the name, address, telephone number, fax number and e-mail address of the service from which this information may be obtained.
  14. Optional information:
    - value and share of the contract which has been or may be subcontracted to third parties,
    - award criteria.

## II. Information not intended for publication

15. Number of contracts awarded (where an award has been split between several suppliers).
16. Value of each contract awarded.
17. Country of origin of the product or service (Community origin or non-Community origin; if the latter, broken down by third country).
18. Which award criteria were used (most economically advantageous; lowest cost)?
19. Was the contract awarded to a tenderer who submitted a variant, in accordance with Article 58(1)?
20. Were any tenders excluded on the grounds that they were abnormally low, in accordance with Article 79?
21. Date of transmission of the notice by the contracting entity.

**ANNEX XIII**  
**CONTENTS OF THE INVITATIONS TO SUBMIT A TENDER, TO NEGOTIATE OR**  
**TO CONFIRM INTEREST PROVIDED FOR UNDER ARTICLE 68**

1. The invitation to submit a tender or to negotiate provided for under Article 68 must contain at least:
  - (a) the final date for receipt of tenders, the address to which they are to be sent, and the language or languages in which they are to be drawn up;  

However, in the case of contracts awarded through an innovation partnership, this information shall not appear in the invitation to negotiate but it shall appear in the invitation to submit a tender.
  - (b) a reference to any published call for competition;
  - (c) an indication of any documents to be attached;
  - (d) the criteria for the award of the contract, where they are not indicated in the notice on the existence of a qualification system used as a means of calling for competition;
  - (e) the relative weighting of the contract award criteria or, where appropriate, the order of importance of such criteria, if this information is not given in the contract notice, the notice on the existence of a qualification system or the specifications.
  
2. When a call for competition is made by means of a periodic indicative notice, contracting entities shall subsequently invite all candidates to confirm their interest on the basis of detailed information on the contract concerned before beginning the selection of tenderers or participants in negotiations.

This invitation shall include at least the following information:

- (a) nature and quantity, including all options concerning complementary contracts and, if possible, the estimated time available for exercising those options for renewable contracts, the nature and quantity and, if possible, the estimated publication dates of future notices of competition for works, supplies or services to be put out to tender;
- (b) type of procedure: restricted or negotiated;
- (c) where appropriate, the date on which the delivery of supplies or the execution of works or services is to commence or terminate;
- (d) the address and closing date for the submission of requests for procurement documents and the language or languages in which they are to be drawn up;
- (e) the address of the entity which is to award the contract and the information necessary for obtaining the specifications and other documents;

- (f) economic and technical conditions, financial guarantees and information required from economic operators;
- (g) the form of the contract which is the subject of the invitation to tender: purchase, lease, hire or hire-purchase, or any combination of those; and
- (h) the contract award criteria and their weighting or, where appropriate, the order of importance of such criteria, if this information is not given in the indicative notice or the specifications or in the invitation to tender or to negotiate.

**ANNEX XIV**  
**LIST OF INTERNATIONAL SOCIAL AND ENVIRONMENTAL CONVENTIONS**  
**REFERRED TO IN ARTICLES 70 AND 79**

- Convention 87 on Freedom of Association and the Protection of the Right to Organise;
- Convention 98 on the Right to Organise and Collective Bargaining;
- Convention 29 on Forced Labour;
- Convention 105 on the Abolition of Forced Labour;
- Convention 138 on Minimum Age;
- Convention 111 on Discrimination (Employment and Occupation);
- Convention 100 on Equal Remuneration;
- Convention 182 on Worst Forms of Child Labour;
- Vienna Convention for the protection of the Ozone Layer and its Montreal Protocol on substances that deplete the Ozone Layer;
- Basel Convention on the Control of Transboundary Movements of Hazardous Wastes and their Disposal (Basel Convention);
- Stockholm Convention on Persistent Organic Pollutants (Stockholm POPs Convention);
- Convention on the Prior Informed Consent Procedure for Certain Hazardous Chemicals and Pesticides in International Trade (UNEP/FAO) (The PIC Convention) Rotterdam, 10/09/1998 and its 3 regional Protocols.

**ANNEX XV**  
**LIST OF EU LEGISLATION REFERRED TO IN ARTICLE 77(3)**

- (a) Directive 2009/33/EC.

**ANNEX XVI**  
**INFORMATION TO BE INCLUDED IN NOTICES OF MODIFICATIONS OF A**  
**CONTRACT DURING ITS TERM**  
**(as referred to in Article 82(6))**

1. Name, identification number (where provided for in national legislation), address including NUTS code, telephone, fax number, email and internet address of the contracting entity and, where different, of the service from which additional information may be obtained.
2. Main activity exercised.
3. CPV Nomenclature reference No(s);
4. NUTS code for the main location of works in case of works or NUTS code for the main place of delivery or performance in supplies and service;
5. Description of the procurement before and after the modification: nature and extent of the works, nature and quantity or value of supplies, nature and extent of services.
6. Where applicable, increase in price caused by the modification.
7. Description of the circumstances which have rendered necessary the modification.
8. Date of contract award decision.
9. Where applicable, the name, address including NUTS code, telephone, fax number, email address and internet address of the new economic operator or operators.
10. Information whether the contract is related to a project and /or programme financed by European Union funds.
11. Name and address of the oversight body and the body responsible for review and, where appropriate, mediation procedures. Precise information concerning the deadline for review procedures, or if need be the name, address, telephone number, fax number and email address of the service from which this information may be obtained.

**ANNEX XVII**  
**SERVICES REFERRED TO IN ARTICLE 84**

CPV Code	Description
79611000-0 and from 85000000-9 to 85323000-9 (except 85321000-5 and 85322000-2)	Health and social services
75121000-0, 75122000-7, 75124000-1; from 79995000-5 to 79995200-7; from 80100000- 5 to 80660000-8 (except 80533000-9, 80533100-0, 80533200-1); from 92000000-1 to 92700000-8 (except 92230000-2, 92231000-9, 92232000-6)	Administrative educational, healthcare and cultural services
75300000-9	Compulsory social security services
75310000-2, 75311000-9, 75312000-6, 75313000-3, 75313100-4, 75314000-0, 75320000-5, 75330000-8, 75340000-1	Benefit services
98000000-3	Other community, social and personal services
98120000-0	Services furnished by trade unions
98131000-0	Religious services

## **ANNEX XVIII**

### **Information to be included in notices concerning contracts for social and other specific services** **(as referred to in Article 85)**

#### **Part A Contract notice**

1. Name, identification number (where provided for in national legislation), address including NUTS code, telephone, fax number, email and internet address of the contracting entity and, where different, of the service from which additional information may be obtained.
2. Main activity exercised.
3. Description of the services or categories thereof and where applicable, incidental works and supplies to be procured, including an indication of the quantities or values involved, nomenclature reference No(s).
4. NUTS code for the main place of performance of the services.
5. Where appropriate, state whether the contract is reserved for sheltered workshops or whether its performance is reserved in the context of sheltered employment programmes.
6. Main conditions to be fulfilled by the economic operators in view of their participation, or, where appropriate, the electronic address where detailed information may be obtained.
7. Time limit(s) for contacting the contracting entity in view of participation.
8. Any other relevant information.

#### **Part B Contract award notice**

1. Name, identification number (where provided for in national legislation), address including NUTS code, telephone, fax number, email and internet address of the contracting entity and, where different, of the service from which additional information may be obtained.
2. Main activity exercised.
3. At least a summary indication of the nature and quantity of the services and where applicable, incidental works and supplies provided.
4. Reference of publication of the notice in the *Official Journal of the European Union*
5. Number of tenders received.
6. Name and address of the chosen economic operator(s).
7. Any other relevant information.

**ANNEX XIX**  
**INFORMATION TO BE INCLUDED IN THE DESIGN CONTEST NOTICE**  
**(as referred to in Article 89(1))**

1. Name, identification number (where provided for in national legislation), address including NUTS code, telephone, fax number, email and internet address of the contracting entity and, where different, of the service from which additional information may be obtained.
2. Main activity exercised.
3. Project description (nomenclature reference No(s)).
4. Nature of the contest: open or restricted.
5. In the case of open contests: final date for receipt of projects.
6. In the case of restricted contests:
  - (a) the number of participants envisaged, or range;
  - (b) where applicable, names of participants already selected;
  - (c) criteria for the selection of participants;
  - (d) final date for receipt of requests to participate.
7. Where applicable, indication of whether participation is reserved to a particular profession.
8. Criteria to be applied in the evaluation of projects.
9. Where applicable, names of the selected members of the jury.
10. Indication of whether the decision of the jury is binding on the authority.
11. Where applicable, number and value of prizes.
12. Where applicable, details of payments to all participants.
13. Indication of whether the prize-winners are permitted any follow-up contracts.
14. Name and address of the body responsible for the appeal and, where appropriate, mediation procedures. Precise information concerning the time limit for lodging appeals, or, if need be, the name, address, telephone number, fax number and e-mail address of the service from which this information may be obtained.
15. Date of dispatch of the notice.
16. Any other relevant information

**ANNEX XX**  
**INFORMATION TO BE INCLUDED IN THE RESULTS OF DESIGN CONTEST**  
**NOTICES**  
**(as referred to in Article 89(1))**

1. Name, identification number (where provided for in national legislation), address including NUTS code, telephone, fax number, email and internet address of the contracting entity and, where different, of the service from which additional information may be obtained.
2. Main activity exercised.
3. Project description (nomenclature reference No(s)).
4. Total number of participants.
5. Number of foreign participants.
6. Winner(s) of the contest.
7. Where applicable, the prize(s).
8. Other information.
9. Reference of the design contest notice.
10. Name and address of the body responsible for the appeal and, where appropriate, mediation procedures. Precise information concerning the time limit for lodging appeals, or, if need be, the name, address, telephone number, fax number and e-mail address of the service from which this information may be obtained.
11. Date of dispatch of the notice.

**ANNEX XXI**  
**CORRELATION TABLE**<sup>56</sup>

This Directive	Directive 2004/17/EC	
Art. 1	-	New
Art. 2, 1 <sup>st</sup> sentence	Art. 1, par. 1	=
Art. 2, point 1	Art. 2, par. 1, point (a), 1 <sup>st</sup> subpar.	=

**DIRECTIVE 2004/18/EC OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL**  
**of 31 March 2004**  
**on the coordination of procedures for the award of public works contracts, public supply contracts and public service contracts**

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 47(2) and Article 55 and Article 95 thereof,

Having regard to the proposal from the Commission <sup>(1)</sup>,

Having regard to the opinion of the Economic and Social Committee <sup>(2)</sup>,

Having regard to the opinion of the Committee of the Regions <sup>(3)</sup>,

Acting in accordance with the procedure laid down in Article 251 of the Treaty <sup>(4)</sup>, in the light of the joint text approved by the Conciliation Committee on 9 December 2003,

Whereas:

(1) On the occasion of new amendments being made to Council Directives 92/50/EEC of 18 June 1992 relating to the coordination of procedures for the award of public service contracts <sup>(5)</sup>, 93/36/EEC of 14 June 1993 coordinating procedures for the award of public supply contracts <sup>(6)</sup> and 93/37/EEC of 14 June 1993 concerning the coordination of procedures for the award of public works contracts <sup>(7)</sup>, which are necessary to meet requests for simplification and modernisation made by contracting authorities and economic operators alike in their responses to the Green Paper adopted by the

Commission on 27 November 1996, the Directives should, in the interests of clarity, be recast. This Directive is based on Court of Justice case-law, in particular case-law on award criteria, which clarifies the possibilities for the contracting authorities to meet the needs of the public concerned, including in the environmental and/or social area, provided that such criteria are linked to the subject-matter of the contract, do not confer an unrestricted freedom of choice on the contracting authority, are expressly mentioned and comply with the fundamental principles mentioned in recital 2.

(2) The award of contracts concluded in the Member States on behalf of the State, regional or local authorities and other bodies governed by public law entities, is subject to the respect of the principles of the Treaty and in particular to the principle of freedom of movement of goods, the principle of freedom of establishment and the principle of freedom to provide services and to the principles deriving therefrom, such as the principle of equal treatment, the principle of non-discrimination, the principle of mutual recognition, the principle of proportionality and the principle of transparency. However, for public contracts above a certain value, it is advisable to draw up provisions of Community coordination of national procedures for the award of such contracts which are based on these principles so as to ensure the effects of them and to guarantee the opening-up of public procurement to competition. These coordinating provisions should therefore be interpreted in accordance with both the aforementioned rules and principles and other rules of the Treaty.

(3) Such coordinating provisions should comply as far as possible with current procedures and practices in each of the Member States.

(4) Member States should ensure that the participation of a body governed by public law as a tenderer in a procedure for the award of a public contract does not cause any distortion of competition in relation to private tenderers.

(5) Under Article 6 of the Treaty, environmental protection requirements are to be integrated into the definition and implementation of the Community policies and activities referred to in Article 3 of that Treaty, in particular with a view to promoting sustainable development. This Directive therefore clarifies how the contracting authorities may contribute to the protection of the environment and the promotion of sustainable development, whilst ensuring the possibility of obtaining the best value for money for their contracts.

<sup>(1)</sup> OJ C 29 E, 30.1.2001, p. 11 and OJ C 203 E, 27.8.2002, p. 210.

<sup>(2)</sup> OJ C 193, 10.7.2001, p. 7.

<sup>(3)</sup> OJ C 144, 16.5.2001, p. 23.

<sup>(4)</sup> Opinion of the European Parliament of 17 January 2002 (OJ C 271 E, 7.11.2002, p. 176), Council Common Position of 20 Mars 2003 (OJ C 147 E, 24.6.2003, p. 1) and Position of the European Parliament of 2 July 2003 (not yet published in the Official Journal). Legislative Resolution of the European Parliament of 29 January 2004 and Decision of the Council of 2 February 2004.

<sup>(5)</sup> OJ L 209, 24.7.1992, p. 1. Directive as last amended by Commission Directive 2001/78/EC (OJ L 285, 29.10.2001, p. 1).

<sup>(6)</sup> OJ L 199, 9.8.1993, p. 1. Directive as last amended by Commission Directive 2001/78/EC.

<sup>(7)</sup> OJ L 199, 9.8.1993, p. 54. Directive as last amended by Commission Directive 2001/78/EC.

(6) Nothing in this Directive should prevent the imposition or enforcement of measures necessary to protect public policy, public morality, public security, health, human and animal life or the preservation of plant life, in particular with a view to sustainable development, provided that these measures are in conformity with the Treaty.

(7) Council Decision 94/800/EC of 22 December 1994 concerning the conclusion on behalf of the European Community, as regards matters within its competence, of the Agreements reached in the Uruguay Round multilateral negotiations (1986 to 1994) <sup>(1)</sup>, approved in particular the WTO Agreement on Government Procurement, hereinafter referred to as the 'Agreement', the aim of which is to establish a multilateral framework of balanced rights and obligations relating to public contracts with a view to achieving the liberalisation and expansion of world trade.

In view of the international rights and commitments devolving on the Community as a result of the acceptance of the Agreement, the arrangements to be applied to tenderers and products from signatory third countries are those defined by the Agreement. This Agreement does not have direct effect. The contracting authorities covered by the Agreement which comply with this Directive and which apply the latter to economic operators of third countries which are signatories to the Agreement should therefore be in conformity with the Agreement. It is also appropriate that those coordinating provisions should guarantee for Community economic operators conditions for participation in public procurement which are just as favourable as those reserved for economic operators of third countries which are signatories to the Agreement.

(8) Before launching a procedure for the award of a contract, contracting authorities may, using a technical dialogue, seek or accept advice which may be used in the preparation of the specifications provided, however, that such advice does not have the effect of precluding competition.

(9) In view of the diversity of public works contracts, contracting authorities should be able to make provision for contracts for the design and execution of work to be awarded either separately or jointly. It is not the intention of this Directive to prescribe either joint or separate

contract awards. The decision to award contracts separately or jointly must be determined by qualitative and economic criteria, which may be defined by national law.

(10) A contract shall be deemed to be a public works contract only if its subject matter specifically covers the execution of activities listed in Annex I, even if the contract covers the provision of other services necessary for the execution of such activities. Public service contracts, in particular in the sphere of property management services, may, in certain circumstances, include works. However, insofar as such works are incidental to the principal subject-matter of the contract, and are a possible consequence thereof or a complement thereto, the fact that such works are included in the contract does not justify the qualification of the contract as a public works contract.

(11) A Community definition of framework agreements, together with specific rules on framework agreements concluded for contracts falling within the scope of this Directive, should be provided. Under these rules, when a contracting authority enters into a framework agreement in accordance with the provisions of this Directive relating, in particular, to advertising, time limits and conditions for the submission of tenders, it may enter into contracts based on such a framework agreement during its term of validity either by applying the terms set forth in the framework agreement or, if all terms have not been fixed in advance in the framework agreement, by reopening competition between the parties to the framework agreement in relation to those terms. The reopening of competition should comply with certain rules the aim of which is to guarantee the required flexibility and to guarantee respect for the general principles, in particular the principle of equal treatment. For the same reasons, the term of the framework agreements should not exceed four years, except in cases duly justified by the contracting authorities.

(12) Certain new electronic purchasing techniques are continually being developed. Such techniques help to increase competition and streamline public purchasing, particularly in terms of the savings in time and money which their use will allow. Contracting authorities may make use of electronic purchasing techniques, providing such use complies with the rules drawn up under this Directive and the principles of equal treatment, non-discrimination and transparency. To that extent, a tender submitted by a tenderer, in particular where competition has been reopened under a framework agreement or where a dynamic purchasing system is being used, may take the form of that tenderer's electronic catalogue if the latter uses the means of communication chosen by the contracting authority in accordance with Article 42.

<sup>(1)</sup> OJ L 336, 23.12.1994, p. 1.

- (13) In view of the rapid expansion of electronic purchasing systems, appropriate rules should now be introduced to enable contracting authorities to take full advantage of the possibilities afforded by these systems. Against this background, it is necessary to define a completely electronic dynamic purchasing system for commonly used purchases, and lay down specific rules for setting up and operating such a system in order to ensure the fair treatment of any economic operator who wishes to take part therein. Any economic operator which submits an indicative tender in accordance with the specification and meets the selection criteria should be allowed to join such a system. This purchasing technique allows the contracting authority, through the establishment of a list of tenderers already selected and the opportunity given to new tenderers to take part, to have a particularly broad range of tenders as a result of the electronic facilities available, and hence to ensure optimum use of public funds through broad competition.
- (14) Since use of the technique of electronic auctions is likely to increase, such auctions should be given a Community definition and governed by specific rules in order to ensure that they operate in full accordance with the principles of equal treatment, non-discrimination and transparency. To that end, provision should be made for such electronic auctions to deal only with contracts for works, supplies or services for which the specifications can be determined with precision. Such may in particular be the case for recurring supplies, works and service contracts. With the same objective, it must also be possible to establish the respective ranking of the tenderers at any stage of the electronic auction. Recourse to electronic auctions enables contracting authorities to ask tenderers to submit new prices, revised downwards, and when the contract is awarded to the most economically advantageous tender, also to improve elements of the tenders other than prices. In order to guarantee compliance with the principle of transparency, only the elements suitable for automatic evaluation by electronic means, without any intervention and/or appreciation by the contracting authority, may be the object of electronic auctions, that is, only the elements which are quantifiable so that they can be expressed in figures or percentages. On the other hand, those aspects of the tenders which imply an appreciation of non-quantifiable elements should not be the object of electronic auctions. Consequently, certain works contracts and certain service contracts having as their subject-matter intellectual performances, such as the design of works, should not be the object of electronic auctions.
- (15) Certain centralised purchasing techniques have been developed in Member States. Several contracting authorities are responsible for making acquisitions or awarding public contracts/framework agreements for other contracting authorities. In view of the large volumes purchased, those techniques help increase competition and streamline public purchasing. Provision should therefore be made for a Community definition of central purchasing bodies dedicated to contracting authorities. A definition should also be given of the conditions under which, in accordance with the principles of non-discrimination and equal treatment, contracting authorities purchasing works, supplies and/or services through a central purchasing body may be deemed to have complied with this Directive.
- (16) In order to take account of the different circumstances obtaining in Member States, Member States should be allowed to choose whether contracting authorities may use framework agreements, central purchasing bodies, dynamic purchasing systems, electronic auctions or the competitive dialogue procedure, as defined and regulated by this Directive.
- (17) Multiplying the number of thresholds for applying the coordinating provisions complicates matters for contracting authorities. Furthermore, in the context of monetary union such thresholds should be established in euro. Accordingly, thresholds should be set, in euro, in such a way as to simplify the application of such provisions, while at the same time ensuring compliance with the thresholds provided for by the Agreement which are expressed in special drawing rights. In this context, provision should also be made for periodic reviews of the thresholds expressed in euro so as to adjust them, where necessary, in line with possible variations in the value of the euro in relation to the special drawing right.
- (18) The field of services is best delineated, for the purpose of applying the procedural rules of this Directive and for monitoring purposes, by subdividing it into categories corresponding to particular headings of a common classification and by bringing them together in two Annexes, II A and II B, according to the regime to which they are subject. As regards services in Annex II B, the relevant provisions of this Directive should be without prejudice to the application of Community rules specific to the services in question.
- (19) As regards public service contracts, full application of this Directive should be limited, for a transitional period, to contracts where its provisions will permit the full potential for increased cross-frontier trade to be realised. Contracts for other services need to be monitored during this transitional period before a decision is

taken on the full application of this Directive. In this respect, the mechanism for such monitoring needs to be defined. This mechanism should, at the same time, enable interested parties to have access to the relevant information.

- (20) Public contracts which are awarded by the contracting authorities operating in the water, energy, transport and postal services sectors and which fall within the scope of those activities are covered by Directive 2004/17/EC of the European Parliament and of the Council of 31 March 2004 coordinating the procurement procedures of entities operating in the water, energy, transport and postal services sectors <sup>(1)</sup>. However, contracts awarded by the contracting authorities in the context of their service activities for maritime, coastal or river transport must fall within the scope of this Directive.
- (21) In view of the situation of effective market competition in the telecommunications sector following the implementation of the Community rules aimed at liberalising that sector, public contracts in that area should be excluded from the scope of this Directive insofar as they are intended primarily to allow the contracting authorities to exercise certain activities in the telecommunications sector. Those activities are defined in accordance with the definitions used in Articles 1, 2 and 8 of Council Directive 93/38/EEC of 14 June 1993 coordinating the procurement procedures of entities operating in the water, energy, transport and telecommunications sector <sup>(2)</sup>, such that this Directive does not apply to contracts which have been excluded from the scope of Directive 93/38/EEC pursuant to Article 8 thereof.
- (22) Provision should be made for cases in which it is possible to refrain from applying the measures for coordinating procedures on grounds relating to State security or secrecy, or because specific rules on the awarding of contracts which derive from international agreements, relating to the stationing of troops, or which are specific to international organisations are applicable.
- (23) Pursuant to Article 163 of the Treaty, the encouragement of research and technological development is a means of strengthening the scientific and technological basis of Community industry, and the opening-up of public service contracts contributes to this end. This Directive should not cover the cofinancing of research and development programmes: research and development contracts other than those where the benefits accrue exclusively to the contracting authority for its use in the conduct of its own affairs, on condition that the service provided is wholly remunerated by the contracting authority, are not therefore covered by this Directive.
- (24) In the context of services, contracts for the acquisition or rental of immovable property or rights to such property have particular characteristics which make the application of public procurement rules inappropriate.
- (25) The awarding of public contracts for certain audiovisual services in the field of broadcasting should allow aspects of cultural or social significance to be taken into account which render application of procurement rules inappropriate. For these reasons, an exception must therefore be made for public service contracts for the purchase, development, production or co-production of off-the-shelf programmes and other preparatory services, such as those relating to scripts or artistic performances necessary for the production of the programme and contracts concerning broadcasting times. However, this exclusion should not apply to the supply of technical equipment necessary for the production, co-production and broadcasting of such programmes. A broadcast should be defined as transmission and distribution using any form of electronic network.
- (26) Arbitration and conciliation services are usually provided by bodies or individuals designated or selected in a manner which cannot be governed by procurement rules.
- (27) In accordance with the Agreement, the financial services covered by this Directive do not include instruments of monetary policy, exchange rates, public debt, reserve management or other policies involving transactions in securities or other financial instruments, in particular

<sup>(1)</sup> See p. 1 of this Official Journal.

<sup>(2)</sup> OJ L 199, 9.8.1993, p. 84. Directive as last amended by Commission Directive 2001/78/EC (OJ L 285, 29.10.2001, p. 1).

transactions by the contracting authorities to raise money or capital. Accordingly, contracts relating to the issue, purchase, sale or transfer of securities or other financial instruments are not covered. Central bank services are also excluded.

- (28) Employment and occupation are key elements in guaranteeing equal opportunities for all and contribute to integration in society. In this context, sheltered workshops and sheltered employment programmes contribute efficiently towards the integration or reintegration of people with disabilities in the labour market. However, such workshops might not be able to obtain contracts under normal conditions of competition. Consequently, it is appropriate to provide that Member States may reserve the right to participate in award procedures for public contracts to such workshops or reserve performance of contracts to the context of sheltered employment programmes.
- (29) The technical specifications drawn up by public purchasers need to allow public procurement to be opened up to competition. To this end, it must be possible to submit tenders which reflect the diversity of technical solutions. Accordingly, it must be possible to draw up the technical specifications in terms of functional performance and requirements, and, where reference is made to the European standard or, in the absence thereof, to the national standard, tenders based on equivalent arrangements must be considered by contracting authorities. To demonstrate equivalence, tenderers should be permitted to use any form of evidence. Contracting authorities must be able to provide a reason for any decision that equivalence does not exist in a given case. Contracting authorities that wish to define environmental requirements for the technical specifications of a given contract may lay down the environmental characteristics, such as a given production method, and/or specific environmental effects of product groups or services. They can use, but are not obliged to use appropriate specifications that are defined in eco-labels, such as the European Eco-label, (multi-)national eco-labels or any other eco-label providing the requirements for the label are drawn up and adopted on the basis of scientific information using a procedure in which stakeholders, such as government bodies, consumers, manufacturers, distributors and environmental organisations can participate, and providing the label is accessible and available to all interested parties. Contracting authorities should, whenever possible, lay down technical specifications so as to take into account accessibility criteria for people with disabilities or design for all users. The technical specifications should be clearly indicated, so that all tenderers know what the requirements established by the contracting authority cover.
- (30) Additional information concerning contracts must, as is customary in Member States, be given in the contract documents for each contract or else in an equivalent document.
- (31) Contracting authorities which carry out particularly complex projects may, without this being due to any fault on their part, find it objectively impossible to define the means of satisfying their needs or of assessing what the market can offer in the way of technical solutions and/or financial/legal solutions. This situation may arise in particular with the implementation of important integrated transport infrastructure projects, large computer networks or projects involving complex and structured financing the financial and legal make-up of which cannot be defined in advance. To the extent that use of open or restricted procedures does not allow the award of such contracts, a flexible procedure should be provided which preserves not only competition between economic operators but also the need for the contracting authorities to discuss all aspects of the contract with each candidate. However, this procedure must not be used in such a way as to restrict or distort competition, particularly by altering any fundamental aspects of the offers, or by imposing substantial new requirements on the successful tenderer, or by involving any tenderer other than the one selected as the most economically advantageous.
- (32) In order to encourage the involvement of small and medium-sized undertakings in the public contracts procurement market, it is advisable to include provisions on subcontracting.
- (33) Contract performance conditions are compatible with this Directive provided that they are not directly or indirectly discriminatory and are indicated in the contract notice or in the contract documents. They may, in particular, be intended to favour on-site vocational training, the employment of people experiencing particular difficulty in achieving integration, the fight against unemployment or the protection of the environment. For instance, mention may be made, amongst other things, of the requirements — applicable during performance of the contract — to recruit long-term job-seekers or to implement training measures for the unemployed or young persons, to comply in substance with the provisions of the basic International Labour Organisation (ILO) Conventions, assuming that such provisions have not been implemented in national law, and to recruit more handicapped persons than are required under national legislation.

- (34) The laws, regulations and collective agreements, at both national and Community level, which are in force in the areas of employment conditions and safety at work apply during performance of a public contract, providing that such rules, and their application, comply with Community law. In cross-border situations, where workers from one Member State provide services in another Member State for the purpose of performing a public contract, Directive 96/71/EC of the European Parliament and of the Council of 16 December 1996 concerning the posting of workers in the framework of the provision of services<sup>(1)</sup> lays down the minimum conditions which must be observed by the host country in respect of such posted workers. If national law contains provisions to this effect, non-compliance with those obligations may be considered to be grave misconduct or an offence concerning the professional conduct of the economic operator concerned, liable to lead to the exclusion of that economic operator from the procedure for the award of a public contract.
- (35) In view of new developments in information and communications technology, and the simplifications these can bring in terms of publicising contracts and the efficiency and transparency of procurement processes, electronic means should be put on a par with traditional means of communication and information exchange. As far as possible, the means and technology chosen should be compatible with the technologies used in other Member States.
- (36) To ensure development of effective competition in the field of public contracts, it is necessary that contract notices drawn up by the contracting authorities of Member States be advertised throughout the Community. The information contained in these notices must enable economic operators in the Community to determine whether the proposed contracts are of interest to them. For this purpose, it is appropriate to give them adequate information on the object of the contract and the conditions attached thereto. Improved visibility should therefore be ensured for public notices by means of appropriate instruments, such as standard contract notice forms and the Common Procurement Vocabulary (CPV) provided for in Regulation (EC) No 2195/2002 of the European Parliament and of the Council<sup>(2)</sup> as the reference nomenclature for public contracts. In restricted procedures, advertisement is, more particularly, intended to enable contractors of Member States to express their interest in contracts by seeking from the contracting authorities invitations to tender under the required conditions.
- (37) Directive 1999/93/EC of the European Parliament and of the Council of 13 December 1999 on a Community framework for electronic signatures<sup>(3)</sup> and Directive 2000/31/EC of the European Parliament and of the Council of 8 June 2000 on certain legal aspects of information society services, in particular electronic commerce, in the internal market ('Directive on electronic commerce')<sup>(4)</sup> should, in the context of this Directive, apply to the transmission of information by electronic means. The public procurement procedures and the rules applicable to service contests require a level of security and confidentiality higher than that required by these Directives. Accordingly, the devices for the electronic receipt of offers, requests to participate and plans and projects should comply with specific additional requirements. To this end, use of electronic signatures, in particular advanced electronic signatures, should, as far as possible, be encouraged. Moreover, the existence of voluntary accreditation schemes could constitute a favourable framework for enhancing the level of certification service provision for these devices.
- (38) The use of electronic means leads to savings in time. As a result, provision should be made for reducing the minimum periods where electronic means are used, subject, however, to the condition that they are compatible with the specific mode of transmission envisaged at Community level.
- (39) Verification of the suitability of tenderers, in open procedures, and of candidates, in restricted and negotiated procedures with publication of a contract notice and in the competitive dialogue, and the selection thereof, should be carried out in transparent conditions. For this purpose, non-discriminatory criteria should be indicated which the contracting authorities may use when selecting competitors and the means which economic operators may use to prove they have satisfied those criteria. In the same spirit of transparency, the contracting authority should be required, as soon as a contract is put out to competition, to indicate the selection criteria it will use and the level of specific competence it may or may not demand of the economic operators before admitting them to the procurement procedure.
- (40) A contracting authority may limit the number of candidates in the restricted and negotiated procedures with publication of a contract notice, and in the competitive dialogue. Such a reduction of candidates should be performed on the basis of objective criteria indicated in

<sup>(1)</sup> OJ L 18, 21.1.1997, p. 1.

<sup>(2)</sup> OJ L 340, 16.12.2002, p.1.

<sup>(3)</sup> OJ L 13, 19.1.2000, p. 12.

<sup>(4)</sup> OJ L 178, 17.7.2000, p. 1.

the contract notice. These objective criteria do not necessarily imply weightings. For criteria relating to the personal situation of economic operators, a general reference in the contract notice to the situations set out in Article 45 may suffice.

Non-observance of national provisions implementing the Council Directives 2000/78/EC <sup>(1)</sup> and 76/207/EEC <sup>(2)</sup> concerning equal treatment of workers, which has been the subject of a final judgment or a decision having equivalent effect may be considered an offence concerning the professional conduct of the economic operator concerned or grave misconduct.

- (41) In the competitive dialogue and negotiated procedures with publication of a contract notice, in view of the flexibility which may be required and the high level of costs associated with such methods of procurement, contracting authorities should be entitled to make provision for the procedure to be conducted in successive stages in order gradually to reduce, on the basis of previously indicated contract award criteria, the number of tenders which they will go on to discuss or negotiate. This reduction should, insofar as the number of appropriate solutions or candidates allows, ensure that there is genuine competition.
- (42) The relevant Community rules on mutual recognition of diplomas, certificates or other evidence of formal qualifications apply when evidence of a particular qualification is required for participation in a procurement procedure or a design contest.
- (43) The award of public contracts to economic operators who have participated in a criminal organisation or who have been found guilty of corruption or of fraud to the detriment of the financial interests of the European Communities or of money laundering should be avoided. Where appropriate, the contracting authorities should ask candidates or tenderers to supply relevant documents and, where they have doubts concerning the personal situation of a candidate or tenderer, they may seek the cooperation of the competent authorities of the Member State concerned. The exclusion of such economic operators should take place as soon as the contracting authority has knowledge of a judgment concerning such offences rendered in accordance with national law that has the force of *res judicata*. If national law contains provisions to this effect, non-compliance with environmental legislation or legislation on unlawful agreements in public contracts which has been the subject of a final judgment or a decision having equivalent effect may be considered an offence concerning the professional conduct of the economic operator concerned or grave misconduct.
- (44) In appropriate cases, in which the nature of the works and/or services justifies applying environmental management measures or schemes during the performance of a public contract, the application of such measures or schemes may be required. Environmental management schemes, whether or not they are registered under Community instruments such as Regulation (EC) No 761/2001 <sup>(3)</sup> (EMAS), can demonstrate that the economic operator has the technical capability to perform the contract. Moreover, a description of the measures implemented by the economic operator to ensure the same level of environmental protection should be accepted as an alternative to environmental management registration schemes as a form of evidence.
- (45) This Directive allows Member States to establish official lists of contractors, suppliers or service providers or a system of certification by public or private bodies, and makes provision for the effects of such registration or such certification in a contract award procedure in another Member State. As regards official lists of approved economic operators, it is important to take into account Court of Justice case-law in cases where an economic operator belonging to a group claims the economic, financial or technical capabilities of other companies in the group in support of its application for registration. In this case, it is for the economic operator to prove that those resources will actually be available to it throughout the period of validity of

<sup>(1)</sup> Council Directive 2000/78/EC of 27 November 2000 establishing a general framework for equal treatment in employment and occupation (OJ L 303, 2.12.2000, p. 16).

<sup>(2)</sup> Council Directive 76/207/EEC of 9 February 1976 on the implementation of the principle of equal treatment for men and women as regards access to employment, vocational training and promotion, and working conditions (OJ L 39, 14.2.1976, p. 40). Directive amended by Directive 2002/73/EC of the European Parliament and of the Council (OJ L 269, 5.10.2002, p. 15).

<sup>(3)</sup> Regulation (EC) No 761/2001 of the European Parliament and of the Council of 19 March 2001 allowing a voluntary participation by organisations in a Community eco-management and audit scheme (EMAS) (OJ L 114, 24.4.2001, p. 1).

the registration. For the purposes of that registration, a Member State may therefore determine the level of requirements to be met and in particular, for example where the operator lays claim to the financial standing of another company in the group, it may require that that company be held liable, if necessary jointly and severally.

- (46) Contracts should be awarded on the basis of objective criteria which ensure compliance with the principles of transparency, non-discrimination and equal treatment and which guarantee that tenders are assessed in conditions of effective competition. As a result, it is appropriate to allow the application of two award criteria only: 'the lowest price' and 'the most economically advantageous tender'.

To ensure compliance with the principle of equal treatment in the award of contracts, it is appropriate to lay down an obligation — established by case-law — to ensure the necessary transparency to enable all tenderers to be reasonably informed of the criteria and arrangements which will be applied to identify the most economically advantageous tender. It is therefore the responsibility of contracting authorities to indicate the criteria for the award of the contract and the relative weighting given to each of those criteria in sufficient time for tenderers to be aware of them when preparing their tenders. Contracting authorities may derogate from indicating the weighting of the criteria for the award in duly justified cases for which they must be able to give reasons, where the weighting cannot be established in advance, in particular on account of the complexity of the contract. In such cases, they must indicate the descending order of importance of the criteria.

Where the contracting authorities choose to award a contract to the most economically advantageous tender, they shall assess the tenders in order to determine which one offers the best value for money. In order to do this, they shall determine the economic and quality criteria which, taken as a whole, must make it possible to determine the most economically advantageous tender for the contracting authority. The determination of these criteria depends on the object of the contract since they must allow the level of performance offered by each tender to be assessed in the light of the object of the contract, as defined in the technical specifications, and the value for money of each tender to be measured.

In order to guarantee equal treatment, the criteria for the award of the contract should enable tenders to be

compared and assessed objectively. If these conditions are fulfilled, economic and qualitative criteria for the award of the contract, such as meeting environmental requirements, may enable the contracting authority to meet the needs of the public concerned, as expressed in the specifications of the contract. Under the same conditions, a contracting authority may use criteria aiming to meet social requirements, in response in particular to the needs — defined in the specifications of the contract — of particularly disadvantaged groups of people to which those receiving/using the works, supplies or services which are the object of the contract belong.

- (47) In the case of public service contracts, the award criteria must not affect the application of national provisions on the remuneration of certain services, such as, for example, the services performed by architects, engineers or lawyers and, where public supply contracts are concerned, the application of national provisions setting out fixed prices for school books.

- (48) Certain technical conditions, and in particular those concerning notices and statistical reports, as well as the nomenclature used and the conditions of reference to that nomenclature, will need to be adopted and amended in the light of changing technical requirements. The lists of contracting authorities in the Annexes will also need to be updated. It is therefore appropriate to put in place a flexible and rapid adoption procedure for this purpose.

- (49) The measures necessary for the implementation of this Directive should be adopted in accordance with Council Decision 1999/468/EC of 28 June 1999 laying down the procedures for the exercise of implementing powers conferred on the Commission <sup>(1)</sup>.

- (50) It is appropriate that Council Regulation (EEC, Euratom) No 1182/71 of 3 June 1971 determining the rules applicable to periods, dates and time limits <sup>(2)</sup> should apply to the calculation of the time limits contained in this Directive.

- (51) This Directive should not prejudice the time limits set out in Annex XI, within which Member States are required to transpose and apply Directives 92/50/EEC, 93/36/EEC and 93/37/EEC,

HAVE ADOPTED THIS DIRECTIVE:

<sup>(1)</sup> OJ L 184, 17.7.1999, p. 23.

<sup>(2)</sup> OJ L 124, 8.6.1971, p. 1.

**TABLE OF CONTENTS****TITLE I****Definitions and general principles**

- Article 1 — Definitions
- Article 2 — Principles of awarding contracts
- Article 3 — Granting of special or exclusive rights: non-discrimination clause

**TITLE II****Rules on public contracts**

## CHAPTER I

*General provisions*

- Article 4 — Economic operators
- Article 5 — Conditions relating to agreements concluded within the World Trade Organisation
- Article 6 — Confidentiality

## CHAPTER II

*Scope*

## Section 1 — Thresholds

- Article 7 — Threshold amounts for public contracts
- Article 8 — Contracts subsidised by more than 50 % by contracting authorities
- Article 9 — Methods for calculating the estimated value of public contracts, framework agreements and dynamic purchasing systems

## Section 2 — Specific situations

- Article 10 — Defence procurement
- Article 11 — Public contracts and framework agreements awarded by central purchasing bodies

## Section 3 — Excluded contracts

- Article 12 — Contracts in the water, energy, transport and postal services sectors
- Article 13 — Specific exclusions in the field of telecommunications
- Article 14 — Secret contracts and contracts requiring special security measures
- Article 15 — Contracts awarded pursuant to international rules
- Article 16 — Specific exclusions
- Article 17 — Service concessions
- Article 18 — Service contracts awarded on the basis of an exclusive right

## Section 4 — Special arrangement

Article 19 — Reserved contracts

## CHAPTER III

*Arrangements for public service contracts*

Article 20 — Service contracts listed in Annex II A

Article 21 — Service contracts listed in Annex II B

Article 22 — Mixed contracts including services listed in Annex II A and services listed in Annex II B

## CHAPTER IV

*Specific rules governing specifications and contract documents*

Article 23 — Technical specifications

Article 24 — Variants

Article 25 — Subcontracting

Article 26 — Conditions for performance of contracts

Article 27 — Obligations relating to taxes, environmental protection, employment protection provisions and working conditions

## CHAPTER V

*Procedures*

Article 28 — Use of open, restricted and negotiated procedures and of competitive dialogue

Article 29 — Competitive dialogue

Article 30 — Cases justifying use of the negotiated procedure with prior publication of a contract notice

Article 31 — Cases justifying use of the negotiated procedure without publication of a contract notice

Article 32 — Framework agreements

Article 33 — Dynamic purchasing systems

Article 34 — Public works contracts: particular rules on subsidised housing schemes

## CHAPTER VI

*Rules on advertising and transparency*

## Section 1 — Publication of notices

Article 35 — Notices

Article 36 — Form and manner of publication of notices

Article 37 — Non-mandatory publication

## Section 2 — Time limits

Article 38 — Time limits for receipt of requests to participate and for receipt of tenders

Article 39 — Open procedures: Specifications, additional documents and information

Section 3 — Information content and means of transmission

Article 40 — Invitations to submit a tender, participate in the dialogue or negotiate

Article 41 — Informing candidates and tenderers

Section 4 — Communication

Article 42 — Rules applicable to communication

Section 5 — Reports

Article 43 — Content of reports

CHAPTER VII

*Conduct of the procedure*

Section 1 — General provisions

Article 44 — Verification of the suitability and choice of participants and award of contracts

Section 2 — Criteria for qualitative selection

Article 45 — Personal situation of the candidate or tenderer

Article 46 — Suitability to pursue the professional activity

Article 47 — Economic and financial standing

Article 48 — Technical and/or professional ability

Article 49 — Quality assurance standards

Article 50 — Environmental management standards

Article 51 — Additional documentation and information

Article 52 — Official lists of approved economic operators and certification by bodies established under public or private law

Section 3 — Award of the contract

Article 53 — Contract award criteria

Article 54 — Use of electronic auctions

Article 55 — Abnormally low tenders

**TITLE III**

**Rules on public works concessions**

CHAPTER I

*Rules governing public works concessions*

Article 56 — Scope

Article 57 — Exclusions from the scope

Article 58 — Publication of the notice concerning public works concessions

Article 59 — Time limit

Article 60 — Subcontracting

Article 61 — Awarding of additional works to the concessionaire

**CHAPTER II**

*Rules on contracts awarded by concessionaires which are contracting authorities*

Article 62 — Applicable rules

**CHAPTER III**

*Rules applicable to contracts awarded by concessionaires which are not contracting authorities*

Article 63 — Advertising rules: threshold and exceptions

Article 64 — Publication of the notice

Article 65 — Time limit for the receipt of requests to participate and receipt of tenders

**TITLE IV****Rules governing design contests**

Article 66 — General provisions

Article 67 — Scope

Article 68 — Exclusions from the scope

Article 69 — Notices

Article 70 — Form and manner of publication of notices of contests

Article 71 — Means of communication

Article 72 — Selection of competitors

Article 73 — Composition of the jury

Article 74 — Decisions of the jury

**TITLE V****Statistical obligations, executory powers and final provisions**

Article 75 — Statistical obligations

Article 76 — Content of statistical report

Article 77 — Advisory Committee

Article 78 — Revision of the thresholds

Article 79 — Amendments

Article 80 — Implementation

Article 81 — Monitoring mechanisms

Article 82 — Repeals

Article 83 — Entry into force

Article 84 — Addressees

**ANNEXES**

Annex I — List of the activities referred to in Article 1(2)(b)

Annex II — Services referred to in Article 1(2)(d)

Annex II A

Annex II B

Annex III	— List of bodies and categories of bodies governed by public law referred to in the second subparagraph of Article 1(9)
Annex IV	— Central Government authorities
Annex V	— List of products referred to in Article 7 with regard to contracts awarded by contracting authorities in the field of defence
Annex VI	— Definition of certain technical specifications
Annex VII	— Information to be included in notices
Annex VII A	— Information to be included in public contract notices
Annex VII B	— Information which must appear in public works concession notices
Annex VII C	— Information which must appear in works contracts notices of concessionaires who are not contracting authorities
Annex VII D	— Information which must appear in design contest notices
Annex VIII	— Features concerning publication
Annex IX	— Registers
Annex IX A	— Public works contracts
Annex IX B	— Public supply contracts
Annex IX C	— Public service contracts
Annex X	— Requirements relating to equipment for the electronic receipt of tenders, requests to participate and plans and projects in design contests
Annex XI	— Deadlines for transposition and application (Article 80)
Annex XII	— Correlation table

## TITLE I

### DEFINITIONS AND GENERAL PRINCIPLES

#### Article 1

engineering works taken as a whole which is sufficient of itself to fulfil an economic or technical function.

#### Definitions

1. For the purposes of this Directive, the definitions set out in paragraphs 2 to 15 shall apply.

2. (a) 'Public contracts' are contracts for pecuniary interest concluded in writing between one or more economic operators and one or more contracting authorities and having as their object the execution of works, the supply of products or the provision of services within the meaning of this Directive.

(c) 'Public supply contracts' are public contracts other than those referred to in (b) having as their object the purchase, lease, rental or hire purchase, with or without option to buy, of products.

A public contract having as its object the supply of products and which also covers, as an incidental matter, siting and installation operations shall be considered to be a 'public supply contract'.

(b) 'Public works contracts' are public contracts having as their object either the execution, or both the design and execution, of works related to one of the activities within the meaning of Annex I or a work, or the realisation, by whatever means, of a work corresponding to the requirements specified by the contracting authority. A 'work' means the outcome of building or civil

(d) 'Public service contracts' are public contracts other than public works or supply contracts having as their object the provision of services referred to in Annex II.

A public contract having as its object both products and services within the meaning of Annex II shall be considered to be a 'public service contract' if the value of the services in question exceeds that of the products covered by the contract.

A public contract having as its object services within the meaning of Annex II and including activities within the meaning of Annex I that are only incidental to the principal object of the contract shall be considered to be a public service contract.

3. 'Public works concession' is a contract of the same type as a public works contract except for the fact that the consideration for the works to be carried out consists either solely in the right to exploit the work or in this right together with payment.

4. 'Service concession' is a contract of the same type as a public service contract except for the fact that the consideration for the provision of services consists either solely in the right to exploit the service or in this right together with payment.

5. A 'framework agreement' is an agreement between one or more contracting authorities and one or more economic operators, the purpose of which is to establish the terms governing contracts to be awarded during a given period, in particular with regard to price and, where appropriate, the quantity envisaged.

6. A 'dynamic purchasing system' is a completely electronic process for making commonly used purchases, the characteristics of which, as generally available on the market, meet the requirements of the contracting authority, which is limited in duration and open throughout its validity to any economic operator which satisfies the selection criteria and has submitted an indicative tender that complies with the specification.

7. An 'electronic auction' is a repetitive process involving an electronic device for the presentation of new prices, revised downwards, and/or new values concerning certain elements of tenders, which occurs after an initial full evaluation of the tenders, enabling them to be ranked using automatic evaluation methods.

Consequently, certain service contracts and certain works contracts having as their subject-matter intellectual performances, such as the design of works, may not be the object of electronic auctions.

8. The terms 'contractor', 'supplier' and 'service provider' mean any natural or legal person or public entity or group of such persons and/or bodies which offers on the market, respectively, the execution of works and/or a work, products or services.

The term 'economic operator' shall cover equally the concepts of contractor, supplier and service provider. It is used merely in the interest of simplification.

An economic operator who has submitted a tender shall be designated a 'tenderer'. One which has sought an invitation to

take part in a restricted or negotiated procedure or a competitive dialogue shall be designated a 'candidate'.

9. 'Contracting authorities' means the State, regional or local authorities, bodies governed by public law, associations formed by one or several of such authorities or one or several of such bodies governed by public law.

A 'body governed by public law' means any body:

(a) established for the specific purpose of meeting needs in the general interest, not having an industrial or commercial character;

(b) having legal personality; and

(c) financed, for the most part, by the State, regional or local authorities, or other bodies governed by public law; or subject to management supervision by those bodies; or having an administrative, managerial or supervisory board, more than half of whose members are appointed by the State, regional or local authorities, or by other bodies governed by public law.

Non-exhaustive lists of bodies and categories of bodies governed by public law which fulfil the criteria referred to in (a), (b) and (c) of the second subparagraph are set out in Annex III. Member States shall periodically notify the Commission of any changes to their lists of bodies and categories of bodies.

10. A 'central purchasing body' is a contracting authority which:

— acquires supplies and/or services intended for contracting authorities, or

— awards public contracts or concludes framework agreements for works, supplies or services intended for contracting authorities.

11. (a) 'Open procedures' means those procedures whereby any interested economic operator may submit a tender.

(b) 'Restricted procedures' means those procedures in which any economic operator may request to participate and whereby only those economic operators invited by the contracting authority may submit a tender.

(c) 'Competitive dialogue' is a procedure in which any economic operator may request to participate and whereby the contracting authority conducts a dialogue with the candidates admitted to that procedure, with the aim of developing one or more suitable alternatives capable of meeting its requirements, and on the basis of which the candidates chosen are invited to tender.

For the purpose of recourse to the procedure mentioned in the first subparagraph, a public contract is considered to be 'particularly complex' where the contracting authorities:

— are not objectively able to define the technical means in accordance with Article 23(3)(b), (c) or (d), capable of satisfying their needs or objectives, and/or

— are not objectively able to specify the legal and/or financial make-up of a project.

(d) 'Negotiated procedures' means those procedures whereby the contracting authorities consult the economic operators of their choice and negotiate the terms of contract with one or more of these.

(e) 'Design contests' means those procedures which enable the contracting authority to acquire, mainly in the fields of town and country planning, architecture and engineering or data processing, a plan or design selected by a jury after being put out to competition with or without the award of prizes.

12. 'Written' or 'in writing' means any expression consisting of words or figures which can be read, reproduced and subsequently communicated. It may include information which is transmitted and stored by electronic means.

13. 'Electronic means' means using electronic equipment for the processing (including digital compression) and storage of data which is transmitted, conveyed and received by wire, by radio, by optical means or by other electromagnetic means.

14. The 'Common Procurement Vocabulary (CPV)' shall designate the reference nomenclature applicable to public contracts as adopted by Regulation (EC) No 2195/2002, while ensuring equivalence with the other existing nomenclatures.

In the event of varying interpretations of the scope of this Directive, owing to possible differences between the CPV and NACE nomenclatures listed in Annex I, or between the CPV and CPC (provisional version) nomenclatures listed in Annex II, the NACE or the CPC nomenclature respectively shall take precedence.

15. For the purposes of Article 13, Article 57(a) and Article 68(b), the following phrases shall have the following meanings:

(a) 'public telecommunications network' means the public telecommunications infrastructure which enables signals to be conveyed between defined network termination points by wire, by microwave, by optical means or by other electromagnetic means;

(b) a 'network termination point' means all physical connections and their technical access specifications which form part of the public telecommunications network and are necessary for access to, and efficient communication through, that public network;

(c) 'public telecommunications services' means telecommunications services the provision of which the Member States have specifically assigned, in particular, to one or more telecommunications entities;

(d) 'telecommunications services' means services the provision of which consists wholly or partly in the transmission and routing of signals on the public telecommunications network by means of telecommunications processes, with the exception of broadcasting and television.

#### Article 2

### Principles of awarding contracts

Contracting authorities shall treat economic operators equally and non-discriminatorily and shall act in a transparent way.

#### Article 3

### Granting of special or exclusive rights: non-discrimination clause

Where a contracting authority grants special or exclusive rights to carry out a public service activity to an entity other than such a contracting authority, the act by which that right is granted shall provide that, in respect of the supply contracts which it awards to third parties as part of its activities, the entity concerned must comply with the principle of non-discrimination on the basis of nationality.

## TITLE II

## RULES ON PUBLIC CONTRACTS

## CHAPTER I

**General provisions**

## Article 4

**Economic operators**

1. Candidates or tenderers who, under the law of the Member State in which they are established, are entitled to provide the relevant service, shall not be rejected solely on the ground that, under the law of the Member State in which the contract is awarded, they would be required to be either natural or legal persons.

However, in the case of public service and public works contracts as well as public supply contracts covering in addition services and/or siting and installation operations, legal persons may be required to indicate in the tender or the request to participate, the names and relevant professional qualifications of the staff to be responsible for the performance of the contract in question.

2. Groups of economic operators may submit tenders or put themselves forward as candidates. In order to submit a tender or a request to participate, these groups may not be required by the contracting authorities to assume a specific legal form; however, the group selected may be required to do so when it has been awarded the contract, to the extent that this change is necessary for the satisfactory performance of the contract.

## Article 5

**Conditions relating to agreements concluded within the World Trade Organisation**

For the purposes of the award of contracts by contracting authorities, Member States shall apply in their relations conditions as favourable as those which they grant to economic operators of third countries in implementation of the Agreement on Government Procurement (hereinafter referred to as 'the Agreement'), concluded in the framework of the Uruguay Round multilateral negotiations. Member States shall, to this end, consult one another within the Advisory Committee for Public Contracts referred to in Article 77 on the measures to be taken pursuant to the Agreement.

## Article 6

**Confidentiality**

Without prejudice to the provisions of this Directive, in particular those concerning the obligations relating to the

advertising of awarded contracts and to the information to candidates and tenderers set out in Articles 35(4) and 41, and in accordance with the national law to which the contracting authority is subject, the contracting authority shall not disclose information forwarded to it by economic operators which they have designated as confidential; such information includes, in particular, technical or trade secrets and the confidential aspects of tenders.

## CHAPTER II

**Scope**

## Section 1

## Thresholds

## Article 7

**Threshold amounts for public contracts**

This Directive shall apply to public contracts which are not excluded in accordance with the exceptions provided for in Articles 10 and 11 and Articles 12 to 18 and which have a value exclusive of value-added tax (VAT) estimated to be equal to or greater than the following thresholds:

- (a) EUR 162 000 for public supply and service contracts others than those covered by point (b), third indent, awarded by contracting authorities which are listed as central government authorities in Annex IV; in the case of public supply contracts awarded by contracting authorities operating in the field of defence, this shall apply only to contracts involving products covered by Annex V;
- (b) EUR 249 000
  - for public supply and service contracts awarded by contracting authorities other than those listed in Annex IV,
  - for public supply contracts awarded by contracting authorities which are listed in Annex IV and operate in the field of defence, where these contracts involve products not covered by Annex V,
  - for public service contracts awarded by any contracting authority in respect of the services listed in Category 8 of Annex IIA, Category 5 telecommunications services the positions of which in the CPV are equivalent to CPC reference Nos 7524, 7525 and 7526 and/or the services listed in Annex II B;
- (c) EUR 6 242 000 for public works contracts.

## Article 8

**Contracts subsidised by more than 50 % by contracting authorities**

This Directive shall apply to the awarding of:

- (a) contracts which are subsidised directly by contracting authorities by more than 50 % and the estimated value of which, net of VAT, is equal to or greater than EUR 6 242 000,
- where those contracts involve civil engineering activities within the meaning of Annex I,
  - where those contracts involve building work for hospitals, facilities intended for sports, recreation and leisure, school and university buildings and buildings used for administrative purposes;
- (b) service contracts which are subsidised directly by contracting authorities by more than 50 % and the estimated value of which, net of VAT, is equal to or greater than EUR 249 000 and which are connected with a works contract within the meaning of point (a).

Member States shall take the necessary measures to ensure that the contracting authorities awarding such subsidies ensure compliance with this Directive where that contract is awarded by one or more entities other than themselves or comply with this Directive where they themselves award that contract for and on behalf of those other entities.

## Article 9

**Methods for calculating the estimated value of public contracts, framework agreements and dynamic purchasing systems**

1. The calculation of the estimated value of a public contract shall be based on the total amount payable, net of VAT, as estimated by the contracting authority. This calculation shall take account of the estimated total amount, including any form of option and any renewals of the contract.

Where the contracting authority provides for prizes or payments to candidates or tenderers it shall take them into account when calculating the estimated value of the contract.

2. This estimate must be valid at the moment at which the contract notice is sent, as provided for in Article 35(2), or, in cases where such notice is not required, at the moment at which the contracting authority commences the contract awarding procedure.

3. No works project or proposed purchase of a certain quantity of supplies and/or services may be subdivided to prevent its coming within the scope of this Directive.

4. With regard to public works contracts, calculation of the estimated value shall take account of both the cost of the works and the total estimated value of the supplies necessary for executing the works and placed at the contractor's disposal by the contracting authorities.

5. (a) Where a proposed work or purchase of services may result in contracts being awarded at the same time in the form of separate lots, account shall be taken of the total estimated value of all such lots.

Where the aggregate value of the lots is equal to or exceeds the threshold laid down in Article 7, this Directive shall apply to the awarding of each lot.

However, the contracting authorities may waive such application in respect of lots the estimated value of which net of VAT is less than EUR 80 000 for services or EUR 1 million for works, provided that the aggregate value of those lots does not exceed 20 % of the aggregate value of the lots as a whole.

(b) Where a proposal for the acquisition of similar supplies may result in contracts being awarded at the same time in the form of separate lots, account shall be taken of the total estimated value of all such lots when applying Article 7(a) and (b).

Where the aggregate value of the lots is equal to or exceeds the threshold laid down in Article 7, this Directive shall apply to the awarding of each lot.

However, the contracting authorities may waive such application in respect of lots, the estimated value of which, net of VAT, is less than EUR 80 000, provided that the aggregate cost of those lots does not exceed 20 % of the aggregate value of the lots as a whole.

6. With regard to public supply contracts relating to the leasing, hire, rental or hire purchase of products, the value to be taken as a basis for calculating the estimated contract value shall be as follows:

(a) in the case of fixed-term public contracts, if that term is less than or equal to 12 months, the total estimated value for the term of the contract or, if the term of the contract is greater than 12 months, the total value including the estimated residual value;

(b) in the case of public contracts without a fixed term or the term of which cannot be defined, the monthly value multiplied by 48.

7. In the case of public supply or service contracts which are regular in nature or which are intended to be renewed within a given period, the calculation of the estimated contract value shall be based on the following:

- (a) either the total actual value of the successive contracts of the same type awarded during the preceding 12 months or financial year adjusted, if possible, to take account of the changes in quantity or value which would occur in the course of the 12 months following the initial contract;
- (b) or the total estimated value of the successive contracts awarded during the 12 months following the first delivery, or during the financial year if that is longer than 12 months.

The choice of method used to calculate the estimated value of a public contract may not be made with the intention of excluding it from the scope of this Directive.

8. With regard to public service contracts, the value to be taken as a basis for calculating the estimated contract value shall, where appropriate, be the following:

- (a) for the following types of services:
  - (i) insurance services: the premium payable and other forms of remuneration;
  - (ii) banking and other financial services: the fees, commissions, interest and other forms of remuneration;
  - (iii) design contracts: fees, commission payable and other forms of remuneration;
- (b) for service contracts which do not indicate a total price:
  - (i) in the case of fixed-term contracts, if that term is less than or equal to 48 months: the total value for their full term;
  - (ii) in the case of contracts without a fixed term or with a term greater than 48 months: the monthly value multiplied by 48.

9. With regard to framework agreements and dynamic purchasing systems, the value to be taken into consideration shall be the maximum estimated value net of VAT of all the contracts envisaged for the total term of the framework agreement or the dynamic purchasing system.

## Section 2

### Specific situations

#### Article 10

#### **Defence procurement**

This Directive shall apply to public contracts awarded by contracting authorities in the field of defence, subject to Article 296 of the Treaty.

#### Article 11

#### **Public contracts and framework agreements awarded by central purchasing bodies**

1. Member States may stipulate that contracting authorities may purchase works, supplies and/or services from or through a central purchasing body.
2. Contracting authorities which purchase works, supplies and/or services from or through a central purchasing body in the cases set out in Article 1(10) shall be deemed to have complied with this Directive insofar as the central purchasing body has complied with it.

#### Section 3

#### Excluded contracts

#### Article 12

#### **Contracts in the water, energy, transport and postal services sectors**

This Directive shall not apply to public contracts which, under Directive 2004/17/EC, are awarded by contracting authorities exercising one or more of the activities referred to in Articles 3 to 7 of that Directive and are awarded for the pursuit of those activities, or to public contracts excluded from the scope of that Directive under Article 5(2) and Articles 19, 26 and 30 thereof.

However, this Directive shall continue to apply to public contracts awarded by contracting authorities carrying out one or more of the activities referred to in Article 6 of Directive 2004/17/EC and awarded for those activities, insofar as the Member State concerned takes advantage of the option referred to in the second subparagraph of Article 71 thereof to defer its application.

#### Article 13

#### **Specific exclusions in the field of telecommunications**

This Directive shall not apply to public contracts for the principal purpose of permitting the contracting authorities to provide or exploit public telecommunications networks or to provide to the public one or more telecommunications services.

#### Article 14

#### **Secret contracts and contracts requiring special security measures**

This Directive shall not apply to public contracts when they are declared to be secret, when their performance must be accompanied by special security measures in accordance with the laws, regulations or administrative provisions in force in the Member State concerned, or when the protection of the essential interests of that Member State so requires.

*Article 15***Contracts awarded pursuant to international rules**

This Directive shall not apply to public contracts governed by different procedural rules and awarded:

- (a) pursuant to an international agreement concluded in conformity with the Treaty between a Member State and one or more third countries and covering supplies or works intended for the joint implementation or exploitation of a work by the signatory States or services intended for the joint implementation or exploitation of a project by the signatory States; all agreements shall be communicated to the Commission, which may consult the Advisory Committee for Public Contracts referred to in Article 77;
- (b) pursuant to a concluded international agreement relating to the stationing of troops and concerning the undertakings of a Member State or a third country;
- (c) pursuant to the particular procedure of an international organisation.

*Article 16***Specific exclusions**

This Directive shall not apply to public service contracts for:

- (a) the acquisition or rental, by whatever financial means, of land, existing buildings or other immovable property or concerning rights thereon; nevertheless, financial service contracts concluded at the same time as, before or after the contract of acquisition or rental, in whatever form, shall be subject to this Directive;
- (b) the acquisition, development, production or co-production of programme material intended for broadcasting by broadcasters and contracts for broadcasting time;
- (c) arbitration and conciliation services;
- (d) financial services in connection with the issue, sale, purchase or transfer of securities or other financial instruments, in particular transactions by the contracting authorities to raise money or capital, and central bank services;
- (e) employment contracts;
- (f) research and development services other than those where the benefits accrue exclusively to the contracting authority for its use in the conduct of its own affairs, on condition that the service provided is wholly remunerated by the contracting authority.

*Article 17***Service concessions**

Without prejudice to the application of Article 3, this Directive shall not apply to service concessions as defined in Article 1(4).

*Article 18***Service contracts awarded on the basis of an exclusive right**

This Directive shall not apply to public service contracts awarded by a contracting authority to another contracting authority or to an association of contracting authorities on the basis of an exclusive right which they enjoy pursuant to a published law, regulation or administrative provision which is compatible with the Treaty.

## Section 4

## Special arrangement

*Article 19***Reserved contracts**

Member States may reserve the right to participate in public contract award procedures to sheltered workshops or provide for such contracts to be performed in the context of sheltered employment programmes where most of the employees concerned are handicapped persons who, by reason of the nature or the seriousness of their disabilities, cannot carry on occupations under normal conditions.

The contract notice shall make reference to this provision.

## CHAPTER III

**Arrangements for public service contracts***Article 20***Service contracts listed in Annex II A**

Contracts which have as their object services listed in Annex II A shall be awarded in accordance with Articles 23 to 55.

*Article 21***Service contracts listed in Annex II B**

Contracts which have as their object services listed in Annex II B shall be subject solely to Article 23 and Article 35(4).

## Article 22

**Mixed contracts including services listed in Annex II A and services listed in Annex II B**

Contracts which have as their object services listed both in Annex II A and in Annex II B shall be awarded in accordance with Articles 23 to 55 where the value of the services listed in Annex II A is greater than the value of the services listed in Annex II B. In other cases, contracts shall be awarded in accordance with Article 23 and Article 35(4).

## CHAPTER IV

**Specific rules governing specifications and contract documents**

## Article 23

**Technical specifications**

1. The technical specifications as defined in point 1 of Annex VI shall be set out in the contract documentation, such as contract notices, contract documents or additional documents. Whenever possible these technical specifications should be defined so as to take into account accessibility criteria for people with disabilities or design for all users.

2. Technical specifications shall afford equal access for tenderers and not have the effect of creating unjustified obstacles to the opening up of public procurement to competition.

3. Without prejudice to mandatory national technical rules, to the extent that they are compatible with Community law, the technical specifications shall be formulated:

- (a) either by reference to technical specifications defined in Annex VI and, in order of preference, to national standards transposing European standards, European technical approvals, common technical specifications, international standards, other technical reference systems established by the European standardisation bodies or — when these do not exist — to national standards, national technical approvals or national technical specifications relating to the design, calculation and execution of the works and use of the products. Each reference shall be accompanied by the words 'or equivalent';
- (b) or in terms of performance or functional requirements; the latter may include environmental characteristics. However, such parameters must be sufficiently precise to allow tenderers to determine the subject-matter of the contract and to allow contracting authorities to award the contract;
- (c) or in terms of performance or functional requirements as mentioned in subparagraph (b), with reference to the specifications mentioned in subparagraph (a) as a means of presuming conformity with such performance or functional requirements;

(d) or by referring to the specifications mentioned in subparagraph (a) for certain characteristics, and by referring to the performance or functional requirements mentioned in subparagraph (b) for other characteristics.

4. Where a contracting authority makes use of the option of referring to the specifications mentioned in paragraph 3(a), it cannot reject a tender on the grounds that the products and services tendered for do not comply with the specifications to which it has referred, once the tenderer proves in his tender to the satisfaction of the contracting authority, by whatever appropriate means, that the solutions which he proposes satisfy in an equivalent manner the requirements defined by the technical specifications.

An appropriate means might be constituted by a technical dossier of the manufacturer or a test report from a recognised body.

5. Where a contracting authority uses the option laid down in paragraph 3 to prescribe in terms of performance or functional requirements, it may not reject a tender for works, products or services which comply with a national standard transposing a European standard, with a European technical approval, a common technical specification, an international standard or a technical reference system established by a European standardisation body, if these specifications address the performance or functional requirements which it has laid down.

In his tender, the tenderer must prove to the satisfaction of the contracting authority and by any appropriate means that the work, product or service in compliance with the standard meets the performance or functional requirements of the contracting authority.

An appropriate means might be constituted by a technical dossier of the manufacturer or a test report from a recognised body.

6. Where contracting authorities lay down environmental characteristics in terms of performance or functional requirements as referred to in paragraph 3(b) they may use the detailed specifications, or, if necessary, parts thereof, as defined by European or (multi-) national eco-labels, or by any other eco-label, provided that:

- those specifications are appropriate to define the characteristics of the supplies or services that are the object of the contract,
- the requirements for the label are drawn up on the basis of scientific information,
- the eco-labels are adopted using a procedure in which all stakeholders, such as government bodies, consumers, manufacturers, distributors and environmental organisations can participate, and
- they are accessible to all interested parties.

Contracting authorities may indicate that the products and services bearing the eco-label are presumed to comply with the technical specifications laid down in the contract documents; they must accept any other appropriate means of proof, such as a technical dossier of the manufacturer or a test report from a recognised body.

7. 'Recognised bodies', within the meaning of this Article, are test and calibration laboratories and certification and inspection bodies which comply with applicable European standards.

Contracting authorities shall accept certificates from recognised bodies established in other Member States.

8. Unless justified by the subject-matter of the contract, technical specifications shall not refer to a specific make or source, or a particular process, or to trade marks, patents, types or a specific origin or production with the effect of favouring or eliminating certain undertakings or certain products. Such reference shall be permitted on an exceptional basis, where a sufficiently precise and intelligible description of the subject-matter of the contract pursuant to paragraphs 3 and 4 is not possible; such reference shall be accompanied by the words 'or equivalent'.

#### Article 24

##### Variants

1. Where the criterion for award is that of the most economically advantageous tender, contracting authorities may authorise tenderers to submit variants.

2. Contracting authorities shall indicate in the contract notice whether or not they authorise variants: variants shall not be authorised without this indication.

3. Contracting authorities authorising variants shall state in the contract documents the minimum requirements to be met by the variants and any specific requirements for their presentation.

4. Only variants meeting the minimum requirements laid down by these contracting authorities shall be taken into consideration.

In procedures for awarding public supply or service contracts, contracting authorities which have authorised variants may not reject a variant on the sole ground that it would, if successful, lead to either a service contract rather than a public supply contract or a supply contract rather than a public service contract.

#### Article 25

##### Subcontracting

In the contract documents, the contracting authority may ask or may be required by a Member State to ask the tenderer to indicate in his tender any share of the contract he may intend

to subcontract to third parties and any proposed subcontractors.

This indication shall be without prejudice to the question of the principal economic operator's liability.

#### Article 26

##### Conditions for performance of contracts

Contracting authorities may lay down special conditions relating to the performance of a contract, provided that these are compatible with Community law and are indicated in the contract notice or in the specifications. The conditions governing the performance of a contract may, in particular, concern social and environmental considerations.

#### Article 27

##### Obligations relating to taxes, environmental protection, employment protection provisions and working conditions

1. A contracting authority may state in the contract documents, or be obliged by a Member State so to state, the body or bodies from which a candidate or tenderer may obtain the appropriate information on the obligations relating to taxes, to environmental protection, to the employment protection provisions and to the working conditions which are in force in the Member State, region or locality in which the works are to be carried out or services are to be provided and which shall be applicable to the works carried out on site or to the services provided during the performance of the contract.

2. A contracting authority which supplies the information referred to in paragraph 1 shall request the tenderers or candidates in the contract award procedure to indicate that they have taken account, when drawing up their tender, of the obligations relating to employment protection provisions and the working conditions which are in force in the place where the works are to be carried out or the service is to be provided.

The first subparagraph shall be without prejudice to the application of the provisions of Article 55 concerning the examination of abnormally low tenders.

#### CHAPTER V

##### Procedures

#### Article 28

##### Use of open, restricted and negotiated procedures and of competitive dialogue

In awarding their public contracts, contracting authorities shall apply the national procedures adjusted for the purposes of this Directive.

They shall award these public contracts by applying the open or restricted procedure. In the specific circumstances expressly provided for in Article 29, contracting authorities may award their public contracts by means of the competitive dialogue. In the specific cases and circumstances referred to expressly in Articles 30 and 31, they may apply a negotiated procedure, with or without publication of the contract notice.

#### Article 29

### Competitive dialogue

1. In the case of particularly complex contracts, Member States may provide that where contracting authorities consider that the use of the open or restricted procedure will not allow the award of the contract, the latter may make use of the competitive dialogue in accordance with this Article.

A public contract shall be awarded on the sole basis of the award criterion for the most economically advantageous tender.

2. Contracting authorities shall publish a contract notice setting out their needs and requirements, which they shall define in that notice and/or in a descriptive document.

3. Contracting authorities shall open, with the candidates selected in accordance with the relevant provisions of Articles 44 to 52, a dialogue the aim of which shall be to identify and define the means best suited to satisfying their needs. They may discuss all aspects of the contract with the chosen candidates during this dialogue.

During the dialogue, contracting authorities shall ensure equality of treatment among all tenderers. In particular, they shall not provide information in a discriminatory manner which may give some tenderers an advantage over others.

Contracting authorities may not reveal to the other participants solutions proposed or other confidential information communicated by a candidate participating in the dialogue without his/her agreement.

4. Contracting authorities may provide for the procedure to take place in successive stages in order to reduce the number of solutions to be discussed during the dialogue stage by applying the award criteria in the contract notice or the descriptive document. The contract notice or the descriptive document shall indicate that recourse may be had to this option.

5. The contracting authority shall continue such dialogue until it can identify the solution or solutions, if necessary after comparing them, which are capable of meeting its needs.

6. Having declared that the dialogue is concluded and having so informed the participants, contracting authorities shall

ask them to submit their final tenders on the basis of the solution or solutions presented and specified during the dialogue. These tenders shall contain all the elements required and necessary for the performance of the project.

These tenders may be clarified, specified and fine-tuned at the request of the contracting authority. However, such clarification, specification, fine-tuning or additional information may not involve changes to the basic features of the tender or the call for tender, variations in which are likely to distort competition or have a discriminatory effect.

7. Contracting authorities shall assess the tenders received on the basis of the award criteria laid down in the contract notice or the descriptive document and shall choose the most economically advantageous tender in accordance with Article 53.

At the request of the contracting authority, the tenderer identified as having submitted the most economically advantageous tender may be asked to clarify aspects of the tender or confirm commitments contained in the tender provided this does not have the effect of modifying substantial aspects of the tender or of the call for tender and does not risk distorting competition or causing discrimination.

8. The contracting authorities may specify prices or payments to the participants in the dialogue.

#### Article 30

### Cases justifying use of the negotiated procedure with prior publication of a contract notice

1. Contracting authorities may award their public contracts by negotiated procedure, after publication of a contract notice, in the following cases:

(a) in the event of irregular tenders or the submission of tenders which are unacceptable under national provisions compatible with Articles 4, 24, 25, 27 and Chapter VII, in response to an open or restricted procedure or a competitive dialogue insofar as the original terms of the contract are not substantially altered.

Contracting authorities need not publish a contract notice where they include in the negotiated procedure all of, and only, the tenderers which satisfy the criteria of Articles 45 to 52 and which, during the prior open or restricted procedure or competitive dialogue, have submitted tenders in accordance with the formal requirements of the tendering procedure;

(b) in exceptional cases, when the nature of the works, supplies, or services or the risks attaching thereto do not permit prior overall pricing;

(c) in the case of services, *inter alia* services within category 6 of Annex II A, and intellectual services such as services involving the design of works, insofar as the nature of the services to be provided is such that contract specifications cannot be established with sufficient precision to permit the award of the contract by selection of the best tender according to the rules governing open or restricted procedures;

(d) in respect of public works contracts, for works which are performed solely for purposes of research, testing or development and not with the aim of ensuring profitability or recovering research and development costs.

2. In the cases referred to in paragraph 1, contracting authorities shall negotiate with tenderers the tenders submitted by them in order to adapt them to the requirements which they have set in the contract notice, the specifications and additional documents, if any, and to seek out the best tender in accordance with Article 53(1).

3. During the negotiations, contracting authorities shall ensure the equal treatment of all tenderers. In particular, they shall not provide information in a discriminatory manner which may give some tenderers an advantage over others.

4. Contracting authorities may provide for the negotiated procedure to take place in successive stages in order to reduce the number of tenders to be negotiated by applying the award criteria in the contract notice or the specifications. The contract notice or the specifications shall indicate whether recourse has been had to this option.

#### Article 31

#### Cases justifying use of the negotiated procedure without publication of a contract notice

Contracting authorities may award public contracts by a negotiated procedure without prior publication of a contract notice in the following cases:

(1) for public works contracts, public supply contracts and public service contracts:

(a) when no tenders or no suitable tenders or no applications have been submitted in response to an open procedure or a restricted procedure, provided that the initial conditions of contract are not substantially altered and on condition that a report is sent to the Commission if it so requests;

(b) when, for technical or artistic reasons, or for reasons connected with the protection of exclusive rights, the contract may be awarded only to a particular economic operator;

(c) insofar as is strictly necessary when, for reasons of extreme urgency brought about by events unforeseeable

by the contracting authorities in question, the time limit for the open, restricted or negotiated procedures with publication of a contract notice as referred to in Article 30 cannot be complied with. The circumstances invoked to justify extreme urgency must not in any event be attributable to the contracting authority;

(2) for public supply contracts:

(a) when the products involved are manufactured purely for the purpose of research, experimentation, study or development; this provision does not extend to quantity production to establish commercial viability or to recover research and development costs;

(b) for additional deliveries by the original supplier which are intended either as a partial replacement of normal supplies or installations or as the extension of existing supplies or installations where a change of supplier would oblige the contracting authority to acquire material having different technical characteristics which would result in incompatibility or disproportionate technical difficulties in operation and maintenance; the length of such contracts as well as that of recurrent contracts may not, as a general rule, exceed three years;

(c) for supplies quoted and purchased on a commodity market;

(d) for the purchase of supplies on particularly advantageous terms, from either a supplier which is definitively winding up its business activities, or the receivers or liquidators of a bankruptcy, an arrangement with creditors, or a similar procedure under national laws or regulations;

(3) for public service contracts, when the contract concerned follows a design contest and must, under the applicable rules, be awarded to the successful candidate or to one of the successful candidates, in the latter case, all successful candidates must be invited to participate in the negotiations;

(4) for public works contracts and public service contracts:

(a) for additional works or services not included in the project initially considered or in the original contract but which have, through unforeseen circumstances, become necessary for the performance of the works or services described therein, on condition that the award is made to the economic operator performing such works or services:

— when such additional works or services cannot be technically or economically separated from the original contract without major inconvenience to the contracting authorities,

or

- when such works or services, although separable from the performance of the original contract, are strictly necessary for its completion.

However, the aggregate value of contracts awarded for additional works or services may not exceed 50 % of the amount of the original contract;

- (b) for new works or services consisting in the repetition of similar works or services entrusted to the economic operator to whom the same contracting authorities awarded an original contract, provided that such works or services are in conformity with a basic project for which the original contract was awarded according to the open or restricted procedure.

As soon as the first project is put up for tender, the possible use of this procedure shall be disclosed and the total estimated cost of subsequent works or services shall be taken into consideration by the contracting authorities when they apply the provisions of Article 7.

This procedure may be used only during the three years following the conclusion of the original contract.

#### Article 32

##### Framework agreements

1. Member States may provide that contracting authorities may conclude framework agreements.
2. For the purpose of concluding a framework agreement, contracting authorities shall follow the rules of procedure referred to in this Directive for all phases up to the award of contracts based on that framework agreement. The parties to the framework agreement shall be chosen by applying the award criteria set in accordance with Article 53.

Contracts based on a framework agreement shall be awarded in accordance with the procedures laid down in paragraphs 3 and 4. Those procedures may be applied only between the contracting authorities and the economic operators originally party to the framework agreement.

When awarding contracts based on a framework agreement, the parties may under no circumstances make substantial amendments to the terms laid down in that framework agreement, in particular in the case referred to in paragraph 3.

The term of a framework agreement may not exceed four years, save in exceptional cases duly justified, in particular by the subject of the framework agreement.

Contracting authorities may not use framework agreements improperly or in such a way as to prevent, restrict or distort competition.

3. Where a framework agreement is concluded with a single economic operator, contracts based on that agreement shall be awarded within the limits of the terms laid down in the framework agreement.

For the award of those contracts, contracting authorities may consult the operator party to the framework agreement in writing, requesting it to supplement its tender as necessary.

4. Where a framework agreement is concluded with several economic operators, the latter must be at least three in number, insofar as there is a sufficient number of economic operators to satisfy the selection criteria and/or of admissible tenders which meet the award criteria.

Contracts based on framework agreements concluded with several economic operators may be awarded either:

- by application of the terms laid down in the framework agreement without reopening competition, or
- where not all the terms are laid down in the framework agreement, when the parties are again in competition on the basis of the same and, if necessary, more precisely formulated terms, and, where appropriate, other terms referred to in the specifications of the framework agreement, in accordance with the following procedure:
  - (a) for every contract to be awarded, contracting authorities shall consult in writing the economic operators capable of performing the contract;
  - (b) contracting authorities shall fix a time limit which is sufficiently long to allow tenders for each specific contract to be submitted, taking into account factors such as the complexity of the subject-matter of the contract and the time needed to send in tenders;
  - (c) tenders shall be submitted in writing, and their content shall remain confidential until the stipulated time limit for reply has expired;
  - (d) contracting authorities shall award each contract to the tenderer who has submitted the best tender on the basis of the award criteria set out in the specifications of the framework agreement.

#### Article 33

##### Dynamic purchasing systems

1. Member States may provide that contracting authorities may use dynamic purchasing systems.

2. In order to set up a dynamic purchasing system, contracting authorities shall follow the rules of the open procedure in all its phases up to the award of the contracts to be concluded under this system. All the tenderers satisfying the selection criteria and having submitted an indicative tender which complies with the specification and any possible additional documents shall be admitted to the system; indicative tenders may be improved at any time provided that they continue to comply with the specification. With a view to setting up the system and to the award of contracts under that system, contracting authorities shall use solely electronic means in accordance with Article 42(2) to (5).

3. For the purposes of setting up the dynamic purchasing system, contracting authorities shall:

- (a) publish a contract notice making it clear that a dynamic purchasing system is involved;
- (b) indicate in the specification, amongst other matters, the nature of the purchases envisaged under that system, as well as all the necessary information concerning the purchasing system, the electronic equipment used and the technical connection arrangements and specifications;
- (c) offer by electronic means, on publication of the notice and up to the expiry of the system, unrestricted, direct and full access to the specification and to any additional documents and shall indicate in the notice the internet address at which such documents may be consulted.

4. Contracting authorities shall give any economic operator, throughout the entire period of the dynamic purchasing system, the possibility of submitting an indicative tender and of being admitted to the system under the conditions referred to in paragraph 2. They shall complete evaluation within a maximum of 15 days from the date of submission of the indicative tender. However, they may extend the evaluation period provided that no invitation to tender is issued in the meantime.

The contracting authority shall inform the tenderer referred to in the first subparagraph at the earliest possible opportunity of its admittance to the dynamic purchasing system or of the rejection of its indicative tender.

5. Each specific contract must be the subject of an invitation to tender. Before issuing the invitation to tender, contracting authorities shall publish a simplified contract notice inviting all interested economic operators to submit an indicative tender, in accordance with paragraph 4, within a time limit that may not be less than 15 days from the date on which the simplified notice was sent. Contracting authorities may not

proceed with tendering until they have completed evaluation of all the indicative tenders received by that deadline.

6. Contracting authorities shall invite all tenderers admitted to the system to submit a tender for each specific contract to be awarded under the system. To that end they shall set a time limit for the submission of tenders.

They shall award the contract to the tenderer which submitted the best tender on the basis of the award criteria set out in the contract notice for the establishment of the dynamic purchasing system. Those criteria may, if appropriate, be formulated more precisely in the invitation referred to in the first subparagraph.

7. A dynamic purchasing system may not last for more than four years, except in duly justified exceptional cases.

Contracting authorities may not resort to this system to prevent, restrict or distort competition.

No charges may be billed to the interested economic operators or to parties to the system.

#### Article 34

#### **Public works contracts: particular rules on subsidised housing schemes**

In the case of public contracts relating to the design and construction of a subsidised housing scheme the size and complexity of which, and the estimated duration of the work involved require that planning be based from the outset on close collaboration within a team comprising representatives of the contracting authorities, experts and the contractor to be responsible for carrying out the works, a special award procedure may be adopted for selecting the contractor most suitable for integration into the team.

In particular, contracting authorities shall include in the contract notice as accurate as possible a description of the works to be carried out so as to enable interested contractors to form a valid idea of the project. Furthermore, contracting authorities shall, in accordance with the qualitative selection criteria referred to in Articles 45 to 52, set out in such a contract notice the personal, technical, economic and financial conditions to be fulfilled by candidates.

Where such a procedure is adopted, contracting authorities shall apply Articles 2, 35, 36, 38, 39, 41, 42, 43 and 45 to 52.

## CHAPTER VI

**Rules on advertising and transparency**

## Section 1

## Publication of notices

*Article 35***Notices**

1. Contracting authorities shall make known, by means of a prior information notice published by the Commission or by themselves on their 'buyer profile', as described in point 2(b) of Annex VIII:

(a) where supplies are concerned, the estimated total value of the contracts or the framework agreements by product area which they intend to award over the following 12 months, where the total estimated value, taking into account Articles 7 and 9, is equal to or greater than EUR 750 000.

The product area shall be established by the contracting authorities by reference to the CPV nomenclature;

(b) where services are concerned, the estimated total value of the contracts or the framework agreements in each of the categories of services listed in Annex II A which they intend to award over the following 12 months, where such estimated total value, taking into account the provisions of Articles 7 and 9, is equal to or greater than EUR 750 000;

(c) where works are concerned, the essential characteristics of the contracts or the framework agreements which they intend to award, the estimated value of which is equal to or greater than the threshold specified in Article 7, taking into account Article 9.

The notices referred to in subparagraphs (a) and (b) shall be sent to the Commission or published on the buyer profile as soon as possible after the beginning of the budgetary year.

The notice referred to in subparagraph (c) shall be sent to the Commission or published on the buyer profile as soon as possible after the decision approving the planning of the works contracts or the framework agreements that the contracting authorities intend to award.

Contracting authorities who publish a prior information notice on their buyer profiles shall send the Commission, electronically, a notice of the publication of the prior information notice on a buyer profile, in accordance with the format and detailed procedures for sending notices indicated in point 3 of Annex VIII.

Publication of the notices referred to in subparagraphs (a), (b) and (c) shall be compulsory only where the contracting authorities take the option of shortening the time limits for the receipt of tenders as laid down in Article 38(4).

This paragraph shall not apply to negotiated procedures without the prior publication of a contract notice.

2. Contracting authorities which wish to award a public contract or a framework agreement by open, restricted or, under the conditions laid down in Article 30, negotiated procedure with the publication of a contract notice or, under the conditions laid down in Article 29, a competitive dialogue, shall make known their intention by means of a contract notice.

3. Contracting authorities which wish to set up a dynamic purchasing system shall make known their intention by means of a contract notice.

Contracting authorities which wish to award a contract based on a dynamic purchasing system shall make known their intention by means of a simplified contract notice.

4. Contracting authorities which have awarded a public contract or concluded a framework agreement shall send a notice of the results of the award procedure no later than 48 days after the award of the contract or the conclusion of the framework agreement.

In the case of framework agreements concluded in accordance with Article 32 the contracting authorities are not bound to send a notice of the results of the award procedure for each contract based on that agreement.

Contracting authorities shall send a notice of the result of the award of contracts based on a dynamic purchasing system within 48 days of the award of each contract. They may, however, group such notices on a quarterly basis. In that case, they shall send the grouped notices within 48 days of the end of each quarter.

In the case of public contracts for services listed in Annex II B, the contracting authorities shall indicate in the notice whether they agree to its publication. For such services contracts the Commission shall draw up the rules for establishing statistical reports on the basis of such notices and for the publication of such reports in accordance with the procedure laid down in Article 77(2).

Certain information on the contract award or the conclusion of the framework agreement may be withheld from publication where release of such information would impede law enforcement or otherwise be contrary to the public interest, would harm the legitimate commercial interests of economic operators, public or private, or might prejudice fair competition between them.

*Article 36***Form and manner of publication of notices**

1. Notices shall include the information mentioned in Annex VII A and, where appropriate, any other information deemed useful by the contracting authority in the format of standard forms adopted by the Commission in accordance with the procedure referred to in Article 77(2).

2. Notices sent by contracting authorities to the Commission shall be sent either by electronic means in accordance with the format and procedures for transmission indicated in Annex VIII, paragraph 3, or by other means. In the event of recourse to the accelerated procedure set out in Article 38(8), notices must be sent either by telefax or by electronic means, in accordance with the format and procedures for transmission indicated in point 3 of Annex VIII.

Notices shall be published in accordance with the technical characteristics for publication set out in point 1(a) and (b) of Annex VIII.

3. Notices drawn up and transmitted by electronic means in accordance with the format and procedures for transmission indicated in point 3 of Annex VIII, shall be published no later than five days after they are sent.

Notices which are not transmitted by electronic means in accordance with the format and procedures for transmission indicated in point 3 of Annex VIII, shall be published not later than 12 days after they are sent, or in the case of accelerated procedure referred to in Article 38(8), not later than five days after they are sent.

4. Contract notices shall be published in full in an official language of the Community as chosen by the contracting authority, this original language version constituting the sole authentic text. A summary of the important elements of each notice shall be published in the other official languages.

The costs of publication of such notices by the Commission shall be borne by the Community.

5. Notices and their contents may not be published at national level before the date on which they are sent to the Commission.

Notices published at national level shall not contain information other than that contained in the notices dispatched to the Commission or published on a buyer profile in accordance with the first subparagraph of Article 35(1), but shall mention the date of dispatch of the notice to the Commission or its publication on the buyer profile.

Prior information notices may not be published on a buyer profile before the dispatch to the Commission of the notice of their publication in that form; they shall mention the date of that dispatch.

6. The content of notices not sent by electronic means in accordance with the format and procedures for transmission indicated in point 3 of Annex VIII, shall be limited to approximately 650 words.

7. Contracting authorities must be able to supply proof of the dates on which notices are dispatched.

8. The Commission shall give the contracting authority confirmation of the publication of the information sent, mentioning the date of that publication. Such confirmation shall constitute proof of publication.

#### Article 37

### Non-mandatory publication

Contracting authorities may publish in accordance with Article 36 notices of public contracts which are not subject to the publication requirement laid down in this Directive.

#### Section 2

#### Time limits

#### Article 38

### Time limits for receipt of requests to participate and for receipt of tenders

1. When fixing the time limits for the receipt of tenders and requests to participate, contracting authorities shall take account in particular of the complexity of the contract and the time required for drawing up tenders, without prejudice to the minimum time limits set by this Article.

2. In the case of open procedures, the minimum time limit for the receipt of tenders shall be 52 days from the date on which the contract notice was sent.

3. In the case of restricted procedures, negotiated procedures with publication of a contract notice referred to in Article 30 and the competitive dialogue:

(a) the minimum time limit for receipt of requests to participate shall be 37 days from the date on which the contract notice is sent;

(b) in the case of restricted procedures, the minimum time limit for the receipt of tenders shall be 40 days from the date on which the invitation is sent.

4. When contracting authorities have published a prior information notice, the minimum time limit for the receipt of tenders under paragraphs 2 and 3(b) may, as a general rule, be shortened to 36 days, but under no circumstances to less than 22 days.

The time limit shall run from the date on which the contract notice was sent in open procedures, and from the date on which the invitation to tender was sent in restricted procedures.

The shortened time limits referred to in the first subparagraph shall be permitted, provided that the prior information notice has included all the information required for the contract notice in Annex VII A, insofar as that information is available at the time the notice is published and that the prior information notice was sent for publication between 52 days and 12 months before the date on which the contract notice was sent.

5. Where notices are drawn up and transmitted by electronic means in accordance with the format and procedures for transmission indicated in point 3 of Annex VIII, the time limits for the receipt of tenders referred to in paragraphs 2 and 4 in open procedures, and the time limit for the receipt of the requests to participate referred to in paragraph 3(a), in restricted and negotiated procedures and the competitive dialogue, may be shortened by seven days.

6. The time limits for receipt of tenders referred to in paragraphs 2 and 3(b) may be reduced by five days where the contracting authority offers unrestricted and full direct access by electronic means to the contract documents and any supplementary documents from the date of publication of the notice in accordance with Annex VIII, specifying in the text of the notice the internet address at which this documentation is accessible.

This reduction may be added to that referred to in paragraph 5.

7. If, for whatever reason, the specifications and the supporting documents or additional information, although requested in good time, are not supplied within the time limits set in Articles 39 and 40, or where tenders can be made only after a visit to the site or after on-the-spot inspection of the documents supporting the contract documents, the time limits for the receipt of tenders shall be extended so that all economic operators concerned may be aware of all the information needed to produce tenders.

8. In the case of restricted procedures and negotiated procedures with publication of a contract notice referred to in Article 30, where urgency renders impracticable the time limits laid down in this Article, contracting authorities may fix:

- (a) a time limit for the receipt of requests to participate which may not be less than 15 days from the date on which the contract notice was sent, or less than 10 days if the notice was sent by electronic means, in accordance with the format and procedure for sending notices indicated in point 3 of Annex VIII;
- (b) and, in the case of restricted procedures, a time limit for the receipt of tenders which shall be not less than 10 days from the date of the invitation to tender.

#### Article 39

#### **Open procedures: Specifications, additional documents and information**

1. In open procedures, where contracting authorities do not offer unrestricted and full direct access by electronic means in accordance with Article 38(6) to the specifications and any supporting documents, the specifications and supplementary documents shall be sent to economic operators within six days of receipt of the request to participate, provided that the

request was made in good time before the deadline for the submission of tenders.

2. Provided that it has been requested in good time, additional information relating to the specifications and any supporting documents shall be supplied by the contracting authorities or competent departments not later than six days before the deadline fixed for the receipt of tenders.

### Section 3

#### Information content and means of transmission

#### Article 40

#### **Invitations to submit a tender, participate in the dialogue or negotiate**

1. In restricted procedures, competitive dialogue procedures and negotiated procedures with publication of a contract notice within the meaning of Article 30, contracting authorities shall simultaneously and in writing invite the selected candidates to submit their tenders or to negotiate or, in the case of a competitive dialogue, to take part in the dialogue.

2. The invitation to the candidates shall include either:

- a copy of the specifications or of the descriptive document and any supporting documents, or
- a reference to accessing the specifications and the other documents indicated in the first indent, when they are made directly available by electronic means in accordance with Article 38(6).

3. Where an entity other than the contracting authority responsible for the award procedure has the specifications, the descriptive document and/or any supporting documents, the invitation shall state the address from which those specifications, that descriptive document and those documents may be requested and, if appropriate, the deadline for requesting such documents, and the sum payable for obtaining them and any payment procedures. The competent department shall send that documentation to the economic operator without delay upon receipt of a request.

4. The additional information on the specifications, the descriptive document or the supporting documents shall be sent by the contracting authority or the competent department not less than six days before the deadline fixed for the receipt of tenders, provided that it is requested in good time. In the event of a restricted or an accelerated procedure, that period shall be four days.

5. In addition, the invitation to submit a tender, to participate in the dialogue or to negotiate must contain at least:

- (a) a reference to the contract notice published;

- (b) the deadline for the receipt of the tenders, the address to which the tenders must be sent and the language or languages in which the tenders must be drawn up;
- (c) in the case of competitive dialogue the date and the address set for the start of consultation and the language or languages used;
- (d) a reference to any possible adjoining documents to be submitted, either in support of verifiable declarations by the tenderer in accordance with Article 44, or to supplement the information referred to in that Article, and under the conditions laid down in Articles 47 and 48;
- (e) the relative weighting of criteria for the award of the contract or, where appropriate, the descending order of importance for such criteria, if they are not given in the contract notice, the specifications or the descriptive document.

However, in the case of contracts awarded in accordance with the rules laid down in Article 29, the information referred to in (b) above shall not appear in the invitation to participate in the dialogue but it shall appear in the invitation to submit a tender.

#### Article 41

##### Informing candidates and tenderers

1. Contracting authorities shall as soon as possible inform candidates and tenderers of decisions reached concerning the conclusion of a framework agreement, the award of the contract or admittance to a dynamic purchasing system, including the grounds for any decision not to conclude a framework agreement or award a contract for which there has been a call for competition or to recommence the procedure or implement a dynamic purchasing system; that information shall be given in writing upon request to the contracting authorities.
2. On request from the party concerned, the contracting authority shall as quickly as possible inform:
  - any unsuccessful candidate of the reasons for the rejection of his application,
  - any unsuccessful tenderer of the reasons for the rejection of his tender, including, for the cases referred to in Article 23, paragraphs 4 and 5, the reasons for its decision of non-equivalence or its decision that the works, supplies or services do not meet the performance or functional requirements,
  - any tenderer who has made an admissible tender of the characteristics and relative advantages of the tender selected as well as the name of the successful tenderer or the parties to the framework agreement.

The time taken may in no circumstances exceed 15 days from receipt of the written request.

3. However, contracting authorities may decide to withhold certain information referred to in paragraph 1, regarding the contract award, the conclusion of framework agreements or admittance to a dynamic purchasing system where the release of such information would impede law enforcement, would otherwise be contrary to the public interest, would prejudice the legitimate commercial interests of economic operators, whether public or private, or might prejudice fair competition between them.

#### Section 4

##### Communication

#### Article 42

##### Rules applicable to communication

1. All communication and information exchange referred to in this Title may be by post, by fax, by electronic means in accordance with paragraphs 4 and 5, by telephone in the cases and circumstances referred to in paragraph 6, or by a combination of those means, according to the choice of the contracting authority.
2. The means of communication chosen must be generally available and thus not restrict economic operators' access to the tendering procedure.
3. Communication and the exchange and storage of information shall be carried out in such a way as to ensure that the integrity of data and the confidentiality of tenders and requests to participate are preserved, and that the contracting authorities examine the content of tenders and requests to participate only after the time limit set for submitting them has expired.
4. The tools to be used for communicating by electronic means, as well as their technical characteristics, must be non-discriminatory, generally available and interoperable with the information and communication technology products in general use.
5. The following rules are applicable to devices for the electronic transmission and receipt of tenders and to devices for the electronic receipt of requests to participate:
  - (a) information regarding the specifications necessary for the electronic submission of tenders and requests to participate, including encryption, shall be available to interested parties. Moreover, the devices for the electronic receipt of tenders and requests to participate shall conform to the requirements of Annex X;
  - (b) Member States may, in compliance with Article 5 of Directive 1999/93/EC, require that electronic tenders be accompanied by an advanced electronic signature in conformity with paragraph 1 thereof;

- (c) Member States may introduce or maintain voluntary accreditation schemes aiming at enhanced levels of certification service provision for these devices;
- (d) tenderers or candidates shall undertake to submit, before expiry of the time limit laid down for submission of tenders or requests to participate, the documents, certificates and declarations referred to in Articles 45 to 50 and Article 52 if they do not exist in electronic format.

6. The following rules shall apply to the transmission of requests to participate:

- (a) requests to participate in procedures for the award of public contracts may be made in writing or by telephone;
- (b) where requests to participate are made by telephone, a written confirmation must be sent before expiry of the time limit set for their receipt;
- (c) contracting authorities may require that requests for participation made by fax must be confirmed by post or by electronic means, where this is necessary for the purposes of legal proof. Any such requirement, together with the time limit for sending confirmation by post or electronic means, must be stated by the contracting authority in the contract notice.

#### Section 5

##### Reports

##### Article 43

#### Content of reports

For every contract, framework agreement, and every establishment of a dynamic purchasing system, the contracting authorities shall draw up a written report which shall include at least the following:

- (a) the name and address of the contracting authority, the subject-matter and value of the contract, framework agreement or dynamic purchasing system;
- (b) the names of the successful candidates or tenderers and the reasons for their selection;
- (c) the names of the candidates or tenderers rejected and the reasons for their rejection;
- (d) the reasons for the rejection of tenders found to be abnormally low;
- (e) the name of the successful tenderer and the reasons why his tender was selected and, if known, the share of the contract or framework agreement which the successful tenderer intends to subcontract to third parties;
- (f) for negotiated procedures, the circumstances referred to in Articles 30 and 31 which justify the use of these procedures;

(g) as far as the competitive dialogue is concerned, the circumstances as laid down in Article 29 justifying the use of this procedure;

(h) if necessary, the reasons why the contracting authority has decided not to award a contract or framework agreement or to establish a dynamic purchasing system.

The contracting authorities shall take appropriate steps to document the progress of award procedures conducted by electronic means.

The report, or the main features of it, shall be communicated to the Commission if it so requests.

#### CHAPTER VII

#### *Conduct of the procedure*

##### Section 1

##### General provisions

##### Article 44

#### **Verification of the suitability and choice of participants and award of contracts**

1. Contracts shall be awarded on the basis of the criteria laid down in Articles 53 and 55, taking into account Article 24, after the suitability of the economic operators not excluded under Articles 45 and 46 has been checked by contracting authorities in accordance with the criteria of economic and financial standing, of professional and technical knowledge or ability referred to in Articles 47 to 52, and, where appropriate, with the non-discriminatory rules and criteria referred to in paragraph 3.

2. The contracting authorities may require candidates and tenderers to meet minimum capacity levels in accordance with Articles 47 and 48.

The extent of the information referred to in Articles 47 and 48 and the minimum levels of ability required for a specific contract must be related and proportionate to the subject-matter of the contract.

These minimum levels shall be indicated in the contract notice.

3. In restricted procedures, negotiated procedures with publication of a contract notice and in the competitive dialogue procedure, contracting authorities may limit the number of suitable candidates they will invite to tender, to negotiate or to conduct a dialogue with, provided a sufficient number of suitable candidates is available. The contracting authorities shall indicate in the contract notice the objective and non-discriminatory criteria or rules they intend to apply, the minimum number of candidates they intend to invite and, where appropriate, the maximum number.

In the restricted procedure the minimum shall be five. In the negotiated procedure with publication of a contract notice and the competitive dialogue procedure the minimum shall be three. In any event the number of candidates invited shall be sufficient to ensure genuine competition.

The contracting authorities shall invite a number of candidates at least equal to the minimum number set in advance. Where the number of candidates meeting the selection criteria and the minimum levels of ability is below the minimum number, the contracting authority may continue the procedure by inviting the candidate(s) with the required capabilities. In the context of this same procedure, the contracting authority may not include other economic operators who did not request to participate, or candidates who do not have the required capabilities.

4. Where the contracting authorities exercise the option of reducing the number of solutions to be discussed or of tenders to be negotiated, as provided for in Articles 29(4) and 30(4), they shall do so by applying the award criteria stated in the contract notice, in the specifications or in the descriptive document. In the final stage, the number arrived at shall make for genuine competition insofar as there are enough solutions or suitable candidates.

## Section 2

### Criteria for qualitative selection

#### Article 45

##### **Personal situation of the candidate or tenderer**

1. Any candidate or tenderer who has been the subject of a conviction by final judgment of which the contracting authority is aware for one or more of the reasons listed below shall be excluded from participation in a public contract:

- (a) participation in a criminal organisation, as defined in Article 2(1) of Council Joint Action 98/733/JHA <sup>(1)</sup>;
- (b) corruption, as defined in Article 3 of the Council Act of 26 May 1997 <sup>(2)</sup> and Article 3(1) of Council Joint Action 98/742/JHA <sup>(3)</sup> respectively;
- (c) fraud within the meaning of Article 1 of the Convention relating to the protection of the financial interests of the European Communities <sup>(4)</sup>;
- (d) money laundering, as defined in Article 1 of Council Directive 91/308/EEC of 10 June 1991 on prevention of the use of the financial system for the purpose of money laundering <sup>(5)</sup>.

Member States shall specify, in accordance with their national law and having regard for Community law, the implementing conditions for this paragraph.

<sup>(1)</sup> OJ L 351, 29.12.1998, p. 1.

<sup>(2)</sup> OJ C 195, 25.6.1997, p. 1.

<sup>(3)</sup> OJ L 358, 31.12.1998, p. 2.

<sup>(4)</sup> OJ C 316, 27.11.1995, p. 48.

<sup>(5)</sup> OJ L 166, 28.6.1991, p. 77. Directive as amended by Directive 2001/97/EC of the European Parliament and of the Council of 4 December 2001 (OJ L 344, 28.12.2001, p. 76).

They may provide for a derogation from the requirement referred to in the first subparagraph for overriding requirements in the general interest.

For the purposes of this paragraph, the contracting authorities shall, where appropriate, ask candidates or tenderers to supply the documents referred to in paragraph 3 and may, where they have doubts concerning the personal situation of such candidates or tenderers, also apply to the competent authorities to obtain any information they consider necessary on the personal situation of the candidates or tenderers concerned. Where the information concerns a candidate or tenderer established in a State other than that of the contracting authority, the contracting authority may seek the cooperation of the competent authorities. Having regard for the national laws of the Member State where the candidates or tenderers are established, such requests shall relate to legal and/or natural persons, including, if appropriate, company directors and any person having powers of representation, decision or control in respect of the candidate or tenderer.

2. Any economic operator may be excluded from participation in a contract where that economic operator:

- (a) is bankrupt or is being wound up, where his affairs are being administered by the court, where he has entered into an arrangement with creditors, where he has suspended business activities or is in any analogous situation arising from a similar procedure under national laws and regulations;
- (b) is the subject of proceedings for a declaration of bankruptcy, for an order for compulsory winding up or administration by the court or of an arrangement with creditors or of any other similar proceedings under national laws and regulations;
- (c) has been convicted by a judgment which has the force of res judicata in accordance with the legal provisions of the country of any offence concerning his professional conduct;
- (d) has been guilty of grave professional misconduct proven by any means which the contracting authorities can demonstrate;
- (e) has not fulfilled obligations relating to the payment of social security contributions in accordance with the legal provisions of the country in which he is established or with those of the country of the contracting authority;
- (f) has not fulfilled obligations relating to the payment of taxes in accordance with the legal provisions of the country in which he is established or with those of the country of the contracting authority;

(g) is guilty of serious misrepresentation in supplying the information required under this Section or has not supplied such information.

Member States shall specify, in accordance with their national law and having regard for Community law, the implementing conditions for this paragraph.

3. Contracting authorities shall accept the following as sufficient evidence that none of the cases specified in paragraphs 1 or 2(a), (b), (c), (e) or (f) applies to the economic operator:

- (a) as regards paragraphs 1 and 2(a), (b) and (c), the production of an extract from the 'judicial record' or, failing that, of an equivalent document issued by a competent judicial or administrative authority in the country of origin or the country whence that person comes showing that these requirements have been met;
- (b) as regards paragraph 2(e) and (f), a certificate issued by the competent authority in the Member State concerned.

Where the country in question does not issue such documents or certificates, or where these do not cover all the cases specified in paragraphs 1 and 2(a), (b) and (c), they may be replaced by a declaration on oath or, in Member States where there is no provision for declarations on oath, by a solemn declaration made by the person concerned before a competent judicial or administrative authority, a notary or a competent professional or trade body, in the country of origin or in the country whence that person comes.

4. Member States shall designate the authorities and bodies competent to issue the documents, certificates or declarations referred to in paragraph 3 and shall inform the Commission thereof. Such notification shall be without prejudice to data protection law.

#### Article 46

##### **Suitability to pursue the professional activity**

Any economic operator wishing to take part in a public contract may be requested to prove its enrolment, as prescribed in his Member State of establishment, on one of the professional or trade registers or to provide a declaration on oath or a certificate as described in Annex IX A for public works contracts, in Annex IX B for public supply contracts and in Annex IX C for public service contracts.

In procedures for the award of public service contracts, insofar as candidates or tenderers have to possess a particular authorisation or to be members of a particular organisation in order to be able to perform in their country of origin the service concerned, the contracting authority may require them to prove that they hold such authorisation or membership.

#### Article 47

##### **Economic and financial standing**

1. Proof of the economic operator's economic and financial standing may, as a general rule, be furnished by one or more of the following references:

- (a) appropriate statements from banks or, where appropriate, evidence of relevant professional risk indemnity insurance;
- (b) the presentation of balance-sheets or extracts from the balance-sheets, where publication of the balance-sheet is required under the law of the country in which the economic operator is established;
- (c) a statement of the undertaking's overall turnover and, where appropriate, of turnover in the area covered by the contract for a maximum of the last three financial years available, depending on the date on which the undertaking was set up or the economic operator started trading, as far as the information on these turnovers is available.

2. An economic operator may, where appropriate and for a particular contract, rely on the capacities of other entities, regardless of the legal nature of the links which it has with them. It must in that case prove to the contracting authority that it will have at its disposal the resources necessary, for example, by producing an undertaking by those entities to that effect.

3. Under the same conditions, a group of economic operators as referred to in Article 4 may rely on the capacities of participants in the group or of other entities.

4. Contracting authorities shall specify, in the contract notice or in the invitation to tender, which reference or references mentioned in paragraph 1 they have chosen and which other references must be provided.

5. If, for any valid reason, the economic operator is unable to provide the references requested by the contracting authority, he may prove his economic and financial standing by any other document which the contracting authority considers appropriate.

#### Article 48

##### **Technical and/or professional ability**

1. The technical and/or professional abilities of the economic operators shall be assessed and examined in accordance with paragraphs 2 and 3.

2. Evidence of the economic operators' technical abilities may be furnished by one or more of the following means according to the nature, quantity or importance, and use of the works, supplies or services:

- (a) (i) a list of the works carried out over the past five years, accompanied by certificates of satisfactory execution for the most important works. These certificates shall indicate the value, date and site of the works and shall specify whether they were carried out according to the rules of the trade and properly completed. Where appropriate, the competent authority shall submit these certificates to the contracting authority direct;
- (ii) a list of the principal deliveries effected or the main services provided in the past three years, with the sums, dates and recipients, whether public or private, involved. Evidence of delivery and services provided shall be given:
- where the recipient was a contracting authority, in the form of certificates issued or countersigned by the competent authority,
  - where the recipient was a private purchaser, by the purchaser's certification or, failing this, simply by a declaration by the economic operator;
- (b) an indication of the technicians or technical bodies involved, whether or not belonging directly to the economic operator's undertaking, especially those responsible for quality control and, in the case of public works contracts, those upon whom the contractor can call in order to carry out the work;
- (c) a description of the technical facilities and measures used by the supplier or service provider for ensuring quality and the undertaking's study and research facilities;
- (d) where the products or services to be supplied are complex or, exceptionally, are required for a special purpose, a check carried out by the contracting authorities or on their behalf by a competent official body of the country in which the supplier or service provider is established, subject to that body's agreement, on the production capacities of the supplier or the technical capacity of the service provider and, if necessary, on the means of study and research which are available to it and the quality control measures it will operate;
- (e) the educational and professional qualifications of the service provider or contractor and/or those of the undertaking's managerial staff and, in particular, those of the person or persons responsible for providing the services or managing the work;
- (f) for public works contracts and public services contracts, and only in appropriate cases, an indication of the environmental management measures that the economic operator will be able to apply when performing the contract;
- (g) a statement of the average annual manpower of the service provider or contractor and the number of managerial staff for the last three years;
- (h) a statement of the tools, plant or technical equipment available to the service provider or contractor for carrying out the contract;
- (i) an indication of the proportion of the contract which the services provider intends possibly to subcontract;
- (j) with regard to the products to be supplied:
- (i) samples, descriptions and/or photographs, the authenticity of which must be certified if the contracting authority so requests;
  - (ii) certificates drawn up by official quality control institutes or agencies of recognised competence attesting the conformity of products clearly identified by references to specifications or standards.
3. An economic operator may, where appropriate and for a particular contract, rely on the capacities of other entities, regardless of the legal nature of the links which it has with them. It must in that case prove to the contracting authority that it will have at its disposal the resources necessary for the execution of the contract, for example, by producing an undertaking by those entities to place the necessary resources at the disposal of the economic operator.
4. Under the same conditions a group of economic operators as referred to Article 4 may rely on the abilities of participants in the group or in other entities.
5. In procedures for awarding public contracts having as their object supplies requiring siting or installation work, the provision of services and/or the execution of works, the ability of economic operators to provide the service or to execute the installation or the work may be evaluated in particular with regard to their skills, efficiency, experience and reliability.
6. The contracting authority shall specify, in the notice or in the invitation to tender, which references under paragraph 2 it wishes to receive.

*Article 49***Quality assurance standards**

Should they require the production of certificates drawn up by independent bodies attesting the compliance of the economic operator with certain quality assurance standards, contracting authorities shall refer to quality assurance systems based on the relevant European standards series certified by bodies conforming to the European standards series concerning certification. They shall recognise equivalent certificates from bodies established in other Member States. They shall also accept other evidence of equivalent quality assurance measures from economic operators.

*Article 50***Environmental management standards**

Should contracting authorities, in the cases referred to in Article 48(2)(f), require the production of certificates drawn up by independent bodies attesting the compliance of the economic operator with certain environmental management standards, they shall refer to the Community Eco-Management and Audit Scheme (EMAS) or to environmental management standards based on the relevant European or international standards certified by bodies conforming to Community law or the relevant European or international standards concerning certification. They shall recognise equivalent certificates from bodies established in other Member States. They shall also accept other evidence of equivalent environmental management measures from economic operators.

*Article 51***Additional documentation and information**

The contracting authority may invite economic operators to supplement or clarify the certificates and documents submitted pursuant to Articles 45 to 50.

*Article 52***Official lists of approved economic operators and certification by bodies established under public or private law**

1. Member States may introduce either official lists of approved contractors, suppliers or service providers or certification by certification bodies established in public or private law.

Member States shall adapt the conditions for registration on these lists and for the issue of certificates by certification bodies to the provisions of Article 45(1), Article 45(2)(a) to (d) and (g), Articles 46, Article 47(1), (4) and (5), Article 48(1), (2), (5) and (6), Article 49 and, where appropriate, Article 50.

Member States shall also adapt them to Article 47(2) and Article 48(3) as regards applications for registration submitted by economic operators belonging to a group and claiming resources made available to them by the other companies in the group. In such case, these operators must prove to the authority establishing the official list that they will have these resources at their disposal throughout the period of validity of the certificate attesting to their being registered in the official list and that throughout the same period these companies continue to fulfil the qualitative selection requirements laid down in the Articles referred to in the second subparagraph on which operators rely for their registration.

2. Economic operators registered on the official lists or having a certificate may, for each contract, submit to the contracting authority a certificate of registration issued by the competent authority or the certificate issued by the competent certification body. The certificates shall state the references which enabled them to be registered in the list/to obtain certification and the classification given in that list.

3. Certified registration on official lists by the competent bodies or a certificate issued by the certification body shall not, for the purposes of the contracting authorities of other Member States, constitute a presumption of suitability except as regards Articles 45(1) and (2)(a) to (d) and (g), Article 46, Article 47(1)(b) and (c), and Article 48(2)(a)(i), (b), (e), (g) and (h) in the case of contractors, (2)(a)(ii), (b), (c), (d) and (j) in the case of suppliers and 2(a)(ii) and (c) to (i) in the case of service providers.

4. Information which can be deduced from registration on official lists or certification may not be questioned without justification. With regard to the payment of social security contributions and taxes, an additional certificate may be required of any registered economic operator whenever a contract is offered.

The contracting authorities of other Member States shall apply paragraph 3 and the first subparagraph of this paragraph only in favour of economic operators established in the Member State holding the official list.

5. For any registration of economic operators of other Member States in an official list or for their certification by the bodies referred to in paragraph 1, no further proof or statements can be required other than those requested of national economic operators and, in any event, only those provided for under Articles 45 to 49 and, where appropriate, Article 50.

However, economic operators from other Member States may not be obliged to undergo such registration or certification in order to participate in a public contract. The contracting authorities shall recognise equivalent certificates from bodies established in other Member States. They shall also accept other equivalent means of proof.

6. Economic operators may ask at any time to be registered in an official list or for a certificate to be issued. They must be informed within a reasonably short period of time of the decision of the authority drawing up the list or of the competent certification body.

7. The certification bodies referred to in paragraph 1 shall be bodies complying with European certification standards.

8. Member States which have official lists or certification bodies as referred to in paragraph 1 shall be obliged to inform the Commission and the other Member States of the address of the body to which applications should be sent.

### Section 3

#### Award of the contract

#### Article 53

##### Contract award criteria

1. Without prejudice to national laws, regulations or administrative provisions concerning the remuneration of certain services, the criteria on which the contracting authorities shall base the award of public contracts shall be either:

- (a) when the award is made to the tender most economically advantageous from the point of view of the contracting authority, various criteria linked to the subject-matter of the public contract in question, for example, quality, price, technical merit, aesthetic and functional characteristics, environmental characteristics, running costs, cost-effectiveness, after-sales service and technical assistance, delivery date and delivery period or period of completion, or
- (b) the lowest price only.

2. Without prejudice to the provisions of the third subparagraph, in the case referred to in paragraph 1(a) the contracting authority shall specify in the contract notice or in the contract documents or, in the case of a competitive dialogue, in the descriptive document, the relative weighting which it gives to each of the criteria chosen to determine the most economically advantageous tender.

Those weightings can be expressed by providing for a range with an appropriate maximum spread.

Where, in the opinion of the contracting authority, weighting is not possible for demonstrable reasons, the contracting authority shall indicate in the contract notice or contract documents or, in the case of a competitive dialogue, in the descriptive document, the criteria in descending order of importance.

#### Article 54

##### Use of electronic auctions

1. Member States may provide that contracting authorities may use electronic auctions.

2. In open, restricted or negotiated procedures in the case referred to in Article 30(1)(a), the contracting authorities may decide that the award of a public contract shall be preceded by an electronic auction when the contract specifications can be established with precision.

In the same circumstances, an electronic auction may be held on the reopening of competition among the parties to a framework agreement as provided for in the second indent of the second subparagraph of Article 32(4) and on the opening for competition of contracts to be awarded under the dynamic purchasing system referred to in Article 33.

The electronic auction shall be based:

- either solely on prices when the contract is awarded to the lowest price,
- or on prices and/or on the new values of the features of the tenders indicated in the specification when the contract is awarded to the most economically advantageous tender.

3. Contracting authorities which decide to hold an electronic auction shall state that fact in the contract notice.

The specifications shall include, *inter alia*, the following details:

- (a) the features, the values for which will be the subject of electronic auction, provided that such features are quantifiable and can be expressed in figures or percentages;
- (b) any limits on the values which may be submitted, as they result from the specifications relating to the subject of the contract;
- (c) the information which will be made available to tenderers in the course of the electronic auction and, where appropriate, when it will be made available to them;
- (d) the relevant information concerning the electronic auction process;
- (e) the conditions under which the tenderers will be able to bid and, in particular, the minimum differences which will, where appropriate, be required when bidding;
- (f) the relevant information concerning the electronic equipment used and the arrangements and technical specifications for connection.

4. Before proceeding with an electronic auction, contracting authorities shall make a full initial evaluation of the tenders in accordance with the award criterion/criteria set and with the weighting fixed for them.

All tenderers who have submitted admissible tenders shall be invited simultaneously by electronic means to submit new prices and/or new values; the invitation shall contain all relevant information concerning individual connection to the electronic equipment being used and shall state the date and time of the start of the electronic auction. The electronic auction may take place in a number of successive phases. The electronic auction may not start sooner than two working days after the date on which invitations are sent out.

5. When the contract is to be awarded on the basis of the most economically advantageous tender, the invitation shall be accompanied by the outcome of a full evaluation of the relevant tenderer, carried out in accordance with the weighting provided for in the first subparagraph of Article 53(2).

The invitation shall also state the mathematical formula to be used in the electronic auction to determine automatic rerankings on the basis of the new prices and/or new values submitted. That formula shall incorporate the weighting of all the criteria fixed to determine the most economically advantageous tender, as indicated in the contract notice or in the specifications; for that purpose, any ranges shall, however, be reduced beforehand to a specified value.

Where variants are authorised, a separate formula shall be provided for each variant.

6. Throughout each phase of an electronic auction the contracting authorities shall instantaneously communicate to all tenderers at least sufficient information to enable them to ascertain their relative rankings at any moment. They may also communicate other information concerning other prices or values submitted, provided that that is stated in the specifications. They may also at any time announce the number of participants in that phase of the auction. In no case, however, may they disclose the identities of the tenderers during any phase of an electronic auction.

7. Contracting authorities shall close an electronic auction in one or more of the following manners:

- (a) in the invitation to take part in the auction they shall indicate the date and time fixed in advance;
- (b) when they receive no more new prices or new values which meet the requirements concerning minimum differences. In that event, the contracting authorities shall state in the invitation to take part in the auction the time which they will allow to elapse after receiving the last submission before they close the electronic auction;
- (c) when the number of phases in the auction, fixed in the invitation to take part in the auction, has been completed.

When the contracting authorities have decided to close an electronic auction in accordance with subparagraph (c), possibly in combination with the arrangements laid down in subparagraph (b), the invitation to take part in the auction shall indicate the timetable for each phase of the auction.

8. After closing an electronic auction contracting authorities shall award the contract in accordance with Article 53 on the basis of the results of the electronic auction.

Contracting authorities may not have improper recourse to electronic auctions nor may they use them in such a way as to prevent, restrict or distort competition or to change the subject-matter of the contract, as put up for tender in the published contract notice and defined in the specification.

#### Article 55

#### Abnormally low tenders

1. If, for a given contract, tenders appear to be abnormally low in relation to the goods, works or services, the contracting authority shall, before it may reject those tenders, request in writing details of the constituent elements of the tender which it considers relevant.

Those details may relate in particular to:

- (a) the economics of the construction method, the manufacturing process or the services provided;
- (b) the technical solutions chosen and/or any exceptionally favourable conditions available to the tenderer for the execution of the work, for the supply of the goods or services;
- (c) the originality of the work, supplies or services proposed by the tenderer;
- (d) compliance with the provisions relating to employment protection and working conditions in force at the place where the work, service or supply is to be performed;
- (e) the possibility of the tenderer obtaining State aid.

2. The contracting authority shall verify those constituent elements by consulting the tenderer, taking account of the evidence supplied.

3. Where a contracting authority establishes that a tender is abnormally low because the tenderer has obtained State aid, the tender can be rejected on that ground alone only after consultation with the tenderer where the latter is unable to prove, within a sufficient time limit fixed by the contracting authority, that the aid in question was granted legally. Where the contracting authority rejects a tender in these circumstances, it shall inform the Commission of that fact.

## TITLE III

## RULES ON PUBLIC WORKS CONCESSIONS

## CHAPTER I

**Rules governing public works concessions**

## Article 56

**Scope**

This Chapter shall apply to all public works concession contracts concluded by the contracting authorities where the value of the contracts is equal to or greater than EUR 6 242 000.

The value shall be calculated in accordance with the rules applicable to public works contracts defined in Article 9.

## Article 57

**Exclusions from the scope**

This Title shall not apply to public works concessions which are awarded:

- (a) in the cases referred to in Articles 13, 14 and 15 of this Directive in respect of public works contracts;
- (b) by contracting authorities exercising one or more of the activities referred to in Articles 3 to 7 of Directive 2004/17/EC where those concessions are awarded for carrying out those activities.

However, this Directive shall continue to apply to public works concessions awarded by contracting authorities carrying out one or more of the activities referred to in Article 6 of Directive 2004/17/EC and awarded for those activities, insofar as the Member State concerned takes advantage of the option referred to in the second subparagraph of Article 71 thereof to defer its application.

## Article 58

**Publication of the notice concerning public works concessions**

1. Contracting authorities which wish to award a public works concession contract shall make known their intention by means of a notice.
2. Notices of public works concessions shall contain the information referred to in Annex VII C and, where appropriate, any other information deemed useful by the contracting authority, in accordance with the standard forms adopted by the Commission pursuant to the procedure in Article 77(2).
3. Notices shall be published in accordance with Article 36(2) to (8).

4. Article 37 on the publication of notices shall also apply to public works concessions.

## Article 59

**Time limit**

When contracting authorities resort to a public works concession, the time limit for the presentation of applications for the concession shall be not less than 52 days from the date of dispatch of the notice, except where Article 38(5) applies.

Article 38(7) shall apply.

## Article 60

**Subcontracting**

The contracting authority may either:

- (a) require the concessionaire to award contracts representing a minimum of 30 % of the total value of the work for which the concession contract is to be awarded, to third parties, at the same time providing the option for candidates to increase this percentage, this minimum percentage being specified in the concession contract, or
- (b) request the candidates for concession contracts to specify in their tenders the percentage, if any, of the total value of the work for which the concession contract is to be awarded which they intend to assign to third parties.

## Article 61

**Awarding of additional works to the concessionaire**

This Directive shall not apply to additional works not included in the concession project initially considered or in the initial contract but which have, through unforeseen circumstances, become necessary for the performance of the work described therein, which the contracting authority has awarded to the concessionaire, on condition that the award is made to the economic operator performing such work:

- when such additional works cannot be technically or economically separated from the initial contract without major inconvenience to the contracting authorities, or
- when such works, although separable from the performance of the initial contract, are strictly necessary for its completion.

However, the aggregate value of contracts awarded for additional works may not exceed 50 % of the amount of the original works concession contract.

## CHAPTER II

### **Rules on contracts awarded by concessionaires which are contracting authorities**

#### *Article 62*

#### **Applicable rules**

Where the concessionaire is a contracting authority as referred to in Article 1(9), it shall comply with the provisions laid down by this Directive for public works contracts in the case of works to be carried out by third parties.

## CHAPTER III

### **Rules applicable to contracts awarded by concessionaires which are not contracting authorities**

#### *Article 63*

#### **Advertising rules: threshold and exceptions**

1. The Member States shall take the necessary measures to ensure that public works concessionaires which are not contracting authorities apply the advertising rules defined in Article 64 when awarding works contracts to third parties where the value of such contracts is equal to or greater than EUR 6 242 000.

Advertising shall not, however, be required where a works contract satisfies the conditions listed in Article 31.

The values of contracts shall be calculated in accordance with the rules applicable to public works contracts laid down in Article 9.

2. Groups of undertakings which have been formed to obtain the concession or undertakings related to them shall not be considered third parties.

'Related undertaking' shall mean any undertaking over which the concessionaire can exert a dominant influence, whether directly or indirectly, or any undertaking which can exert a dominant influence on the concessionaire or which, as the concessionaire, is subject to the dominant influence of another undertaking as a result of ownership, financial participation or

the rules which govern it. A dominant influence on the part of an undertaking is presumed when, directly or indirectly in relation to another undertaking, it:

- (a) holds a majority of the undertaking's subscribed capital;
- (b) controls a majority of the votes attached to the shares issued by the undertaking; or
- (c) can appoint more than half of the undertaking's administrative, management or supervisory body.

The exhaustive list of such undertakings shall be included in the application for the concession. That list shall be brought up to date following any subsequent changes in the relationship between the undertakings.

#### *Article 64*

#### **Publication of the notice**

1. Works concessionaires which are not contracting authorities and which wish to award works contracts to a third party shall make known their intention by way of a notice.
2. Notices shall contain the information referred to in Annex VII C and, where appropriate, any other information deemed useful by the works concessionaire, in accordance with the standard form adopted by the Commission in accordance with the procedure in Article 77(2).
3. The notice shall be published in accordance with Article 36(2) to (8).
4. Article 37 on the voluntary publication of notices shall also apply.

#### *Article 65*

#### **Time limit for the receipt of requests to participate and receipt of tenders**

In works contracts awarded by a works concessionaire which is not a contracting authority, the time limit for the receipt of requests to participate, fixed by the concessionaire, shall be not less than 37 days from the date on which the contract notice was dispatched and the time limit for the receipt of tenders not less than 40 days from the date on which the contract notice or the invitation to tender was dispatched.

Article 38(5), (6) and (7) shall apply.

## TITLE IV

## RULES GOVERNING DESIGN CONTESTS

## Article 66

**General provisions**

1. The rules for the organisation of design contests shall be in conformity with Articles 66 to 74 and shall be communicated to those interested in participating in the contest.

2. The admission of participants to design contests shall not be limited:

- (a) by reference to the territory or part of the territory of a Member State;
- (b) on the grounds that, under the law of the Member State in which the contest is organised, they would be required to be either natural or legal persons.

## Article 67

**Scope**

1. In accordance with this Title, design contests shall be organised by:

- (a) contracting authorities which are listed as central government authorities in Annex IV, starting from a threshold equal to or greater than EUR 162 000;
- (b) contracting authorities not listed in Annex IV, starting from a threshold equal to or greater than EUR 249 000;
- (c) by all the contracting authorities, starting from a threshold equal to or greater than EUR 249 000 where contests concern services in category 8 of Annex II A, category 5 telecommunications services, the positions of which in the CPV are equivalent to reference Nos CPC 7524, 7525 and 7526 and/or services listed in Annex II B.

2. This Title shall apply to:

- (a) design contests organised as part of a procedure leading to the award of a public service contract;
- (b) design contests with prizes and/or payments to participants.

In the cases referred to in (a) the threshold refers to the estimated value net of VAT of the public services contract, including any possible prizes and/or payments to participants.

In the cases referred to in (b), the threshold refers to the total amount of the prizes and payments, including the estimated value net of VAT of the public services contract which might

subsequently be concluded under Article 31(3) if the contracting authority does not exclude such an award in the contest notice.

## Article 68

**Exclusions from the scope**

This Title shall not apply to:

- (a) design contests within the meaning of Directive 2004/17/EC which are organised by contracting authorities exercising one or more of the activities referred to in Articles 3 to 7 of that Directive and are organised for the pursuit of such activities; nor shall it apply to contests excluded from the scope of this Directive.

However, this Directive shall continue to apply to design contests awarded by contracting authorities carrying out one or more of the activities referred to in Article 6 of Directive 2004/17/EC and awarded for those activities, insofar as the Member State concerned takes advantage of the option referred to in the second subparagraph of Article 71 thereof to defer its application;

- (b) contests which are organised in the same cases as those referred to in Articles 13, 14 and 15 of this Directive for public service contracts.

## Article 69

**Notices**

1. Contracting authorities which wish to carry out a design contest shall make known their intention by means of a contest notice.

2. Contracting authorities which have held a design contest shall send a notice of the results of the contest in accordance with Article 36 and must be able to prove the date of dispatch.

Where the release of information on the outcome of the contest would impede law enforcement, be contrary to the public interest, prejudice the legitimate commercial interests of a particular enterprise, whether public or private, or might prejudice fair competition between service providers, such information need not be published.

3. Article 37 concerning publication of notices shall also apply to contests.

*Article 70***Form and manner of publication of notices of contests**

1. The notices referred to in Article 69 shall contain the information referred to in Annex VII D in accordance with the standard model notices adopted by the Commission in accordance with the procedure in Article 77(2).

2. The notices shall be published in accordance with Article 36(2) to (8).

*Article 71***Means of communication**

1. Article 42(1), (2) and (4) shall apply to all communications relating to contests.

2. Communications, exchanges and the storage of information shall be such as to ensure that the integrity and the confidentiality of all information communicated by the participants in a contest are preserved and that the jury ascertains the contents of plans and projects only after the expiry of the time limit for their submission.

3. The following rules shall apply to devices for the electronic receipt of plans and projects:

- (a) the information relating to the specifications which is necessary for the presentation of plans and projects by electronic means, including encryption, shall be available to the parties concerned. In addition, the devices for the electronic receipt of plans and projects shall comply with the requirements of Annex X;
- (b) the Member States may introduce or maintain voluntary arrangements for accreditation intended to improve the level of the certification service provided for such devices.

*Article 72***Selection of competitors**

Where design contests are restricted to a limited number of participants, the contracting authorities shall lay down clear

and non-discriminatory selection criteria. In any event, the number of candidates invited to participate shall be sufficient to ensure genuine competition.

*Article 73***Composition of the jury**

The jury shall be composed exclusively of natural persons who are independent of participants in the contest. Where a particular professional qualification is required from participants in a contest, at least a third of the members of the jury shall have that qualification or an equivalent qualification.

*Article 74***Decisions of the jury**

1. The jury shall be autonomous in its decisions or opinions.

2. It shall examine the plans and projects submitted by the candidates anonymously and solely on the basis of the criteria indicated in the contest notice.

3. It shall record its ranking of projects in a report, signed by its members, made according to the merits of each project, together with its remarks and any points which may need clarification.

4. Anonymity must be observed until the jury has reached its opinion or decision.

5. Candidates may be invited, if need be, to answer questions which the jury has recorded in the minutes to clarify any aspects of the projects.

6. Complete minutes shall be drawn up of the dialogue between jury members and candidates.

**TITLE V****STATISTICAL OBLIGATIONS, EXECUTORY POWERS AND FINAL PROVISIONS***Article 75***Statistical obligations**

In order to permit assessment of the results of applying this Directive, Member States shall forward to the Commission a statistical report, prepared in accordance with Article 76, separately addressing public supply, services and works contracts awarded by contracting authorities during the preceding year, by no later than 31 October of each year.

*Article 76***Content of statistical report**

1. For each contracting authority listed in Annex IV, the statistical report shall detail at least:

- (a) the number and value of awarded contracts covered by this Directive;

- (b) the number and total value of contracts awarded pursuant to derogations to the Agreement.

As far as possible, the data referred to in point (a) of the first subparagraph shall be broken down by:

- (a) the contract award procedures used; and
- (b) for each of these procedures, works as given in Annex I and products and services as given in Annex II identified by category of the CPV nomenclature;
- (c) the nationality of the economic operator to which the contract was awarded.

Where the contracts have been concluded according to the negotiated procedure, the data referred to in point (a) of the first subparagraph shall also be broken down according to the circumstances referred to in Articles 30 and 31 and shall specify the number and value of contracts awarded, by Member State and third country of the successful contractor.

2. For each category of contracting authority which is not given in Annex IV, the statistical report shall detail at least:

- (a) the number and value of the contracts awarded, broken down in accordance with the second subparagraph of paragraph 1;
- (b) the total value of contracts awarded pursuant to derogations to the Agreement.

3. The statistical report shall set out any other statistical information which is required under the Agreement.

The information referred to in the first subparagraph shall be determined pursuant to the procedure under Article 77(2).

#### Article 77

##### Advisory Committee

1. The Commission shall be assisted by the Advisory Committee for Public Contracts set up by Article 1 of Decision 71/306/EEC<sup>(1)</sup> (hereinafter referred to as 'the Committee').

2. Where reference is made to this paragraph, Articles 3 and 7 of Decision 1999/468/EC shall apply, in compliance with Article 8 thereof.

3. The Committee shall adopt its rules of procedure.

#### Article 78

##### Revision of the thresholds

1. The Commission shall verify the thresholds established in Article 7 every two years from the entry into force of this

Directive and shall, if necessary, revise them in accordance with the procedure laid down in Article 77(2).

The calculation of the value of these thresholds shall be based on the average daily value of the euro, expressed in SDRs, over the 24 months terminating on the last day of August preceding the revision with effect from 1 January. The value of the thresholds thus revised shall, where necessary, be rounded down to the nearest thousand euro so as to ensure that the thresholds in force provided for by the Agreement, expressed in SDRs, are observed.

2. At the same time as the revision under paragraph 1, the Commission, in accordance with the procedure under Article 77(2), shall align:

- (a) the thresholds established in (a) of the first subparagraph of Article 8, in Article 56 and in the first subparagraph of Article 63(1) on the revised threshold applying to public works contracts;
- (b) the thresholds established in (b) of the first subparagraph of Article 8, and in Article 67(1)(a) on the revised threshold applying to public service contracts concluded by the contracting authorities referred to in Annex IV;
- (c) the threshold established in Article 67(1)(b) and (c) on the revised threshold applying to public service contracts awarded by the contracting authorities not included in Annex IV.

3. The value of the thresholds set pursuant to paragraph 1 in the national currencies of the Member States which are not participating in monetary union is normally to be adjusted every two years from 1 January 2004 onwards. The calculation of such value shall be based on the average daily values of those currencies expressed in euro over the 24 months terminating on the last day of August preceding the revision with effect from 1 January.

4. The revised thresholds referred to in paragraph 1 and their corresponding values in the national currencies referred to in paragraph 3 shall be published by the Commission in the *Official Journal of the European Union* at the beginning of the month of November following their revision.

#### Article 79

##### Amendments

1. In accordance with the procedure referred to in Article 77(2), the Commission may amend:

- (a) the technical procedures for the calculation methods set out in the second subparagraph of Article 78(1) and in Article 78(3);

<sup>(1)</sup> OJ L 185, 16.8.1971, p. 15. Decision as amended by Decision 77/63/EEC (OJ L 13, 15.1.1977, p. 15).

- (b) the procedures for the drawing-up, transmission, receipt, translation, collection and distribution of the notices referred to in Articles 35, 58, 64 and 69 and the statistical reports provided for in the fourth subparagraph of Article 35(4), and in Articles 75 and 76;
- (c) the procedures for specific reference to specific positions in the CPV nomenclature in the notices;
- (d) the lists of bodies and categories of bodies governed by public law in Annex III, when, on the basis of the notifications from the Member States, these prove necessary;
- (e) the lists of central government authorities in Annex IV, following the adaptations necessary to give effect to the Agreement;
- (f) the reference numbers in the nomenclature set out in Annex I, insofar as this does not change the material scope of this Directive, and the procedures for reference to particular positions of this nomenclature in the notices;
- (g) the reference numbers in the nomenclature set out in Annex II, insofar as this does not change the material scope of this Directive, and the procedures for reference in the notices to particular positions in this nomenclature within the categories of services listed in the Annex;
- (h) the procedure for sending and publishing data referred to in Annex VIII, on grounds of technical progress or for administrative reasons;
- (i) the technical details and characteristics of the devices for electronic receipt referred to in points (a), (f) and (g) of Annex X.

#### Article 80

### Implementation

1. The Member States shall bring into force the laws, regulations and administrative provisions necessary to comply with this Directive no later than 31 January 2006. They shall forthwith inform the Commission thereof.

When Member States adopt these measures, they shall contain a reference to this Directive or be accompanied by such

reference on the occasion of their official publication. The methods of making such reference shall be laid down by Member States.

2. Member States shall communicate to the Commission the text of the main provisions of national law which they adopt in the field covered by this Directive.

#### Article 81

### Monitoring mechanisms

In conformity with Council Directive 89/665/EEC of 21 December 1989 on the coordination of the laws, regulations and administrative provisions relating to the application of review procedures to the award of public supply and public works contracts<sup>(1)</sup>, Member States shall ensure implementation of this Directive by effective, available and transparent mechanisms.

For this purpose they may, among other things, appoint or establish an independent body.

#### Article 82

### Repeals

Directive 92/50/EEC, except for Article 41 thereof, and Directives 93/36/EEC and 93/37/EEC shall be repealed with effect from the date shown in Article 80, without prejudice to the obligations of the Member States concerning the deadlines for transposition and application set out in Annex XI.

References to the repealed Directives shall be construed as references to this Directive and shall be read in accordance with the correlation table in Annex XII.

#### Article 83

### Entry into force

This Directive shall enter into force on the day of its publication in the *Official Journal of the European Union*.

<sup>(1)</sup> OJ L 395, 30.12. 1989, p. 33. Directive as amended by Directive 92/50/EEC.

*Article 84*

**Addressees**

This Directive is addressed to the Member States.

Done at Strasbourg, 31 March 2004.

*For the European Parliament*

*The President*

P. COX

*For the Council*

*The President*

D. ROCHE

## ANNEX I

LIST OF THE ACTIVITIES REFERRED TO IN ARTICLE 1(2), POINT (b) <sup>(1)</sup>

NACE <sup>(1)</sup>					
CPV code			SECTION F		CONSTRUCTION
Division	Group	Class	Subject	Notes	
45			Construction	This division includes: construction of new buildings and works, restoring and common repairs	45000000
	45.1		Site preparation		45100000
		45.11	Demolition and wrecking of buildings; earth moving	This class includes: — demolition of buildings and other structures — clearing of building sites — earth moving: excavation, landfill, levelling and grading of construction sites, trench digging, rock removal, blasting, etc. — site preparation for mining: — overburden removal and other development and preparation of mineral properties and sites  This class also includes: — building site drainage — drainage of agricultural or forestry land	45110000
		45.12	Test drilling and boring	This class includes: — test drilling, test boring and core sampling for construction, geophysical, geological or similar purposes  This class excludes: — drilling of production oil or gas wells, see 11.20 — water well drilling, see 45.25 — shaft sinking, see 45.25 — oil and gas field exploration, geophysical, geological and seismic surveying, see 74.20	45120000
	45.2		Building of complete constructions or parts thereof; civil engineering		45200000

## ANNEX III

## LIST OF BODIES AND CATEGORIES OF BODIES GOVERNED BY PUBLIC LAW AS REFERRED TO IN THE SECOND SUBPARAGRAPH OF ARTICLE 1(9)

## I — BELGIUM

**Bodies**

## A

- Agence fédérale pour l'Accueil des demandeurs d'Asile — Federaal Agentschap voor Opvang van Asielzoekers
- Agence fédérale pour la Sécurité de la Chaîne alimentaire — Federaal Agentschap voor de Veiligheid van de Voedselketen
- Agence fédérale de Contrôle nucléaire — Federaal Agentschap voor nucleaire Controle
- Agence wallonne à l'Exportation
- Agence wallonne des Télécommunications
- Agence wallonne pour l'Intégration des Personnes handicapées
- Aquafin
- Arbeitsamt der Deutschsprachigen Gemeinschaft
- Archives générales du Royaume et Archives de l'Etat dans les Provinces — Algemeen Rijksarchief en Rijksarchief in de Provinciën Astrid

## B

- Banque nationale de Belgique — Nationale Bank van België
- Belgisches Rundfunk- und Fernsehzentrum der Deutschsprachigen Gemeinschaft
- Berlaymont 2000
- Bibliothèque royale Albert I<sup>er</sup> — Koninklijke Bibliotheek Albert I
- Bruxelles-Propreté — Agence régionale pour la Propreté — Net-Brussel — Gewestelijke Agentschap voor Netheid
- Bureau d'Intervention et de Restitution belge — Belgisch Interventie — en Restitutiebureau
- Bureau fédéral du Plan — Federaal Planbureau

## C

- Caisse auxiliaire de Paiement des Allocations de Chômage — Hulpkas voor Werkloosheidsuitkeringen
- Caisse auxiliaire d'Assurance Maladie-Invalidité — Hulpkas voor Ziekte — en Invaliditeitsverzekeringen
- Caisse de Secours et de Prévoyance en Faveur des Marins — Hulp — en Voorzorgskas voor Zeevarenden
- Caisse de Soins de Santé de la Société Nationale des Chemins de Fer Belges — Kas der geneeskundige Verzorging van de Nationale Maatschappij der Belgische Spoorwegen
- Caisse nationale des Calamités — Nationale Kas voor Rampenschade
- Caisse spéciale de Compensation pour Allocations familiales en Faveur des Travailleurs occupés dans les Entreprises de Batellerie — Bijzondere Verrekenkas voor Gezinsvergoedingen ten Bate van de Arbeiders der Ondernemingen voor Binnenscheepvaart
- Caisse spéciale de Compensation pour Allocations familiales en Faveur des Travailleurs occupés dans les Entreprises de Chargement, Déchargement et Manutention de Marchandises dans les Ports, Débarcadères, Entrepôts et Stations (appelée habituellement «Caisse spéciale de Compensation pour Allocations familiales des Régions maritimes») — Bijzondere Verrekenkas voor Gezinsvergoedingen ten Bate van de Arbeiders gebezigd door Ladings — en Lossingsondernemingen en door de Stuwadoors in de Havens, Losplaatsen, Stapelplaatsen en Stations (gewoonlijk genoemd „Bijzondere Compensatiekas voor Kindertoeslagen van de Zeevaartgewesten”)
- Centre d'Etude de l'Energie nucléaire — Studiecentrum voor Kernenergie
- Centre de recherches agronomiques de Gembloux
- Centre hospitalier de Mons

- Centre hospitalier de Tournai
- Centre hospitalier universitaire de Liège
- Centre informatique pour la Région de Bruxelles-Capitale — Centrum voor Informatica voor het Brusselse Gewest
- Centre pour l'Égalité des Chances et la Lutte contre le Racisme — Centrum voor Gelijkheid van Kansen en voor Racismebestrijding
- Centre régional d'Aide aux Communes
- Centrum voor Bevolkings- en Gezinsstudiën
- Centrum voor landbouwkundig Onderzoek te Gent
- Comité de Contrôle de l'Électricité et du Gaz — Controlecomité voor Elektriciteit en Gas
- Comité national de l'Énergie — Nationaal Comité voor de Energie
- Commissariat général aux Relations internationales
- Commissariaat-Generaal voor de Bevordering van de lichamelijke Ontwikkeling, de Sport en de Openlucht recreatie
- Commissariat général pour les Relations internationales de la Communauté française de Belgique
- Conseil central de l'Économie — Centrale Raad voor het Bedrijfsleven
- Conseil économique et social de la Région wallonne
- Conseil national du Travail — Nationale Arbeidsraad
- Conseil supérieur de la Justice — Hoge Raad voor de Justitie
- Conseil supérieur des Indépendants et des petites et moyennes Entreprises — Hoge Raad voor Zelfstandigen en de kleine en middelgrote Ondernemingen
- Conseil supérieur des Classes moyennes
- Coopération technique belge — Belgische technische Coöperatie

## D

- Dienststelle der Deutschsprachigen Gemeinschaft für Personen mit einer Behinderung
- Dienst voor de Scheepvaart
- Dienst voor Infrastructuurwerken van het gesubsidieerd Onderwijs
- Domus Flandria

## E

- Entreprise publique des Technologies nouvelles de l'Information et de la Communication de la Communauté française
- Export Vlaanderen

## F

- Financieringsfonds voor Schuldafbouw en Eenmalige Investeringsuitgaven
- Financieringsinstrument voor de Vlaamse Visserij- en Aquicultuursector
- Fonds bijzondere Jeugdbijstand
- Fonds communautaire de Garantie des Bâtiments scolaires
- Fonds culturele Infrastructuur
- Fonds de Participation
- Fonds de Vieillessement — Zilverfonds
- Fonds d'Aide médicale urgente — Fonds voor dringende geneeskundige Hulp
- Fonds de Construction d'Institutions hospitalières et médico-sociales de la Communauté française
- Fonds de Pension pour les Pensions de Retraite du Personnel statutaire de Belgacom — Pensioenfondsen voor de Rustpensioenen van het statutair Personeel van Belgacom
- Fonds des Accidents du Travail — Fonds voor Arbeidsongevallen

- Fonds des Maladies professionnelles — Fonds voor Beroepsziekten
- Fonds d'Indemnisation des Travailleurs licenciés en cas de Fermeture d'Entreprises — Fonds tot Vergoeding van de in geval van Sluiting van Ondernemingen ontslagen Werknemers
- Fonds du Logement des Familles nombreuses de la Région de Bruxelles-Capitale — Woningfonds van de grote Gezinnen van het Brusselse hoofdstedelijk Gewest
- Fonds du Logement des Familles nombreuses de Wallonie
- Fonds Film in Vlaanderen
- Fonds national de Garantie des Bâtiments scolaires — Nationaal Warborgfonds voor Schoolgebouwen
- Fonds national de Garantie pour la Réparation des Dégâts houillers — Nationaal Waarborgfonds inzake Kolenmijnenschade
- Fonds piscicole de Wallonie
- Fonds pour le Financement des Prêts à des Etats étrangers — Fonds voor Financiering van de Leningen aan Vreemde Staten
- Fonds pour la Rémunération des Mousses — Fonds voor Scheepsjongens
- Fonds régional bruxellois de Refinancement des Trésoreries communales — Brussels gewestelijk Herfinancieringsfonds van de gemeentelijke Thesaurieën
- Fonds voor flankerend economisch Beleid
- Fonds wallon d'Avances pour la Réparation des Dommages provoqués par des Pompages et des Prises d'Eau souterraine

## G

- Garantiefonds der Deutschsprachigen Gemeinschaft für Schulbauten
- Grindfonds

## H

- Herplaatsingfonds
- Het Gemeenschapsonderwijs
- Hulpfonds tot financieel Herstel van de Gemeenten

## I

- Institut belge de Normalisation — Belgisch Instituut voor Normalisatie
- Institut belge des Services postaux et des Télécommunications — Belgisch Instituut voor Postdiensten en Telecommunicatie
- Institut bruxellois francophone pour la Formation professionnelle
- Institut bruxellois pour la Gestion de l'Environnement — Brussels Instituut voor Milieubeheer
- Institut d'Aéronomie spatiale — Instituut voor Ruimte — aëronomie
- Institut de Formation permanente pour les Classes moyennes et les petites et moyennes Entreprises
- Institut des Comptes nationaux — Instituut voor de nationale Rekeningen
- Institut d'Expertise vétérinaire — Instituut voor veterinaire Keuring
- Institut du Patrimoine wallon
- Institut für Aus- und Weiterbildung im Mittelstand und in kleinen und mittleren Unternehmen
- Institut géographique national — Nationaal geografisch Instituut
- Institution pour le Développement de la Gazéification souterraine — Instelling voor de Ontwikkeling van ondergrondse Vergassing
- Institution royale de Messine — Koninklijke Gesticht van Mesen
- Institutions universitaires de droit public relevant de la Communauté flamande — Universitaire instellingen van publiek recht afangende van de Vlaamse Gemeenschap

- Institutions universitaires de droit public relevant de la Communauté française — Universitaire instellingen van publiek recht afhankelijk van de Franse Gemeenschap
  - Institut national d'Assurance Maladie-Invalidité — Rijksinstituut voor Ziekte — en Invaliditeitsverzekering
  - Institut national d'Assurances sociales pour Travailleurs indépendants — Rijksinstituut voor de sociale Verzekeringen der Zelfstandigen
  - Institut national des Industries extractives — Nationaal Instituut voor de Extractiebedrijven
  - Institut national de Recherche sur les Conditions de Travail — Nationaal Onderzoeksinstituut voor Arbeidsomstandigheden
  - Institut national des Invalides de Guerre, anciens Combattants et Victimes de Guerre — Nationaal Instituut voor Oorlogsinvaliden, Oudstrijders en Oorlogsslachtoffers
  - Institut national des Radioéléments — Nationaal Instituut voor Radio-Elementen
  - Institut national pour la Criminalistique et la Criminologie — Nationaal Instituut voor Criminalistiek en Criminologie
  - Institut pour l'Amélioration des Conditions de Travail — Instituut voor Verbetering van de Arbeidsvoorwaarden
  - Institut royal belge des Sciences naturelles — Koninklijk Belgisch Instituut voor Natuurwetenschappen
  - Institut royal du Patrimoine culturel — Koninklijk Instituut voor het Kunstpatrimonium
  - Institut royal météorologique de Belgique — Koninklijk meteorologisch Instituut van België
  - Institut scientifique de Service public en Région wallonne
  - Institut scientifique de la Santé publique — Louis Pasteur — Wetenschappelijk Instituut Volksgezondheid — Louis Pasteur
  - Instituut voor de Aanmoediging van Innovatie door Wetenschap en Technologie in Vlaanderen
  - Instituut voor Bosbouw en Wildbeheer
  - Instituut voor het archeologisch Patrimonium
  - Investeringsdienst voor de Vlaamse autonome Hogescholen
  - Investeringsfonds voor Grond- en Woonbeleid voor Vlaams-Brabant
- J
- Jardin botanique national de Belgique — Nationale Plantentuin van België
- K
- Kind en Gezin
  - Koninklijk Museum voor schone Kunsten te Antwerpen
- L
- Loterie nationale — Nationale Loterij
- M
- Mémorial national du Fort de Breendonk — Nationaal Gedenkteken van het Fort van Breendonk
  - Musée royal de l'Afrique centrale — Koninklijk Museum voor Midden-Afrika
  - Musées royaux d'Art et d'Histoire — Koninklijke Musea voor Kunst en Geschiedenis
  - Musées royaux des Beaux-Arts de Belgique — Koninklijke Musea voor schone Kunsten van België
- O
- Observatoire royal de Belgique — Koninklijke Sterrenwacht van België
  - Office central d'Action sociale et culturelle du Ministère de la Défense — Centrale Dienst voor sociale en culturele Actie van het Ministerie van Defensie
  - Office communautaire et régional de la Formation professionnelle et de l'Emploi

- Office de Contrôle des Assurances — Controledienst voor de Verzekeringen

## ANNEX V

**LIST OF PRODUCTS REFERRED TO IN ARTICLE 7 WITH REGARD TO CONTRACTS AWARDED BY CONTRACTING AUTHORITIES IN THE FIELD OF DEFENCE <sup>(1)</sup>**

- Chapter 25: Salt, sulphur, earths and stone, plastering materials, lime and cement
- Chapter 26: Metallic ores, slag and ash
- Chapter 27: Mineral fuels, mineral oils and products of their distillation, bituminous substances, mineral waxes  
except:  
ex 27.10: special engine fuels
- Chapter 28: Inorganic chemicals, organic and inorganic compounds of precious metals, of rare-earth metals, of radioactive elements and of isotopes  
except:  
ex 28.09: explosives  
ex 28.13: explosives  
ex 28.14: tear gas  
ex 28.28: explosives  
ex 28.32: explosives  
ex 28.39: explosives  
ex 28.50: toxic products  
ex 28.51: toxic products  
ex 28.54: explosives
- Chapter 29: Organic chemicals  
except:  
ex 29.03: explosives  
ex 29.04: explosives  
ex 29.07: explosives  
ex 29.08: explosives  
ex 29.11: explosives  
ex 29.12: explosives  
ex 29.13: toxic products  
ex 29.14: toxic products  
ex 29.15: toxic products  
ex 29.21: toxic products  
ex 29.22: toxic products  
ex 29.23: toxic products  
ex 29.26: explosives  
ex 29.27: toxic products  
ex 29.29: explosives

<sup>(1)</sup> The only text applicable for the purpose of this Directive is that within Annex 1, point 3 of the Agreement.

- Chapter 30: Pharmaceutical products
- Chapter 31: Fertilisers
- Chapter 32: Tanning and dyeing extracts, tannings and their derivatives, dyes, colours, paints and varnishes, putty, fillers and stoppings, inks
- Chapter 33: Essential oils and resinoids, perfumery, cosmetic or toilet preparations
- Chapter 34: Soap, organic surface-active agents, washing preparations, lubricating preparations, artificial waxes, prepared waxes, polishing and scouring preparations, candles and similar articles, modelling pastes and 'dental waxes'
- Chapter 35: Albuminoidal substances, glues, enzymes
- Chapter 37: Photographic and cinematographic goods
- Chapter 38: Miscellaneous chemical products,  
except:  
ex 38.19: toxic products
- Chapter 39: Artificial resins and plastic materials, celluloses esters and ethers, articles thereof,  
except:  
ex 39.03: explosives
- Chapter 40: Rubber, synthetic rubber, factice, and articles thereof,  
except:  
ex 40.11: bullet-proof tyres
- Chapter 41: Raw hides and skins (other than furskins) and leather
- Chapter 42: Articles of leather, saddlery and harness, travel goods, handbags and similar containers, articles of animal gut (other than silk-worm gut)
- Chapter 43: Furskins and artificial fur, manufactures thereof
- Chapter 44: Wood and articles of wood, wood charcoal
- Chapter 45: Cork and articles of cork
- Chapter 46: Manufactures of straw of esparto and of other plaiting materials, basketware and wickerwork
- Chapter 47: Paper-making material
- Chapter 48: Paper and paperboard, articles of paper pulp, of paper or of paperboard
- Chapter 49: Printed books, newspapers, pictures and other products of the printing industry, manuscripts, type-scripts and plans
- Chapter 65: Headgear and parts thereof
- Chapter 66: Umbrellas, sunshades, walking-sticks, whips, riding-crops and parts thereof
- Chapter 67: Prepared feathers and down and articles made of feathers or of down, artificial flowers, articles of human hair
- Chapter 68: Articles of stone, of plaster, of cement, of asbestos, of mica and of similar materials
- Chapter 69: Ceramic products
- Chapter 70: Glass and glassware

- Chapter 71: Pearls, precious and semi-precious stones, precious metals, rolled precious metals, and articles thereof; imitation jewellery
- Chapter 73: Iron and steel and articles thereof
- Chapter 74: Copper and articles thereof
- Chapter 75: Nickel and articles thereof
- Chapter 76: Aluminium and articles thereof
- Chapter 77: Magnesium and beryllium and articles thereof
- Chapter 78: Lead and articles thereof
- Chapter 79: Zinc and articles thereof
- Chapter 80: Tin and articles thereof
- Chapter 81: Other base metals employed in metallurgy and articles thereof
- Chapter 82: Tools, implements, cutlery, spoons and forks, of base metal, parts thereof, except:  
ex 82.05: tools  
ex 82.07: tools, parts
- Chapter 83: Miscellaneous articles of base metal
- Chapter 84: Boilers, machinery and mechanical appliances, parts thereof, except:  
ex 84.06: engines  
ex 84.08: other engines  
ex 84.45: machinery  
ex 84.53: automatic data-processing machines  
ex 84.55: parts of machines under heading No 84.53  
ex 84.59: nuclear reactors
- Chapter 85: Electrical machinery and equipment, parts thereof, except:  
ex 85.13: telecommunication equipment  
ex 85.15: transmission apparatus
- Chapter 86: Railway and tramway locomotives, rolling-stock and parts thereof, railway and tramway tracks fixtures and fittings, traffic signalling equipment of all kinds (not electrically powered), except:  
ex 86.02: armoured locomotives, electric  
ex 86.03: other armoured locomotives  
ex 86.05: armoured wagons  
ex 86.06: repair wagons  
ex 86.07: wagons

- Chapter 87: Vehicles, other than railway or tramway rolling-stock, and parts thereof,  
except:  
ex 87.08: tanks and other armoured vehicles  
ex 87.01: tractors  
ex 87.02: military vehicles  
ex 87.03: breakdown lorries  
ex 87.09: motorcycles  
ex 87.14: trailers
- Chapter 89: Ships, boats and floating structures,  
except:  
ex 89.01A: warships
- Chapter 90: Optical, photographic, cinematographic, measuring, checking, precision, medical and surgical instruments and apparatus, parts thereof,  
except:  
ex 90.05: binoculars  
ex 90.13: miscellaneous instruments, lasers  
ex 90.14: telemeters  
ex 90.28: electrical and electronic measuring instruments  
ex 90.11: microscopes  
ex 90.17: medical instruments  
ex 90.18: mechano-therapy appliances  
ex 90.19: orthopaedic appliances  
ex 90.20: X-ray apparatus
- Chapter 91: Manufacture of watches and clocks
- Chapter 92: Musical instruments, sound recorders or reproducers, television image and sound recorders or reproducers, parts and accessories of such articles
- Chapter 94: Furniture and parts thereof, bedding, mattresses, mattress supports, cushions and similar stuffed furnishings,  
except:  
ex 94.01A: aircraft seats
- Chapter 95: Articles and manufactures of carving or moulding material
- Chapter 96: Brooms, brushes, powder-puffs and sieves
- Chapter 98: Miscellaneous manufactured articles
-

## ANNEX VI

**DEFINITION OF CERTAIN TECHNICAL SPECIFICATIONS**

For the purposes of this Directive:

1. (a) 'technical specification', in the case of public works contracts, means the totality of the technical prescriptions contained in particular in the tender documents, defining the characteristics required of a material, product or supply, which permits a material, a product or a supply to be described in a manner such that it fulfils the use for which it is intended by the contracting authority. These characteristics shall include levels of environmental performance, design for all requirements (including accessibility for disabled persons) and conformity assessment, performance, safety or dimensions, including the procedures concerning quality assurance, terminology, symbols, testing and test methods, packaging, marking and labelling and production processes and methods. They shall also include rules relating to design and costing, the test, inspection and acceptance conditions for works and methods or techniques of construction and all other technical conditions which the contracting authority is in a position to prescribe, under general or specific regulations, in relation to the finished works and to the materials or parts which they involve;
- (b) 'technical specification', in the case of public supply or service contracts, means a specification in a document defining the required characteristics of a product or a service, such as quality levels, environmental performance levels, design for all requirements (including accessibility for disabled persons) and conformity assessment, performance, use of the product, safety or dimensions, including requirements relevant to the product as regards the name under which the product is sold, terminology, symbols, testing and test methods, packaging, marking and labelling, user instructions, production processes and methods and conformity assessment procedures;
2. 'standard' means a technical specification approved by a recognised standardising body for repeated or continuous application, compliance with which is not compulsory and which falls into one of the following categories:
  - international standard: a standard adapted by an international standards organisation and made available to the general public,
  - European standard: a standard adopted by a European standards organisation and made available to the general public,
  - national standard: a standard adopted by a national standards organisation and made available to the general public;
3. 'European technical approval' means a favourable technical assessment of the fitness for use of a product for a particular purpose, based on the fulfilment of the essential requirements for building works, by means of the inherent characteristics of the product and the defined conditions of application and use. European technical approvals are issued by an approval body designated for this purpose by the Member State;
4. 'Common technical specification' means a technical specification laid down in accordance with a procedure recognised by the Member States which has been published in the *Official Journal of the European Union*;
5. 'technical reference': any product produced by European standardisation bodies, other than official standards, according to procedures adopted for the development of market needs.

---

## ANNEX VII

## INFORMATION TO BE INCLUDED IN NOTICES

## ANNEX VII A

## INFORMATION WHICH MUST BE INCLUDED IN PUBLIC CONTRACT NOTICES

## NOTICE OF THE PUBLICATION OF A PRIOR INFORMATION NOTICE ON A BUYER PROFILE

1. Country of the contracting authority
2. Name of the contracting authority
3. Internet address of the 'buyer profile' (URL)
4. CPV Nomenclature reference No(s)

## PRIOR INFORMATION NOTICE

1. The name, address, fax number and email address of the contracting authority and, if different, of the service from which additional information may be obtained and, in the case of services and works contracts, of the services, e.g. the relevant governmental internet site, from which information can be obtained concerning the general regulatory framework for taxes, environmental protection, employment protection and working conditions applicable in the place where the contract is to be performed.
2. Where appropriate, indicate whether the public contract is restricted to sheltered workshops, or whether its execution is restricted to the framework of protected job programmes.
3. In the case of public works contracts: the nature and extent of the works and the place of execution; if the work is to be subdivided into several lots, the essential characteristics of those lots by reference to the work; if available, an estimate of the range of the cost of the proposed works; Nomenclature reference No(s).

In the case of public supply contracts: the nature and quantity or value of the products to be supplied, Nomenclature reference No(s).

In the case of public services contracts: the total value of the proposed purchases in each of the service categories in Annex II A; Nomenclature reference No(s).

4. Estimated date for initiating the award procedures in respect of the contract or contracts, in the case of public service contracts by category.
5. Where appropriate, indicate whether a framework agreement is involved.
6. Where appropriate, other information.
7. Date of dispatch of the notice or of dispatch of the notice of the publication of the prior information notice on the buyer profile.
8. Indicate whether the contract is covered by the Agreement.

## CONTRACT NOTICES

Open and restricted procedures, competitive dialogues, procedures, negotiated procedures:

1. Name, address, telephone and fax number, email address of the contracting authority.
2. Where appropriate, indicate whether the public contract is restricted to sheltered workshops, or whether its execution is restricted to the framework of protected job programmes.
3. (a) The award procedure chosen;  
(b) Where appropriate, the reasons for use of the accelerated procedure (in restricted and negotiated procedures);  
(c) Where appropriate, indicate whether a framework agreement is involved;

- (d) Where appropriate, indicate whether a dynamic purchasing system is involved;
- (e) Where appropriate, the holding of an electronic auction (in the event of open, restricted or negotiated procedures, in the situation covered by Article 30(1)(a)).
4. Form of the contract.
5. Place of execution/performance of the works, for delivery of products or of the provision of services.
6. (a) Public works contracts:
- nature and extent of the works and general nature of the work. Indication in particular of options concerning supplementary works, and, if known, the provisional timetable for recourse to these options as well as the number of possible renewals, if any. If the work or the contract is subdivided into several lots, the size of the different lots; Nomenclature reference number(s),
  - information concerning the purpose of the work or the contract where the latter also involves the drawing up of projects,
  - in the event of a framework agreement, indication also of the planned duration of the framework agreement, the estimated total value of the works for the entire duration of the framework agreement and, as far as possible, the value and the frequency of the contracts to be awarded.
- (b) Public supply contracts:
- nature of the products to be supplied, indicating in particular whether tenders are requested with a view to purchase, lease rental, hire or hire purchase or a combination of these, nomenclature reference number. Quantity of products to be supplied, indicating in particular options concerning supplementary purchases and, if known, the provisional timetable for recourse to these options as well as the number of renewals, if any. Nomenclature reference number(s),
  - in the case of regular or renewable contracts during the course of a given period, indicate also, if known, the timetable for subsequent contracts for purchase of intended supplies,
  - in the event of a framework agreement, indication also of the planned duration of the framework agreement, the estimated total value of the supplies for the entire duration of the framework agreement and, as far as possible, the value and the frequency of the contracts to be awarded.
- (c) Public service contracts:
- category and description of service. Nomenclature reference number(s). Quantity of services to be provided. Indicate in particular options concerning supplementary purchases and, if known, the provisional timetable for recourse to these options as well as the number of renewals, if any. In the case of renewable contracts over a given period, an estimate of the time frame, if known, for subsequent public contracts for purchase of intended services,
  - in the event of a framework agreement, indication also of the planned duration of the framework agreement, the estimated total value of the services for the entire duration of the framework agreement and, as far as possible, the value and the frequency of the contracts to be awarded,
  - indication of whether the execution of the service is reserved by law, regulation or administrative provision to a particular profession.  
  
Reference to the law, regulation or administrative provision.
  - indication of whether legal persons should indicate the names and professional qualifications of the staff to be responsible for the execution of the service.
7. If the contracts are subdivided into lots, indication of the possibility of tendering for one, for several or for all the lots.
8. Any time limit for completion of works/supplies/services or duration of the works/supply/services contract; where possible any time limit by which works will begin or any time limit by which delivery of supplies or services will begin.
9. Admission or prohibition of variants.
10. Where applicable particular conditions to which the performance of the contract is subject.

11. In the case of open procedures:
  - (a) name, address, telephone and telefax number and electronic address of the service from which contract documents and additional documents can be requested;
  - (b) where appropriate, time limit for submission of such requests;
  - (c) where appropriate, cost of and payment conditions for obtaining these documents.
12. (a) Time limit for receipt of tenders or indicative tenders where a dynamic purchasing system is being used (open procedures);
  - (b) time limit for receipt of request to participate (restricted and negotiated procedures);
  - (c) address where these have to be transmitted;
  - (d) the language or languages in which they must be drawn up.
13. In the case of open procedures:
  - (a) persons authorised to be present at the opening of tenders;
  - (b) date, time and place for such opening.
14. Where appropriate any deposit and guarantees required.
15. Main terms concerning financing and payment and/or references to the texts in which these are contained.
16. Where applicable, the legal form to be taken by the grouping of economic operators to whom the contract is to be awarded.
17. Selection criteria regarding the personal situation of economic operators that may lead to their exclusion, and required information proving that they do not fall within the cases justifying exclusion. Selection criteria and information concerning the economic operators' personal situation, information and any necessary formalities for assessment of the minimum economic and technical standards required of the economic operator. Minimum level(s) of standards possibly required.
18. Where there is a framework agreement: the number and, where appropriate, proposed maximum number of economic operators who will be members of it, the duration of the framework agreement provided for, stating, if appropriate, the reasons for any duration exceeding four years.
19. In the case of a competitive dialogue or a negotiated procedure with the publication of a contract notice, indicate, if appropriate, recourse to a staged procedure in order gradually to reduce the number of solutions to be discussed or tenders to be negotiated.
20. In the case of a restricted procedure, a competitive dialogue or a negotiated procedure with the publication of a contract notice, when recourse is had to the option of reducing the number of candidates to be invited to submit tenders, to engage in dialogue or to negotiate: minimum and, if appropriate, proposed maximum number of candidates and objective criteria to be used to choose that number of candidates.
21. Time frame during which the tenderer must maintain its tender (open procedures).
22. Where appropriate, names and addresses of economic operators already selected by the contracting authority (negotiated procedures).
23. Criteria referred to in Article 53 to be used for award of the contract: 'lowest price' or 'most economically advantageous tender'. Criteria representing the most economically advantageous tender as well as their weighting shall be mentioned where they do not appear in the specifications or, in the event of a competitive dialogue, in the descriptive document.

24. Name and address of the body responsible for appeal and, where appropriate, mediation procedures. Precise information concerning deadlines for lodging appeals, or if need be the name, address, telephone number, fax number and email address of the service from which this information may be obtained.
25. Date(s) of publication of the prior information notice in accordance with the technical specifications of publication indicated in Annex VIII or statement that no such publication was made.
26. Date of dispatch of the notice.
27. Indicate whether the contract is covered by the Agreement.

#### SIMPLIFIED CONTRACT NOTICE FOR USE IN A DYNAMIC PURCHASING SYSTEM

1. Country of contracting authority.
2. Name and e-mail address of contracting authority.
3. Publication reference of the contract notice for the dynamic purchasing system.
4. E-mail address at which the technical specification and additional documents relating to the dynamic purchasing system are available.
5. Subject of contract: description by reference number(s) of 'CPV' nomenclature and quantity or extent of the contract to be awarded.
6. Time frame for submitting indicative tenders.

#### CONTRACT AWARD NOTICES

1. Name and address of the contracting authority.
  2. Award procedures chosen. In the case of negotiated procedure without prior publication of a contract notice (Article 28), justification.
  3. Public works contracts: nature and extent of the contract, general characteristics of the work.  
Public supply contracts: nature and quantity of products supplied, where appropriate, by the supplier; nomenclature reference number.  
Public service contracts: category and description of the service; nomenclature reference number; quantity of services bought.
  4. Date of contract award.
  5. Contract award criteria.
  6. Number of tenders received.
  7. Name and address of the successful economic operators.
  8. Price or range of prices (minimum/maximum) paid.
  9. Value of the tender (tenders) retained or the highest tender and lowest tender taken into consideration for the contract award.
  10. Where appropriate, value and proportion of contract likely to be subcontracted to third parties.
  11. Date of publication of the tender notice in accordance with the technical specifications for publication in Annex VIII.
  12. Date of dispatch of the notice.
  13. Name and address of the body responsible for appeal and, where appropriate, mediation procedures. Precise information concerning the deadline for lodging appeals, or if need be the name, address, telephone number, fax number and email address of the service from which this information may be obtained.
-

## ANNEX VII B

**INFORMATION WHICH MUST APPEAR IN PUBLIC WORKS CONCESSION NOTICES**

1. Name, address, fax number and email address of the contracting authority
2. (a) Place of execution  
(b) Subject of the concession; nature and extent of the services
3. (a) Time limit for the submission of applications  
(b) Address to which they must be sent  
(c) Language(s) in which they must be written
4. Personal, technical and financial conditions to be met by the candidates
5. Criteria which will be applied in the award of the contract
6. If appropriate, the minimum proportion of the works which will be contracted out
7. Date of dispatch of the notice
8. Name and address of the body responsible for appeal and, where appropriate, mediation procedures. Precise information concerning the deadline for lodging appeals, or if need be the name, address, telephone number, fax number and email address of the service from which this information may be obtained.

## ANNEX VII C

**INFORMATION WHICH MUST APPEAR IN WORKS CONTRACT NOTICES OF CONCESSIONNAIRES WHO ARE NOT CONTRACTING AUTHORITIES**

1. (a) Place of execution  
(b) Nature and extent of the services, general characteristics of the works
2. Any time limit for completion imposed
3. Name and address of the body from whom the specifications and the additional documents may be requested
4. (a) Time limit for the receipt of applications to participate and/or the receipt of tenders  
(b) Address to which they must be sent  
(c) Language(s) in which they must be written
5. Any deposits or guarantees required
6. Economic and technical conditions to be met by the contractor
7. Criteria which will be applied in the award of the contract
8. Date of dispatch of the notice

## ANNEX VII D

**INFORMATION WHICH MUST APPEAR IN DESIGN CONTEST NOTICES**

## CONTEST NOTICES

1. Name, address, fax number and email address of the contracting authority and those of the service from which the additional documents may be obtained
2. Description of the project
3. Type of contest: open or restricted
4. In the event of an open contest: time limit for the submission of projects
5. In the event of a restricted contest:
  - (a) number of participants contemplated
  - (b) names of the participants already selected, if any
  - (c) criteria for the selection of participants
  - (d) time limit for requests to participate
6. If appropriate, indicate that the participation is restricted to a specified profession
7. Criteria which will be applied in the evaluation of the projects
8. Names of any members of the jury who have already been selected
9. Indicate whether the jury's decision is binding on the contracting authority
10. Number and value of any prizes
11. Payments to be made to all participants, if any
12. Indicate whether any contracts following the contest will or will not be awarded to the winner or winners of the contest
13. Date of dispatch of the notice

## NOTICE OF THE RESULTS OF A CONTEST

1. Name, address, fax number and email address of the contracting authority
  2. Description of the project
  3. Total number of participants
  4. Number of foreign participants
  5. Winner(s) of the contest
  6. Any prizes
  7. Reference of the contest notice
  8. Date of dispatch of the notice
-

## ANNEX VIII

**FEATURES CONCERNING PUBLICATION****1. Publication of notices**

- (a) Notices referred to in Articles 35, 58, 64 and 69 are sent by the contracting authorities to the Office for Official Publications of the European Communities in the format required by Commission Directive 2001/78/EC of 13 September 2001 on the use of standard forms in the publication of public contract notices<sup>(1)</sup>. The prior information notices referred to in Article 35(1), first subparagraph, published on a buyer profile as described in point 2(b), must also use that format, as must the notice of such publication.
- (b) Notices referred to in Articles 35, 58, 64 and 69 are published by the Office for Official Publications of the European Communities or by the contracting authorities in the event of a prior information notice published on a buyer profile in accordance with Article 35(1), first subparagraph.

In addition, contracting authorities may publish this information on the Internet on a 'buyer profile' as referred to in point 2(b).

- (c) The Office for Official Publications of the European Communities will give the contracting authority the confirmation referred to in Article 36(8).

**2. Publication of complementary or additional information**

- (a) Contracting authorities are encouraged to publish the specifications and the additional documents in their entirety on the Internet.
- (b) The buyer profile may include prior information notices as referred to in Article 35(1), first subparagraph, information on ongoing invitations to tender, scheduled purchases, contracts concluded, procedures cancelled and any useful general information, such as a contact point, a telephone and a fax number, a postal address and an e-mail address.

**3. Format and procedures for sending notices electronically**

The format and procedure for sending notices electronically are accessible at the Internet address '<http://simap.eu.int>'.

<sup>(1)</sup> OJ L 285, 29.10.2001, p. 1.

## ANNEX IX

## REGISTERS

ANNEX IX A <sup>(1)</sup>

## PUBLIC WORKS CONTRACTS

The professional registers and corresponding declarations and certificates for each Member State are:

- in Belgium, the 'Registre du commerce'/ 'Handelsregister';
- in Denmark, the 'Erhvervs-og Selskabsstyrelsen';
- in Germany, the 'Handelsregister' and the 'Handwerksrolle';
- in Greece, the 'Μητρώο Εργοληπτικών Επιχειρήσεων' – MEEP of the Ministry for Environment, Town and Country Planning and Public Works (ΥΠΕΧΩΔΕ);
- in Spain, the 'Registro Oficial de Empresas Clasificadas del Ministerio de Hacienda';
- in France, the 'Registre du commerce et des sociétés' and the 'Répertoire des métiers';
- in Ireland, the contractor may be requested to provide a certificate from the Registrar of companies or the Registrar of Friendly Societies or, if this is not the case, a certificate stating that the person concerned has declared on oath that he is engaged in the profession in question in the country in which he is established, in a specific place and under a given business name;
- in Italy, the 'Registro della Camera di commercio, industria, agricoltura e artigianato';
- in Luxembourg, the 'Registre aux firmes' and the 'Rôle de la chambre des métiers';
- in the Netherlands, the 'Handelsregister';
- in Austria, the 'Firmenbuch', the 'Gewerberegister', the 'Mitgliederverzeichnisse der Landeskammern';
- in Portugal, the 'Instituto dos Mercados de Obras Públicas e Particulares e do Imobiliário' (IMOPPI)(CAEOPP);
- in Finland, the 'Kaupparekisteri'/ 'Handelsregistret';
- in Sweden, 'aktiebolags-, handels- eller föreningsregistren';
- in the United Kingdom, the contractor may be requested to provide a certificate from the Registrar of Companies or, if this is not the case, a certificate stating that the person concerned has declared on oath that he is engaged in the profession in question in the country in which he is established, in a specific place and under a given business name.

<sup>(1)</sup> For the purposes of Article 46, 'professional and trade registers' means those listed in this Annex and, where changes have been made at national level, the registers which have replaced them.

## ANNEX IX B

**PUBLIC SUPPLY CONTRACTS**

The relevant professional or trade registers and the corresponding declarations and certificates are:

- in Belgium, the 'Registre du commerce/Handelsregister';
  - in Denmark, 'Erhvers- og Selskabsstyrelsen';
  - in Germany, the 'Handelsregister' and 'Handwerksrolle';
  - in Greece, the 'Βιοτεχνικό ή Εμπορικό ή Βιομηχανικό Επιμελητήριο';
  - in Spain, the 'Registro Mercantil' or, in the case of non-registered individuals, a certificate stating that the person concerned has declared on oath that he is engaged in the profession in question;
  - in France, the 'Registre du commerce et des sociétés' and 'Répertoire des métiers';
  - in Ireland, the supplier may be requested to provide a certificate from the Registrar of companies or the Registrar of Friendly Societies that he is certified as incorporated or registered or, if he is not so certified, a certificate stating that the person concerned has declared on oath that he is engaged in the profession in question in the country in which he is established, in a specific place under a given business name and under a specific trading name;
  - in Italy, the 'Registro della Camera di commercio, industria, agricoltura e artigianato', and 'Registro delle commissioni provinciali per l'artigianato';
  - in Luxembourg, the 'Registre aux firmes' and 'Rôle de la chambre des métiers';
  - in the Netherlands, the 'Handelsregister';
  - in Austria, the 'Firmenbuch', the 'Gewerberegister', the 'Mitgliederverzeichnisse der Landeskammern';
  - in Portugal, the 'Registo Nacional das Pessoas Colectivas';
  - in Finland, the 'Kaupparekisteri' and 'Handelsregistret';
  - in Sweden, 'aktiebolags-, handels- eller föreningsregistren';
  - in the United Kingdom, the supplier may be requested to provide a certificate from the Registrar of Companies stating that he is certified as incorporated or registered or, if he is not so certified, a certificate stating that the person concerned has declared on oath that he is engaged in the profession in question in the country in which he is established in a specific place under a given business name and under a specific trading name.
-

## ANNEX IX C

**PUBLIC SERVICE CONTRACTS**

The relevant professional and trade registers or declarations or certificates are:

- in Belgium, the 'Registre du commerce/Handelsregister' and the 'Ordres professionnels/Beroepsorden';
  - in Denmark, 'Erhvervs- og Selskabsstyrelsen';
  - in Germany, the 'Handelsregister', the 'Handwerksrolle', the 'Vereinsregister', 'Partnerschaftsregister' and the 'Mitgliedsverzeichnisse der Berufskammern der Ländern';
  - in Greece, the service provider may be asked to provide a declaration on the exercise of the profession concerned made on oath before a notary; in the cases provided for by existing national legislation, for the provision of research services as mentioned in Annex I A, the professional register 'Μητρώο Μελετητών' and 'Μητρώο Γραφείων Μελετών';
  - in Spain, the 'Registro Oficial de Empresas Clasificadas del Ministerio de Hacienda';
  - in France, the 'Registre du commerce' and the 'Répertoire des métiers';
  - in Ireland, the service provider may be requested to provide a certificate from the Registrar of companies or the Registrar of Friendly Societies or, if he is not so certified, a certificate stating that the person concerned has declared on oath that he is engaged in the profession in question in the country in which he is established, in a specific place under a given business name and under a specific trading name;
  - in Italy, the 'Registro della Camera di commercio, industria, agricoltura e artigianato', the 'Registro delle commissioni provinciali per l'artigianato' or the 'Consiglio nazionale degli ordini professionali';
  - in Luxembourg, the 'Registre aux firmes' and the 'Rôle de la chambre des métiers';
  - in the Netherlands, the 'Handelsregister';
  - in Austria, the 'Firmenbuch', the 'Gewerberegister', the 'Mitgliederverzeichnisse der Landeskammern';
  - in Portugal, the 'Registo nacional das Pessoas Colectivas';
  - in Finland, the 'Kaupparekisteri' and 'Handelsregistret';
  - in Sweden, 'aktiebolags-, handels- eller föreningsregistren';
  - in the United Kingdom, the service provider may be requested to provide a certificate from the Registrar of Companies or, if he is not so certified, a certificate stating that the person concerned has declared on oath that he is engaged in the profession in question in the country in which he is established in a specific place under a given business name.
-

## ANNEX X

**REQUIREMENTS RELATING TO DEVICES FOR THE ELECTRONIC RECEIPT OF TENDERS, REQUESTS FOR PARTICIPATION AND PLANS AND PROJECTS IN CONTESTS**

Devices for the electronic receipt of tenders, requests for participation and plans and projects in contests must at least guarantee, through technical means and appropriate procedures, that:

- (a) electronic signatures relating to tenders, requests to participate and the forwarding of plans and projects comply with national provisions adopted pursuant to Directive 1999/93/EC;
  - (b) the exact time and date of the receipt of tenders, requests to participate and the submission of plans and projects can be determined precisely;
  - (c) it may be reasonably ensured that, before the time limits laid down, no-one can have access to data transmitted under these requirements;
  - (d) if that access prohibition is infringed, it may be reasonably ensured that the infringement is clearly detectable;
  - (e) only authorised persons may set or change the dates for opening data received;
  - (f) during the different stages of the contract award procedure or of the contest access to all data submitted, or to part thereof, must be possible only through simultaneous action by authorised persons;
  - (g) simultaneous action by authorised persons must give access to data transmitted only after the prescribed date;
  - (h) data received and opened in accordance with these requirements must remain accessible only to persons authorised to acquaint themselves therewith.
-

## ANNEX XI

## DEADLINES FOR TRANSPOSITION AND APPLICATION (Article 80)

Directives	Deadlines for transposition and application
92/50/CEE (OJ L 209, 24.7.1992, p. 1) Austria, Finland, Sweden (*)	1 July 1993 1 January 1995
93/36/EEC (OJ L 199, 09.08.93, p. 1) Austria, Finland, Sweden (*)	13 June 1994 1 January 1995
93/37/EEC (OJ L 199, 09.08.93, p. 54) consolidation of directives: — 71/305/EEC (OJ L 185, 16.08.71, p. 5): — EC of 6 — DK, IRL, UK — Greece — Spain, Portugal — Austria, Finland, Sweden (*) — 89/440/EEC (OJ L 210, 21.07.1989, p. 1): — EC of 9 — Greece, Spain, Portugal — Austria, Finland, Sweden (*)	30 July 1972 1 January 1973 1 January 1981 1 January 1986 1 January 1995  19 July 1990 1 March 1992 1 January 1995
97/52/EC (OJ L 328, 28.11.97, p. 1)	13 October 1998
(*) EEA: 1 January 1994.	

## ANNEX XII

CORRELATION TABLE <sup>(1)</sup>

This Directive	Directive 93/37/EEC	Directive 93/36/EEC	Directive 92/50/EEC	Other acts	
Art. 1, par.1	Art. 1, first line, adapted	Art. 1, first line, adapted	Art. 1, first line, adapted		
Art. 1, par. 2, point (a)	Art. 1, point (a), first part of sentence	Art. 1, point (a), first and last parts of first sentence	Art. 1, point a)		Amended
Art. 1, par. 2, point (b)	Art. 1, point (a) and point (c), adapted	—	—		
Art. 1, par. 2, point (c), first subparagraph	—	Art. 1, point (a), second part of the first sentence and second sentence, adapted	—		
Art. 1, par. 2, point (c), second subparagraph	—	Art. 1, point (a), adapted	—		
Art. 1, par. 2, point (d), first subparagraph	—	—	—		New
Art. 1, par. 2, point (d), second subparagraph	—	—	Art. 2, adapted		
Art. 1, par. 2, point (d), third subparagraph	—	—	16th recital adapted		
Art. 1, par. 3	Art. 1, point (d)	—	—		
Art. 1, par. 4	—	—	—		New
Art. 1, par. 5	—	—	—		New
Art. 1, par. 6	—	—	—		New
Art. 1, par. 7	—	—	—		New
Art. 1, par. 8, first subparagraph	—	—	Art. 1, point (c), first sentence adapted		
Art. 1, par. 8, second subparagraph	—	—	—		New
Art. 1, par. 8, third subparagraph	Art. 1, point h)	Art. 1, point (c)	Art. 1, point (c), second sentence		Amended

<sup>(1)</sup> 'Adapted' means that the wording of the text was changed, while the meaning of the repealed directives was preserved. Changes to the meaning of the provisions of the repealed directives are indicated by the term 'amended'. This term appears in the last column when the amendment concerns the provisions of the three repealed directives. When the amendment affects only one or two of these directives, the term 'amended' is included in the column of the directives concerned.

This Directive	Directive 93/37/EEC	Directive 93/36/EEC	Directive 92/50/EEC	Other acts	
Art. 1, par. 9	Art. 1, point (b), adapted	Art. 1 point (b), adapted	Art. 1, point (b), adapted		
Art. 1, par. 10	—	—	—		New
Art. 1, par. 11, first subparagraph	Art. 1, point (e), adapted	Art. 1, point (d), adapted	Art. 1, point (d), adapted		
Art. 1, par. 11, second subparagraph	Art. 1, point (f), adapted	Art. 1, point (e), adapted	Art. 1, point (e), adapted		
Art. 1, par. 11, third subparagraph	—	—	—		New
Art. 1, par. 11, fourth subparagraph	Art. 1, point (g), adapted	Art. 1, point (f), adapted	Art. 1, point (f), adapted		
Art. 1, par. 11, fifth subparagraph	—	—	Art. 1, point (g), adapted		
Art. 1, par. 12	—	—	—		New
Art. 1, par. 13	—	—	—		New
Art. 1, par. 14	—	—	—		New
Art. 1, par. 15	—	—	—		New

EUROPEAN COMMISSION

Brussels, 20.12.2011  
COM(2011) 896 final

2011/0438 (COD)

Proposal for a

**DIRECTIVE OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL**

**on public procurement**

(Text with EEA relevance)

{SEC(2011) 1585 final}

{SEC(2011) 1586 final}

## EXPLANATORY MEMORANDUM

### 1. CONTEXT OF THE PROPOSAL

- **Grounds for and objectives of the proposal**

The Europe 2020 strategy for smart, sustainable and inclusive growth [COM(2010) 2020] is based on three interlocking and mutually reinforcing priorities: developing an economy based on knowledge and innovation; promoting a low-carbon, resource-efficient and competitive economy; and fostering a high-employment economy delivering social and territorial cohesion.

Public procurement plays a key role in the Europe 2020 strategy as one of the market-based instruments to be used to achieve these objectives by improving the business environment and conditions for business to innovate and by encouraging wider use of green procurement supporting the shift towards a resource efficient and low-carbon economy. At the same time, the Europe 2020 strategy stresses that public procurement policy must ensure the most efficient use of public funds and that procurement markets must be kept open Union-wide.

In the face of these challenges, the existing public procurement legislation needs to be revised and modernised in order to make it better suited to deal with the evolving political, social and economic context.

In its communication of 13 April 2011 on ‘The Single Market Act: Twelve levers to boost growth and confidence’, the Commission included among its twelve key priority actions to be adopted by the EU institutions before the end of 2012, a revised and modernised public procurement legislative framework to make the award of contracts more flexible and enable public contracts to be put to better use in support of other policies.

This proposal has two complementary objectives:

- Increase the efficiency of public spending to ensure the best possible procurement outcomes in terms of value for money. This implies in particular a simplification and flexibilisation of the existing public procurement rules. Streamlined, more efficient procedures will benefit all economic operators and facilitate the participation of SMEs and cross-border bidders.
- Allow procurers to make better use of public procurement in support of common societal goals such as protection of the environment, higher resource and energy efficiency, combating climate change, promoting innovation, employment and social inclusion and ensuring the best possible conditions for the provision of high quality social services.

- **General context**

Public procurement plays an important role in the overall economic performance of the European Union. In Europe, public authorities spend around 18% of GDP on supplies, works and services. Given the volume of purchases, public procurement can be used as a powerful lever for achieving a Single Market fostering smart, sustainable and inclusive growth.

The current generation of public procurement Directives — Directives 2004/17/EC<sup>1</sup> and 2004/18/EC<sup>2</sup> — are the product of a long evolution that started in 1971 with the adoption of Directive 71/305/EEC. By guaranteeing transparent and non-discriminatory procedures, these Directives principally aim to ensure that economic operators from across the Single Market benefit fully from the basic freedoms in competing for public contracts.

A comprehensive economic evaluation has shown that the public procurement Directives have achieved their objectives to a considerable extent. They have resulted in greater transparency and higher levels of competition while achieving measurable savings through lower prices.

Stakeholders have nevertheless voiced demand for a review of the public procurement directives to simplify the rules, increase their efficiency and effectiveness and make them better suited to deal with the evolving political, social and economic context. Streamlined, more efficient procedures will increase flexibility for contracting authorities, benefit all economic operators and facilitate the participation of SMEs and cross-border bidders. Improved public procurement rules will also allow contracting authorities to make better use of public procurement in support of common societal goals, such as the protection of the environment, higher resource and energy efficiency and combating climate change, promoting innovation and social inclusion, and ensuring the best possible conditions for the provision of high quality social services. These orientations were confirmed by the results of a consultation of stakeholders conducted by the Commission in spring 2011, where a very large majority of stakeholders supported the proposal to review the public procurement Directives in order to adapt them better to the new challenges faced by public procurers and economic operators alike.

- **Existing provisions in the area of the proposal**

Together with the proposed new utilities Directive, the proposal will replace Directives 2004/17/EC and 2004/18/EC as the core elements of the European Union public procurement legislative framework.

The Directive will be complemented by the further elements of that legislative framework:

- Directive 2009/81/EC<sup>3</sup> sets specific rules for defence and sensitive security procurement,
- Directive 89/665/EEC<sup>4</sup> establishes common standards for national review procedures to ensure that rapid and effective means of redress is available in all EU countries in cases where bidders consider that contracts have been awarded unfairly.

---

<sup>1</sup> Directive 2004/17/EC of 31 March 2004 coordinating the procurement procedures of entities in the water, energy, transport and postal services sectors, OJ L 134, 30.4.2004, p. 1.

<sup>2</sup> Directive 2004/18/EC of 31 March 2004 on the coordination of procedures for the award of public works contracts, public supply contracts and public service contracts, OJ L 134, 30.4.2004, p. 114.

<sup>3</sup> Directive 2009/81/EC of 13 July 2009 on the coordination of procedures for the award of certain works contracts, supply contracts and service contracts by contracting authorities or entities in the fields of defence and security, and amending Directives 2004/17/EC and 2004/18/EC, OJ L 216, 20.8.2009, p. 76.

<sup>4</sup> Directive 89/665/EEC of 21 December 1989 on the coordination of the laws, regulations and administrative provisions relating to the application of review procedures to the award of public supply and public works contracts, OJ L 395, 30.12.1989, p. 33.

- **Consistency with the other policies and objectives of the Union**

This initiative implements the Europe 2020 strategy for smart, sustainable and inclusive growth [COM(2010) 2020] and the Europe 2020 Flagship Initiatives on a Digital Agenda for Europe [COM(2010) 245], the Innovation Union [COM(2010) 546], an Integrated Industrial Policy for the Globalisation Era [COM(2010) 614], Energy 2020 [COM(2010) 639] and a Resource Efficient Europe [COM(2011) 21]. It also implements the Single Market Act [COM(2011) 206], in particular its twelfth key action ‘Revised and Modernised Public Procurement Legislative Framework’. It is a CWP 2011 strategic initiative.

## 2. CONSULTATION OF INTERESTED PARTIES AND IMPACT ASSESSMENT

- **Consultation of interested parties**

### *Consultation methods, main sectors targeted and general profile of respondents*

The Commission published on 27 January 2011 a *Green Paper on the modernisation of EU public procurement policy — Towards a more efficient European Procurement Market*<sup>5</sup> launching a broad public consultation on options for legislative changes to make the award of contracts easier and more flexible and enable public contracts to be put to better use in support of other policies. The purpose of the Green Paper was to identify a number of key areas for reform and ask for stakeholders’ views on concrete options for legislative change. Among the issues covered were the needs for simplifying and flexibilising procedures, strategic use of public procurement to promote other policy objectives, improving access of SMEs to public contracts and combating favouritism, corruption and conflicts of interest.

The public consultation closed on 18 April 2011 and met with a high response. In total, 623 replies were received, coming from a wide variety of stakeholder groups including central Member State authorities, local and regional public purchasers and their associations, undertakings, industry associations, academics, civil society organisations (including trade unions) and individual citizens. The majority of replies originated from the United Kingdom, Germany, France and, to a lesser degree, Belgium, Italy, the Netherlands, Austria, Sweden, Spain and Denmark.

The results of the consultation were summarised in a synthesis paper<sup>6</sup> and presented and discussed at a public conference on 30 June 2011<sup>7</sup>.

### *Summary of responses and how they have been taken into account*

A very large majority of stakeholders appreciated the initiative of the Commission to review the current public procurement policy. Amongst the different subjects discussed in the Green Paper, stakeholders put a particularly strong emphasis on the need to simplify procedures and make them more flexible. For instance, a clear majority of all stakeholder groups supported

---

<sup>5</sup> COM(2011) 15: <http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=COM:2011:0015:FIN:EN:PDF>.

<sup>6</sup> [http://ec.europa.eu/internal\\_market/consultations/docs/2011/public\\_procurement/synthesis\\_document\\_en.pdf](http://ec.europa.eu/internal_market/consultations/docs/2011/public_procurement/synthesis_document_en.pdf).

<sup>7</sup> [http://ec.europa.eu/internal\\_market/publicprocurement/modernising\\_rules/conferences/index\\_en.htm](http://ec.europa.eu/internal_market/publicprocurement/modernising_rules/conferences/index_en.htm).

the idea of allowing greater use of a competitive procedure with negotiation. There was also strong support for measures to alleviate administrative burdens related to the choice of bidder.

On the strategic use of public procurement to achieve the societal goals of the Europe 2020 strategy, stakeholders' opinions were mixed. Many stakeholders, especially businesses, showed a general reluctance to the idea of using public procurement in support of other policy objectives. Other stakeholders, notably civil society organisations, were strongly in favour of such strategic use and advocated far-reaching changes to the very principles of the European Union public procurement policy.

- **Collection and use of expertise**

In addition to the Green Paper consultation, the Commission conducted in 2010/2011 a comprehensive evaluation of the impact and effectiveness of EU public procurement legislation drawing on an extensive body of evidence and new independent research. The studies assessed mainly the cost and effectiveness of procurement procedures, issues of cross border procurement, SMEs' access to public procurement markets and the strategic use of public procurement in Europe.

The findings of the evaluation showed clearly that the public procurement Directives 2004/17/EC and 2004/18/EC have helped to establish a culture of transparency and outcome-driven procurement, generating savings and improvements in the quality of procurement outcomes that far exceed the costs, for public purchasers and suppliers, of running those procedures. The evaluation has also found that differences in implementation and application of the Directives have led to different outcomes in different Member States. The time taken to complete procedures and the cost to public purchasers vary widely across Member States.

- **Impact assessment**

The impact assessment and its executive summary give an overview of the different options for each of the five groups of basic problems (administrative organisation, scope, procedures, strategic procurement and access to procurement markets). Based on an analysis of the advantages and disadvantages of the different options, a package of preferred options was identified that should optimise the synergies between the different solutions allowing savings due to one type of action to neutralise related costs caused by another (e.g. possible increased procedural requirements caused by strategic procurement actions could partially be neutralised by savings related to the improved design of procurement procedures). These preferred options form the basis of the present proposal.

The draft Impact Assessment report was scrutinised by the Impact Assessment Board, who asked for amendments concerning in particular the identification of the specific elements of the legislative framework to be addressed, the description of the options under discussion, a more in-depth cost-benefit analysis of the selected headline actions and the systematic integration of stakeholder views, both in the problem definition and to complement the analysis of impacts. These recommendations for improvement were integrated in the final report. The opinions of the Impact Assessment Board on the report are published together with this proposal, as well as the final Impact Assessment report and its executive summary.

### **3. LEGAL ELEMENTS OF THE PROPOSAL**

- **Legal basis**

The proposal is based on Articles 53(1), 62 and 114 of the Treaty on the Functioning of the European Union (TFEU).

- **Subsidiarity principle**

The subsidiarity principle applies insofar as the proposal does not fall under the exclusive competence of the EU.

The objectives of the proposal cannot be sufficiently achieved by the Member States for the following reason:

The coordination of procedures for public procurement above certain thresholds has proven an important tool for the achievement of the Internal Market in the field of public purchasing by ensuring effective and equal access to public contracts for economic operators across the Single Market. Experience with Directives 2004/17/EC and 2004/18/EC and the earlier generations of public procurement Directives has shown that European-wide procurement procedures provide transparency and objectivity in public procurement resulting in considerable savings and improved procurement outcomes that benefit Member States' authorities and, ultimately, the European taxpayer.

This objective could not be sufficiently achieved through action by Member States which would inevitably result in divergent requirements and possibly conflicting procedural regimes increasing regulatory complexity and causing unwarranted obstacles for cross-border activities.

The proposal therefore complies with the subsidiarity principle.

- **Proportionality principle**

The proposal complies with the proportionality principle since it does not go beyond what is necessary in order to achieve the objective of ensuring the proper functioning of the Internal Market through a set of European-wide coordinated procurement procedures. Moreover, the proposal is based on a 'tool box' approach, allowing Member State a maximum of flexibility in adapting the procedures and tools to their specific situation.

Compared to the current public procurement Directives, the proposal will considerably reduce administrative burden related to the conduct of the procedure both for contracting authorities and economic operators; where new requirements are foreseen (for instance, in the context of strategic procurement), these will be compensated by the removal of constraints in other areas.

- **Choice of instruments**

Since the proposal is based on Articles 53(1), 62 and 114 TFEU the use of a Regulation for the provisions applying both to the procurement of goods and services would not be permitted by the Treaty. The instrument proposed is therefore a Directive.

During the impact assessment process, non-legislative options were discarded for reasons set out in detail in the impact assessment.

#### **4. BUDGETARY IMPLICATION**

The proposal has no budgetary implications.

#### **5. ADDITIONAL INFORMATION**

- **Repeal of existing legislation**

The adoption of the proposal will lead to the repeal of existing legislation (Directive 2004/18/EEC).

- **Review/revision/sunset clause**

The proposal contains a review clause concerning the economic effects of the threshold amounts.

- **Transposition measures and explanatory documents**

The proposal concerns an area where Union legislation has a coordination purpose, with a significant impact on a wide range of national legal sectors. Notwithstanding the coordination purpose, many provisions constitute full harmonisation and the proposal includes a large number of legal obligations. Member States supplement Union rules with national additional provisions so as the whole system becomes operational.

In this context, the Commission has identified a number of factors which render explanations by Member States necessary both for the correct understanding of transposing measures and for the functioning of the whole picture of procurement rules at national level:

- transposing and implementing measures are adopted at different institutional levels (national / federal, regional, local);
- in addition to the different regulatory layers, in many Member States rules are also established according to the sector involved or the type of procurement concerned;
- administrative measures of general or specific nature complement and in some cases overlap the main legal framework.

Only Member States can explain how the different measures transpose the Union directives in the public procurement sector and how the same measures interact each with the others.

For these reasons, the communication of documents explaining the relationship between the various parts of this directive and the corresponding parts of national transposition measures should be communicated together with the transposing measures, in particular concordance tables, which constitute an operational tool for the analysis of the national measures.

- **European Economic Area**

The proposed act concerns an EEA matter and should therefore extend to the European Economic Area.

- **Detailed explanation of the proposal**

*1) Simplification and flexibilisation of procurement procedures*

The proposed Directive provides for a simplification and flexibilisation of the procedural regime set by the current public procurement Directives. For this purpose, it contains the following measures:

*Clarification of scope:* The basic concept of ‘procurement’ which appears also in the title of the proposed Directive has been newly introduced in order to better determine the scope and purpose of procurement law and to facilitate the application of the thresholds. The definitions of certain key notions determining the scope of the Directive (such as body governed by public law, public works and service contracts, mixed contracts) have been revised in the light of the case-law of the Court of Justice. At the same time, the proposal endeavours to keep continuity in the use of notions and concepts that have been developed over the years through the Court’s case-law and are well known to practitioners. In this context, it should be noted that minor deviations from the wording and presentation known from the previous Directives do not necessarily imply a change of substance, but may be due to simplification of texts.

The traditional distinction between so-called priority and non-priority services (‘A’ and ‘B’ services) will be abolished. The results of the evaluation have shown that it is no longer justified to restrict the full application of procurement law to a limited group of services. However, it became also clear that the regular procurement regime is not adapted to social services which need a specific set of rules (see below).

*Toolbox approach:* Member State systems will provide two basic forms of procedure, open and restricted procedure. They may, in addition, foresee, subject to certain conditions, the competitive procedure with negotiation, the competitive dialogue and/or the innovation partnership, a new form of procedure for innovative procurement (see below).

Contracting authorities will furthermore have at their disposal a set of six specific procurement techniques and tools intended for aggregated and electronic procurement: framework agreements, dynamic purchasing systems, electronic auctions, electronic catalogues, central purchasing bodies and joint procurement. Compared to the existing Directive, these tools have been improved and clarified with a view to facilitating e-procurement.

*Lighter regime for sub-central contracting authorities:* In line with the WTO Government Procurement Agreement, the proposal provides a simplified procurement regime that applies to all contracting authorities below the central government level, such as local and regional authorities. These purchasers may use a prior information notice as a means of calling for competition. If they make use of this faculty, they don’t have to publish a separate contract notice before launching the procurement procedure. They may also set certain time limits in a more flexible way by mutual agreement with participants.

*Promotion of e-procurement:* The use of electronic communications and transaction processing by public purchasers can deliver significant savings and improved procurement outcomes while reducing waste and error. The proposal aims at helping Member States to

achieve the switchover to e-procurement enabling suppliers to take part in online procurement procedures across the Internal Market. For this purpose, the proposed Directive provides for the mandatory transmission of notices in electronic form, the mandatory electronic availability of the procurement documents and imposes the switch to fully electronic communication, in particular e-submission, in all procurement procedures within a transition period of two years. It streamlines and improves Dynamic Purchasing Systems and electronic catalogues, fully electronic procurement tools that are particularly adapted to highly aggregated procurement done by Central Purchasing Bodies. The e-procurement instrument would also enable contracting authorities to prevent, detect and correct errors generally due to wrong understanding or interpretation of public procurement rules.

*Modernisation of procedures:* The proposal provides a more flexible and user-friendly approach for certain important features of procurement procedures. Time-limits for participations and submission of offers have been shortened, allowing for quicker and more streamlined procurement. The distinction between selection of tenderers and award of the contract which is often a source of errors and misunderstandings has been made more flexible, allowing it for contracting authorities to decide on the most practical sequencing by examining award criteria before selection criteria and to take into account the organisation and quality of the staff assigned to performing the contract as an award criterion.

The grounds for exclusion of candidates and tenderers have been reviewed and clarified. Contracting authorities will be entitled to exclude economic operators which have shown significant or persistent deficiencies in performing prior contracts. The proposal provides also for the possibility of ‘self-cleaning’: contracting authorities may accept candidates or tenderers in spite of the existence of an exclusion ground if they have taken appropriate measures to remedy the consequences of any illicit behaviour and effectively prevent further occurrences of the misbehaviour.

The modification of contracts during their term has become an increasingly relevant and problematic issue for practitioners. A specific provision on modification of contracts takes up the basic solutions developed by case-law and provides a pragmatic solution for dealing with unforeseen circumstances requiring an adaption of a public contract during its term.

## 2) *Strategic use of public procurement in response to new challenges*

The proposed Directive is based on *enabling approach* providing contracting authorities with the instruments needed to contribute to the achievement of the Europe 2020 strategic goals by using their purchasing power to procure goods and services that foster innovation, respect the environment and combat climate change while improving employment, public health and social conditions.

*Life-cycle costing:* The proposal gives public purchasers the possibility to base their award decisions on life-cycle costs of the products, services or works to be purchased. The life cycle covers all stages of the existence of a product or works or provision of a service, from raw material acquisition or generation of resources until disposal, clearance and finalisation. The costs to be taken into account do not only include direct monetary expenses, but also external environmental costs if they can be monetised and verified. Where a common European Union methodology for the calculation of life-cycle costs has been developed, contracting authorities have to make use of it.

*Production process:* Contracting authorities may refer to all factors directly linked to the production process in the technical specifications and in the award criteria, as long as they refer to aspects of the production process which are closely related to the specific production or provision of the good or service purchased. This excludes requirements not related to the process of producing the products, works or services covered by the procurement, such as general corporate social responsibility requirements covering the whole operation of the contractor.

*Labels:* Contracting authorities may require that works, supplies or services bear specific labels certifying environmental, social or other characteristics, provided that they accept also equivalent labels. This applies for instance to European or (multi-)national eco-labels or labels certifying that a product is free of child-labour. The certification schemes in question must concern characteristics linked to the subject-matter of the contract and be drawn up on the basis of scientific information, established in an open and transparent procedure and accessible to all interested parties.

*Sanctioning violations of mandatory social, labour or environmental law:* Under the proposed Directive, a contracting authority can exclude economic operators from the procedure, if it identifies infringements of obligations established by Union legislation in the field of social, labour or environmental law or of international labour law provisions. Moreover, contracting authorities will be obliged to reject tenders if they have established that they are abnormally low because of violations of Union legislation in the field of social, labour or environmental law.

*Social services:* The evaluation on the impact and effectiveness of EU public procurement legislation has shown that social, health and education services have specific characteristics which make them inappropriate for the application of the regular procedures for the award of public service contracts. These services are typically provided within a specific context that varies widely between Member States due to different administrative, organisational and cultural circumstances. The services have, by their very nature, only a very limited cross-border dimension. Member States should therefore have large discretion to organise the choice of service providers. The proposal takes account of this by providing a specific regime for public contracts for these services, with a higher threshold of EUR 500 000 and imposing only the respect of basic principles of transparency and equal treatment. A quantitative analysis of the values of contracts for the relevant services awarded to economic operators from abroad has shown that contracts below this value have typically no cross-border interest.

*Innovation:* Research and innovation play a central role in the Europe 2020 strategy for smart, sustainable and inclusive growth. Public purchasers should be enabled to buy innovative products and services promoting future growth and improving efficiency and quality of public services. The proposal provides for this purpose the innovation partnership, a new special procedure for the development and subsequent purchase of new, innovative products, works and services, provided they can be delivered to agreed performance levels and costs. In addition, the proposal improves and simplifies the competitive dialogue procedure and facilitates cross-border joint procurement which is an important instrument for innovative purchasing.

### *3) Better access to the market for SMEs and Start-ups*

Small and medium-sized enterprises (SMEs) have a huge potential for job creation, growth and innovation. Easy access to procurement markets can help them unlock this potential while

allowing contracting authorities to broaden their supplier base, with positive effects of higher competition for public contracts. In order to make public contracts as accessible as possible to SMEs, the Commission published in 2008 the ‘European Code of Best Practices facilitating access by SMEs to public procurement contracts’<sup>8</sup>. The proposal builds on this work and provides concrete measures to remove barriers for market access by SMEs.

*Simplification of information obligations:* The general simplification of information obligations in procurement procedures will greatly benefit SMEs. The proposal provides for the mandatory acceptance of self-declarations as prima-facie evidence for selection purposes. The actual production of documentary evidence will be facilitated by a standardised document, the European Procurement Passport which is a means of proof for the absence of grounds for exclusion.

*Division into lots:* Contracting authorities will be invited to divide public contracts into — homogeneous or heterogeneous — lots to make them more accessible for SMEs. If they decide not to do so, they will be obliged to provide a specific explanation.

*Limitation on requirements for participation:* To avoid unjustified barriers in the way of participation by SMEs, the proposed Directive contains an exhaustive list of possible conditions for participation in procurement procedures and states explicitly that any such conditions shall be restricted ‘to those that are appropriate to ensure that a candidate or tenderer has the ... capacities and ... abilities to perform the contract to be awarded’. Turnover requirements which are frequently a formidable obstacle to access by SMEs are explicitly limited to three times the estimated contract value, except in duly justified cases. Finally, any conditions for participation by groups of economic operators — an instrument of particular relevance for SMEs — must be justified by objective reasons and proportionate.

*Direct payment of subcontractors:* In addition, Member State can provide that subcontractors may request for direct payment by the contracting authority of supplies, works and services provided to the main contractor in the context of the contract performance. This offers subcontractors which are often SMEs an efficient way of protecting their interest in being paid.

#### 4) Sound procedures

The financial interests at stake and the close interaction between the public and the private sector make public procurement a risk area for unsound business practices such as conflict of interest, favouritism and corruption. The proposal improves the existing safeguards against such risks and provides for additional protection.

*Conflicts of interest:* The proposal contains a specific provision on conflicts of interest covering actual, potential or perceived conflict of interest situations affecting staff members of the contracting authority or of procurement service providers intervening in the procedure and members of the contracting authority’s management who may influence the outcome of a procurement procedure even if they are not formally involved in it.

*Illicit conduct:* The proposal contains a specific provision against illicit behaviour by candidates and tenderers, such as attempts to improperly influence the decision-making process or entering into agreements with other participants to manipulate the outcome of the

---

<sup>8</sup> Commission Staff Working Document SEC(2008) 2193.

procedure have to be excluded from the procedure. Such illicit activities violate basic principles of European Union result and can result in serious distortions of competition.

*Unfair advantages:* Market consultations are a useful instrument for contracting authorities to obtain information on the structure, capability and capacity of a market while at the same time informing market actors on public purchasers' procurement projects and requirements. However, preliminary contacts with market participants must not result in unfair advantages and distortions of competitions. The proposal contains therefore a specific provision on safeguards against undue preference in favour of participants who have advised the contracting authority or been involved in the preparation of the procedure.

## 5) Governance

*National oversight bodies:* The evaluation has shown that not all Member States are consistently and systematically monitoring the implementation and functioning of the public procurement rules. This compromises the efficient and uniform application of European Union law. The proposal provides therefore that Member States designate a single national authority in charge of monitoring, implementation and control of public procurement. Only a single body with overarching tasks will ensure an overview of main implementation difficulties and will be able to suggest appropriate remedies to more structural problems. It will be in the position to provide immediate feedback on the functioning of the policy and the potential weaknesses in national legislation and practice, thus contributing to the quick identification of solutions and the improvement of the procurement procedures.

*Knowledge centres:* In many cases, contracting authorities do not have the internal expertise to deal with complex procurement projects. Appropriate and independent professional support by administrative structures could considerably improve procurement outcomes by expanding the knowledge base and the professionalism of public procurers and delivering assistance to businesses, notably SMEs. The proposal obliges therefore Member States to provide support structures offering legal and economic advice, guidance, training and assistance in preparing and conducting procurement procedures. Support structures or mechanisms exist already at national level, although organised in very different manners and covering different areas of interest for contracting authorities. Member States will therefore be able to use these mechanisms, build on their expertise and promote their services as an appropriate and modern tool capable to provide appropriate support to contracting authorities and economic operators.

To reinforce the fight against corruption and favouritism, contracting authorities will be obliged to transmit the text of concluded contracts to the oversight body, which will thus be able to scrutinize these contracts for suspicious patterns, and give access to these documents to interested persons to the extent that legitimate public or private interests are not jeopardized. However, the creation of disproportionate administrative burden must be avoided; the obligation to transmit the full text of concluded contracts should therefore remain limited to relatively high value contracts. The thresholds proposed would strike the right balance between increasing administrative burden and ensuring greater transparency: with a threshold of 1 000 000 EUR for supplies and services, and of 10 000 000 EUR, this obligation would apply to 10 - 20 % of all procurement published in the Official Journal.

It is not foreseen that requirements concerning oversight bodies and knowledge centres will generate overall additional financial burden for Member States. If some costs are expected to re-organise or fine tune the activities of existing mechanisms and structures, they will be neutralised by a reduction of litigation costs (both for contracting authorities and business),

costs related to delays in the attribution of contracts, due to misapplication of public procurement rules or to the bad preparation of the procurement procedures, as well as costs related to the fact that advice to contracting authorities is currently provided in a fragmented and inefficient manner.

*Administrative cooperation:* The proposal provides also for effective cooperation allowing national oversight bodies to share information and best practices and to cooperate through the Internal Market Information System (IMI).

Proposal for a

**DIRECTIVE OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL**

**on public procurement**

(Text with EEA relevance)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 53(1), Article 62 and Article 114 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national Parliaments<sup>9</sup>,

Having regard to the opinion of the European Economic and Social Committee<sup>10</sup>,

Having regard to the opinion of the Committee of the Regions<sup>11</sup>,

Acting in accordance with the ordinary legislative procedure,

Whereas:

- (1) The award of public contracts by or on behalf of Member States authorities has to comply with the principles of the Treaty on the Functioning of the European Union, and in particular the free movement of goods, freedom of establishment and the freedom to provide services as well as the principles deriving therefrom, such as equal treatment, non-discrimination, mutual recognition, proportionality and transparency. However, for public contracts above a certain value, provisions should be drawn up coordinating national procurement procedures so as to ensure that these principles are given practical effect and public procurement is opened up to competition.
- (2) Public procurement plays a key role in the Europe 2020 strategy<sup>12</sup> as one of the market-based instruments to be used to achieve a smart, sustainable and inclusive growth while ensuring the most efficient use of public funds. For that purpose, the current public procurement rules adopted pursuant to Directive 2004/17/EC of the European Parliament and of the Council of 31 March 2004 coordinating the procurement procedures of entities operating in the water, energy, transport and postal

<sup>10</sup> OJ C ....

<sup>11</sup> OJ C ....

<sup>12</sup> COM(2010) 2020 final, 3.3-2010.

services sectors<sup>13</sup> and Directive 2004/18/EC of the European Parliament and of the Council of 31 March 2004 on the coordination of procedures for the award of public works contracts, public supply contracts and public service contracts<sup>14</sup> have to be revised and modernised in order to increase the efficiency of public spending, facilitating in particular the participation of small and medium-sized enterprises in public procurement and to enable procurers to make better use of public procurement in support of common societal goals. There is also a need to clarify basic notions and concepts to ensure better legal certainty and to incorporate certain aspects of related well-established case-law of the Court of Justice of the European Union.

- (3) The increasingly diverse forms of public action have made it necessary to define more clearly the notion of procurement itself. The Union rules on public procurement are not intended to cover all forms of disbursement of public money, but only those aimed at the acquisition of works, supplies or services for consideration. The notion of acquisition should be understood broadly in the sense of obtaining the benefits of the works, supplies or services in question, not necessarily requiring a transfer of ownership to the contracting authorities. Furthermore, the mere financing of an activity, which is frequently linked to the obligation to reimburse the amounts received where they are not used for the purposes intended, does not usually fall under the public procurement rules.
- (4) It has also proven necessary to clarify what should be understood as a single procurement, with the effect that the aggregate value of all contracts concluded for the purpose of this procurement has to be taken into account with regard to the thresholds of this directive, and that the procurement should be advertised as a whole, possibly split into lots. The concept of single procurement encompasses all supplies, works and services needed to carry out a particular project, for instance a works project or an entirety of works, supplies and/or services. Indications for the existence of one single project can for instance consist in overall prior planning and conception by the contracting authority, the fact that the different elements purchased fulfil a single economic and technical function or that they are otherwise logically interlinked and carried out in a narrow time frame.
- (5) Under Article 11 of the Treaty on the Functioning of the European Union, environmental protection requirements must be integrated into the definition and implementation of the Union policies and activities, in particular with a view to promoting sustainable development. This Directive clarifies how the contracting authorities may contribute to the protection of the environment and the promotion of sustainable development, whilst ensuring that they can obtain the best value for money for their contracts.
- (6) Even if they do not necessarily lead to corrupt conduct, actual, potential or perceived conflicts of interest have a high potential to improperly influence public procurement decisions with the effect of distorting competition and jeopardising equal treatment of tenderers. Effective mechanisms should therefore be set up to prevent, identify and remedy conflicts of interest.

---

<sup>13</sup> OJ L 134, 30.4.2004, p. 1.

<sup>14</sup> OJ L 134, 30.4.2004, p. 114.

- (7) Illicit conduct by participants in a procurement procedure, such as attempts to unduly influence the decision-making process or to enter into agreements with other candidates to manipulate the outcome of the procedure, can result in violations of the basic principles of Union law and in serious distortions of competition. Economic operators should therefore be required to submit a declaration on honour that they do not engage in such illicit activities and be excluded if this declaration proves to be false.
- (8) Council Decision 94/800/EC of 22 December 1994 concerning the conclusion on behalf of the European Community, as regards matters within its competence, of the Agreements reached in the Uruguay Round multilateral negotiations (1986 to 1994)<sup>15</sup> approved in particular the World Trade Organisation Agreement on Government Procurement, hereinafter referred to as the ‘Agreement’. The aim of the Agreement is to establish a multilateral framework of balanced rights and obligations relating to public contracts with a view to achieving the liberalisation and expansion of world trade. For contracts covered by the Agreement, as well as by other relevant international agreements by which the Union is bound, contracting authorities fulfil the obligations under these agreements by applying this Directive to economic operators of third countries that are signatories to the agreements.
- (9) The Agreement applies to contracts above certain thresholds, set in the Agreement and expressed as special drawing rights. The thresholds laid down by this Directive should be aligned to ensure that they correspond to the euro equivalents of the thresholds of the Agreement. Provision should also be made for periodic reviews of the thresholds expressed in euros so as to adjust them, by way of a purely mathematical operation, to possible variations in the value of the euro in relation to the special drawing right.
- (10) The results of the Evaluation on the Impact and Effectiveness of EU Public Procurement Legislation<sup>16</sup> demonstrated that the exclusion of certain services from the full application of the Directive should be reviewed. As a result, the full application of this directive is extended to a number of services (such as hotel and legal services, which both showed a particularly high percentage of cross-border trade).
- (11) Other categories of services continue by their very nature to have a limited cross-border dimension, namely what are known as services to the person, such as certain social, health and educational services. These services are provided within a particular context that varies widely amongst Member States, due to different cultural traditions. A specific regime should therefore be established for public contracts for these services, with a higher threshold of EUR 500 000. Services to the person with values below this threshold will typically not be of interest to providers from other Member States, unless there are concrete indications to the contrary, such as Union financing for transborder projects. Contracts for services to the person above this threshold should be subject to Union-wide transparency. Given the importance of the cultural context and the sensitivity of these services, Member States should be given wide discretion to organise the choice of the service providers in the way they consider most appropriate. The rules of this directive take account of that imperative, imposing only observance of basic principles of transparency and equal treatment and making sure

---

<sup>15</sup> OJ L 336, 23.12.1994, p. 1.

<sup>16</sup> SEC(2011) 853 final, 27.6.2011.

that contracting authorities are able to apply specific quality criteria for the choice of service providers, such as the criteria set out in the voluntary European Quality Framework for Social Services of the European Union's Social Protection Committee<sup>17</sup>. Member States and/or public authorities remain free to provide these services themselves or to organise social services in a way that does not entail the conclusion of public contracts, for example through the mere financing of such services or by granting licences or authorisations to all economic operators meeting the conditions established beforehand by the contracting authority, without any limits or quotas, provided such a system ensures sufficient advertising and complies with the principles of transparency and non-discrimination.

- (12) Public contracts that are awarded by contracting authorities operating in the water, energy, transport and postal services sectors and fall within the scope of those activities are covered by Directive [...] of the European Parliament and of the Council of [...] on procurement by entities operating in the water, energy, transport and postal services sectors<sup>18</sup>. Contracts awarded by contracting authorities in the context of their operation of maritime, coastal or river transport services fall within the scope of this Directive.
- (13) Being addressed to Member States, this directive does not apply to procurement carried out by international organisations on their own behalf and for their own account. There is, however, a need to clarify to what extent this directive should be applied to procurement governed by specific international rules.
- (14) There is considerable legal uncertainty as to how far cooperation between public authorities should be covered by public procurement rules. The relevant case-law of the Court of Justice of the European Union is interpreted divergently between Member States and even between contracting authorities. It is therefore necessary to clarify in what cases contracts concluded between contracting authorities are not subject to the application of public procurement rules. Such clarification should be guided by the principles set out in the relevant case-law of the Court of Justice. The sole fact that both parties to an agreement are themselves contracting authorities does not as such rule out the application of procurement rules. However, the application of public procurement rules should not interfere with the freedom of public authorities to decide how to organise the way they carry out their public service tasks. Contracts awarded to controlled entities or cooperation for the joint execution of the public service tasks of the participating contracting authorities should therefore be exempted from the application of the rules if the conditions set out in this directive are fulfilled. This directive should aim to ensure that any exempted public-public cooperation does not cause a distortion of competition in relation to private economic operators. Neither should the participation of a contracting authority as a tenderer in a procedure for the award of a public contract cause any distortion of competition.
- (15) There is a widespread need for additional flexibility and in particular for wider access to a procurement procedure providing for negotiations, as is explicitly foreseen in the Agreement, where negotiation is allowed in all procedures. Contracting authorities should, unless otherwise provided in the legislation of the Member State concerned, be

---

<sup>17</sup> SPC/2010/10/8 final,6.10.2010.

<sup>18</sup> ...

able to use a competitive procedure with negotiation as provided for in this Directive, in various situations where open or restricted procedures without negotiations are not likely to lead to satisfactory procurement outcomes. This procedure should be accompanied by adequate safeguards ensuring observance of the principles of equal treatment and transparency. This will give greater leeway to contracting authorities to buy works, supplies and services perfectly adapted to their specific needs. At the same time, it should also increase cross-border trade, as the evaluation has shown that contracts awarded by negotiated procedure with prior publication have a particularly high success rate of cross-border tenders.

- (16) For the same reasons, contracting authorities should be free to use the competitive dialogue. The use of this procedure has significantly increased in terms of contract values over the last years. It has shown itself to be of use in cases where contracting authorities are unable to define the means of satisfying their needs or of assessing what the market can offer in terms of technical, financial or legal solutions. This situation may arise in particular with innovative projects, the implementation of major integrated transport infrastructure projects, large computer networks or projects involving complex and structured financing.
- (17) Research and innovation, including eco-innovation and social innovation, are among the main drivers of future growth and have been put at the centre of the Europe 2020 strategy for smart, sustainable and inclusive growth. Public authorities should make the best strategic use of public procurement to spur innovation. Buying innovative goods and services plays a key role in improving the efficiency and quality of public services while addressing major societal challenges. It contributes to achieving best value for public money as well as wider economic, environmental and societal benefits in terms of generating new ideas, translating them into innovative products and services and thus promoting sustainable economic growth. This directive should contribute to facilitating public procurement of innovation and help Member States in achieving the Innovation Union targets. A specific procurement procedure should therefore be provided for which allows contracting authorities to establish a long-term innovation partnership for the development and subsequent purchase of a new, innovative product, service or works provided it can be delivered to agreed performance levels and costs. The partnership should be structured in such a way that it can provide the necessary 'market-pull', incentivising the development of an innovative solution without foreclosing the market.
- (18) In view of the detrimental effects on competition, negotiated procedures without prior publication of a contract notice should only be used in very exceptional circumstances. This exception should be limited to cases where publication is either not possible, for reasons of force majeure in line with the standing case-law of the Court of Justice of the European Union, or where it is clear from the outset that publication would not trigger more competition, not least because there is objectively only one economic operator that can perform the contract. Only situations of objective exclusivity can justify the use of the negotiated procedure without publication, where the situation of exclusivity has not been created by the contracting authority itself with a view to the future procurement procedure, and where there are no adequate substitutes, the availability of which should be assessed thoroughly.
- (19) Electronic means of information and communication can greatly simplify the publication of contracts and increase the efficiency and transparency of procurement

processes. They should become the standard means of communication and information exchange in procurement procedures. The use of electronic means also leads to time savings. As a result, provision should be made for reducing the minimum periods where electronic means are used, subject, however, to the condition that they are compatible with the specific mode of transmission envisaged at Union level. Moreover, electronic means of information and communication including adequate functionalities can enable contracting authorities to prevent, detect and correct errors that occur during procurement procedures.

- (20) There is a strong trend emerging across Union public procurement markets towards the aggregation of demand by public purchasers, with a view to obtaining economies of scale, including lower prices and transaction costs, and to improving and professionalising procurement management. This can be achieved by concentrating purchases either by the number of contracting authorities involved or by volume and value over time. However, the aggregation and centralisation of purchases should be carefully monitored in order to avoid excessive concentration of purchasing power and collusion, and to preserve transparency and competition, as well as market access opportunities for small and medium-sized enterprises.
- (21) The instrument of framework agreements has been widely used and is considered as an efficient procurement technique throughout Europe. It should therefore be maintained largely as is. However, certain concepts need to be clarified, in particular the conditions for the use of a framework agreement by contracting authorities which are not themselves party to it.
- (22) In view of the experience acquired, there is also a need to adjust the rules governing dynamic purchasing systems to enable contracting authorities to take full advantage of the possibilities afforded by this instrument. The systems need to be simplified, in particular by operating them in the form of a restricted procedure, hence eliminating the need for indicative tenders, which have been identified as one of the major burdens associated with these systems. Thus any economic operator that submits a request to participate and meets the selection criteria should be allowed to take part in procurement procedures carried out through the dynamic purchasing system. This purchasing technique allows the contracting authority to have a particularly broad range of tenders and hence to ensure optimum use of public funds through broad competition.
- (23) In addition, new electronic purchasing techniques are constantly being developed, such as electronic catalogues. They help to increase competition and streamline public purchasing, particularly in terms of savings in time and money. Certain rules should however be laid down to ensure that the use of the new techniques complies with the rules of this Directive and the principles of equal treatment, non-discrimination and transparency. In particular, where competition has been reopened under a framework agreement or where a dynamic purchasing system is being used and where sufficient guarantees are offered in respect of ensuring traceability, equal treatment and predictability, contracting authorities should be allowed to generate tenders in relation to specific purchases on the basis of previously transmitted electronic catalogues. In line with the requirements of the rules for electronic means of communication, contracting authorities should avoid unjustified obstacles to economic operators' access to procurement procedures in which tenders are to be presented in the form of

electronic catalogues and which guarantee compliance with the general principles of non-discrimination and equal treatment.

- (24) Centralised purchasing techniques are increasingly used in most Member States. Central purchasing bodies are responsible for making acquisitions or awarding public contracts/framework agreements for other contracting authorities. In view of the large volumes purchased, such techniques help increase competition and professionalise public purchasing. Provision should therefore be made for a Union definition of central purchasing bodies dedicated to contracting authorities, without preventing the continuation of less institutionalised and systematic common purchasing or the established practice of having recourse to service providers that prepare and manage procurement procedures on behalf and for the account of a contracting authority. Rules should also be laid down for allocating responsibility for the observance of the obligations pursuant to this Directive, also in the case of remedies, among the central purchasing body and the contracting authorities procuring from or through the central purchasing body. Where the latter has sole responsibility for the conduct of the procurement procedures, it should also be solely and directly responsible for the legality of the procedures. Where a contracting authority conducts certain parts of the procedure, for instance the reopening of competition under a framework agreement or the award of individual contracts based on a dynamic purchasing system, it should continue to be responsible for the stages it conducts.
- (25) Electronic means of communication are particularly well suited to support centralised purchasing practices and tools because of the possibility they offer to re-use and automatically process data and to minimise information and transaction costs. The use of such electronic means of communication should therefore, as a first step, be rendered compulsory for central purchasing bodies, while also facilitating converging practices across the Union. This should be followed by a general obligation to use electronic means of communication in all procurement procedures after a transition period of two years.
- (26) Joint awarding of public contracts by contracting authorities from different Member States currently encounters specific legal difficulties, with special reference to conflicts of national laws. Despite the fact that Directive 2004/18/EC implicitly allowed for cross-border joint public procurement, in practice several national legal systems have explicitly or implicitly rendered cross-border joint procurement legally uncertain or impossible. Contracting authorities from different Member States may be interested in cooperating and in jointly awarding public contracts in order to derive maximum benefit from the potential of the internal market in terms of economies of scale and risk-benefit sharing, not least for innovative projects involving a greater amount of risk than reasonably bearable by a single contracting authority. Therefore new rules on cross-border joint procurement designating the applicable law should be established in order to facilitate cooperation between contracting authorities across the Single Market. In addition, contracting authorities from different Member States may set up joint legal bodies established under national or Union law. Specific rules should be established for such form of joint procurement.
- (27) The technical specifications drawn up by public purchasers need to allow public procurement to be opened up to competition. To that end, it must be possible to submit tenders that reflect the diversity of technical solutions so as to obtain a sufficient level of competition. Consequently, technical specifications should be drafted in such a way

to avoid artificially narrowing down competition through requirements that favour a specific economic operator by mirroring key characteristics of the supplies, services or works habitually offered by that economic operator. Drawing up the technical specifications in terms of functional and performance requirements generally allows this objective to be achieved in the best way possible and favours innovation. Where reference is made to a European standard or, in the absence thereof, to a national standard, tenders based on equivalent arrangements must be considered by contracting authorities. To demonstrate equivalence, tenderers can be required to provide third-party verified evidence; however, other appropriate means of proof such as a technical dossier of the manufacturer should also be allowed where the economic operator concerned has no access to such certificates or test reports, or no possibility of obtaining them within the relevant time limits.

- (28) Contracting authorities that wish to purchase works, supplies or services with specific environmental, social or other characteristics should be able to refer to particular labels, such as the European Eco-label, (multi-)national eco-labels or any other label provided that the requirements for the label are linked to the subject-matter of the contract, such as the description of the product and its presentation, including packaging requirements. It is furthermore essential that these requirements are drawn up and adopted on the basis of objectively verifiable criteria, using a procedure in which stakeholders, such as government bodies, consumers, manufacturers, distributors and environmental organisations, can participate, and that the label is accessible and available to all interested parties.
- (29) For all procurement intended for use by persons, whether general public or staff of the contracting authority, it is necessary that contracting authorities lay down technical specifications so as to take into account accessibility criteria for people with disabilities or design for all users, except in duly justified cases.
- (30) In order to foster the involvement of small and medium-sized enterprises (SMEs) in the public procurement market, contracting authorities should be encouraged to divide contracts into lots, and be obliged to state the reasons for not doing so. Where contracts are divided into lots, contracting authorities may, for instance in order to preserve competition or to ensure security of supply, limit the number of lots for which an economic operator may tender; they may also limit the number of lots that may be awarded to any one tenderer.
- (31) Overly demanding requirements concerning economic and financial capacity frequently constitute an unjustified obstacle to the involvement of SMEs in public procurement. Contracting authorities should therefore not be allowed to require economic operators to have a minimum turnover exceeding three times the estimated contract value. However, in duly justified circumstances, higher requirements may be applied. Such circumstances may relate to the high risks attached to the performance of the contract or the fact that its timely and correct performance is critical, for instance because it constitutes a necessary preliminary for the performance of other contracts.
- (32) Many economic operators, and not least SMEs, find that a major obstacle to their participation in public procurement consists in administrative burdens deriving from the need to produce a substantial number of certificates or other documents related to exclusion and selection criteria. Limiting such requirements, for example through self-

declarations, can result in considerable simplification for the benefit of both contracting authorities and economic operators. The tenderer to which it has been decided to award the contract should, however, be required to provide the relevant evidence and contracting authorities should not conclude contracts with tenderers unable to do so. Further simplification can be achieved through standardised documents such as the European Procurement Passport, which should be recognized by all contracting authorities and widely promoted among economic operators, in particular SMEs, for whom they can substantially lessen the administrative burden.

- (33) The Commission provides and manages an electronic system — e-Certis, which is updated and verified on a voluntary basis by national authorities. The aim of e-Certis is to facilitate the exchange of certificates and other documentary evidence frequently required by contracting authorities. Experience acquired so far indicates that voluntary updating and verification is insufficient to ensure that e-Certis can deliver its full potential for simplifying and facilitating documentary exchanges for the benefit of small and medium-sized enterprises in particular. Maintenance should therefore be rendered obligatory in a first step; recourse to e-Certis will be made mandatory at a later stage.
- (34) Public contracts should not be awarded to economic operators that have participated in a criminal organisation or have been found guilty of corruption, fraud to the detriment of the Union's financial interests or money laundering. Non-payment of taxes or social security contributions should also be sanctioned by mandatory exclusion at the level of the Union. Furthermore, contracting authorities should be given the possibility to exclude candidates or tenderers for violations of environmental or social obligations, including rules on accessibility for disabled persons or other forms of grave professional misconduct, such as violations of competition rules or of intellectual property rights.
- (35) Allowance should, however, be made for the possibility that economic operators may adopt compliance measures aimed at remedying the consequences of any criminal offences or misconduct and at effectively preventing further occurrences of the misbehaviour. These measures may consist in particular in personnel and organisation measures such as the severance of all links with persons or organisations involved in the misbehaviour, appropriate staff reorganisation measures, the implementation of reporting and control systems, the creation of an internal audit structure to monitor compliance and the adoption of internal liability and compensation rules. Where such measures offer sufficient guarantees, the economic operator in question should no longer be excluded on these grounds. Economic operators should have the possibility to request that contracting authorities examine the compliance measures taken with a view to possible admission to the procurement procedure.
- (36) Contracting authorities may require that environmental management measures or schemes are to be applied during the performance of a public contract. Environmental management schemes, whether or not they are registered under Union instruments such as Regulation (EC) No 1221/2009 of the European Parliament and of the Council of 25 November 2009 on the voluntary participation by organisations in a Community eco-management and audit scheme (EMAS)<sup>19</sup>, can demonstrate that the economic

---

<sup>19</sup> OJ L 342, 22.12.2009, p. 1.

operator has the technical capability to perform the contract. A description of the measures implemented by the economic operator to ensure the same level of environmental protection should be accepted as an alternative to environmental management registration schemes as a form of evidence, where the economic operator concerned has no access to such environmental management registration schemes or no possibility of obtaining them within the relevant time limits.

- (37) Contracts should be awarded on the basis of objective criteria that ensure compliance with the principles of transparency, non-discrimination and equal treatment. These criteria should guarantee that tenders are assessed in conditions of effective competition, also where contracting authorities require high-quality works, supplies and services that are optimally suited to their needs, for instance where the chosen award criteria include factors linked to the production process. As a result, contracting authorities should be allowed to adopt as award criteria either ‘the most economically advantageous tender’ or ‘the lowest cost’, taking into account that in the latter case they are free to set adequate quality standards by using technical specifications or contract performance conditions.
- (38) Where contracting authorities choose to award a contract to the most economically advantageous tender, they must determine the award criteria on the basis of which they will assess tenders in order to identify which one offers the best value for money. The determination of these criteria depends on the subject-matter of the contract since they must allow the level of performance offered by each tender to be assessed in the light of the subject-matter of the contract, as defined in the technical specifications, and the value for money of each tender to be measured. Furthermore, the chosen award criteria should not confer an unrestricted freedom of choice on the contracting authority and they should ensure the possibility of effective competition and be accompanied by requirements that allow the information provided by the tenderers to be effectively verified.
- (39) It is of utmost importance to fully exploit the potential of public procurement to achieve the objectives of the Europe 2020 Strategy for sustainable growth. In view of the important differences between individual sectors and markets, it would however not be appropriate to set general mandatory requirements for environmental, social and innovation procurement. The Union legislature has already set mandatory procurement requirements for obtaining specific goals in the sectors of road transport vehicles (Directive 2009/33/EC of the European Parliament and the Council of 23 April 2009 on the promotion of clean and energy-efficient road transport vehicles<sup>20</sup>) and office equipment (Regulation (EC) No 106/2008 of the European Parliament and the Council of 15 January 2008 on a Community energy-efficiency labelling programme for office equipment<sup>21</sup>). In addition, the definition of common methodologies for life cycle costing has significantly advanced. It therefore appears appropriate to continue on that path, leaving it to sector-specific legislation to set mandatory objectives and targets in function of the particular policies and conditions prevailing in the relevant sector and to promote the development and use of European approaches to life-cycle costing as a further underpinning for the use of public procurement in support of sustainable growth.

---

<sup>20</sup> OJ L 120, 15.5.2009, p. 5.

<sup>21</sup> OJ L 39, 13.2.2008, p. 1.

- (40) These sector-specific measures must be complemented by an adaptation of the public procurement Directives empowering contracting authorities to pursue the objectives of the Europe 2020 Strategy in their purchasing strategies. It should hence be made clear that contracting authorities can determine the most economically advantageous tender and the lowest cost using a life-cycle costing approach, provided that the methodology to be used is established in an objective and non-discriminatory manner and accessible to all interested parties. The notion of life-cycle costing includes all costs over the life cycle of works, supplies or services, both their internal costs (such as development, production, use, maintenance and end-of-life disposal costs) and their external costs, provided they can be monetised and monitored. Common methodologies should be developed at the level of the Union for the calculation of life-cycle costs for specific categories of supplies or services; whenever such a methodology is developed its use should be made compulsory.
- (41) Furthermore, in technical specifications and in award criteria, contracting authorities should be allowed to refer to a specific production process, a specific mode of provision of services, or a specific process for any other stage of the life cycle of a product or service, provided that they are linked to the subject-matter of the public contract. In order to better integrate social considerations in public procurement, procurers may also be allowed to include, in the award criterion of the most economically advantageous tender, characteristics related to the working conditions of the persons directly participating in the process of production or provision in question. Those characteristics may only concern the protection of health of the staff involved in the production process or the favouring of social integration of disadvantaged persons or members of vulnerable groups amongst the persons assigned to performing the contract, including accessibility for persons with disabilities. Any award criteria which include those characteristics should in any event remain limited to characteristics that have immediate consequences on staff members in their working environment. They should be applied in accordance with Directive 96/71/EC of the European Parliament and of the Council of 16 December 1996 concerning the posting of workers in the framework of the provision of services<sup>22</sup> and in a way that does not discriminate directly or indirectly against economic operators from other Member States or from third countries parties to the Agreement or to Free Trade Agreements to which the Union is party. For service contracts and for contracts involving the design of works, contracting authorities should also be allowed to use as an award criterion the organisation, qualification and experience of the staff assigned to performing the contract in question, as this may affect the quality of contract performance and, as a result, the economic value of the tender.
- (42) Tenders that appear abnormally low in relation to the works, supplies or services might be based on technically, economically or legally unsound assumptions or practices. In order to prevent possible disadvantages during contract performance, contracting authorities should be obliged to ask for an explanation of the price charged where a tender significantly undercuts the prices demanded by other tenderers. Where the tenderer cannot provide a sufficient explanation, the contracting authority should be entitled to reject the tender. Rejection should be mandatory in cases where the contracting authority has established that the abnormally low price charged results

---

<sup>22</sup> OJ L 18, 21.1.1997, p.1.

from non-compliance with mandatory Union legislation in the fields of social, labour or environmental law or international labour law provisions.

- (43) Contract performance conditions are compatible with this Directive provided that they are not directly or indirectly discriminatory, are linked to the subject-matter of the contract and are indicated in the contract notice, the prior information notice used as a means of calling for competition or the procurement documents. They may, in particular, be intended to favour on-site vocational training, the employment of people experiencing particular difficulty in achieving integration, the fight against unemployment, protection of the environment or animal welfare. For instance, mention may be made, amongst other things, of the requirements — applicable during performance of the contract — to recruit long-term job-seekers or to implement training measures for the unemployed or young persons, to comply in substance with fundamental International Labour Organisation (ILO) Conventions, even where such Conventions have not been implemented in national law, and to recruit more disadvantaged persons than are required under national legislation.
- (44) The laws, regulations and collective agreements, at both national and Union level, that are in force in the areas of employment conditions and safety at work apply during the performance of a public contract, provided that such rules, and their application, comply with Union law. In cross-border situations, where workers from one Member State provide services in another Member State for the purpose of performing a public contract, Directive 96/71/EC of the European Parliament and of the Council of 16 December 1996 concerning the posting of workers in the framework of the provision of services<sup>23</sup> lays down the minimum conditions that must be observed by the host country in respect of such posted workers. Where national law contains provisions to this effect, non-compliance with those obligations may be considered to be grave misconduct on the part of the economic operator concerned, liable to lead to the exclusion of that economic operator from the procedure for the award of a public contract.
- (45) It is necessary to clarify the conditions under which modifications of a contract during its performance require a new procurement procedure, taking into account the relevant case-law of the Court of Justice of the European Union. A new procurement procedure is required in case of material changes to the initial contract, in particular to the scope and content of the mutual rights and obligations of the parties, including the distribution of intellectual property rights. Such changes demonstrate the parties' intention to renegotiate essential terms or conditions of that contract. This is the case in particular if the amended conditions would have had an influence on the outcome of the procedure, had they been part of the initial procedure.
- (46) Contracting authorities can be faced with external circumstances that they could not foresee when they awarded the contract. In this case, a certain degree of flexibility is needed to adapt the contract to these circumstances without a new procurement procedure. The notion of unforeseeable circumstances refers to circumstances that could not have been predicted despite reasonably diligent preparation of the initial award by the contracting authority, taking into account its available means, the nature and characteristics of the specific project, good practice in the field in question and the

---

<sup>23</sup> OJ L 18, 21.1.1997, p. 1.

need to ensure an appropriate relationship between the resources spent in preparing the award and its foreseeable value. However, this cannot apply in cases where a modification results in an alteration of the nature of the overall procurement, for instance by replacing the works, supplies or services to be procured by something different or by fundamentally changing the type of procurement since, in such a situation, a hypothetical influence on the outcome may be assumed.

- (47) In line with the principles of equal treatment and transparency, the successful tenderer should not be replaced by another economic operator without reopening the contract to competition. However, the successful tenderer performing the contract may undergo certain structural changes during the performance of the contract, such as purely internal reorganisations, mergers and acquisitions or insolvency. Such structural changes should not automatically require new procurement procedures for all public contracts performed by that undertaking.
- (48) Contracting authorities should, in the individual contracts themselves, have the possibility to provide for modifications to a contract by way of review clauses, but such clauses should not give them unlimited discretion. This directive should therefore set out to what extent modifications may be provided for in the initial contract.
- (49) The evaluation has shown that Member States do not consistently and systematically monitor the implementation and functioning of public procurement rules. This has a negative impact on the correct implementation of provisions stemming from these directives, which is a major source of cost and uncertainty. Several Member States have appointed a national central body dealing with public procurement issues, but the tasks entrusted to such bodies vary considerably across Member States. Clearer, more consistent and authoritative monitoring and control mechanisms would increase knowledge of the functioning of procurement rules, improve legal certainty for businesses and contracting authorities, and contribute to establishing a level playing field. Such mechanisms could serve as tools for the detection and early resolution of problems, especially with regard to projects cofunded by the Union, and for the identification of structural deficiencies. There is in particular a strong need to coordinate these mechanisms to ensure consistent application, control and monitoring of public procurement policy, as well as systematic assessment of the outcomes of procurement policy across the Union.
- (50) Member States should designate a single national authority in charge of monitoring, implementation and control of public procurement. Such a central body should have first-hand and timely information, particularly in relation to different problems affecting the implementation of public procurement law. It should be able to provide immediate feedback on the functioning of the policy and the potential weaknesses in national legislation and practice and contribute to the quick identification of solutions. In view of efficiently fighting corruption and fraud, this central body and the general public should also have the possibility to inspect the texts of concluded contracts. High-value contracts should hence be transmitted to the oversight body with a possibility of interested persons to have access to these documents, to the extent that legitimate public or private interests are not jeopardized.
- (51) Not all contracting authorities may have the internal expertise to deal with economically or technically complex contracts. Against this background, appropriate professional support would be an effective complement to monitoring and control

activities. On the one hand, this objective can be achieved by knowledge sharing tools (knowledge centres) offering technical assistance to contracting authorities; on the other hand, business, not least SMEs, should benefit from administrative assistance, in particular when participating in procurement procedures on a cross-border basis.

- (52) Monitoring, oversight and support structures or mechanisms exist already at national level and can of course be used to ensure monitoring, implementation and control of public procurement and to provide the required support to contracting authorities and economic operators.
- (53) Effective cooperation is necessary to ensure consistent advice and practice within each Member State and across the Union. Bodies designated for monitoring, implementation, control and technical assistance should be able to share information and cooperate; in the same context, the national authority designated by each Member State should act as the preferred contact point with the Commission services for the purpose of collecting data, exchanging information and monitoring the implementation of Union public procurement law.
- (54) In order to adapt to rapid technical, economic and regulatory developments, the power to adopt acts in accordance with Article 290 of the Treaty on the Functioning of the European Union should be delegated to the Commission in respect of a number of non-essential elements of this Directive. In fact, due to the need to comply with international agreements, the Commission should be empowered to modify the technical procedures for the calculation methods concerning thresholds as well as to periodically revise the thresholds themselves and to adapt Annexes V and XI; the lists of central government authorities are subject to variations due to administrative changes at national level. These are notified to the Commission, which should be empowered to adapt the Annex I; references to the CPV nomenclature may undergo regulatory changes at EU level and it is necessary to reflect those changes into the text of this Directive; the technical details and characteristics of the devices for electronic receipt should be kept up to date with technological developments and administrative needs; it is also necessary to empower the Commission to make mandatory technical standards for electronic communication to ensure the interoperability of technical formats, processes and messaging in procurement procedures conducted using electronic means of communication taking into account technological developments and administrative needs; and the content of the European Procurement Passport to reflect administrative needs and regulatory changes at both national and EU level; the list of legislative acts of the Union establishing common methodologies for the calculation of life-cycle costs should be quickly adapted to incorporate the measures adopted on a sectoral basis. In order to satisfy these needs, the Commission should be empowered to keep the list of legislative acts including LCC methodologies up-to date.
- (55) It is of particular importance that the Commission carries out appropriate consultations during its preparatory work, including at expert level. When preparing and drawing up delegated acts, the Commission should ensure simultaneous, timely and appropriate transmission of relevant documents to the European Parliament and the Council.
- (56) In order to ensure uniform conditions for the implementation of this Directive, as for the drawing up of the standard forms for the publication of notices, the standard form for the European Procurement Passport and the common template to be used by the

oversight bodies for drawing up the implementation and statistical report, implementing powers should be conferred on the Commission. Those powers should be exercised in accordance with Regulation (EU) No. 182/2011 of the European Parliament and of the Council of 16 February 2011 laying down the rules and general principles concerning mechanisms for control by the Member States of the Commission's exercise of implementing powers<sup>24</sup>. The advisory procedure should be used for the adoption of these implementing acts, which do not have any impact either from the financial point of views or on the nature and scope of obligations stemming from this Directive. On the contrary, these acts are characterised by a mere administrative purpose and serve to facilitate the application of the rules set by this Directive.

- (57) Since the objective of this Directive, namely the coordination of laws, regulations and administrative provisions of the Member States applying to certain public procurement procedures, cannot be sufficiently achieved by the Member States and can therefore be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with the principle of proportionality, as set out in that Article, this Directive does not go beyond what is necessary in order to achieve that objective.
- (58) Directive 2004/18/EC should therefore be repealed.
- (59) In accordance with the Joint Political Declaration of Member States and the Commission on explanatory documents of [date], Member States have undertaken to accompany, in justified cases, the notification of their transposition measures with one or more documents explaining the relationship between the components of a directive and the corresponding parts of national transposition instruments. With regard to this Directive, the legislator considers the transmission of such documents to be justified,

HAVE ADOPTED THIS DIRECTIVE:

## SCOPE, DEFINITIONS AND GENERAL PRINCIPLES

### CHAPTER I

#### *Scope and definitions*

#### SECTION 1

##### SUBJECT-MATTER AND DEFINITIONS

##### *Article 1*

###### *Subject-matter and scope*

1. This Directive establishes rules on the procedures for procurement by contracting authorities with respect to public contracts as well as design contests, whose value is estimated to be not less than the thresholds laid down in Article 4.
2. Procurement within the meaning of this Directive is the purchase or other forms of acquisition of works, supplies or services by one or more contracting authorities from economic operators chosen by those contracting authorities, whether or not the works, supplies or services are intended for a public purpose.

An entirety of works, supplies and/or services, even if purchased through different contracts, constitutes a single procurement within the meaning of this Directive, if the contracts are part of one single project.

##### *Article 2*

###### *Definitions*

For the purposes of this Directive, the following definitions shall apply:

- (1) ‘contracting authorities’ means the State, regional or local authorities, bodies governed by public law, associations formed by one or more such authorities or one or more such bodies governed by public law;
- (2) ‘central government authorities’ means the contracting authorities listed in Annex I and, insofar as corrections or amendments have been made at national level, their successor entities;
- (3) ‘sub-central contracting authorities’ means all contracting authorities which are not central government authorities ;

- (4) ‘regional authorities’ include all authorities of the administrative units falling under NUTS 1 and 2, as referred to by Regulation (EC) No. 1059/2003 of the European Parliament and of the Council<sup>25</sup>;
- (5) ‘local authorities’ include all authorities of the administrative units falling under NUTS 3 and smaller administrative units, as referred to by Regulation (EC) No. 1059/2003;
- (6) ‘bodies governed by public law’ means bodies that have all of the following characteristics:
- (a) they are established for or have the specific purpose of meeting needs in the general interest, not having an industrial or commercial character; for that purpose, a body which operates in normal market conditions, aims to make a profit, and bears the losses resulting from the exercise of its activity does not have the purpose of meeting needs in the general interest, not having an industrial or commercial character;
  - (b) they have legal personality;
  - (c) they are financed, for the most part, by the State, regional or local authorities, or other bodies governed by public law; or subject to management supervision by those bodies; or have an administrative, managerial or supervisory board, more than half of whose members are appointed by the State, regional or local authorities, or by other bodies governed by public law.
- (7) ‘public contracts’ means contracts for pecuniary interest concluded in writing between one or more economic operators and one or more contracting authorities and having as their object the execution of works, the supply of products or the provision of services within the meaning of this Directive;
- (8) ‘public works contracts’ means public contracts having as their object one of the following:
- (a) the execution, or both the design and execution, of works related to one of the activities within the meaning of Annex II;
  - (b) the execution, or both the design and execution, of a work;
  - (c) the realisation, by whatever means, of a work corresponding to the requirements specified by the contracting authority exercising a decisive influence on the type or design of the work;
- (9) ‘a work’ means the outcome of building or civil engineering works taken as a whole which is sufficient in itself to fulfil an economic or technical function;
- (10) ‘public supply contracts’ means public contracts having as their object the purchase, lease, rental or hire-purchase, with or without an option to buy, of products. A public

---

<sup>25</sup> OJ L 154, 21.6.2003, p. 1.

supply contract may include, as an incidental matter, siting and installation operations;

- (11) 'public service contracts' means public contracts having as their object the provision of services other than those referred to in point (8);
- (12) 'economic operator' means any natural or legal person or public entity or group of such persons and/or entities which offers the execution of works and/or a work, the supply of products or the provision of services on the market;
- (13) 'tenderer' means an economic operator that has submitted a tender;
- (14) 'candidate' means an economic operator that has sought an invitation or has been invited to take part in a restricted procedure, in a competitive procedure with negotiation or in a negotiated procedure without prior publication, in a competitive dialogue or in an innovation partnership;
- (15) 'procurement documents' means all documents produced or referred to by the contracting authority to describe or determine elements of the procurement or the procedure, including the contract notice, the prior information notice where it is used as a means of calling for competition, the technical specifications, the descriptive document, proposed conditions of contract, formats for the presentation of documents by candidates and tenderers, information on generally applicable obligations and any additional documents.
- (16) 'centralised purchasing activities' means activities conducted on a permanent basis, in one of the following forms:
  - (a) the acquisition of supplies and/or services intended for contracting authorities,
  - (b) the award of public contracts or the conclusion of framework agreements for works, supplies or services intended for contracting authorities;
- (17) 'ancillary purchasing activities' means activities consisting in the provision of support to purchasing activities, in particular in the following forms:
  - (a) technical infrastructure enabling contracting authorities to award public contracts or to conclude framework agreements for works, supplies or services;
  - (b) advice on the conduct or design of public procurement procedures;
  - (c) preparation and management of procurement procedures on behalf and for the account of the contracting authority concerned;
- (18) 'central purchasing body' means a contracting authority providing centralised purchasing activities and, possibly, ancillary purchasing activities;
- (19) 'procurement service provider' means a public or private body which offers ancillary purchasing activities on the market;

- (20) ‘written’ or ‘in writing’ means any expression consisting of words or figures which can be read, reproduced and subsequently communicated, including information transmitted and stored by electronic means;
- (21) ‘electronic means’ means electronic equipment for the processing (including digital compression) and storage of data which is transmitted, conveyed and received by wire, by radio, by optical means or by other electromagnetic means;
- (22) ‘life cycle’ means all consecutive and/or interlinked stages, including production, transport, use and maintenance, throughout the existence of a product or a works or the provision of a service, from raw material acquisition or generation of resources to disposal, clearance and finalisation.
- (23) ‘design contests’ means those procedures which enable the contracting authority to acquire, mainly in the fields of town and country planning, architecture and engineering or data processing, a plan or design selected by a jury after being put out to competition with or without the award of prizes.

*Article 3*  
*Mixed procurement*

1. Contracts which have as their subject two or more types of procurement (works, services or supplies) shall be awarded in accordance with the provisions applicable to the type of procurement that characterises the main subject of the contract in question.

In the case of mixed contracts consisting of services within the meaning of Chapter I of Title III and other services or of services and supplies, the main object shall be determined by a comparison of the values of the respective services or supplies.

2. In the case of contracts which have as their object procurement covered by this Directive as well as procurement or other elements not covered by it or by Directives [replacing 2004/17/EC] or 2009/81/EC<sup>26</sup>, the part of the contract which constitutes procurement covered by this Directive shall be awarded in accordance with the provisions of this Directive.

In the case of mixed contracts containing elements of public contracts and of concessions, the part of the contract which constitutes a public contract covered by this Directive shall be awarded in accordance with the provisions of this Directive.

Where the different parts of the contract in question are objectively not separable, the application of this Directive shall be determined on the basis of the main subject of that contract.

---

<sup>26</sup> OJ L 217, 20.8.2009, p. 76.

## SECTION 2 THRESHOLDS

### *Article 4 Thresholds amounts*

This Directive shall apply to procurements with a value exclusive of value-added tax (VAT) estimated to be equal to or greater than the following thresholds:

- (a) EUR 5 000 000 for public works contracts;
- (b) EUR 130 000 for public supply and service contracts awarded by central government authorities and design contests organised by such authorities; where public supply contracts are awarded by contracting authorities operating in the field of defence, that threshold shall apply only to contracts concerning products covered by Annex III;
- (c) EUR 200 000 for public supply and service contracts awarded by sub-central contracting authorities and design contests organised by such authorities.
- (d) EUR 500 000 for public contracts for social and other specific services listed in Annex XVI.

### *Article 5 Methods for calculating the estimated value of procurement*

1. The calculation of the estimated value of a procurement shall be based on the total amount payable, net of VAT, as estimated by the contracting authority, including any form of option and any renewals of the contract.

Where the contracting authority provides for prizes or payments to candidates or tenderers it shall take them into account when calculating the estimated value of the contract.

2. The choice of the method used to calculate the estimated value of a procurement shall not be made with the intention of excluding it from the scope of this Directive. A single procurement shall therefore not be subdivided with the effect of preventing it from falling within the scope of this Directive, unless justified by objective reasons.
3. This estimate shall be valid at the moment at which the call for competition is sent, or, in cases where such notice is not foreseen, at the moment at which the contracting authority commences the procurement procedure, in particular by defining the essential characteristics of the intended procurement.
4. With regard to framework agreements and dynamic purchasing systems, the value to be taken into consideration shall be the maximum estimated value net of VAT of all the contracts envisaged for the total term of the framework agreement or the dynamic purchasing system.

5. In the case of innovation partnerships, the value to be taken into consideration shall be the maximum estimated value net of VAT of the research and development activities to take place during the all stages of the envisaged partnership as well as of the supplies, services or works to be developed and procured at the end of the envisaged partnership.
6. With regard to public works contracts, calculation of the estimated value shall take account of both the cost of the works and the total estimated value of the supplies and services that are made available to the contractor by the contracting authorities provided that they are necessary for executing the works.
7. Where a proposed work or purchase of services may result in contracts being awarded at the same time in the form of separate lots, account shall be taken of the total estimated value of all such lots.

Where the aggregate value of the lots is equal to or exceeds the threshold laid down in Article 4, this Directive shall apply to the awarding of each lot.

8. Where a proposal for the acquisition of similar supplies may result in contracts being awarded at the same time in the form of separate lots, account shall be taken of the total estimated value of all such lots when applying Article 4(b) and (c).

Where the aggregate value of the lots is equal to or exceeds the threshold laid down in Article 4, this Directive shall apply to the awarding of each lot.

9. Contracting authorities may award contracts for individual lots without applying the procedures provided for under this Directive, provided that the estimated value net of VAT of the lot concerned is less than EUR 80 000 for supplies or services or EUR 1 million for works. However, the aggregate value of the lots thus awarded without applying this Directive shall not exceed 20% of the aggregate value of all the lots into which the proposed work, the proposed acquisition of similar supplies or the proposed purchase of services has been divided.

10. In the case of public supply or service contracts which are regular in nature or which are intended to be renewed within a given period, the calculation of the estimated contract value shall be based on the following:

- (a) either the total actual value of the successive contracts of the same type awarded during the preceding 12 months or financial year adjusted, where possible, to take account of the changes in quantity or value which would occur in the course of the 12 months following the initial contract;

- (b) or the total estimated value of the successive contracts awarded during the 12 months following the first delivery, or during the financial year where that is longer than 12 months.

11. With regard to public supply contracts relating to the leasing, hire, rental or hire purchase of products, the value to be taken as a basis for calculating the estimated contract value shall be as follows:

- (a) in the case of fixed-term public contracts, where that term is less than or equal to 12 months, the total estimated value for the term of the contract or, where

the term of the contract is greater than 12 months, the total value including the estimated residual value;

- (b) in the case of public contracts without a fixed term or the term of which cannot be defined, the monthly value multiplied by 48.
12. With regard to public service contracts, the basis for calculating the estimated contract value shall, where appropriate, be the following:
- (a) insurance services: the premium payable and other forms of remuneration;
  - (b) banking and other financial services: the fees, commissions, interest and other forms of remuneration;
  - (c) design contracts: fees, commission payable and other forms of remuneration.
13. With regard to public service contracts which do not indicate a total price, the basis for calculating the estimated contract value shall be the following:
- (a) in the case of fixed-term contracts, where that term is less than or equal to 48 months: the total value for their full term;
  - (b) in the case of contracts without a fixed term or with a term greater than 48 months: the monthly value multiplied by 48.

#### *Article 6* *Revision of the thresholds*

1. Every two years from 30 June 2014, the Commission shall verify that the thresholds set out in points (a), (b) and (c) of Article 4 correspond to the thresholds established in the Government Procurement Agreement and shall, where necessary, revise them.

In accordance with the calculation method set out in the Government Procurement Agreement, the Commission shall calculate the value of these thresholds on the basis of the average daily value of the euro in terms of the special drawing rights (SDRs), over a period of 24 months terminating on the last day of August preceding the revision with effect from 1 January. The value of the thresholds thus revised shall, where necessary, be rounded down to the nearest thousand euros so as to ensure that the thresholds in force provided for by the Agreement, expressed in SDRs, are observed.

2. When carrying out the revision pursuant to paragraph 1 of this Article, the Commission shall, in addition, revise:
- (a) the threshold established in point (a) of the first paragraph of Article 12 by aligning it with the revised threshold applying to public works contracts;
  - (b) the threshold established in point (b) of the first paragraph of Article 12 by aligning it with the revised threshold applying to public service contracts awarded by sub-central contracting authorities.

3. Every two years from 1 January 2014, the Commission shall determine the values, in the national currencies of the Member States which are not participating in monetary union, of the thresholds referred to in points (a), (b) and (c) of Article 4, revised pursuant to paragraph 1 of this Article.

At the same time, the Commission shall determine the value, in the national currencies of the Member States which are not participating in monetary union, of the threshold referred to in point (d) of Article 4.

In accordance with the calculation method set out in the Government Procurement Agreement, the determination of such value shall be based on the average daily values of those currencies corresponding to the applicable threshold expressed in euros over the 24 months terminating on the last day of August preceding the revision with effect from 1 January.

4. The revised thresholds referred to in paragraph 1 and their corresponding values in the national currencies referred to in paragraph 3 shall be published by the Commission in the *Official Journal of the European Union* at the beginning of the month of November following their revision.
5. The Commission shall be empowered to adopt delegated acts in accordance with Article 89 to adapt the methodology set out in the second subparagraph of paragraph 1 to any change in the methodology provided in the Government Procurement Agreement for the revision of the thresholds referred to in points (a), (b) and (c) of Article 4 and for the determination of the thresholds in the national currencies of the Member States not participating in monetary union, as referred to in paragraph 3 of this Article.

It shall also be empowered to adopt delegated acts in accordance with Article 89 to revise the thresholds referred to in points (a), (b) and (c) of Article 4 pursuant to paragraph 1 of this Article. It shall also be empowered to adopt delegated acts in accordance with Article 89 to revise the thresholds referred to in points (a) and (b) of the first paragraph of Article 12 pursuant to paragraph 2 of this Article.

6. Where it is necessary to revise the thresholds referred to in points (a), (b) and (c) of Article 4 and the thresholds referred to in points (a) and (b) of the first paragraph of Article 12 and time constraints prevent the use of the procedure set in article 89 and therefore imperative grounds of urgency so require, the procedure provided for in Article 90 shall apply to delegated acts adopted pursuant to the second subparagraph of paragraph 5 of this Article.

### **SECTION 3** **EXCLUSIONS**

#### *Article 7*

#### *Contracts in the water, energy, transport and postal services sectors*

This Directive shall not apply to public contracts and design contests which, under [Directive replacing 2004/17/EC], are awarded or organised by contracting authorities exercising one or

more of the activities referred to in Articles [5 to 11] of that Directive and are awarded for the pursuit of those activities, or to public contracts excluded from the scope of that Directive under [Articles 15, 20 and 27] thereof.

#### *Article 8*

##### *Specific exclusions in the field of electronic communications*

This Directive shall not apply to public contracts and design contests for the principal purpose of permitting the contracting authorities to provide or exploit public communications networks or to provide to the public one or more electronic communications services.

For the purposes of this Article:

- (a) 'public communications network' means an electronic communications network used wholly or mainly for the provision of electronic communications services available to the public which support the transfer of information between network termination points;
- (b) 'electronic communications network' means transmission systems and, where applicable, switching or routing equipment and other resources, including network elements which are not active, which permit the conveyance of signals by wire, radio, optical or other electromagnetic means, including satellite networks, fixed (circuit and packet-switched, including Internet) and mobile terrestrial networks, electricity cable systems, to the extent that they are used for the purpose of transmitting signals, networks used for radio and television broadcasting, and cable television networks, irrespective of the type of information conveyed;
- (c) a 'network termination point' (NTP) means the physical point at which a subscriber is provided with access to a public communications network; in the case of networks involving switching or routing, the NTP is identified by means of a specific network address, which may be linked to a subscriber number or name;
- (d) 'electronic communications services' means a service normally provided for remuneration which consists wholly or mainly in the conveyance of signals on electronic communications networks, including telecommunications services and transmission services in networks used for broadcasting, but exclude services providing, or exercising editorial control over, content transmitted using electronic communications networks and services; it does not include information society services, as defined in Article 1 of Directive 98/34/EC, which do not consist wholly or mainly in the conveyance of signals on electronic communications networks.

#### *Article 9*

##### *Contracts awarded and design contests organised pursuant to international rules*

This Directive shall not apply to public contracts and design contests which the contracting authority is obliged to award or organise in accordance with procurement procedures different from those of this Directive established by any of the following:

- (a) an international agreement concluded in conformity with the Treaty between a Member State and one or more third countries and covering works, supplies or

services intended for the joint implementation or exploitation of a project by the signatory States;

- (b) an international agreement relating to the stationing of troops and concerning the undertakings of a Member State or a third country;
- (c) a particular procedure of an international organisation;
- (d) procurement rules provided by an international organisation or international financing institution for public contracts and design contests fully financed by this organisation or institution; in the case of public contracts and design contests co-financed to a considerable extent by an international organisation or international financing institution the parties shall agree on applicable procurement procedures, which shall be in conformity with the Treaty.

All agreements referred to in point (a) of the first subparagraph shall be communicated to the Commission, which may consult the Advisory Committee for Public Contracts referred to in Article 91.

*Article 10*  
*Specific exclusions for service contracts*

This Directive shall not apply to public service contracts for:

- (a) the acquisition or rental, by whatever financial means, of land, existing buildings or other immovable property or concerning rights thereon; however, financial service contracts concluded at the same time as, before or after the contract of acquisition or rental, in whatever form, shall be subject to this Directive;
- (b) the acquisition, development, production or co-production of programme material intended for audiovisual media services, that are awarded by broadcasters, or contracts for broadcasting time that are awarded to audiovisual media service providers;
- (c) arbitration and conciliation services;
- (d) financial services in connection with the issue, sale, purchase or transfer of securities or other financial instruments within the meaning of Directive 2004/39/EC of the European Parliament and of the Council<sup>27</sup>, central bank services and operations conducted with the European Financial Stability Facility;
- (e) employment contracts;
- (f) public passenger transport services by rail or metro.

The audiovisual media services referred to in point (b) of the first paragraph shall include any transmission and distribution using any form of electronic network.

---

<sup>27</sup> OJ L 145, 30.4.2004, p. 1.

*Article 11*  
*Relations between public authorities*

1. A contract awarded by a contracting authority to another legal person shall fall outside the scope of this Directive where the following cumulative conditions are fulfilled:
  - (a) the contracting authority exercises over the legal person concerned a control which is similar to that which it exercises over its own departments.
  - (b) at least 90% of the activities of that legal person are carried out for the controlling contracting authority or for other legal persons controlled by that contracting authority;
  - (c) there is no private participation in the controlled legal person.

A contracting authority shall be deemed to exercise over a legal person a control similar to that which it exercises over its own departments within the meaning of point (a) of the first subparagraph where it exercises a decisive influence over both strategic objectives and significant decisions of the controlled legal person.

2. Paragraph 1 also applies where a controlled entity which is a contracting authority awards a contract to its controlling entity, or to another legal person controlled by the same contracting authority, provided that there is no private participation in the legal person being awarded the public contract.
3. A contracting authority, which does not exercise over a legal person control within the meaning of paragraph 1, may nevertheless award a public contract without applying this Directive to a legal person which it controls jointly with other contracting authorities, where the following conditions are fulfilled:
  - (a) the contracting authorities exercise jointly over the legal person a control which is similar to that which they exercise over their own departments;
  - (b) at least 90% of the activities of that legal person are carried out for the controlling contracting authorities or other legal persons controlled by the same contracting authorities;
  - (c) there is no private participation in the controlled legal person.

For the purposes of point (a), contracting authorities shall be deemed to jointly control a legal person where the following cumulative conditions are fulfilled:

- (a) the decision-making bodies of the controlled legal person are composed of representatives of all participating contracting authorities;
- (b) those contracting authorities are able to jointly exert decisive influence over the strategic objectives and significant decisions of the controlled legal person;
- (c) the controlled legal person does not pursue any interests which are distinct from that of the public authorities affiliated to it;

- (d) the controlled legal person does not draw any gains other than the reimbursement of actual costs from the public contracts with the contracting authorities.
4. An agreement concluded between two or more contracting authorities shall not be deemed to be a public contract within the meaning of Article 2(6) of this Directive where the following cumulative conditions are fulfilled:
- (a) the agreement establishes a genuine cooperation between the participating contracting authorities aimed at carrying out jointly their public service tasks and involving mutual rights and obligations of the parties;
  - (b) the agreement is governed only by considerations relating to the public interest;
  - (c) the participating contracting authorities do not perform on the open market more than 10 % in terms of turnover of the activities which are relevant in the context of the agreement;
  - (d) the agreement does not involve financial transfers between the participating contracting authorities, other than those corresponding to the reimbursement of actual costs of the works, services or supplies;
  - (e) there is no private participation in any of the contracting authorities involved.
5. The absence of private participation referred to in paragraphs 1 to 4 shall be verified at the time of the award of the contract or of the conclusion of the agreement.

The exclusions provided for in paragraphs 1 to 4 shall cease to apply from the moment any private participation takes place, with the effect that ongoing contracts need to be opened to competition through regular procurement procedures.

## **SECTION 4**

### **SPECIFIC SITUATIONS**

#### *Article 12*

##### *Contracts subsidised by contracting authorities*

This Directive shall apply to the awarding of the following contracts:

- (a) works contracts which are subsidised directly by contracting authorities by more than 50 % and the estimated value of which, net of VAT, is equal to or greater than EUR 5 000 000, where those contracts involve one of the following activities:
  - (i) civil engineering activities within the meaning of Annex II,
  - (ii) building work for hospitals, facilities intended for sports, recreation and leisure, school and university buildings and buildings used for administrative purposes;

- (b) service contracts which are subsidised directly by contracting authorities by more than 50% and the estimated value of which, net of VAT, is equal to or greater than EUR 200000 and which are connected to a works contract within the meaning of point (a).

The contracting authorities providing the subsidies referred to in points (a) and (b) of the first subparagraph shall ensure compliance with this Directive where they do not award themselves the subsidised contracts or where they award that contract for and on behalf of other entities.

### *Article 13* *Research and development services*

1. This Directive shall apply to public service contracts for research and development services with CPV reference numbers 73000000-2 to 73436000-7, except 73200000-4, 73210000-7 or 73220000-0, provided that the following conditions are both fulfilled:
  - (a) the benefits accrue exclusively to the contracting authority for its use in the conduct of its own affairs,
  - (b) the service provided is wholly remunerated by the contracting authority.

This Directive shall not apply to public service contracts for research and development services with CPV reference numbers 73000000-2 to 73436000-7, except 73200000-4, 73210000-7 or 73220000-0 where one of the conditions referred to in points (a) or (b) of the first subparagraph is not met.

2. The Commission shall be empowered to adopt delegated acts in accordance with Article 89 to amend the CPV reference numbers referred to in paragraph 1 to reflect changes in the CPV nomenclature provided that such amendments do not imply a modification of the scope of this Directive.

### *Article 14* *Defence and security*

1. Subject to Article 346 of the Treaty on the Functioning of the European Union, this Directive shall apply to the awarding of public contracts and to design contests organised in the fields of defence and security, with the exception of the following contracts:
  - (a) contracts falling within the scope of Directive 2009/81/EC;
  - (b) contracts to which Directive 2009/81/EC does not apply pursuant to Articles 8, 12 and 13 thereof.
2. This Directive shall not apply to public contracts and design contests other than those referred to in paragraph 1 to the extent that the protection of the essential security interests of a Member State cannot be guaranteed in a procurement procedure as provided for in this Directive.

## CHAPTER II

### *General rules*

#### *Article 15*

##### *Principles of procurement*

Contracting authorities shall treat economic operators equally and without discrimination and shall act in a transparent and proportionate way.

The design of the procurement shall not be made with the objective of excluding it from the scope of this Directive or of artificially narrowing competition.

#### *Article 16*

##### *Economic operators*

1. Economic operators that, under the law of the Member State in which they are established, are entitled to provide the relevant service, shall not be rejected solely on the ground that, under the law of the Member State in which the contract is awarded, they would be required to be either natural or legal persons.

However, in the case of public service and public works contracts as well as public supply contracts covering in addition services or siting and installation operations, legal persons may be required to indicate, in the tender or the request to participate, the names and relevant professional qualifications of the staff to be responsible for the performance of the contract in question.

2. Groups of economic operators may submit tenders or put themselves forward as candidates. Contracting authorities shall not establish specific conditions for participation of such groups in procurement procedures which are not imposed on individual candidates. In order to submit a tender or a request to participate, those groups shall not be required by the contracting authorities to assume a specific legal form.

Contracting authorities may establish specific conditions for the performance of the contract by a group, provided that those conditions are justified by objective reasons and proportionate. Those conditions may require a group to assume a specific legal form once it has been awarded the contract, to the extent that this change is necessary for the satisfactory performance of the contract.

#### *Article 17*

##### *Reserved contracts*

Member States may reserve the right to participate in public procurement procedures to sheltered workshops and economic operators whose main aim is the social and professional integration of disabled and disadvantaged workers or provide for such contracts to be performed in the context of sheltered employment programmes, provided that more than 30%

of the employees of those workshops, economic operators or programmes are disabled or disadvantaged workers.

The call for competition shall make reference to this provision.

*Article 18*  
*Confidentiality*

1. Unless otherwise provided in this Directive or in the national law concerning access to information, and without prejudice to the obligations relating to the advertising of awarded contracts and to the information to candidates and tenderers set out in Articles 48 and 53 of this Directive, the contracting authority shall not disclose information forwarded to it by economic operators which they have designated as confidential, including, but not limited to, technical or trade secrets and the confidential aspects of tenders.
2. Contracting authorities may impose on economic operators requirements aimed at protecting the confidential nature of information which the contracting authorities make available throughout the procurement procedure.

*Article 19*  
*Rules applicable to communication*

1. Except where use of electronic means is mandatory pursuant to Articles 32, 33, 34, 35(4), 49(2) or 51 of this Directive, contracting authorities may choose between the following means of communication for all communication and information exchange:
  - (a) electronic means in accordance with paragraphs 3, 4 and 5;
  - (b) post or fax;
  - (c) telephone in the cases and circumstances referred to in paragraph 6;
  - (d) a combination of those means.

Member States may make mandatory the use of electronic means of communication in other situations than those provided for in Articles 32, 33, 34, 35(2), 49(2) or 51 of this Directive.

2. The means of communication chosen must be generally available and not restrict economic operators' access to the procurement procedure.

In all communication, exchange and storage of information, contracting authorities shall ensure that the integrity of data and the confidentiality of tenders and requests to participate are preserved. They shall examine the content of tenders and requests to participate only after the time limit set for submitting them has expired.

3. The tools to be used for communicating by electronic means, as well as their technical characteristics, shall be non-discriminatory, generally available and

interoperable with the information and communication technology products in general use and shall not restrict economic operators' access to the procurement procedure. The technical details and characteristics of the devices for the electronic receipts to be deemed in compliance with the first subparagraph of this paragraph are set out in Annex IV.

The Commission shall be empowered to adopt delegated acts in accordance with Article 89 to amend the technical details and characteristics set out in Annex IV due to technical developments or administrative reasons.

To ensure the interoperability of technical formats as well as of process and messaging standards, especially in a cross-border context, the Commission shall be empowered to adopt delegated acts in accordance with Article 89 to establish the mandatory use of specific technical standards, at least with regard to the use of e-submission, electronic catalogues and means for electronic authentication.

4. Contracting authorities may, where necessary, require the use of tools which are not generally available, provided that they offer alternative means of access.

Contracting authorities shall be deemed to offer suitable alternative means of access in any of the following situations:

- (a) They offer unrestricted and full direct access by electronic means to these tools from the date of publication of the notice in accordance with Annex IX or from the date when the invitation to confirm interest is sent; the text of the notice or the invitation to confirm interest shall specify the internet address at which these tools are accessible;
  - (b) ensure that tenderers established in other Member States than the contracting authority's may access the procurement procedure through the use of provisional tokens made available online at no extra cost;
  - (c) support an alternative channel for electronic submission of tenders.
5. The following rules shall apply to devices for the electronic transmission and receipt of tenders and for the electronic receipt of requests to participate:
  - (a) information on specifications for the electronic submission of tenders and requests to participate, including encryption and time-stamping, shall be available to interested parties;
  - (b) devices, methods for authentication and electronic signatures shall comply with the requirements of Annex IV;
  - (c) contracting authorities shall specify the level of security required for the electronic means of communication in the various stages of the specific procurement procedure; the level shall be proportionate to the risks attached;

- (d) where advanced Electronic Signatures as defined by Directive 1999/93/EC of the European Parliament and of the Council<sup>28</sup> are required, contracting authorities shall, as long as the signature is valid, accept signatures supported by a qualified electronic certificate referred to in the Trusted List provided for in the Commission Decision 2009/767/EC<sup>29</sup>, created with or without a secure signature creation device, subject to compliance with the following conditions:
  - (i) they must establish the required advanced signature format on the basis of formats established in Commission Decision 2011/130/EU<sup>30</sup> and put in place necessary measures to be able to process these formats technically;
  - (ii) where a tender is signed with the support of a qualified certificate that is included in the Trusted list, they must not apply additional requirements that may hinder the use of those signatures by tenderers.

6. The following rules shall apply to the transmission of requests to participate:

- (a) requests to participate in procedures for the award of public contracts may be made in writing or by telephone; in the latter case, a written confirmation must be sent before expiry of the time limit set for their receipt;
- (b) contracting authorities may require that requests for participation made by fax must be confirmed by post or by electronic means, where this is necessary for the purposes of legal proof.

For the purposes of point (b), the contracting authority shall indicate in the contract notice or in the invitation to confirm interest that it requires requests to participate made by fax to be confirmed by post or by electronic means and the time limit for sending such confirmation.

7. Member States shall ensure that, at the latest 2 years after the date provided for in Article 92(1), all procurement procedures under this Directive are performed using electronic means of communication, in particular e-submission, in accordance with the requirements of this Article.

This obligation shall not apply where the use of electronic means would require specialised tools or file formats that are not generally available in all the Member States within the meaning of paragraph 3. It is the responsibility of the contracting authorities using other means of communication for submission of tenders to demonstrate in the procurement documents that the use of electronic means, due to the particular nature of the information to be exchanged with the economic operators, would require specialised tools or file formats that are not generally available in all the Member States.

Contracting authorities shall be deemed to have legitimate reasons not to request electronic means of communication in the submission process in the following cases:

---

<sup>28</sup> OJ L 13, 19.1.2000, p. 12.

<sup>29</sup> OJ L 274, 20.10.2009, p. 36.

<sup>30</sup> OJ L 53, 26.2.2011, p. 66.

- (a) the description of the technical specifications, due to the specialised nature of the procurement, cannot be rendered using file formats that are generally supported by commonly used applications;
  - (b) the applications supporting file formats that are suitable for the description of the technical specifications are under a proprietary licensing schema and cannot be made available for downloading or remote use by the contracting authority;
  - (c) the applications supporting file formats that are suitable for the description of the technical specifications use file formats that cannot be handled by any other open or downloadable applications.
8. Contracting authorities may use the data processed electronically for public procurement procedures in order to prevent, detect and correct errors occurring at each stage by developing appropriate tools.

*Article 20*  
*Nomenclatures*

1. Any references to nomenclatures in the context of public procurement shall be made using the ‘Common Procurement Vocabulary (CPV)’ as adopted by Regulation (EC) No 2195/2002<sup>31</sup>.
2. The Commission shall be empowered to adopt delegated acts in accordance with Article 89 to adapt the reference numbers used in Annex II and XVI, whenever changes in the CPV nomenclature must be reflected in this Directive and they do not imply a modification of the scope of this Directive.

*Article 21*  
*Conflicts of interests*

1. Member States shall provide for rules to effectively prevent, identify and immediately remedy conflicts of interests arising in the conduct of procurement procedures that are subject to this Directive, including the design and preparation of the procedure, the drawing-up of the procurement documents, the selection of candidates and tenderers and the award of the contract, so as to avoid any distortion of competition and ensure equal treatment of all tenderers.

The notion of conflict of interests shall at least cover any situation where the categories of persons referred to in paragraph 2 have, directly or indirectly, a private interest in the outcome of the procurement procedure, which may be perceived to impair the impartial and objective performance of their duties.

For the purposes of this Article, ‘private interests’ means any family, emotional life, economic, political or other shared interests with the candidates or the tenderers, including conflicting professional interests.

---

<sup>31</sup> OJ L 340, 16.12.2002, p. 1.

2. The rules referred to in paragraph 1 shall apply to conflicts of interests involving at least the following categories of persons:
  - (a) staff members of the contracting authority, procurement service providers or staff members of other service providers who are involved in the conduct of the procurement procedure;
  - (b) the chairperson of the contracting authority and members of decision-making bodies of the contracting authority who, without necessarily being involved in the conduct of the procurement procedure, may nevertheless influence the outcome of that procedure.
3. Member States shall ensure in particular:
  - (a) that staff members referred to in paragraph 2(a) are required to disclose any conflict of interests in relation to any of the candidates or tenderers, as soon as they become aware of such conflicts, in order to enable the contracting authority to take remedial action;
  - (b) that candidates and tenderers are required to submit at the beginning of the procurement procedure a declaration on the existence of any privileged links with the persons referred to in paragraph 2(b), which are likely to place those persons in a situation of conflict of interests; the contracting authority shall indicate in the individual report referred to in Article 85 whether any candidate or tenderer has submitted a declaration.

In the event of a conflict of interests, the contracting authority shall take appropriate measures. Those measures may include the recusal of the staff member in question from involvement in the affected procurement procedure or the re-assignment of the staff member's duties and responsibilities. Where a conflict of interests cannot be effectively remedied by other means, the candidate or tenderer concerned shall be excluded from the procedure.

Where privileged links are identified, the contracting authority shall immediately inform the oversight body designated in accordance with Article 84 and take appropriate measures to avoid any undue influence on the award process and ensure equal treatment of candidates and tenderers. Where the conflict of interests cannot be effectively remedied by other means, the candidate or tenderer concerned shall be excluded from the procedure.

4. All measures taken pursuant to this Article shall be documented in the individual report referred to in Article 85.

#### *Article 22* *Illicit conduct*

Candidates shall be required at the beginning of the procedure to provide a declaration on honour that they have not undertaken and will not undertake to:

- (a) unduly influence the decision-making process of the contracting authority or obtain confidential information that may confer upon them undue advantages in the procurement procedure;
- (b) enter into agreements with other candidates and tenderers aimed at distorting competition;
- (c) deliberately provide misleading information that may have a material influence on decisions concerning exclusion, selection or award.

# TITLE II

## RULES ON PUBLIC CONTRACTS

### CHAPTER I

#### *Procedures*

##### *Article 23*

##### *Conditions relating to the Government Procurement Agreement and other international agreements*

1. As far as covered by Annexes I, II, IV and V and the General Notes to the European Union's Appendix 1 to the Government Procurement Agreement and by the other international agreements by which the Union is bound, as listed in Annex V to this Directive, contracting authorities shall accord to the works, supplies, services and economic operators of the signatories to those agreements treatment no less favourable than the treatment accorded to the works, supplies, services and economic operators of the Union. By applying this Directive to economic operators of the signatories to those agreements, contracting authorities shall comply with those agreements.
2. The Commission shall be empowered to adopt delegated acts in accordance with Article 89 to amend the list in Annex V, where necessary due to the conclusion of new international agreements or modification of existing international agreements.

##### *Article 24*

##### *Choice of procedures*

1. In awarding their public contracts, contracting authorities shall apply the national procedures adjusted to be in conformity with this Directive, provided that, without prejudice to Article 30, a call for competition has been published in accordance with this Directive.

Member States shall provide that contracting authorities may apply open or restricted procedures as regulated in this Directive.

Member States may provide that contracting authorities may apply innovation partnerships as regulated in this Directive.

They may also provide that contracting authorities may use a competitive procedure with negotiation or a competitive dialogue in any of the following cases:

- (a) with regard to works, where the works contract has as its object both the design and the execution of works within the meaning of Article 2(8) or where negotiations are needed to establish the legal or financial makeup of the project;

- (b) in respect of public works contracts, for works which are performed solely for purposes of research or innovation, testing or development and not with the aim of ensuring profitability or recovering research and development costs;
- (c) with regard to services or supplies, where the technical specifications cannot be established with sufficient precision with reference to any of the standards, European technical approvals, Common technical specifications or technical references within the meaning of points 2 to 5 of Annex VIII;
- (d) in the event of irregular or unacceptable tenders within the meaning of Article 30(2)(a) in response to an open or a restricted procedure;
- (e) due to specific circumstances related to the nature or the complexity of the works, supplies or services or the risks attaching thereto, the contract cannot be awarded without prior negotiations.

Member States may decide not to transpose into their national law the competitive procedure with negotiation, the competitive dialogue and the innovation partnership procedures.

2. The call for competition may be made by one of the following means:

- (a) a contract notice pursuant to Article 47,
- (b) where the contract is awarded by restricted or competitive procedure with negotiation by a sub-central contracting authority, by means of a prior information notice pursuant to Article 46(2).

In the case referred to in point (b), economic operators having expressed their interest following the publication of the prior information notice shall subsequently be invited to confirm their interest in writing by means of an 'invitation to confirm interest' in conformity with Article 52.

3. Member States may provide that contracting authorities may apply a negotiated procedure without prior publication only in the specific cases and circumstances referred to expressly in Article 30.

#### *Article 25* *Open procedure*

1. In open procedures, any interested economic operator may submit a tender in response to a call for competition.

The minimum time limit for the receipt of tenders shall be 40 days from the date on which the contract notice was sent.

The tender shall be accompanied by the requested information for qualitative selection.

2. Where contracting authorities have published a prior information notice which is not used as a means of calling for competition, the minimum time limit for the receipt of

tenders, as laid down in the second subparagraph of paragraph 1 of this Article, may be shortened to 20 days, provided that both of the following conditions are fulfilled:

- (a) the prior information notice has included all the information required for the contract notice in section I of part B of Annex VI, insofar as that information is available at the time the prior information notice is published;
  - (b) it was sent for publication between 45 days and 12 months before the date on which the contract notice was sent.
3. Where a state of urgency duly substantiated by the contracting authorities renders impracticable the time limit laid down in the second subparagraph of paragraph 1, they may fix a time limit which shall be not less than 20 days from the date on which the contract notice was sent.
  4. The contracting authority may reduce by five days the time limit for receipt of tenders set out in the second subparagraph of paragraph 1 where it accepts that tenders may be submitted by electronic means in accordance with Article 19(3), (4) and (5).

*Article 26*  
*Restricted procedure*

1. In restricted procedures any economic operator may submit a request to participate in response to a call for competition by providing the requested information for qualitative selection.

The minimum time limit for receipt of requests to participate shall be 30 days from the date on which the contract notice or, where a prior information notice is used as a means of calling for competition, the invitation to confirm interest is sent.

2. Only those economic operators invited by the contracting authority following their assessment of the requested information may submit a tender. Contracting authorities may limit the number of suitable candidates to be invited to participate in the procedure in accordance with Article 64.

The minimum time limit for the receipt of tenders shall be 35 days from the date on which the invitation to tender is sent.

3. Where contracting authorities have published a prior information notice which is not used as a means of calling for competition, the minimum time limit for the receipt of tenders as laid down in the second subparagraph of paragraph 2 of this Article may be shortened to 15 days, provided that all of the following conditions are fulfilled:
  - (a) the prior information notice has included all the information required for the contract notice in section I of part B of Annex VI, insofar as that information is available at the time the prior information notice is published;
  - (b) it was sent for publication between 45 days and 12 months before the date on which the contract notice was sent.

4. Sub-central contracting authorities may set the time limit for the receipt of tenders by mutual agreement between the contracting authority and the selected candidates, provided that all candidates have the same time to prepare and submit their tenders. Where it is not possible to reach agreement on the time limit for the receipt of tenders, the contracting authority shall fix a time limit which shall be at least 10 days from the date of the invitation to tender.
5. The time limit for receipt of tenders provided for in paragraph 2 may be reduced by five days where the contracting authority accepts that tenders may be submitted by electronic means in conformity with Article 19(3), (4) and (5).
6. Where a state of urgency duly substantiated by the contracting authorities renders impracticable the time limits laid down in this Article, they may fix:
  - (a) a time limit for the receipt of requests to participate which shall not be less than 15 days from the date on which the contract notice was sent;
  - (b) a time limit for the receipt of tenders which shall be not less than 10 days from the date on which the invitation to tender is sent.

#### *Article 27*

#### *Competitive procedure with negotiation*

1. In competitive procedures with negotiation, any economic operator may submit a request to participate in response to a call for competition by providing the requested information for qualitative selection.

In the contract notice or in the invitation to confirm interest contracting authorities shall describe the procurement and the minimum requirements to be met and specify the award criteria so as to enable economic operators to identify the nature and scope of the procurement and decide whether to request to participate in the negotiations. In the technical specifications, contracting authorities shall specify which parts thereof define the the minimum requirements.

The minimum time limit for receipt of requests to participate shall be 30 days from the date on which the contract notice or, where a prior information notice is used as a means of calling for competition, the invitation to confirm interest is sent; the minimum time limit for the receipt of tenders shall be 30 days from the date on which the invitation is sent. Article 26 (3) to (6) shall apply.

2. Only those economic operators invited by the contracting authority following their assessment of the requested information may submit a written tender which shall be the basis for the subsequent negotiations. Contracting authorities may limit the number of suitable candidates to be invited to participate in the procedure in accordance with Article 64.
3. Contracting authorities shall negotiate with tenderers the tenders submitted by them to improve the content of the offers in order to better correspond to the award criteria and minimum requirements referred to in the second subparagraph of paragraph 1.

The following shall not be changed in the course of the negotiations:

- (a) the description of the procurement;
  - (b) the part of the technical specifications which define the minimum requirements;
  - (c) the award criteria.
4. During the negotiations, contracting authorities shall ensure the equal treatment of all tenderers. To that end, they shall not provide information in a discriminatory manner which may give some tenderers an advantage over others. They shall take particular care to ensure that all tenderers, whose tenders have not been eliminated pursuant to paragraph 5, are informed in writing of any changes to the technical specifications other than those setting out the minimum requirements, in adequate time to allow such tenderers to modify and re-submit amended tenders following these changes, as appropriate.

Contracting authorities shall not reveal to the other participants solutions proposed or other confidential information communicated by a candidate participating in the negotiations without its agreement. Such agreement shall not take the form of a general waiver but shall be given with reference to the intended communication of specific solutions or other confidential information.

5. Competitive procedures with negotiation may take place in successive stages in order to reduce the number of tenders to be negotiated by applying the award criteria specified in the contract notice, in the invitation to confirm interest or in the procurement documents. In the contract notice, the invitation to confirm interest or the procurement documents, the contracting authority shall indicate whether it will use this option.
6. Where the contracting authority intends to conclude the negotiations, it shall inform the remaining tenderers and set a common deadline to submit any new or revised tenders. They shall assess the tenders as negotiated on the basis of the initially indicated award criteria and award the contract in accordance with Articles 66 to 69.

#### *Article 28* *Competitive dialogue*

1. In competitive dialogues, any economic operator may submit a request to participate in response to a call for competition by providing the requested information for qualitative selection.

The minimum time limit for receipt of requests to participate shall be 30 days from the date on which the contract notice is sent.

Only those economic operators invited by the contracting authority following the assessment of the requested information may participate in the dialogue. Contracting authorities may limit the number of suitable candidates to be invited to participate in the procedure in accordance with Article 64. The contract shall be awarded on the sole basis of the award criterion of the most economically advantageous tender in accordance with Article 66(1)(a).

2. Contracting authorities shall set out their needs and requirements in the contract notice and they shall define these needs and requirements in the notice and/or in a descriptive document. At the same time and in the same documents, they shall also set out and define the chosen award criteria.
3. Contracting authorities shall open, with the candidates selected in accordance with the relevant provisions of Articles 54 to 65, a dialogue the aim of which shall be to identify and define the means best suited to satisfying their needs. They may discuss all aspects of the contract with the chosen candidates during this dialogue.

During the dialogue, contracting authorities shall ensure equality of treatment among all tenderers. To that end, they shall not provide information in a discriminatory manner which may give some tenderers an advantage over others.

Contracting authorities shall not reveal to the other participants solutions proposed or other confidential information communicated by a candidate participating in the dialogue without its agreement. Such agreement shall not take the form of a general waiver but shall be given with reference to the intended communication of specific solutions or other specific confidential information.

4. Competitive dialogues may take place in successive stages in order to reduce the number of solutions to be discussed during the dialogue stage by applying the award criteria defined in the contract notice or in the descriptive document. In the contract notice or the descriptive document, the contracting authority shall indicate whether it will use this option.
5. The contracting authority shall continue the dialogue until it can identify the solution or solutions which are capable of meeting its needs.
6. Having declared that the dialogue is concluded and having so informed the participants, contracting authorities shall ask them to submit their final tenders on the basis of the solution or solutions presented and specified during the dialogue. Those tenders shall contain all the elements required and necessary for the performance of the project.
7. Contracting authorities shall assess the tenders received on the basis of the award criteria laid down in the contract notice or in the descriptive document.

Where necessary, in order to finalise financial commitments or other terms of the contract, the contracting authority may negotiate the final terms of the contract with the tenderer identified as having submitted the most economically advantageous tender in accordance with Article 66(1)(a) provided such negotiations do not have the effect of modifying essential aspects of the tender or of the public procurement, including the needs and requirements set out in the contract notice or in the descriptive document and does not risk distorting competition or causing discrimination.

8. The contracting authorities may specify prizes or payments to the participants in the dialogue.

*Article 29*  
*Innovation partnership*

1. In innovation partnerships, any economic operator may submit a request to participate in response to a contract notice with a view to establishing a structured partnership for the development of an innovative product, service or works and the subsequent purchase of the resulting supplies, services or works provided that they correspond to the agreed performance levels and costs.
2. The partnership shall be structured in successive stages following the sequence of steps in the research and innovation process, possibly up to the manufacturing of the supply or the provision of the services. It shall provide for intermediate targets to be attained by the partner and provide for payment of the remuneration in appropriate instalments. Based on those targets, the contracting authority may decide after each stage to terminate the partnership and launch a new procurement procedure for the remaining phases, provided that it has acquired the relevant intellectual property rights.
3. The contract shall be awarded in accordance with the rules for a competitive procedure with negotiation set out in Article 27.

In selecting candidates, contracting authorities shall pay particular attention to criteria concerning the tenderers' capacity and experience in the field of research and development and of developing innovative solutions. They may limit the number of suitable candidates to be invited to participate in the procedure in accordance with Article 64.

Only those economic operators invited by the contracting authority following its assessment of the requested information may submit research and innovation projects aimed at meeting the needs identified by the contracting authority that cannot be met by existing solutions. The contract shall be awarded on the sole basis of the award criterion of the most economically advantageous tender in accordance with Article 66(1)(a).

4. The structure of the partnership and, in particular, the duration and value of the different phases shall reflect the degree of innovation of the proposed solution and the sequence of the research and innovation activities required for the development of an innovative solution not yet available on the market. The value and duration of a contract for the purchase of the resulting supply, service or works shall remain within appropriate limits, taking into account the need to recover the costs, including those incurred in developing an innovative solution, and to achieve an adequate profit.

Contracting authorities shall not use innovation partnerships in such a way as to prevent, restrict or distort competition.

*Article 30*  
*Use of the negotiated procedure without prior publication*

1. Member States may provide that contracting authorities may award public contracts by a negotiated procedure without prior publication only in the cases laid down in paragraphs (2) to (5).

2. The negotiated procedure without prior publication may be foreseen for public works contracts, public supply contracts and public service contracts in any of the following cases:

- (a) where no tenders or no suitable tenders or no requests to participate have been submitted in response to an open procedure or a restricted procedure, provided that the initial conditions of the contract are not substantially altered and that a report is sent to the Commission or the national oversight body designated according to Article 84 where they so request.
- (b) where the aim of the procurement is the creation or obtention of a work of art;
- (c) where the works, supplies or services can be supplied only by a particular economic operator for any of the following reasons:
  - (i) the absence of competition for technical reasons;
  - (ii) the protection of patents, copyrights or other intellectual property rights;
  - (iii) the protection of other exclusive rights.

This exception only applies when no reasonable alternative or substitute exists and the absence of competition is not the result of an artificial narrowing down of the parameters of the procurement;

- (d) insofar as is strictly necessary where, for reasons of extreme urgency brought about by force majeure, the time limits for the open, restricted or competitive procedures with negotiation cannot be complied with; the circumstances invoked to justify extreme urgency must not in any event be attributable to the contracting authority;

For the purposes of point (a), a tender shall be considered not to be suitable where:

- it is irregular or unacceptable, and
- it is completely irrelevant to the contract, being incapable of meeting the contracting authority's needs as specified in the procurement documents.

In particular, tenders shall be considered to be irregular, where they do not comply with the procurement documents or where the prices offered are sheltered from normal competitive forces.

In particular, tenders shall be considered to be unacceptable in any of the following cases:

- (a) they have been received late;
- (b) they have been submitted by tenderers that do not have the requisite qualifications;

- (c) their price either exceeds the contracting authority's budget as determined prior to the launching of the procurement procedure; the prior determination of the budget must be documented in writing;
  - (d) they have been found to be abnormally low in accordance with Article 69.
3. The negotiated procedure without prior publication may be foreseen for public supply contracts:
- (a) where the products involved are manufactured purely for the purpose of research, experimentation, study or development; this provision does not extend to quantity production to establish commercial viability or to recover research and development costs;
  - (b) for additional deliveries by the original supplier which are intended either as a partial replacement of normal supplies or installations or as the extension of existing supplies or installations where a change of supplier would oblige the contracting authority to acquire material having different technical characteristics which would result in incompatibility or disproportionate technical difficulties in operation and maintenance; the duration of such contracts as well as that of recurrent contracts shall not, as a general rule, exceed three years;
  - (c) for supplies quoted and purchased on a commodity market or other similar markets such as electricity exchanges;
  - (d) for the purchase of supplies on particularly advantageous terms, from either a supplier which is definitively winding up its business activities, or the liquidator in an insolvency procedure, an arrangement with creditors, or a similar procedure under national laws or regulations.
4. The negotiated procedure without prior publication may be foreseen for public service contracts, where the contract concerned follows a design contest organised in accordance with this Directive and is to be awarded, under the applicable rules, to the winner or one of the winners of the design contest; in the latter case, all winners must be invited to participate in the negotiations.
5. The negotiated procedure without prior publication may be foreseen for new works or services consisting in the repetition of similar works or services entrusted to the economic operator to which the same contracting authorities awarded an original contract, provided that such works or services are in conformity with a basic project for which the original contract was awarded according to a procedure in accordance with Article 24(1). The basic project shall indicate the extent of possible additional works or services and the conditions under which they will be awarded.

As soon as the first project is put up for tender, the possible use of this procedure shall be disclosed and the total estimated cost of subsequent works or services shall be taken into consideration by the contracting authorities when they apply Article 4.

This procedure may be used only during the three years following the conclusion of the original contract.

## **CHAPTER II**

### **Techniques and instruments for electronic and aggregated procurement**

#### *Article 31* *Framework agreements*

1. Contracting authorities may conclude framework agreements, provided that they apply the procedures provided for in this Directive.

A framework agreement means an agreement between one or more contracting authorities and one or more economic operators, the purpose of which is to establish the terms governing contracts to be awarded during a given period, in particular with regard to price and, where appropriate, the quantity envisaged.

The term of a framework agreement shall not exceed four years, save in exceptional cases duly justified, in particular by the subject of the framework agreement.

2. Contracts based on a framework agreement shall be awarded in accordance with the procedures laid down in this paragraph and paragraphs 3 and 4.

Those procedures may be applied only between those contracting authorities clearly identified for this purpose in the call for competition or the invitation to confirm interest and those economic operators originally party to the framework agreement.

Contracts based on a framework agreement may under no circumstances make substantial modifications to the terms laid down in that framework agreement, in particular in the case referred to in paragraph 3.

Contracting authorities shall not use framework agreements improperly or in such a way as to prevent, restrict or distort competition.

3. Where a framework agreement is concluded with a single economic operator, contracts based on that agreement shall be awarded within the limits of the terms laid down in the framework agreement.

For the award of those contracts, contracting authorities may consult the operator party to the framework agreement in writing, requesting it to supplement its tender as necessary.

4. Where a framework agreement is concluded with more than one economic operator, it may be performed in one of the two following ways:

- (a) following the terms and conditions of the framework agreement, without reopening competition, where it sets out all the terms governing the provision of the works, services and supplies concerned and the objective conditions for determining which of the economic operators, party to the framework agreement, shall perform them; the latter conditions shall be indicated in the procurement documents;

- (b) where not all the terms governing the provision of the works, services and supplies are laid down in the framework agreement, through reopening competition amongst the economic operators parties to the framework agreement.
5. The competition referred to in paragraph (4)(b) shall be based on the same terms as applied for the award of the framework agreement and, where necessary, more precisely formulated terms, and, where appropriate, other terms referred to in the specifications of the framework agreement, in accordance with the following procedure:
- (a) for every contract to be awarded, contracting authorities shall consult in writing the economic operators capable of performing the contract;
  - (b) contracting authorities shall fix a time limit which is sufficiently long to allow tenders for each specific contract to be submitted, taking into account factors such as the complexity of the subject-matter of the contract and the time needed to send in tenders;
  - (c) tenders shall be submitted in writing, and their content shall not be opened until the stipulated time limit for reply has expired;
  - (d) contracting authorities shall award each contract to the tenderer that has submitted the best tender on the basis of the award criteria set out in the specifications of the framework agreement.

*Article 32*  
*Dynamic purchasing systems*

1. For commonly used purchases the characteristics of which, as generally available on the market, meet the requirements of the contracting authorities, contracting authorities may use a dynamic purchasing system. The dynamic purchasing system shall be operated as a completely electronic process, open throughout its validity to any economic operator that satisfies the selection criteria.
2. In order to award contracts under a dynamic purchasing system, contracting authorities shall follow the rules of the restricted procedure. All the candidates satisfying the selection criteria shall be admitted to the system; the number of candidates to be admitted to the system shall not be limited in accordance with Article 64. All communications in the context of a dynamic purchasing system shall only be made with electronic means in accordance with Article 19(2) to (6).
3. For the purposes of awarding contracts under a dynamic purchasing system, contracting authorities shall:
  - (a) publish a call for competition making it clear that a dynamic purchasing system is involved;
  - (b) indicate in the specifications at least the nature and estimated quantity of the purchases envisaged, as well as all the necessary information concerning the

purchasing system, the electronic equipment used and the technical connection arrangements and specifications;

(c) offer unrestricted and full direct access, as long as the system is valid, to the specifications and to any additional documents in conformity with Article 51.

4. Contracting authorities shall give any economic operator, throughout the entire duration of the dynamic purchasing system, the possibility of requesting to participate in the system under the conditions referred to in paragraph 2. Contracting authorities shall finalise their assessment of such requests according to the selection criteria within 10 working days following their receipt.

The contracting authority shall inform the economic operator referred to in the first subparagraph at the earliest possible opportunity of whether or not it has been admitted to the dynamic purchasing system.

5. Contracting authorities shall invite all qualified participants to submit a tender for each specific procurement under the dynamic purchasing system, in accordance with Article 52.

They shall award the contract to the tenderer that submitted the best tender on the basis of the award criteria set out in the contract notice for the dynamic purchasing system or, where a prior information notice is used as a means of calling for competition, in the invitation to confirm interest. Those criteria may, where appropriate, be formulated more precisely in the invitation to tender.

6. Contracting authorities shall indicate the duration of the dynamic purchasing system in the call for competition. They shall notify the Commission of any change in duration, using the following standard forms:
  - (a) where the duration is changed without terminating the system, the form used initially for the call for competition for the dynamic purchasing system;
  - (b) where the system is terminated, a contract award notice referred to in Article 48.
7. No charges may be billed to the interested economic operators or to parties to the dynamic purchasing system.

### *Article 33* *Electronic auctions*

1. Contracting authorities may use electronic auctions, in which new prices, revised downwards, and/or new values concerning certain elements of tenders are presented.

For this purpose, contracting authorities shall use a repetitive electronic process (electronic auction), which occurs after an initial full evaluation of the tenders, enabling them to be ranked using automatic evaluation methods.

2. In open, restricted or competitive procedures with negotiation, the contracting authorities may decide that the award of a public contract shall be preceded by an electronic auction when the tender specifications can be established with precision.

In the same circumstances, an electronic auction may be held on the reopening of competition among the parties to a framework agreement as provided for in Article 31(4)(b) and on the opening for competition of contracts to be awarded under the dynamic purchasing system referred to in Article 32.

3. The electronic auction shall be based on one of the the following criteria:
  - (a) solely on prices where the contract is awarded to the tender offering the lowest cost;
  - (b) on prices and/or on the new values of the features of the tenders indicated in the specifications where the contract is awarded to the most economically advantageous tender.
4. Contracting authorities which decide to hold an electronic auction shall state that fact in the contract notice or in the invitation to confirm interest. The specifications shall include at least the information set out in Annex VII.
5. Before proceeding with an electronic auction, contracting authorities shall make a full initial evaluation of the tenders in accordance with the award criterion or criteria and with the weighting fixed for them.

A tender shall be considered admissible where it has been submitted by a qualified tenderer and is in conformity with the technical specifications.

All tenderers that have submitted admissible tenders shall be invited simultaneously by electronic means to participate in the electronic auction using, as of the specified date and time, the connections in accordance with the instructions set out in the invitation. The electronic auction may take place in a number of successive phases. The electronic auction shall not start sooner than two working days after the date on which invitations are sent out.

6. Where the contract is to be awarded on the basis of the most economically advantageous tender, the invitation shall be accompanied by the outcome of a full evaluation of the relevant tenderer, carried out in accordance with the weighting provided for in the first subparagraph of Article 66(5).

The invitation shall also state the mathematical formula to be used in the electronic auction to determine the automatic re-rankings on the basis of the new prices and/or new values submitted. That formula shall incorporate the weighting of all the criteria established to determine the most economically advantageous tender, as indicated in the notice used as a means of calling for competition or in the specifications. For that purpose, any ranges shall, however, be reduced beforehand to a specified value.

Where variants are authorised, a separate formula shall be provided for each variant.

7. Throughout each phase of an electronic auction the contracting authorities shall instantaneously communicate to all tenderers at least sufficient information to enable

them to ascertain their relative rankings at any moment and they may, where this has been previously indicated, communicate other information concerning other prices or values submitted as well as announcing the number of participants in any specific phase of the auction. In no case, however, may they disclose the identities of the tenderers during any phase of an electronic auction.

8. Contracting authorities shall close an electronic auction in one or more of the following manners:
  - (a) at the previously indicated date and time;
  - (b) when they receive no more new prices or new values which meet the requirements concerning minimum differences, provided that they have previously stated the time which they will allow to elapse after receiving the last submission before they close the electronic auction;
  - (c) when the previously indicated number of phases in the auction has been completed.

Where the contracting authorities have decided to close an electronic auction in accordance with point (c), possibly in combination with the arrangements laid down in point (b), the invitation to take part in the auction shall indicate the timetable for each phase of the auction.

9. After closing an electronic auction contracting authorities shall award the contract in accordance with Article 66 on the basis of the results of the electronic auction.

#### *Article 34* *Electronic catalogues*

1. Where contracting authorities require the use of electronic means of communication pursuant to Article 19, they may require tenders to be presented in the format of an electronic catalogue.

Member States may render the use of electronic catalogues mandatory in connection with certain types of procurement.

Tenders presented in the form of an electronic catalogue may be accompanied by other documents, completing the tender.

2. Electronic catalogues shall be established by the candidates or tenderers with a view to participating in a specific procurement procedure in accordance with the technical specifications and format established by the contracting authority.

Furthermore, electronic catalogues shall comply with the requirements for electronic communication tools as well as with any additional requirements set by the contracting authority in accordance with Article 19.

3. Where the presentation of tenders in the form of electronic catalogues is accepted or required, contracting authorities shall:

- (a) state so in the contract notice or in the invitation to confirm interest where a prior information notice is used as a means of calling for competition;
  - (b) indicate in the specifications all the necessary information pursuant to Article 19(5) concerning the format, the electronic equipment used and the technical connection arrangements and specifications for the catalogue.
4. Where a framework agreement has been concluded with more than one economic operator following the submission of tenders in the form of electronic catalogues, contracting authorities may provide that the reopening of competition for specific contracts takes place on the basis of updated catalogues. In such case, contracting authorities shall use one of the following alternative methods:
- (a) invite tenderers to resubmit their electronic catalogues, adapted to the requirements of the specific contract in question;
  - (b) notify tenderers that they intend to collect from the catalogues which have already been submitted the information needed to constitute tenders adapted to the requirements of the specific contract in question (hereinafter ‘punch out’); provided that the use of this method has been announced in the procurement documents for the framework agreement.
5. Where contracting authorities reopen competition for specific contracts in accordance with point (b) of paragraph (4), they shall specify the date and time at which they intend to collect the information needed to constitute tenders adapted to the requirements of the specific contract in question and shall give tenderers the possibility to refuse such collection of information.

Contracting authorities shall allow for an adequate period between the notification and the actual collection of information.

Before awarding the contract, contracting authorities shall present the collected information to the tenderer concerned so as to give it the opportunity to contest or confirm the correctness of the tender thus constituted.

6. Contracting authorities may award contracts based on a dynamic purchasing system through a punch out provided that the request for participation in the dynamic purchasing system is accompanied by an electronic catalogue in accordance with the technical specifications and format established by the contracting authority. This catalogue shall be completed subsequently by the candidates, when they are informed of the contracting authority’s intention to constitute tenders by means of a punch out. The punch out shall be conducted in conformity with point (b) of paragraph 4 and paragraph 5.

### *Article 35*

#### *Centralised purchasing activities and central purchasing bodies*

1. Contracting authorities may purchase works, supplies and/or services from or through a central purchasing body.

2. Member States shall provide for the possibility for contracting authorities to have recourse to centralised purchasing activities offered by central purchasing bodies established in another Member State.
3. A contracting authority fulfils its obligations pursuant to this Directive when it procures by having recourse to centralised purchasing activities, to the extent that the procurement procedures concerned and their performance are conducted by the central procurement body alone in all its stages from the publication of the call for competition to the end of the execution of the ensuing contract or contracts.

However, where certain stages of the procurement procedure or the performance of the ensuing contracts are carried out by the contracting authority concerned, the contracting authority continues to be responsible for fulfilling the obligations pursuant to this Directive in respect of the stages it conducts.
4. All procurement procedures conducted by a central purchasing body shall be performed using electronic means of communication, in accordance with the requirements of Article 19.
5. Contracting authorities may, without applying the procedures provided for in this Directive, choose a central purchasing body to provide centralised purchasing activities, including where the central purchasing body is remunerated for so doing.
6. Central purchasing bodies shall ensure the documentation of all transactions performed in the course of the execution of the contracts, framework agreements or dynamic purchasing systems they conclude in the course of their central purchasing activities.

*Article 36*  
*Ancillary purchasing activities*

The providers of ancillary purchasing activities shall be chosen in accordance with the procurement procedures set out in this Directive.

*Article 37*  
*Occasional joint procurement*

1. One or more contracting authorities may agree to perform certain specific procurements jointly.
2. Where one contracting authority alone conducts the procurement procedures concerned in all its stages from the publication of the call for competition to the end of the performance of the ensuing contract or contracts, that contracting authority shall have sole responsibility for fulfilling the obligations pursuant to this Directive.

However, where the conduct of the procurement procedures and the performance of the ensuing contracts is carried out by more than one of the participating contracting authorities, each shall continue to be responsible for fulfilling its obligations pursuant to this Directive in respect of the stages it conducts.

### Article 38

#### *Joint procurement between contracting authorities from different Member States*

1. Without prejudice to Article 11, contracting authorities from different Member States may jointly award public contracts by using one of the means described in this Article.
2. Several contracting authorities may purchase works, supplies and/or services from or through a central purchasing body located in another Member State. In that case, the procurement procedure shall be conducted in accordance with the national provisions of the Member State where the central purchasing body is located.
3. Several contracting authorities from different Member States may jointly award a public contract. In that case, the participating contracting authorities shall conclude an agreement that determines:
  - (a) which national provisions shall apply to the procurement procedure.
  - (b) the internal organisation of the procurement procedure, including the management of the procedure, the sharing of responsibilities, the distribution of the works, supplies or services to be procured, and the conclusion of contracts.

When determining the applicable national law in accordance with point (a), contracting authorities may choose the national provisions of any Member State in which at least one of the participating authorities is located.

4. Where several contracting authorities from different Member States have set up a joint legal entity, including European Groupings of territorial cooperation under Regulation (EC) N° 1082/2006 of the European Parliament and of the Council<sup>32</sup> or other entities established under Union law, the participating contracting authorities shall, by a decision of the competent body of the joint legal entity, agree on the applicable national procurement rules of one of the following Member States:
  - (a) the national provisions of the Member State where the joint legal entity has its registered office;
  - (b) the national provisions of the Member State where the joint legal entity is carrying out its activities.

This agreement may either apply for an undetermined period, when fixed in the constitutive act of the joint legal entity, or may be limited to a certain period of time, certain types of contracts or to one or more individual contract awards.

5. In the absence of an agreement determining the applicable public procurement law, the national legislation governing the contract award shall be determined following the rules set out below:

---

<sup>32</sup> OJ L 210 of 31.7.2006, p. 19

- (a) where the procedure is conducted or managed by one participating contracting authority on behalf of the others, the national provisions of the Member State of that contracting authority shall apply;
  - (b) where the procedure is not conducted or managed by one participating contracting authority on behalf of the others, and
    - (i) concerns a works contract, contracting authorities shall apply the national provisions of the Member State where most of the works are located;
    - (ii) concerns a service or supply contract, contracting authorities shall apply the national provisions of the Member State where the major part of the services or supplies is provided;
  - (c) where it is not possible to determine the applicable national law pursuant to points (a) or (b), contracting authorities shall apply the national provisions of the Member State of the contracting authority which bears the biggest share of the costs.
6. In the absence of an agreement determining the applicable public procurement law under paragraph 4, the national legislation governing procurement procedures conducted by joint legal entities set up by several contracting authorities from different Member States shall be determined following the following rules:
- (a) where the procedure is conducted or managed by the competent organ of the joint legal entity, the national provisions of the Member State where the legal entity has its registered office shall apply.
  - (b) where the procedure is conducted or managed by a member of the legal entity on behalf of that legal entity, the rules set out in points (a) and (b) of paragraph 5 shall apply.
  - (c) where it is not possible to determine the applicable national law pursuant to points (a) or (b) of paragraph 5, the contracting authorities shall apply the national provisions of the Member State where the legal entity has its registered office.
7. One or more contracting authorities may award individual contracts under a framework agreement concluded by or jointly with a contracting authority located in another Member State, provided that the framework agreement contains specific provisions enabling the respective contracting authority or contracting authorities to award the individual contracts.
8. Decisions on the award of public contracts in cross-border public procurement shall be subject to the ordinary review mechanisms available under the national law applicable.
9. In order to enable the effective operation of review mechanisms, Member States shall ensure that the decisions of review bodies within the meaning of Council Directive

89/665/EEC<sup>33</sup> located in other Member States are fully executed in their domestic legal order, where such decisions involve contracting authorities established on their territory participating in the relevant cross-border public procurement procedure.

## **CHAPTER III**

### **Conduct of the procedure**

#### **SECTION 1**

#### **PREPARATION**

##### *Article 39*

##### *Preliminary market consultations*

1. Before launching a procurement procedure, contracting authorities may conduct market consultations in order to assess the structure, capability and capacity of the market and to inform economic operators of their procurement plans and requirements.

For this purpose, contracting authorities may seek or accept advice from administrative support structures or from third parties or market participants, provided that such advice does not have the effect of precluding competition and does not result in a violation of the principles of non-discrimination and transparency.

2. Where a candidate or tenderer or an undertaking related to a candidate or tenderer has advised the contracting authority or has otherwise been involved in the preparation of the procurement procedure, the contracting authority shall take appropriate measures to ensure that competition is not distorted by the participation of that candidate or tenderer.

Such measures shall include the communication to the other candidates and tenderers of any relevant information exchanged in the context of or resulting from the involvement of the candidate or tenderer in the preparation of the procurement procedure and the fixing of adequate time limits for the receipt of tenders. The candidate or tenderer concerned shall only be excluded from the procedure where there are no other means to ensure compliance with the duty to observe the principle of equal treatment.

Prior to any such exclusion, candidates or tenderers shall be given the opportunity to prove that their involvement in preparing the procurement procedure is not capable of distorting competition. The measures taken shall be documented in the individual report required by Article 85.

---

<sup>33</sup> OJ L 395, 30.12. 1989, p. 33.

*Article 40*  
*Technical specifications*

1. The technical specifications as defined in point 1 of Annex VIII shall be set out in the procurement documents. They shall define the characteristics required of a works, service or supply.

These characteristics may also refer to the specific process of production or provision of the requested works, supplies or services or of any other stage of its life cycle as referred to in point (22) of Article 2.

The technical specifications shall also specify whether the transfer of intellectual property rights will be required.

For all procurement the subject of which is intended for use by persons, whether general public or staff of the contracting authority, those technical specifications shall, except in duly justified cases, be drawn up so as to take into account accessibility criteria for people with disabilities or design for all users.

Where mandatory accessibility standards are adopted by a legislative act of the Union, technical specifications shall, as far as accessibility criteria are concerned, be defined by reference thereto.

2. Technical specifications shall guarantee equal access of economic operators to the procurement procedure and not have the effect of creating unjustified obstacles to the opening up of public procurement to competition.
3. Without prejudice to mandatory national technical rules, to the extent that they are compatible with Union law, the technical specifications shall be formulated in one of the following ways:
  - (a) in terms of performance or functional requirements, including environmental characteristics, provided that the parameters are sufficiently precise to allow tenderers to determine the subject-matter of the contract and to allow contracting authorities to award the contract;
  - (b) by reference to technical specifications and, in order of preference, to national standards transposing European standards, European technical approvals, common technical specifications, international standards, other technical reference systems established by the European standardisation bodies or — when those do not exist — national standards, national technical approvals or national technical specifications relating to the design, calculation and execution of the works and use of the supplies; each reference shall be accompanied by the words ‘or equivalent’;
  - (c) in terms of performance or functional requirements as referred to in point (a), with reference to the technical specifications referred to in point (b) as a means of presuming conformity with such performance or functional requirements;
  - (d) by reference to the technical specifications referred to in point (b) for certain characteristics, and by reference to the performance or functional requirements referred to in point (a) for other characteristics.

4. Unless justified by the subject-matter of the contract, technical specifications shall not refer to a specific make or source, or a particular process, or to trade marks, patents, types or a specific origin or production with the effect of favouring or eliminating certain undertakings or certain products. Such reference shall be permitted on an exceptional basis, where a sufficiently precise and intelligible description of the subject-matter of the contract pursuant to paragraph 3 is not possible. Such reference shall be accompanied by the words "or equivalent".
5. Where a contracting authority uses the option of referring to the specifications referred to in point (b) of paragraph 3, it shall not reject a tender on the grounds that the works, supplies and services tendered for do not comply with the specifications to which it has referred, once the tenderer proves in its tender by whatever appropriate means, including the means of proof referred to in Article 42, that the solutions it proposes satisfy in an equivalent manner the requirements defined by the technical specifications.
6. Where a contracting authority uses the option laid down in point (a) of paragraph 3 to formulate technical specifications in terms of performance or functional requirements, it shall not reject a tender for works, supplies or services which comply with a national standard transposing a European standard, a European technical approval, a common technical specification, an international standard or a technical reference system established by a European standardisation body, where those specifications address the performance or functional requirements which it has laid down.

In its tender, the tenderer shall prove by any appropriate means, including those referred to in Article 42, that the work, supply or service in compliance with the standard meets the performance or functional requirements of the contracting authority.

#### *Article 41*

##### *Labels*

1. Where contracting authorities lay down environmental, social or other characteristics of a works, service or supply in terms of performance or functional requirements as referred to in point (a) of Article 40(3) they may require that these works, services or supplies bear a specific label, provided that all of the following conditions are fulfilled:
  - (a) the requirements for the label only concern characteristics which are linked to the subject-matter of the contract and are appropriate to define characteristics of the works, supplies or services that are the subject-matter of the contract;
  - (b) the requirements for the label are drawn up on the basis of scientific information or based on other objectively verifiable and non-discriminatory criteria;
  - (c) the labels are established in an open and transparent procedure in which all stakeholders, including government bodies, consumers, manufacturers, distributors and environmental organisations, may participate,

- (d) the labels are accessible to all interested parties;
- (e) the criteria of the label are set by a third party which is independent from the economic operator applying for the label.

Contracting authorities requiring a specific label shall accept all equivalent labels that fulfil the requirements of the label indicated by the contracting authorities. For products that do not bear the label, contracting authorities shall also accept a technical dossier of the manufacturer or other appropriate means of proof.

2. Where a label fulfils the conditions provided in points (b), (c), (d) and (e) of paragraph 1 but also sets out requirements not linked to the subject-matter of the contract, contracting authorities may define the technical specification by reference to those of the detailed specifications of that label, or, where necessary, parts thereof, that are linked to the subject-matter of the contract and are appropriate to define characteristics of this subject-matter.

#### *Article 42*

##### *Test reports, certification and other means of proof*

1. Contracting authorities may require that economic operators provide a test report from a recognised body or a certificate issued by such a body as means of proof of conformity with the technical specifications.

Where contracting authorities require the submission of certificates drawn up by recognised bodies attesting conformity with a particular technical specification, certificates from equivalent other recognised bodies shall also be accepted by the contracting authorities.

2. Contracting authorities shall accept other appropriate means of proof than those referred to in paragraph 1, such as a technical dossier of the manufacturer where the economic operator concerned has no access to the certificates or test reports referred to in paragraph 1, or no possibility of obtaining them within the relevant time limits.
3. Recognised bodies within the meaning of paragraph 1 of this Article shall be test and calibration laboratories and any certification and inspection bodies accredited in accordance with Regulation (EC) No 765/2008 of the European Parliament and of the Council<sup>34</sup>.
4. Member States shall make available to other Member States, upon request, any information related to the evidence and documents submitted in accordance with Article 40(6), Article 41 and paragraphs 1, 2 and 3 of this Article to prove compliance with technical requirements. The competent authorities of the Member State of establishment shall provide this information in accordance with Article 88.

---

<sup>34</sup> OJ L 218, 13.8.2008, p. 30.

*Article 43*  
*Variants*

1. Contracting authorities may authorise tenderers to submit variants. They shall indicate in the contract notice or, where a prior information notice is used as a means of calling for competition, in the invitation to confirm interest whether or not they authorise variants. Variants shall not be authorised without such indication.
2. Contracting authorities authorising variants shall state in the procurement documents the minimum requirements to be met by the variants and any specific requirements for their presentation. They shall also ensure that the chosen award criteria can be usefully applied to variants meeting those minimum requirements as well as to conforming tenders which are not variants.
3. Only variants meeting the minimum requirements laid down by the contracting authorities shall be taken into consideration.

In procedures for awarding public supply or service contracts, contracting authorities that have authorised variants shall not reject a variant on the sole ground that it would, where successful, lead to either a service contract rather than a public supply contract or a supply contract rather than a public service contract.

*Article 44*  
*Division of contracts into lots*

1. Public contracts may be subdivided into homogenous or heterogeneous lots. For contracts with a value equal to or greater than the thresholds provided for in Article 4 but not less than EUR 500 000, determined in accordance with Article 5, where the contracting authority does not deem it appropriate to split into lots, it shall provide in the contract notice or in the invitation to confirm interest a specific explanation of its reasons.

Contracting authorities shall indicate, in the contract notice or in the invitation to confirm interest, whether tenders are limited to one or more lots only.

2. Contracting authorities may, even where the possibility to tender for all lots has been indicated, limit the number of lots that may be awarded to a tenderer, provided that the maximum number is stated in the contract notice or in the invitation to confirm interest. Contracting authorities shall determine and indicate in the procurement documents the objective and non-discriminatory criteria or rules for awarding the different lots where the application of the chosen award criteria would result in the award to one tenderer of more lots than the maximum number.
3. Where more than one lot may be awarded to the same tenderer, contracting authorities may provide that they will either award a contract per lot or one or more contracts covering several or all lots.

Contracting authorities shall specify in the procurement documents whether they reserve the right to make such a choice and, if so, which lots may be grouped together under one contract.

Contracting authorities shall first determine the tenders fulfilling best the award criteria set out pursuant to Article 66 for each individual lot. They may award a contract for more than one lot to a tenderer that is not ranked first in respect of all individual lots covered by this contract, provided that the award criteria set out pursuant to Article 66 are better fulfilled with regard to all the lots covered by that contract. Contracting authorities shall specify the methods they intend to use for such comparison in the procurement documents. Such methods shall be transparent, objective and non-discriminatory.

4. Contracting authorities may require that all contractors coordinate their activities under the direction of the economic operator to which has been awarded a lot involving the coordination of the entire project or its relevant parts.

*Article 45*  
*Setting time limits*

1. When fixing the time limits for the receipt of tenders and requests to participate, contracting authorities shall take account of the complexity of the contract and the time required for drawing up tenders, without prejudice to the minimum time limits set out in Articles 24 to 30.
2. Where tenders can be made only after a visit to the site or after on-the-spot inspection of the documents supporting the procurement documents, the time limits for the receipt of tenders shall be extended so that all economic operators concerned may be aware of all the information needed to produce tenders.

**SECTION 2**  
**PUBLICATION AND TRANSPARENCY**

*Article 46*  
*Prior information notices*

1. Contracting authorities may make known their intentions of planned procurements through the publication of a prior information notice as soon as possible after the beginning of the budgetary year. Those notices shall contain the information set out in Annex VI part B section I. They shall be published either by the Commission or by the contracting authorities on their buyer profiles in accordance with point 2(b) of Annex IX. Where the notice is published by the contracting authorities on their buyer profile, they shall send a notice of the publication on their buyer profile in accordance with point 3 of Annex IX.
2. For restricted and competitive procedures with negotiation, sub-central contracting authorities may use a prior information notice as a call for competition pursuant to Article 24(2), provided that the notice fulfils all of the following conditions:
  - (a) it refers specifically to the supplies, works or services that will be the subject of the contract to be awarded;

- (b) it indicates that the contract will be awarded by restricted or competitive procedure with negotiation without further publication of a call for competition and invites interested economic operators to express their interest in writing;
- (c) it contains, in addition to the information set out in Annex VI part B section I, the information set out in Annex VI part B section II;
- (d) it has been published not more than 12 months prior to the date on which the invitation referred to in Article 52(1) is sent.

Such notices shall not be published on a buyer profile.

*Article 47*  
*Contract notices*

All contracting authorities may use a contract notice as a means of calling for competition in respect of all procedures. Such notices shall contain the information set out in Annex VI part C and shall be published in accordance with Article 49.

*Article 48*  
*Contract award notices*

1. Not later than 48 days after the award of a contract or the conclusion of a framework agreement, contracting authorities shall send a contract award notice on the results of the procurement procedure.

Such notices shall contain the information set out in Annex VI part D and be published in accordance with Article 49.

2. Where the call for competition for the contract concerned has been made in the form of a prior information notice and the contracting authority does not intend to award further contracts during the 12-month period covered by the prior information notice, the contract award notice shall contain a specific indication to that effect.

In the case of framework agreements concluded in accordance with Article 31, contracting authorities shall not be bound to send a notice of the results of the procurement procedure for each contract based on that agreement.

3. Contracting authorities shall send a notice of the result of the award of contracts based on a dynamic purchasing system within 48 days of the award of each contract. They may, however, group such notices on a quarterly basis. In that case, they shall send the grouped notices within 48 days of the end of each quarter.
4. Certain information on the contract award or the conclusion of the framework agreement may be withheld from publication where its release would impede law enforcement or otherwise be contrary to the public interest, would harm the legitimate commercial interests of economic operators, public or private, or might prejudice fair competition between them.

*Article 49*  
*Form and manner of publication of notices*

1. Notices referred to in Articles 46, 47 and 48 shall include the information set out in Annex VI in the format of standard forms, including standard forms for corrigenda.

The Commission shall establish those standard forms. Those implementing acts shall be adopted in accordance with the advisory procedure referred to in Article 91.

2. Notices referred to in Articles 46, 47 and 48 shall be drawn up, transmitted by electronic means to the Commission and published in accordance with Annex IX. Notices shall be published not later than five days after they are sent. The costs of publication of the notices by the Commission shall be borne by the Union.
3. Notices referred to in Article 46(2) and Article 47 shall be published in full in an official language of the Union as chosen by the contracting authority. That language version shall constitute the sole authentic text. A summary of the important elements of each notice shall be published in the other official languages.
4. The Commission shall ensure that the full text and the summary of prior information notices referred to in Article 46(2) and calls for competition setting up a dynamic purchasing system, as referred to in Article 32(3)(a) continue to be published:
  - (a) in the case of prior information notices, for 12 months or until receipt of a contract award notice as provided for in Article 48 indicating that no further contracts will be awarded during the 12-month period covered by the call for competition;
  - (b) in the case of calls for competition setting up a dynamic purchasing system, for the period of validity of the dynamic purchasing system.
5. Contracting authorities shall be able to supply proof of the dates on which notices are dispatched.

The Commission shall give the contracting authority confirmation of the receipt of the notice and of the publication of the information sent, indicating the date of that publication. Such confirmation shall constitute proof of publication.

6. Contracting authorities may publish notices for public contracts that are not subject to the publication requirement laid down in this Directive provided those notices are sent to the Commission by electronic means in accordance with the format and procedures for transmission indicated in Annex IX.

*Article 50*  
*Publication at national level*

1. Notices referred to in Articles 46, 47 and 48 and the information contained therein shall not be published at national level before the publication pursuant to Article 49.
2. Notices published at national level shall not contain information other than that contained in the notices dispatched to the Commission or published on a buyer

profile, but shall indicate the date of dispatch of the notice to the Commission or its publication on the buyer profile.

3. Prior information notices shall not be published on a buyer profile before the dispatch to the Commission of the notice of their publication in that form. They shall indicate the date of that dispatch.

#### *Article 51*

##### *Electronic availability of procurement documents*

1. Contracting authorities shall offer unrestricted and full direct access free of charge by electronic means to the procurement documents from the date of publication of the notice in accordance with Article 49 or the date on which the invitation to confirm interest is sent. The text of the notice or the invitation to confirm interest shall specify the internet address at which this documentation is accessible.
2. Provided that it has been requested in good time, the contracting authorities or competent departments shall supply additional information relating to the specifications and any supporting documents not later than six days before the deadline fixed for the receipt of tenders. In the event of an accelerated procedure as referred to in Articles 25(3) and 26(5), that period shall be four days.

#### *Article 52*

##### *Invitations to submit a tender or to participate in the dialogue; invitations to confirm interest*

1. In restricted procedures, competitive dialogue procedures, innovation partnerships and competitive procedures with negotiation, contracting authorities shall simultaneously and in writing invite the selected candidates to submit their tenders or, in the case of a competitive dialogue, to take part in the dialogue.

Where a prior information notice is used as a call for competition pursuant to Article 46(2), contracting authorities shall simultaneously and in writing invite the economic operators having expressed their interest to confirm their continuing interest.

2. The invitations referred to in paragraph 1 shall include a reference to the electronic address on which the specifications or the descriptive document and any other supporting documents have been made directly available by electronic means. In addition, they shall include the information set out in Annex X.

#### *Article 53*

##### *Informing candidates and tenderers*

1. Contracting authorities shall as soon as possible inform each candidate and tenderer of decisions reached concerning the conclusion of a framework agreement, the award of the contract or admittance to a dynamic purchasing system, including the grounds for any decision not to conclude a framework agreement, not to award a contract for which there has been a call for competition, to recommence the procedure or not to implement a dynamic purchasing system.

2. On request from the party concerned, the contracting authority shall as quickly as possible, and in any case within 15 days from receipt of a written request, inform:
  - (a) any unsuccessful candidate of the reasons for the rejection of its request to participate,
  - (b) any unsuccessful tenderer of the reasons for the rejection of its tender, including, for the cases referred to in Article 40(5) and (6), the reasons for its decision of non-equivalence or its decision that the works, supplies or services do not meet the performance or functional requirements,
  - (c) any tenderer that has made an admissible tender of the characteristics and relative advantages of the tender selected as well as the name of the successful tenderer or the parties to the framework agreement,
  - (d) any tenderer that has made an admissible tender of the conduct and progress of negotiations and dialogue with tenderers.
3. Contracting authorities may decide to withhold certain information referred to in paragraph 1, regarding the contract award, the conclusion of framework agreements or admittance to a dynamic purchasing system, where the release of such information would impede law enforcement, would otherwise be contrary to the public interest, would prejudice the legitimate commercial interests of economic operators, whether public or private, or might prejudice fair competition between them.

### **SECTION 3**

#### **CHOICE OF PARTICIPANTS AND AWARD OF CONTRACTS**

##### *Article 54*

##### *General principles*

1. Contracts shall be awarded on the basis of the criteria laid down in Articles 66 to 69, provided that the following cumulative conditions are fulfilled:
  - (a) the tender complies with the requirements, conditions and criteria set out in the contract notice or the invitation to confirm interest and in the procurement documents, taking into account Article 43;
  - (b) the tender comes from a tenderer that is not excluded in accordance with Articles 21 and 55 and that meets the selection criteria set out by the contracting authority in accordance with Article 56 and, where appropriate, the non-discriminatory rules and criteria referred to in Article 64.
2. Contracting authorities may decide not to award a contract to the tenderer submitting the best tender where they have established that the tender does not comply, at least in an equivalent manner, with obligations established by Union legislation in the field of social and labour law or environmental law or of the international social and environmental law provisions listed in Annex XI.

3. In open procedures, contracting authorities may decide to examine tenders before verifying the fulfilment of the selection criteria, provided that the relevant provisions of this section are observed, including the rule that the contract shall not be awarded to a tenderer that should have been excluded pursuant to Article 55 or that does not meet the selection criteria set out by the contracting authority, in accordance with subsection 1 of this section.
4. The Commission shall be empowered to adopt delegated acts in accordance with Article 89 to amend the list in Annex XI, where necessary due to the conclusion of new international agreements or modification of existing international agreements.

## **SUBSECTION 1**

### **CRITERIA FOR QUALITATIVE SELECTION**

#### *Article 55* *Exclusion grounds*

1. Any candidate or tenderer that has been the subject of a conviction by final judgment for one of the following reasons shall be excluded from participation in a public contract:
  - (a) participation in a criminal organisation, as defined in Article 2(1) of Council Framework Decision 2008/841/JHA<sup>35</sup>;
  - (b) corruption, as defined in Article 3 of the Convention on the fight against corruption involving officials of the European Communities or officials of Member States of the European Union<sup>36</sup> and Article 2 of Council Framework Decision 2003/568/JHA<sup>37</sup> as well as corruption as defined in the national law of the contracting authority or the economic operator;
  - (c) fraud within the meaning of Article 1 of the Convention on the protection of the financial interests of the European Communities<sup>38</sup>;
  - (d) terrorist offences or offences linked to terrorist activities, as defined in Articles 1 and 3 of Framework Decision 2002/475/JHA<sup>39</sup> respectively, or inciting, aiding or abetting or attempting to commit an offence, as referred to in Article 4 of that Framework Decision;
  - (e) money laundering, as defined in Article 1 of Council Directive 91/308/EEC<sup>40</sup>.

The obligation to exclude a candidate or tenderer from participation in a public contract shall also apply where the conviction by final judgment has condemned

---

<sup>35</sup> OJ L 300, 11.11.2008, p. 42.

<sup>36</sup> OJ C 195, 25.6.1997, p. 1.

<sup>37</sup> OJ L 192, 31.7.2003, p. 54.

<sup>38</sup> OJ C 316, 27.11.1995, p. 48.

<sup>39</sup> OJ L 164, 22.6.2002, p.3.

<sup>40</sup> OJ L 166, 28.6.1991, p. 77.

company directors or any other any persons having powers of representation, decision or control in respect of the candidate or tenderer.

2. Any economic operator shall be excluded from participation in a contract where the contracting authority is aware of a decision having the force of *res judicata* establishing that it has not fulfilled obligations relating to the payment of taxes or social security contributions in accordance with the legal provisions of the country in which it is established or with those of the Member State of the contracting authority.
3. A contracting authority may exclude from participation in a public contract any economic operator if one of the following conditions is fulfilled:
  - (a) where it is aware of any violation of obligations established by Union legislation in the field of social and labour law or environmental law or of the international social and environmental law provisions listed in Annex XI. Compliance with Union legislation or with international provisions also includes compliance in an equivalent manner.
  - (b) where the economic operator is the subject of insolvency or winding-up proceedings, where its assets are being administered by a liquidator or by the court, where it has entered into an arrangement with creditors, where it has suspended business activities or is in any analogous situation arising from a similar procedure under national laws and regulations;
  - (c) where the contracting authority can demonstrate by any means that the economic operator is guilty of other grave professional misconduct;
  - (d) where the economic operator has shown significant or persistent deficiencies in the performance of any substantive requirement under a prior contract or contracts of a similar nature with the same contracting authority.

In order to apply the ground for exclusion referred to in point (d) of the first subparagraph, contracting authorities shall provide a method for the assessment of contractual performance that is based on objective and measurable criteria and applied in a systematic, consistent and transparent way. Any performance assessment shall be communicated to the contractor in question, which shall be given the opportunity to object to the findings and to obtain judicial protection.

4. Any candidate or tenderer that is in one of the situations referred to in paragraphs 1, 2 and 3 may provide the contracting authority with evidence demonstrating its reliability despite the existence of the relevant ground for exclusion.

For this purpose, the candidate or tenderer shall prove that it has compensated any damage caused by the criminal offence or misconduct, clarified the facts and circumstances in a comprehensive manner by actively collaborating with the investigating authorities and taken concrete technical, organisational and personal measures that are appropriate to prevent further criminal offences or misconduct. Contracting authorities shall evaluate the measures taken by the candidates and tenderers taking into account the gravity and particular circumstances of the criminal offence or misconduct. Where the contracting authority considers the measures to be insufficient, it shall state the reasons for its decision.

5. Member States shall ensure that contracting authorities and economic operators can easily obtain information and assistance with regard to the application of this Article through the liaison point provided for in Article 88.
6. Member States shall make available to other Member States, upon request, any information related to the exclusion grounds listed in this Article. The competent authorities of the Member State of establishment shall provide this information in accordance with Article 88.

*Article 56*  
*Selection criteria*

1. Contracting authorities may establish conditions for participation relating to:
  - (a) suitability to pursue the professional activity;
  - (b) economic and financial standing;
  - (c) technical and professional ability.

They are not obliged to impose all the conditions listed in paragraphs 2, 3 and 4, but they shall not provide requirements other than those listed.

Contracting authorities shall limit any conditions for participation to those that are appropriate to ensure that a candidate or tenderer has the legal and financial capacities and the commercial and technical abilities to perform the contract to be awarded. All requirements shall be related and strictly proportionate to the subject-matter of the contract, taking into account the need to ensure genuine competition.

2. With regard to suitability to pursue the professional activity, contracting authorities may require economic operators to be enrolled on one of the professional or trade registers kept in their Member State of establishment, as described in Annex XII.

In procedures for the award of public service contracts, insofar as candidates or tenderers have to possess a particular authorisation or to be members of a particular organisation in order to be able to perform in their country of origin the service concerned, the contracting authority may require them to prove that they hold such authorisation or membership.

3. With regard to sufficient economic and financial standing, contracting authorities may require economic operators to have adequate financial and economic capacity. For that purpose, they may require that economic operators have a certain minimum yearly turnover, including a certain minimum turnover in the area covered by the contract and an adequate professional risk indemnity insurance.

The minimum yearly turnover shall not exceed three times the estimated contract value, except in duly justified circumstances relating to the special risks attached to the nature of the works, services or supplies. The contracting authority shall indicate such exceptional circumstances in the procurement documents.

Where a contract is divided into lots this Article shall apply in relation to each individual lot. However, the contracting authority may set the minimum yearly turnover by reference to groups of lots for the event that the successful tenderer is awarded several lots to be executed at the same time.

Where contracts based on a framework agreement are to be awarded following a reopening of competition, the maximum yearly turnover requirement referred to in the second subparagraph of this paragraph shall be calculated on the basis of the expected maximum size of specific contracts that will be performed at the same time, or, where it is not known, on the basis of the estimated value of the framework agreement.

4. With regard to technical and professional ability, contracting authorities may require that economic operators possess the necessary human and technical resources and experience to perform the contract to an appropriate quality standard. Contracting authorities may conclude that economic operators will not perform the contract to an appropriate quality standard where the contracting authority established that they have conflicting interests which may negatively affect the performance of the contract.

In procedures for awarding public contracts having as their object supplies requiring siting or installation work, the provision of services or the execution of works, the ability of economic operators to provide the service or to execute the installation or the work may be evaluated with regard to their skills, efficiency, experience and reliability.

5. Contracting authorities shall indicate the required conditions of participation, which may be expressed as minimum levels of ability, together with the appropriate means of proof, in the contract notice or in the invitation to confirm interest.

#### *Article 57*

#### *Self-declarations and other means of proof*

1. Contracting authorities shall accept self-declarations as preliminary evidence that candidates and tenderers fulfil any of the following conditions:
  - (a) they are not in one of the situations referred to in Article 55 in which economic operators shall or may be excluded;
  - (b) they meet the selection criteria that have been set out pursuant to Article 56;
  - (c) where applicable, they meet the objective rules and criteria that have been set out pursuant to Article 64;
  - (d) they will be able, upon request and without delay, to provide the supporting documentation that contracting authorities have required in accordance with Articles 59, 60 and, where appropriate, Articles 61 and 63.
2. A contracting authority may ask a candidate or tenderer at any moment during the procedure to submit all or parts of the required documentation where this appears necessary to ensure the proper conduct of the procedure.

Before awarding the contract, the contracting authority shall require the tenderer to which it has decided to award the contract to submit the documentation in accordance with Articles 59 and 60 and, where appropriate, Article 61. The contracting authority may invite economic operators to supplement or clarify the certificates and documents submitted pursuant to Articles 59, 60 and 61.

3. Contracting authorities shall not require certificates other than those referred to in Articles 60 and 61; in respect of Article 62, economic operators may rely on any appropriate means to prove to the contracting authority that they will have at their disposal the resources necessary.

Candidates and tenderers shall not be required to re-submit a certificate or other documentary evidence that has already been submitted to the same contracting authority within the past four years in an earlier procedure and is still valid.

4. Upon request, Member States shall make available to other Member States, in accordance with Article 88, any information related to the exclusion grounds listed in Article 55, to the suitability, financial and technical capacities of tenderers described in Article 56 and to the content or nature of the means of proof indicated in this Article.

#### *Article 58*

##### *Online repository of certificates (e-Certis)*

1. With a view to facilitating cross-border tendering, Member States shall ensure that the information concerning certificates and other forms of documentary evidence introduced in e-Certis is constantly kept up to date.
2. Recourse to e-Certis shall become obligatory and contracting authorities shall be obliged to require only such of types of certificates or forms of documentary evidence that are available in e-Certis at the latest 2 years after the date provided for in Article 92(1).

#### *Article 59*

##### *European Procurement Passport*

1. National authorities shall issue, at the request of an economic operator established in the relevant Member State and fulfilling the necessary conditions, a European Procurement Passport. The European Procurement Passport shall contain the particulars set out in Annex XIII and shall be drawn up on the basis of a standard form.

The Commission shall be empowered to adopt delegated acts in accordance with Article 89 in order to modify Annex XIII due to technical progress or for administrative reasons. It shall also establish the standard form for the European Procurement Passport. Those implementing acts shall be adopted in accordance with the advisory procedure referred to in Article 91.

2. At the latest 2 years after the date provided for in Article 92(1), the passport shall be provided exclusively in electronic form.

3. The authority issuing the passport shall seek the relevant information directly from the competent authorities, except where prohibited by national rules on the protection of personal data.
4. The European Procurement Passport shall be recognised by all contracting authorities as proof of fulfilment of the conditions for participation covered by it and shall not be questioned without justification. Such justification may be related to the fact that the passport was issued more than six months earlier.
5. Member States shall make available to other Member States, upon request, any information relating to the authenticity and content of the European Procurement Passport. The competent authorities of the Member State of establishment shall provide this information in accordance with Article 88.

*Article 60*  
*Certificates*

1. Contracting authorities shall accept the following as sufficient evidence that none of the cases specified in Article 55 apply to the economic operator:
  - (a) as regards paragraph 1 of that Article, the production of an extract from the relevant register, such as judicial records or, failing that, of an equivalent document issued by a competent judicial or administrative authority in the country of origin or the country where the economic operator is established showing that those requirements have been met;
  - (b) as regards paragraph 2 and point (b) of paragraph 3 of that Article, a certificate issued by the competent authority in the Member State concerned;
  - (c) where the country in question does not issue such documents or certificates, or where these do not cover all the cases specified in paragraphs 1, 2 and point (b) of paragraph 3 of that Article, they may be replaced by an official declaration to that effect by the national liaison point designated in accordance with Article 88.
2. Proof of the economic operator's economic and financial standing may, as a general rule, be provided by one or more of the references listed in Annex XIV, part 1.

Where, for any valid reason, the economic operator is unable to provide the references requested by the contracting authority, it may prove its economic and financial standing by any other document which the contracting authority considers appropriate.
3. Evidence of the economic operators' technical abilities may be provided by one or more of the means listed in Annex XIV, part 2, according to the nature, quantity or importance, and use of the works, supplies or services.
4. Upon request, Member States shall make available to other Member States, in accordance with Article 88, any information relating to the evidence on exclusion grounds, the documents attesting the suitability to pursue the professional activity,

and financial and technical capacities of tenderers, as well as any other means of proof referred to in paragraphs 1, 2 and 3 of this Article.

#### *Article 61*

##### *Quality assurance standards and environmental management standards*

1. Where they require the production of certificates drawn up by independent bodies attesting that the economic operator complies with certain quality assurance standards, including on accessibility for disabled persons, contracting authorities shall refer to quality assurance systems based on the relevant European standards series certified by accredited bodies. They shall recognise equivalent certificates from bodies established in other Member States. They shall also accept other evidence of equivalent quality assurance measures from economic operators that have no access to such certificates, or no possibility of obtaining them within the relevant time limits.
2. Where contracting authorities require the production of certificates drawn up by independent bodies attesting that the economic operator complies with certain environmental management schemes or standards, they shall refer to the European Union Eco-Management and Audit Scheme (EMAS) or to other environmental management schemes as recognized in accordance with Article 45 of Regulation (EC) No 1221/2009 of the European Parliament and of the Council<sup>41</sup> or other environmental management standards based on the relevant European or international standards by accredited bodies. They shall recognise equivalent certificates from bodies established in other Member States. They shall also accept other evidence of equivalent environmental management measures from economic operators that have no access to such certificates, or no possibility of obtaining them within the relevant time limits.
3. Upon request, Member States shall make available to other Member States, in accordance with Article 88, any information relating to the documents produced as evidence of compliance with quality and environmental standards referred to in paragraphs 1 and 2 of this Article.

#### *Article 62*

##### *Reliance on the capacities of other entities*

1. With regard to criteria relating to economic and financial standing as set out pursuant to Article 56(3), and to criteria relating to technical and professional ability as set out pursuant to Article 56(4), an economic operator may, where appropriate and for a particular contract, rely on the capacities of other entities, regardless of the legal nature of the links which it has with them. It shall in that case prove to the contracting authority that it will have at its disposal the resources necessary, for example, by producing an undertaking by those entities to that effect. In the case of economic and financial standing, contracting authorities may require that the economic operator and those entities are jointly liable for the execution of the contract.

---

<sup>41</sup> OJ L 342, 22.12.2009, p. 1.

Under the same conditions, a group of economic operators as referred to in Article 16 may rely on the capacities of participants in the group or of other entities.

2. In the case of works contracts, service contracts and siting and installation operations in the context of a supply contract, contracting authorities may require that certain critical tasks be performed directly by the tenderer itself or, where a tender is submitted by a group of economic operators as referred to in Article 6, a participant in the group.

### *Article 63*

#### *Official lists of approved economic operators and certification by bodies established under public or private law*

1. Member States may establish or maintain either official lists of approved contractors, suppliers or service providers or provide for a certification by certification bodies complying with European certification standards within the meaning of Annex VIII.

They shall inform the Commission and the other Member States of the address of the certification body or the body responsible for the official lists, to which applications shall be sent.

2. Member States shall adapt the conditions for registration on the lists referred to in paragraph 1 and for the issue of certificates by certification bodies to the provisions of this subsection.

Member States shall also adapt those conditions to Article 62 as regards applications for registration submitted by economic operators belonging to a group and claiming resources made available to them by the other companies in the group. In such cases, those operators shall prove to the authority establishing the official list that they will have those resources at their disposal throughout the period of validity of the certificate attesting to their registration in the official list and that throughout the same period those companies continue to fulfil the qualitative selection requirements encompassed by the official list or certificate on which operators rely for their registration.

3. Economic operators registered on the official lists or having a certificate may, for each contract, submit to the contracting authority a certificate of registration issued by the competent authority or the certificate issued by the competent certification body. Those certificates shall state the references which enabled those economic operators to be registered in the list or to obtain certification and the classification given in that list.
4. Certified registration on official lists by the competent bodies or a certificate issued by the certification body shall constitute a presumption of suitability with regard to requirements for qualitative selection encompassed by the list or certificate.
5. Information that can be deduced from registration on official lists or certification shall not be questioned without justification. With regard to the payment of social security contributions and taxes, an additional certificate may be required of any registered economic operator whenever a contract is to be awarded.

The contracting authorities of other Member States shall apply paragraph 3 and the first subparagraph of this paragraph only in favour of economic operators established in the Member State holding the official list.

6. The requirements of proof for the criteria for qualitative selection encompassed by the list or certificate shall comply with Articles 59, 60 and, where appropriate, Article 61. For any registration of economic operators of other Member States in an official list or for their certification, no further proof or statements shall be required other than those requested of national economic operators.

Economic operators may request at any time their registration in an official list or for the issuance of a certificate. They shall be informed within a reasonably short period of time of the decision of the authority drawing up the list or of the competent certification body.

7. Economic operators from other Member States shall not be obliged to undergo such registration or certification in order to participate in a public contract. The contracting authorities shall recognise equivalent certificates from bodies established in other Member States. They shall also accept other equivalent means of proof.
8. Upon request, Member States shall make available to other Member States, in accordance with Article 88, any information relating to the documents produced as evidence that the economic operators fulfil the requirements to be registered in the list of approved economic operators or as evidence that economic operators from another Member State possess an equivalent certification. .

## **SUBSECTION 2**

### **REDUCTION OF NUMBERS OF CANDIDATES, TENDERS AND SOLUTIONS**

#### *Article 64*

#### *Reduction of the number of otherwise qualified candidates to be invited to participate*

1. In restricted procedures, competitive procedures with negotiation, competitive dialogue procedures and innovation partnerships, contracting authorities may limit the number of candidates meeting the selection criteria that they will invite to tender or to conduct a dialogue, provided a sufficient number of qualified candidates is available.

The contracting authorities shall indicate, in the contract notice or in the invitation to confirm interest, the objective and non-discriminatory criteria or rules they intend to apply, the minimum number of candidates they intend to invite and, where appropriate, the maximum number.

2. In the restricted procedure the minimum number of candidates shall be five. In the competitive procedure with negotiation, in the competitive dialogue procedure and in the innovation partnership the minimum shall be three. In any event the number of candidates invited shall be sufficient to ensure genuine competition.

The contracting authorities shall invite a number of candidates at least equal to the minimum number. Where the number of candidates meeting the selection criteria and the minimum levels of ability as referred to in Article 56(5) is below the minimum number, the contracting authority may continue the procedure by inviting the candidates with the required capabilities. In the context of the same procedure, the contracting authority shall not include other economic operators that did not request to participate, or candidates that do not have the required capabilities.

*Article 65*  
*Reduction of the number of tenders and solutions*

Where contracting authorities exercise the option of reducing the number of tenders to be negotiated as provided for in Article 27(5) or of solutions to be discussed as provided for in Article 28(4), they shall do so by applying the award criteria stated in the contract notice, in the specifications or in the descriptive document. In the final stage, the number arrived at shall make for genuine competition insofar as there are enough solutions or qualified candidates.

**SUBSECTION 3**  
**AWARD OF THE CONTRACT**

*Article 66*  
*Contract award criteria*

1. Without prejudice to national laws, regulations or administrative provisions concerning the remuneration of certain services, the criteria on which contracting authorities shall base the award of public contracts shall be one of the following:

- (a) the most economically advantageous tender;
- (b) the lowest cost.

Costs may be assessed, on the choice of the contracting authority, on the basis of the price only or using a cost-effectiveness approach, such as a life-cycle costing approach, under the conditions set out in Article 67.

2. The most economically advantageous tender referred to in point (a) of paragraph 1 from the point of view of the contracting authority shall be identified on the basis of criteria linked to the subject-matter of the public contract in question. Those criteria shall include, in addition to the price or costs referred to in point (b) of paragraph 1, other criteria linked to the subject-matter of the public contract in question, such as:

- (a) quality, including technical merit, aesthetic and functional characteristics, accessibility, design for all users, environmental characteristics and innovative character;
- (b) for service contracts and contracts involving the design of works, the organisation, qualification and experience of the staff assigned to performing the contract in question may be taken into consideration, with the consequence that, following the award of the contract, such staff may only be replaced with

the consent of the contracting authority, which must verify that replacements ensure equivalent organisation and quality;

- (c) after-sales service and technical assistance, delivery date and delivery period or period of completion;
  - (d) the specific process of production or provision of the requested works, supplies or services or of any other stage of its life cycle as referred to in point (22) of Article 2, to the extent that those criteria are specified in accordance with paragraph 4 and they concern factors directly involved in these processes and characterise the specific process of production or provision of the requested works, supplies or services.
3. Member States may provide that the award of certain types of contracts shall be based on the most economically advantageous tender as referred to in point (a) of paragraph 1 and in paragraph 2.
  4. Award criteria shall not confer an unrestricted freedom of choice on the contracting authority. They shall ensure the possibility of effective competition and shall be accompanied by requirements that allow the information provided by the tenderers to be effectively verified. Contracting authorities shall verify effectively, on the basis of the information and proof provided by the tenderers, whether the tenders meet the award criteria.
  5. In the case referred to in point (a) of paragraph 1 the contracting authority shall specify, in the contract notice, in the invitation to confirm interest, in the procurement documents or, in the case of a competitive dialogue, in the descriptive document, the relative weighting which it gives to each of the criteria chosen to determine the most economically advantageous tender.

Those weightings may be expressed by providing for a range with an appropriate maximum spread.

Where weighting is not possible for objective reasons, the contracting authority shall indicate the criteria in decreasing order of importance.

#### *Article 67* *Life-cycle costing*

1. Life-cycle costing shall to the extent relevant cover the following costs over the life cycle of a product, service or works as defined in point (22) of Article 2:
  - (a) internal costs, including costs relating to acquisition, such as production costs, use, such as energy consumption, maintenance costs, and end of life, such as collection and recycling costs and
  - (b) external environmental costs directly linked to the life cycle, provided their monetary value can be determined and verified, which may include the cost of emissions of greenhouse gases and of other pollutant emissions and other climate change mitigation costs.

2. Where contracting authorities assess the costs using a life-cycle costing approach, they shall indicate in the procurement documents the methodology used for the calculation of the life-cycle costs. The methodology used must fulfil all of the following conditions:
  - (a) it has been drawn up on the basis of scientific information or is based on other objectively verifiable and non-discriminatory criteria;
  - (b) it has been established for repeated or continuous application;
  - (c) it is accessible to all interested parties.

Contracting authorities shall allow economic operators, including economic operators from third countries, to apply a different methodology for establishing the life-cycle costs of their offer, provided that they prove that this methodology complies with the requirements set out in points a, b and c and is equivalent to the methodology indicated by the contracting authority.

3. Whenever a common methodology for the calculation of life-cycle costs is adopted as part of a legislative act of the Union, including by delegated acts pursuant to sector specific legislation, it shall be applied where life-cycle costing is included in the award criteria referred to in Article 66(1).

A list of such legislative and delegated acts is set out in Annex XV. The Commission shall be empowered to adopt delegated acts in accordance with Article 89 concerning the update of this list, when on the basis of the adoption of new legislation, repeal or modification of such legislation, such amendments prove necessary.

#### *Article 68* *Impediments to award*

Contracting authorities shall not award the contract to the tenderer submitting the best tender where one of the following conditions is fulfilled:

- (a) the tenderer is not able to provide the certificates and documents required pursuant to Articles 59, 60 and 61;
- (b) the declaration provided by the tenderer pursuant to Article 22 is false;
- (c) the declaration provided by the tenderer pursuant to Article 21(3)(b) is false.

#### *Article 69* *Abnormally low tenders*

1. Contracting authorities shall require economic operators to explain the price or costs charged, where all of the following conditions are fulfilled:
  - (a) the price or cost charged is more than 50 % lower than the average price or costs of the remaining tenders

- (b) the price or cost charged is more than 20 % lower than the price or costs of the second lowest tender;
  - (c) at least five tenders have been submitted.
- 2. Where tenders appear to be abnormally low for other reasons, contracting authorities may also request such explanations.
- 3. The explanations referred to in paragraphs 1 and 2 may in particular relate to:
  - (a) the economics of the construction method, the manufacturing process or the services provided;
  - (b) the technical solutions chosen or any exceptionally favourable conditions available to the tenderer for the execution of the work or for the supply of the goods or services;
  - (c) the originality of the work, supplies or services proposed by the tenderer;
  - (d) compliance, at least in an equivalent manner, with obligations established by Union legislation in the field of social and labour law or environmental law or of the international social and environmental law provisions listed in Annex XI or, where not applicable, with other provisions ensuring an equivalent level of protection;
  - (e) the possibility of the tenderer obtaining State aid.
- 4. The contracting authority shall verify the information provided by consulting the tenderer. It may only reject the tender where the evidence does not justify the low level of price or costs charged, taking into account the elements referred to in paragraph 3.

Contracting authorities shall reject the tender, where they have established that the tender is abnormally low because it does not comply with obligations established by Union legislation in the field of social and labour law or environmental law or by the international social and environmental law provisions listed in Annex XI.
- 5. Where a contracting authority establishes that a tender is abnormally low because the tenderer has obtained State aid, the tender may be rejected on that ground alone only after consultation with the tenderer where the latter is unable to prove, within a sufficient time limit fixed by the contracting authority, that the aid in question was compatible with the internal market within the meaning of Article 107 of the Treaty. Where the contracting authority rejects a tender in those circumstances, it shall inform the Commission thereof.
- 6. Upon request, Member States shall make available to other Member States, in accordance with Article 88, any information relating to the evidence and documents produced in relation to details listed in paragraph 3.

## **CHAPTER IV**

### ***Contract performance***

#### *Article 70*

##### *Conditions for performance of contracts*

Contracting authorities may lay down special conditions relating to the performance of a contract, provided that they are indicated in the call for competition or in the specifications. Those conditions may, in particular, concern social and environmental considerations. They may also include the requirement that economic operators foresee compensations for risks of price increases that are the result of price fluctuations (hedging) and that could substantially impact the performance of a contract.

#### *Article 71*

##### *Subcontracting*

1. In the procurement documents, the contracting authority may ask or may be required by a Member State to ask the tenderer to indicate in its tender any share of the contract it may intend to subcontract to third parties and any proposed subcontractors.
2. Member States may provide that at the request of the subcontractor and where the nature of the contract so allows, the contracting authority shall transfer due payments directly to the subcontractor for services, supplies or works provided to the main contractor. In such case, Member States shall put in place appropriate mechanisms permitting the main contractor to object to undue payments. The arrangements concerning that mode of payment shall be set out in the procurement documents.
3. Paragraphs 1 and 2 shall be without prejudice to the question of the principal economic operator's liability.

#### *Article 72*

##### *Modification of contracts during their term*

1. A substantial modification of the provisions of a public contract during its term shall be considered as a new award for the purposes of this Directive and shall require a new procurement procedure in accordance with this Directive.
2. A modification of a contract during its term shall be considered substantial within the meaning of paragraph 1, where it renders the contract substantially different from the one initially concluded. In any case, without prejudice to paragraph 3 and 4, a modification shall be considered substantial where one of the following conditions is met:
  - (a) the modification introduces conditions which, had they been part of the initial procurement procedure, would have allowed for the selection of other

candidates than those initially selected or would have allowed for awarding the contract to another tenderer;

- (b) the modification changes the economic balance of the contract in favour of the contractor;
- (c) the modification extends the scope of the contract considerably to encompass supplies, services or works not initially covered.

3. The replacement of the contractual partner shall be considered a substantial modification within the meaning of paragraph 1.

However, the first subparagraph shall not apply in the event of universal or partial succession into the position of the initial contractor, following corporate restructuring operations or insolvency, of another economic operator that fulfils the criteria for qualitative selection initially established provided that this does not entail other substantial modifications to the contract and is not aimed at circumventing the application of this Directive.

4. Where the value of a modification can be expressed in monetary terms, the modification shall not be considered to be substantial within the meaning of paragraph 1, where its value does not exceed the thresholds set out in Article 4 and where it is below 5% of the price of the initial contract, provided that the modification does not alter the overall nature of the contract. Where several successive modifications are made, the value shall be assessed on the basis of the cumulative value of the successive modifications.

5. Contract modifications shall not be considered substantial within the meaning of paragraph 1 where they have been provided for in the procurement documents in clear, precise and unequivocal review clauses or options. Such clauses shall state the scope and nature of possible modifications or options as well as the conditions under which they may be used. They shall not provide for modifications or options that would alter the overall nature of the contract.

6. By way of derogation from paragraph 1, a substantial modification shall not require a new procurement procedure where the following cumulative conditions are fulfilled:

- (a) the need for modification has been brought about by circumstances which a diligent contracting authority could not foresee;
- (b) the modification does not alter the overall nature of the contract;
- (c) any increase in price is not higher than 50% of the value of the original contract.

Contracting authorities shall publish in the *Official Journal of the European Union* a notice on such modifications. Such notices shall contain the information set out in Annex VI part G and be published in accordance with Article 49.

7. Contracting authorities shall not have recourse to modifications of the contract in the following cases:

- (a) where the modification would aim at remedying deficiencies in the performance of the contractor or the consequences, which can be remedied through the enforcement of contractual obligations;
- (b) where the modification would aim at compensating risks of price increases that have been hedged by the contractor.

*Article 73*  
*Termination of contracts*

Member States shall ensure that contracting authorities have the possibility, under the conditions determined by the applicable national contract law, to terminate a public contract during its term, where one of the following conditions is fulfilled:

- (a) the exceptions provided for in Article 11 cease to apply following a private participation in the legal person awarded the contract pursuant to Article 11(4);
- (b) a modification of the contract constitutes a new award within the meaning of Article 72;
- (c) the Court of Justice of the European Union finds, in a procedure pursuant to Article 258 of the Treaty, that a Member State has failed to fulfil its obligations under the Treaties due to the fact that a contracting authority belonging to that Member State has awarded the contract in question without complying with its obligations under the Treaties and this Directive.

## **Title III**

### **Particular procurement regimes**

#### **CHAPTER I**

##### *Social and other specific services*

*Article 74*  
*Award of contracts for social and other specific services*

Contracts for social and other specific services listed in Annex XVI shall be awarded in accordance with this Chapter, where the value of the contracts is equal to or greater than the threshold indicated in Article 4 (d).

*Article 75*  
*Publication of notices*

1. Contracting authorities intending to award a public contract for the services referred to in Article 74 shall make known their intention by means of a contract notice.
2. Contracting authorities that have awarded a public contract for the services referred to in Article 74 shall make known the results of the procurement procedure by means of a contract award notice.
3. The notices referred to in paragraphs 1 and 2 shall contain the information referred to in Annexes VI Part H and I, in accordance with the standard forms.

The Commission shall establish the standard forms. Those implementing acts shall be adopted in accordance with the advisory procedure referred to in Article 91.

4. The notices referred to in paragraphs 1 and 2 shall be published in accordance with Article 49.

*Article 76*  
*Principles of awarding contracts*

1. Member States shall put in place appropriate procedures for the award of contracts subject to this Chapter, ensuring full compliance with the principles of transparency and equal treatment of economic operators and allowing contracting authorities to take into account the specificities of the services in question.
2. Member States shall ensure that contracting authorities may take into account the need to ensure quality, continuity, accessibility, availability and comprehensiveness of the services, the specific needs of different categories of users, the involvement and empowerment of users and innovation. Member States may also provide that the

choice of the service provider shall not be made solely on the basis of the price for the provision of the service.

## **CHAPTER II**

### ***RULES GOVERNING DESIGN CONTESTS***

#### *Article 77* *General provisions*

1. The rules for the organisation of design contests shall be in conformity with this Chapter and shall be communicated to those interested in participating in the contest.
2. The admission of participants to design contests shall not be limited:
  - (a) by reference to the territory or part of the territory of a Member State;
  - (b) on the grounds that, under the law of the Member State in which the contest is organised, they would be required to be either natural or legal persons.

#### *Article 78* *Scope*

This Chapter shall apply to:

- (a) design contests organised as part of a procedure leading to the award of a public service contract;
- (b) design contests with prizes or payments to participants.

In the cases referred to in point (a), the threshold referred to in Article 4 is calculated on the basis of the estimated value net of VAT of the public service contract, including any possible prizes or payments to participants.

#### *Article 79* *Notices*

1. Contracting authorities that intend to carry out a design contest shall make known their intention by means of a contest notice.

Where they intend to award a subsequent service contract pursuant to Article 30(3), this shall be indicated in the contest notice.

2. Contracting authorities that have held a design contest shall send a notice of the results of the contest in accordance with Article 49 and shall be able to prove the date of dispatch.

Where the release of information on the outcome of the contest would impede law enforcement, be contrary to the public interest, or prejudice the legitimate

commercial interests of a particular enterprise, whether public or private, or might prejudice fair competition between service providers, such information may be withheld from publication.

3. The notices referred to in paragraphs 1 and 2 of this Article shall be published in accordance with Article 49(2) to (6) and Article 50. They shall include the information set out in Annex VI part G in the format of the standard forms.

The Commission shall establish the standard forms. Those implementing acts shall be adopted in accordance with the advisory procedure referred to in Article 91.

#### *Article 80*

##### *Rules on the organisation of design contests and the selection of participants*

1. When organising design contests, contracting authorities shall apply procedures which are adapted to the provisions of this Directive.
2. Where design contests are restricted to a limited number of participants, the contracting authorities shall lay down clear and non-discriminatory selection criteria. In any event, the number of candidates invited to participate shall be sufficient to ensure genuine competition.

#### *Article 81*

##### *Composition of the jury*

The jury shall be composed exclusively of natural persons who are independent of participants in the contest. Where a particular professional qualification is required from participants in a contest, at least a third of the members of the jury shall have that qualification or an equivalent qualification.

#### *Article 82*

##### *Decisions of the jury*

1. The jury shall be autonomous in its decisions or opinions.
2. The jury shall examine the plans and projects submitted by the candidates anonymously and solely on the basis of the criteria indicated in the contest notice.
3. The jury shall record its ranking of projects in a report, signed by its members, made according to the merits of each project, together with its remarks and any points that may need clarification.
4. Anonymity shall be observed until the jury has reached its opinion or decision.
5. Candidates may be invited, if need be, to answer questions that the jury has recorded in the minutes to clarify any aspect of the projects.
6. Complete minutes shall be drawn up of the dialogue between jury members and candidates.

# TITLE IV

## GOVERNANCE

### *Article 83* *Enforcement*

In conformity with Council Directive 89/665/EEC, Member States shall ensure correct application of this Directive by effective, available and transparent mechanisms which complement the system in place for the review of decisions taken by contracting authorities.

### *Article 84* *Public oversight*

1. Member States shall appoint a single independent body responsible for the oversight and coordination of implementation activities (hereinafter 'the oversight body'). Member States shall inform the Commission of their designation.

All contracting authorities shall be subject to such oversight.

2. The competent authorities involved in the implementation activities shall be organised in such a manner that conflicts of interests are avoided. The system of public oversight shall be transparent. For this purpose, all guidance and opinion documents and an annual report illustrating the implementation and application of rules laid down in this Directive shall be published.

The annual report shall include the following:

- (a) an indication of the success rate of small and medium-sized enterprises (SMEs) in public procurement; where the percentage is lower than 50 % in terms of values of contracts awarded to SMEs, the report shall provide an analysis of the reasons therefore;
  - (b) a global overview of the implementation of sustainable procurement policies, including on procedures taking into account considerations linked to the protection of the environment, social inclusion including accessibility for persons with disabilities, or fostering innovation;
  - (c) information on the monitoring and follow-up of breaches to procurement rules affecting the budget of the Union in accordance with paragraphs 3 to 5 of the present article;
  - (d) centralized data about reported cases of fraud, corruption, conflict of interests and other serious irregularities in the field of public procurement, including those affecting projects cofinanced by the budget of the Union.
3. The oversight body shall be responsible for the following tasks:

- (a) monitoring the application of public procurement rules and the related practice by contracting authorities and in particular by central purchasing bodies;
- (b) providing legal advice to contracting authorities on the interpretation of public procurement rules and principles and on the application of public procurement rules in specific cases;
- (c) issuing own-initiative opinions and guidance on questions of general interest pertaining to the interpretation and application of public procurement rules, on recurring questions and on systemic difficulties related to the application of public procurement rules, in the light of the provisions of this Directive and of the relevant case-law of the Court of Justice of the European Union;
- (d) establishing and applying comprehensive, actionable 'red flag' indicator systems to prevent, detect and adequately report instances of procurement fraud, corruption, conflict of interest and other serious irregularities;
- (e) drawing the attention of the national competent institutions, including auditing authorities, to specific violations detected and to systemic problems;
- (f) examining complaints from citizens and businesses on the application of public procurement rules in specific cases and transmitting the analysis to the competent contracting authorities, which shall have the obligation to take it into account in their decisions or, where the analysis is not followed, to explain the reasons for disregarding it;
- (g) monitoring the decisions taken by national courts and authorities following a ruling given by the Court of Justice of the European Union on the basis of Article 267 of the Treaty or findings of the European Court of Auditors establishing violations of Union public procurement rules related to projects cofinanced by the Union; the oversight body shall report to the European Anti-Fraud Office any infringement to Union procurement procedures where these were related to contracts directly or indirectly funded by the European Union.

The tasks referred to in point (e) shall be without prejudice to the exercise of rights of appeal under national law or under the system established on the basis of Directive 89/665/EEC.

Member States shall empower the oversight body to seize the jurisdiction competent according to national law for the review of contracting authorities' decisions where it has detected a violation in the course of its monitoring and legal advising activity.

4. Without prejudice to the general procedures and working methods established by the Commission for its communications and contacts with Member States, the oversight body shall act as a specific contact point for the Commission when it monitors the application of Union law and the implementation of the budget from the Union on the basis of Article 17 of the Treaty on the European Union and Article 317 of the Treaty on the Functioning of the European Union. It shall report to the Commission any violation of this Directive in procurement procedures for the award of contracts directly or indirectly funded by the Union.

The Commission may in particular refer to the oversight body the treatment of individual cases where a contract is not yet concluded or a review procedure can still be carried out. It may also entrust the oversight body with the monitoring activities necessary to ensure the implementation of the measures to which Member States are committed in order to remedy a violation of Union public procurement rules and principles identified by the Commission.

The Commission may require the oversight body to analyse alleged breaches to Union public procurement rules affecting projects co-financed by the budget of the Union. The Commission may entrust the oversight body to follow-up certain cases and to ensure that the appropriate consequences of breaches to Union public procurement rules affecting projects co-financed are taken by the competent national authorities which will be obliged to follow its instructions.

5. The investigation and enforcement activities carried out by the oversight body to ensure that contracting authorities' decisions comply with this Directive and the principles of the Treaty shall not replace or prejudice the institutional role of the Commission as guardian of the Treaty. When the Commission decides to refer the treatment of an individual case pursuant to paragraph 4, it shall also retain the right to intervene in accordance with the powers conferred to it by the Treaty.
6. Contracting authorities shall transmit to the national oversight body the full text of all concluded contracts with a value equal to or greater than
  - (a) 1 000 000 EUR in the case of public supply contracts or public service contracts;
  - (b) 10 000 000 EUR in the case of public works contracts.
7. Without prejudice to the national law concerning access to information, and in accordance with national and EU legislation on data protection, the oversight body shall, upon written request, give unrestricted and full direct access, free of charge, to the concluded contracts referred to in paragraph 6. Access to certain parts of the contracts may be refused where their disclosure would impede law enforcement or otherwise be contrary to the public interest, would harm the legitimate commercial interests of economic operators, public or private, or might prejudice fair competition between them.

Access to the parts that may be released shall be given within a reasonable delay and no later than 45 days from the date of the request.

The applicants filing a request for access to a contract shall not need to show any direct or indirect interest related to that particular contract. The recipient of information should be allowed to make it public.

8. A summary of all the activities carried out by the oversight body in accordance with paragraphs 1 to 7 shall be included in the annual report referred to in paragraph 2.

*Article 85*  
*Individual reports on procedures for the award of contracts*

For every contract or framework agreement, and every time a dynamic purchasing system is established, contracting authorities shall draw up a written report which shall include at least the following:

- (a) the name and address of the contracting authority, the subject-matter and value of the contract, framework agreement or dynamic purchasing system;
- (b) the names of the successful candidates or tenderers and the reasons for their selection;
- (c) the names of the candidates or tenderers rejected and the reasons for their rejection;
- (d) the reasons for the rejection of tenders found to be abnormally low;
- (e) the name of the successful tenderer and the reasons why its tender was selected and, where known, the share of the contract or framework agreement which the successful tenderer intends to subcontract to third parties;
- (f) for negotiated procedures without prior publication, the circumstances referred to in Article 30 which justify the use of this procedure;
- (g) where necessary, the reasons why the contracting authority has decided not to award a contract or framework agreement or to establish a dynamic purchasing system
- (h) where applicable, conflicts of interests detected and subsequent measures taken.

The contracting authorities shall document the progress of all procurement procedures, whether or not those are conducted by electronic means. To that end, they shall document all stages in the procurement procedure, including all communications with economic operators and internal deliberations, preparation of the tenders, dialogue or negotiation if any, selection and award of the contract.

The report, or its main elements, shall be communicated to the Commission or to the national oversight body where they so request.

*Article 86*  
*National reporting and lists of contracting authorities*

1. The bodies established or appointed in accordance with Article 84 shall forward to the Commission an implementation and statistical report on each year, based on a standard form, not later than 31 October of the following year.
2. The report referred to in paragraph 1 shall contain at least the following information:
  - (a) a complete and up-to-date list of all central government authorities, sub-central contracting authorities and bodies governed by public law, including sub-central authorities and associations of contracting authorities awarding public contracts or framework agreements, indicating for each authority the unique

identification number where such number is provided for in national legislation; this list shall be grouped by type of authority;

- (b) a complete and up-to-date list of all central purchasing bodies;
- (c) for all contracts above the thresholds laid down in Article 4 of this Directive:
  - (i) the number and value of contracts awarded broken down for each type of authority by procedure and by works, supplies and services identified by division of the CPV nomenclature;
  - (ii) where the contracts have been concluded under the negotiated procedure without prior publication, the data referred to in point (i) shall also be broken down according to the circumstances referred to in Article 30 and shall specify the number and value of contracts awarded, by Member State and third country of the successful contractor;
- (d) for all contracts which fall below the thresholds laid down in Article 4 of this Directive, but would be covered by this Directive if their value exceeded the threshold, the number and value of contracts awarded broken down by each type of authority.

3. The Commission shall be empowered to adopt delegated acts in accordance with Article 89 to amend Annex I, in order to update the list of contracting authorities following notifications from Member States, where such amendments prove necessary to correctly identify contracting authorities;

The Commission may periodically publish the list of bodies governed by public law transmitted according to point (a) of paragraph 2 for information in the *Official Journal of the European Union*.

4. Member States shall make available to the Commission information on their institutional organisation related to the implementation, monitoring and enforcement of this Directive, as well as on national initiatives taken to provide guidance on or assist in implementation of Union rules on public procurement, or to respond to challenges confronting the implementation of those rules.
5. The Commission shall establish the standard form for the annual implementation and statistical report referred to in paragraph 1. Those implementing acts shall be adopted in accordance with the advisory procedure referred to in Article 91.

#### *Article 87*

##### *Assistance to contracting authorities and businesses*

1. Member States shall make available technical support structures in order to provide legal and economic advice, guidance and assistance to contracting authorities in preparing and carrying out procurement procedures. Member States shall also ensure that each contracting authority can obtain competent assistance and advice on individual questions.

2. With a view to improving access to public procurement for economic operators, in particular SMEs, and in order to facilitate correct understanding of the provisions of this Directive, Member States shall ensure that appropriate assistance can be obtained, including by electronic means or using existing networks dedicated to business assistance.
3. Specific administrative assistance shall be available to economic operators intending to participate in a procurement procedure in another Member State. Such assistance shall at least cover administrative requirements in the Member State concerned, as well as possible obligations related to electronic procurement.

Member States shall ensure that interested economic operators have easy access to appropriate information on the obligations relating to taxes, environmental protection, and to social and labour law obligations, which are in force in the Member State, in the region or locality where the works are to be carried out or the services are to be provided and which will be applicable to the works carried out on site or to the services provided during the performance of the contract.

4. For the purposes of paragraphs 1, 2 and 3, Member States may appoint a single body or several bodies or administrative structures. Member States shall ensure due coordination between those bodies and structures.

#### *Article 88* *Administrative cooperation*

1. Member States shall provide mutual assistance to each other, and shall put in place measures for effective cooperation with one another, in order to ensure exchange of information on issues referred to in Articles 40, 41, 42, 55, 57, 59, 60, 61, 63 and 69. They shall ensure the confidentiality of the information which they exchange.
2. The competent authorities of all Member States concerned shall exchange information in compliance with personal data protection legislation provided for in Directives 95/46/EC of the European Parliament and of the Council<sup>42</sup> and 2002/58/EC of the European Parliament and of the Council<sup>43</sup>.
3. For the purposes of this Article, Member States shall designate one or more liaison points, the contact details of which shall be communicated to the other Member States, the oversight bodies and the Commission. Member States shall publish and regularly update the list of liaison points. The oversight body shall be in charge of the coordination of such liaison points.
4. The exchange of information shall take place via the Internal Market Information system established pursuant to Regulation (EU) N° XXX/XXXX of the European Parliament and Council<sup>44</sup> [proposal for a Regulation of the European Parliament and Council on the administrative cooperation through the Internal Market Information System ('the IMI Regulation') COM(2011) 522]. Member States shall supply

information requested by other Member States within the shortest possible period of time.

# TITLE V

## DELEGATED POWERS, IMPLEMENTING POWERS AND FINAL PROVISIONS

### *Article 89*

#### *Exercise of the delegation of powers*

1. The power to adopt delegated acts is conferred on the Commission subject to the conditions laid down in this Article.
2. The delegation of power referred to in Articles 6, 13, 19, 20, 23, 54, 59, 67 and 86 shall be conferred on the Commission for an indeterminate period of time from the [date of entry into force of the present Directive].
3. The delegation of power referred to in Articles 6, 13, 19, 20, 23, 54, 59, 67 and 86 may be revoked at any time by the European Parliament or by the Council. A revocation decision shall put an end to the delegation of the power specified in that decision. It shall take effect the day following the publication of the decision in the *Official Journal of the European Union* or at a later date specified therein. It shall not affect the validity of any delegated acts already in force.
4. As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.
5. A delegated act adopted pursuant to this Article shall enter into force only where no objection has been expressed either by the European Parliament or by the Council within a period of two months of notification of the act to the European Parliament and the Council or if, before the expiry of that period, the European Parliament and the Council have both informed the Commission that they will not object. That period shall be extended by two months at the initiative of the European Parliament or the Council.

### *Article 90*

#### *Urgency procedure*

1. Delegated acts adopted under this Article shall enter into force without delay and shall apply as long as no objection is expressed in accordance with paragraph 2. The notification of a delegated act to the European Parliament and to the Council shall state the reasons for the use of the urgency procedure.
2. Either the European Parliament or the Council may object to a delegated act in accordance with the procedure referred to in Article 89(5). In such a case, the Commission shall repeal the act without delay following the notification of the decision to object by the European Parliament or the Council.

*Article 91*  
*Committee procedure*

1. The Commission shall be assisted by the Advisory Committee for Public Contracts established by Council Decision 71/306/EEC<sup>45</sup>. That committee shall be a committee within the meaning of Regulation (EU) No 182/2011.
2. Where reference is made to this Article, Article 4 of Regulation (EU) No 182/2011 shall apply.

*Article 92*  
*Transposition*

1. Member States shall bring into force the laws, regulations and administrative provisions necessary to comply with this Directive by 30 June 2014 at the latest. They shall forthwith communicate to the Commission the text of those provisions.

When Member States adopt those provisions, they shall contain a reference to this Directive or be accompanied by such a reference on the occasion of their official publication. Member States shall determine how such reference is to be made.

2. Member States shall communicate to the Commission the text of the main provisions of national law which they adopt in the field covered by this Directive.

*Article 93*  
*Repeals*

Directive 2004/18/EC shall be repealed with effect from 30 June 2014.

References to the repealed Directive shall be construed as references to this Directive and shall be read in accordance with the correlation table in Annex XVII.

*Article 94*  
*Review*

The Commission shall review the economic effects on the internal market resulting from the application of the thresholds set in Article 4 and report thereon to the European Parliament and the Council by 30 June 2017.

In the event of any change to the threshold amounts applicable under the Agreement, the report shall, where appropriate, be followed by a legislative proposal amending the thresholds set out in this Directive.

---

<sup>45</sup> OJ L 185, 16.8.1971, p. 15.

*Article 95*  
*Entry into force*

This Directive shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

*Article 96*  
*Addressees*

This Directive is addressed to the Member States.

Done at Brussels,

*For the European Parliament*  
*The President*

*For the Council*  
*The President*

## L

- Lagrådet
- Lantbruksuniversitet, Sveriges
- Lantmäteriverket
- Linköpings universitet
- Livrustkammaren, Skoklosters slott och Hallwylska museet
- Livsmedelsverk, statens
- Livsmedelsekonomiska institutet
- Ljud- och bildarkiv, statens
- Lokala säkerhetsnämnderna vid kärnkraftverk
- Lotteriinspektionen

- Luftfartsverket
- Luftfartsstyrelsen
- Luleå tekniska universitet
- Lunds universitet
- Läkemedelsverket
- Läkemedelsförmånsnämnden
- Länsrätterna
- Länsstyrelserna
- Lärarhögskolan i Stockholm

## M

- Malmö högskola
- Manillaskolan
- Maritima muséer, statens
- Marknadsdomstolen
- Medlingsinstitutet
- Meteorologiska och hydrologiska institut, Sveriges
- Migrationsverket
- Militärhögskolor
- Mittuniversitetet
- Moderna museet
- Museer för världskultur, statens
- Musikaliska Akademien
- Musiksamlingar, statens
- Myndigheten för handikappolitisk samordning
- Myndigheten för internationella adoptionsfrågor
- Myndigheten för skolutveckling
- Myndigheten för kvalificerad yrkesutbildning

- Myndigheten för nätverk och samarbete inom högre utbildning
- Myndigheten för Sveriges nätuniversitet
- Myndigheten för utländska investeringar i Sverige
- Mälardalens högskola

## N

- Nationalmuseum
- Nationellt centrum för flexibelt lärande
- Naturhistoriska riksmuseet
- Naturvårdsverket
- Nordiska Afrikainstitutet
- Notarienämnden
- Nämnd för arbetstagares uppfinningar, statens
- Nämnden för statligt stöd till trossamfund
- Nämnden för styrelserepresentationsfrågor
- Nämnden mot diskriminering
- Nämnden för elektronisk förvaltning
- Nämnden för RH anpassad utbildning
- Nämnden för hemslöjdsfrågor

## O

- Oljekrisnämnden
- Ombudsmannen mot diskriminering på grund av sexuell läggning
- Ombudsmannen mot etnisk diskriminering
- Operahögskolan i Stockholm

## P

- Patent- och registreringsverket
- Patentbesvärsrätten
- Pensionsverk, statens

- Personregisternämnd statens, SPAR-nämnden
- Pliktverk, Totalförsvarets
- Polarforskningssekretariatet
- Post- och telestyrelsen
- Premiepensionsmyndigheten
- Presstödsnämnden

## R

- Radio- och TV-verket
- Rederinämnden
- Regeringskansliet
- Regeringsrätten
- Resegarantinämnden
- Registernämnden
- Revisorsnämnden
- Riksantikvarieämbetet
- Riksarkivet
- Riksbanken
- Riksdagsförvaltningen
- Riksdagens ombudsmän
- Riksdagens revisorer
- Riksgäldskontoret
- Rikshemvärnsrådet
- Rikspolisstyrelsen
- Riksrevisionen
- Rikstrafiken
- Riksutställningar, Stiftelsen
- Riksvärderingsnämnden

- Rymdstyrelsen
- Rådet för Europeiska socialfonden i Sverige
- Räddningsverk, statens
- Rättshjälpsmyndigheten
- Rättshjälpsnämnden
- Rättsmedicinalverket

## S

- Samarbetsnämnden för statsbidrag till trossamfund
- Sameskolstyrelsen och sameskolor
- Sametinget
- SIS, Standardiseringen i Sverige
- Sjöfartsverket
- Skatterättsnämnden
- Skatteverket
- Skaderegleringsnämnd, statens
- Skiljenämnden i vissa trygghetsfrågor
- Skogsstyrelsen
- Skogsvårdsstyrelserna
- Skogs och lantbruksakademien
- Skolverk, statens
- Skolväsendets överklagandenämnd
- Smittskyddsinstitutet
- Socialstyrelsen
- Specialpedagogiska institutet
- Specialskolemyndigheten
- Språk- och folkminnesinstitutet
- Sprängämnesinspektionen

- Statistiska centralbyrån
  - Statskontoret
  - Stockholms universitet
  - Stockholms internationella miljöinstitut
  - Strålsäkerhetsmyndigheten
  - Styrelsen för ackreditering och teknisk kontroll
  - Styrelsen för internationellt utvecklingssamarbete, SIDA
  - Styrelsen för Samefonden
  - Styrelsen för psykologiskt försvar
  - Stängselnämnden
  - Svenska institutet
  - Svenska institutet för europapolitiska studier
  - Svenska ESF rådet
  - Svenska Unescorådet
  - Svenska FAO kommittén
  - Svenska Språknämnden
  - Svenska Skeppshypotekskassan
  - Svenska institutet i Alexandria
  - Sveriges författarfond
  - Säkerhetspolisen
  - Säkerhets- och integritetsskyddsnämnden
  - Södertörns högskola
- T
- Taltidningsnämnden
  - Talboks- och punktskriftsbiblioteket
  - Teaterhögskolan i Stockholm
  - Tingsrätterna

- Tjänstepensions och grupplivnämnd, statens
- Tjänsteförslagsnämnden för domstolsväsendet
- Totalförsvarets forskningsinstitut
- Totalförsvarets pliktverk
- Tullverket
- Turistdelegationen

## U

- Umeå universitet
- Ungdomsstyrelsen
- Uppsala universitet
- Utlandslönenämnd, statens
- Utlänningsnämnden
- Utrikesförvaltningens antagningsnämnd
- Utrikesnämnden
- Utsädeskontroll, statens

## V

- Valideringsdelegationen
- Valmyndigheten
- Vatten- och avloppsnämnd, statens
- Vattenöverdomstolen
- Verket för förvaltningsutveckling
- Verket för högskoleservice
- Verket för innovationssystem (VINNOVA)
- Verket för näringslivsutveckling (NUTEK)
- Vetenskapsrådet
- Veterinärmedicinska anstalt, statens
- Veterinära ansvarsnämnden

- Väg- och transportforskningsinstitut, statens
- Vägverket
- Vänerskolan
- Växjö universitet
- Växsortsnämnd, statens

## Å

- Åklagarmyndigheten
- Åsbackaskolan

## Ö

- Örebro universitet
- Örlogsmannasällskapet
- Östervångsskolan
- Överbefälhavaren
- Överklagandenämnden för högskolan
- Överklagandenämnden för nämndemanna-uppdrag
- Överklagandenämnden för studiestöd
- Överklagandenämnden för totalförsvaret

**ANNEX II**  
**LIST OF THE ACTIVITIES REFERRED TO IN ARTICLE 2(8)(a)**

In the event of any difference of interpretation between the CPV and the NACE, the CPV nomenclature will apply.

NACE Rev. 1 <sup>(1)</sup>					CPV code
SECTION F			CONSTRUCTION		
Division	Group	Class	Subject	Notes	
45			Construction	This division includes: — construction of new buildings and works, restoring and common repairs.	45000000
	45.1		Site preparation		45100000
		45.11	Demolition and wrecking of buildings; earth moving	This class includes: — demolition of buildings and other structures, — clearing of building sites, — earth moving: excavation, landfill, levelling and grading of construction sites, trench digging, rock removal, blasting, etc. — site preparation for mining: — overburden removal and other development and preparation of mineral properties and sites.  This class also includes: — building site drainage. — drainage of agricultural or forestry land.	45110000
		45.12	Test drilling and boring	This class includes: — test drilling, test boring and core sampling for construction, geophysical, geological or similar purposes.	45120000

				<p>This class excludes:</p> <ul style="list-style-type: none"> <li>— drilling of production oil or gas wells, see 11.20.</li> <li>— water well drilling, see 45.25,</li> <li>— shaft sinking, see 45.25,</li> <li>— oil and gas field exploration, geophysical, geological and seismic surveying, see 74.20.</li> </ul>	
	45.2		Building of complete constructions or parts thereof; civil engineering		45200000
		45.21	General construction of buildings and civil engineering works	<p>This class includes:</p> <ul style="list-style-type: none"> <li>— construction of all types of buildings construction of civil engineering constructions,</li> <li>— bridges, including those for elevated highways, viaducts, tunnels and subways,</li> <li>— long-distance pipelines, communication and power lines,</li> <li>— urban pipelines, urban communication and power lines,</li> <li>— ancillary urban works,</li> <li>— assembly and erection of prefabricated constructions on the site.</li> </ul> <p>This class excludes:</p> <ul style="list-style-type: none"> <li>— service activities incidental to oil and gas extraction, see 11.20,</li> <li>— erection of complete prefabricated constructions from self-manufactured parts not of concrete, see divisions 20, 26 and 28,</li> <li>— construction work, other than buildings, for stadiums, swimming pools, gymnasiums, tennis courts, golf courses and other sports</li> </ul>	<p>45210000</p> <p>Except:</p> <ul style="list-style-type: none"> <li>- 45213316</li> <li>45220000</li> <li>45231000</li> <li>45232000</li> </ul>

				installations, see 45.23, — building installation, see 45.3, — building completion, see 45.4, — architectural and engineering activities, see 74.20, — project management for construction, see 74.20.	
		45.22	Erection of roof covering and frames	This class includes: — erection of roofs, — roof covering, — waterproofing.	45261000
		45.23	Construction of highways, roads, airfields and sport facilities	This class includes: — construction of highways, streets, roads, other vehicular and pedestrian ways, — construction of railways, — construction of airfield runways, — construction work, other than buildings, for stadiums, swimming pools, gymnasiums, tennis courts, golf courses and other sports installations, — painting of markings on road surfaces and car parks.  This class excludes: — preliminary earth moving, see 45.11.	45212212 and DA03 45230000 except: - 45231000 - 45232000 - 45234115
		45.24	Construction of water projects	This class includes — construction of: — waterways, harbour and river works, pleasure ports (marinas), locks, etc., — dams and dykes, — dredging,	45240000

				— subsurface work.	
		45.25	Other construction work involving special trades	<p>This class includes:</p> <ul style="list-style-type: none"> <li>— construction activities specialising in one aspect common to different kinds of structures, requiring specialised skill or equipment,</li> <li>— construction of foundations, including pile driving,</li> <li>— water well drilling and construction, shaft sinking,</li> <li>— erection of non-self-manufactured steel elements,</li> <li>— steel bending,</li> <li>— bricklaying and stone setting,</li> <li>— scaffolds and work platform erecting and dismantling, including renting of scaffolds and work platforms,</li> <li>— erection of chimneys and industrial ovens.</li> </ul> <p>This class excludes:</p> <ul style="list-style-type: none"> <li>— renting of scaffolds without erection and dismantling, see 71.32</li> </ul>	45250000 45262000
	45.3		Building installation		45300000
		45.31	Installation of electrical wiring and fittings	<p>This class includes:</p> <p>installation in buildings or other construction projects of:</p> <ul style="list-style-type: none"> <li>— electrical wiring and fittings,</li> <li>— telecommunications systems,</li> <li>— electrical heating systems,</li> <li>— residential antennas and aerials,</li> <li>— fire alarms,</li> </ul>	45213316 45310000 Except: - 45316000

				<ul style="list-style-type: none"> <li>— burglar alarm systems,</li> <li>— lifts and escalators,</li> <li>— lightning conductors, etc.</li> </ul>	
		45.32	Insulation work activities	<p>This class includes:</p> <ul style="list-style-type: none"> <li>— installation in buildings or other construction projects of thermal, sound or vibration insulation.</li> </ul> <p>This class excludes:</p> <ul style="list-style-type: none"> <li>— waterproofing, see 45.22.</li> </ul>	45320000
		45.33	Plumbing	<p>This class includes:</p> <ul style="list-style-type: none"> <li>— installation in buildings or other construction projects of:</li> <li>— plumbing and sanitary equipment,</li> <li>— gas fittings,</li> <li>— heating, ventilation, refrigeration or air-conditioning equipment and ducts,</li> <li>— sprinkler systems.</li> </ul> <p>This class excludes:</p> <ul style="list-style-type: none"> <li>— installation of electrical heating systems, see 45.31.</li> </ul>	45330000
		45.34	Other building installation	<p>This class includes:</p> <ul style="list-style-type: none"> <li>— installation of illumination and signalling systems for roads, railways, airports and harbours,</li> <li>— installation in buildings or other construction projects of fittings and fixtures n.e.c.</li> </ul>	45234115 45316000 45340000
	45.4		Building completion		45400000
		45.41	Plastering	<p>This class includes:</p>	45410000

				— application in buildings or other construction projects of interior and exterior plaster or stucco, including related lathing materials.	
		45.42	Joinery installation	<p>This class includes:</p> <ul style="list-style-type: none"> <li>— installation of not self-manufactured doors, windows, door and window frames, fitted kitchens, staircases, shop fittings and the like, of wood or other materials,</li> <li>— interior completion such as ceilings, wooden wall coverings, movable partitions, etc.</li> </ul> <p>This class excludes:</p> <ul style="list-style-type: none"> <li>— laying of parquet and other wood floor coverings, see 45.43.</li> </ul>	45420000
		45.43	Floor and wall covering	<p>This class includes:</p> <ul style="list-style-type: none"> <li>— laying, tiling, hanging or fitting in buildings or other construction projects of:</li> <li>—</li> <li>— ceramic, concrete or cut stone wall or floor tiles,</li> <li>— parquet and other wood floor coverings carpets and linoleum floor coverings,</li> <li>— including of rubber or plastic,</li> <li>— terrazzo, marble, granite or slate floor or wall coverings,</li> <li>— wallpaper.</li> </ul>	45430000
		45.44	Painting and glazing	<p>This class includes:</p> <ul style="list-style-type: none"> <li>— interior and exterior painting of buildings,</li> <li>— painting of civil engineering structures,</li> <li>— installation of glass, mirrors, etc.</li> </ul> <p>This class excludes:</p>	45440000

				— installation of windows, see 45.42,	
		45.45	Other building completion	<p>This class includes:</p> <p>— installation of private swimming pools,</p> <p>— steam cleaning, sand blasting and similar activities for building exteriors,</p> <p>— other building completion and finishing work n.e.c.</p> <p>This class excludes:</p> <p>— interior cleaning of buildings and other structures, see 74.70.</p>	45212212 and DA04 45450000
	45.5		Renting of construction or demolition equipment with operator		45500000
		45.50	Renting of construction or demolition equipment with operator	<p>This class excludes:</p> <p>— renting of construction or demolition machinery and equipment without operators, see 71.32.</p>	45500000
<p>(1) Council Regulation (EEC) No 3037/90 of 9 October 1990 on the statistical classification of economic activities in the European Community (OJ L 293, 24.10.1990, p. 1), regulation as amended by Commission Regulation (EEC) No 761/93 (OJ L 83, 3.4.1993, p. 1).</p>					

**ANNEX III**  
**LIST OF PRODUCTS REFERRED TO IN ARTICLE 4(b) WITH REGARD TO**  
**CONTRACTS AWARDED BY CONTRACTING AUTHORITIES IN THE FIELD OF**  
**DEFENCE**

The only text applicable for the purposes of this Directive is that in Annex 1 point 3 of the Government Procurement Agreement on which the following indicative list of products is based:

Chapter 25:	Salt, sulphur, earths and stone, plastering materials, lime and cement
Chapter 26:	Metallic ores, slag and ash
Chapter 27:	Mineral fuels, mineral oils and products of their distillation, bituminous substances, mineral waxes  except:  ex 27.10: special engine fuels
Chapter 28:	emicals, organic and inorganic compounds of precious metals, of rare-earth metals, of elements and of isotopes  except:  ex 28.09: explosives  ex 28.13: explosives  ex 28.14: tear gas  ex 28.28: explosives  ex 28.32: explosives  ex 28.39: explosives  ex 28.50: toxic products  ex 28.51: toxic products  ex 28.54: explosives
Chapter 29:	Organic chemicals  except:  ex 29.03: explosives

	<p>ex 29.04: explosives</p> <p>ex 29.07: explosives</p> <p>ex 29.08: explosives</p> <p>ex 29.11: explosives</p> <p>ex 29.12: explosives</p> <p>ex 29.13: toxic products</p> <p>ex 29.14: toxic products</p> <p>ex 29.15: toxic products</p> <p>ex 29.21: toxic products</p> <p>ex 29.22: toxic products</p> <p>ex 29.23: toxic products</p> <p>ex 29.26: explosives</p> <p>ex 29.27: toxic products</p> <p>ex 29.29: explosives</p>
Chapter 30:	Pharmaceutical products
Chapter 31:	Fertilisers
Chapter 32:	Tanning and dyeing extracts, tannings and their derivatives, dyes, colours, paints and varnishes, putty, fillers and stoppings, inks
Chapter 33:	Essential oils and resinoids, perfumery, cosmetic or toilet preparations
Chapter 34:	Soap, organic surface-active agents, washing preparations, lubricating preparations, artificial waxes, prepared waxes, polishing and scouring preparations, candles and similar articles, modelling pastes and 'dental waxes'
Chapter 35:	Albuminoidal substances, glues, enzymes
Chapter 37:	Photographic and cinematographic goods

Chapter 38:	Miscellaneous chemical products, except: ex 38.19: toxic products
Chapter 39:	Artificial resins and plastic materials, celluloses esters and ethers, articles thereof, except: ex 39.03: explosives
Chapter 40:	Rubber, synthetic rubber, factice, and articles thereof, except: ex 40.11: bullet-proof tyres
Chapter 41:	Raw hides and skins (other than fur skins) and leather
Chapter 42:	Articles of leather, saddlery and harness, travel goods, handbags and similar containers, articles of animal gut (other than silk-worm gut)
Chapter 43:	Fur skins and artificial fur, manufactures thereof
Chapter 44:	Wood and articles of wood, wood charcoal
Chapter 45:	Cork and articles of cork
Chapter 46:	Manufactures of straw of esparto and of other plaiting materials, basketware and wickerwork
Chapter 47:	Paper-making material
Chapter 48:	Paper and paperboard, articles of paper pulp, of paper or of paperboard
Chapter 49:	Printed books, newspapers, pictures and other products of the printing industry, manuscripts, typescripts and plans
Chapter 65:	Headgear and parts thereof

Chapter 66:	Umbrellas, sunshades, walking-sticks, whips, riding-crops and parts thereof
Chapter 67:	Prepared feathers and down and articles made of feathers or of down, artificial flowers, articles of human hair
Chapter 68:	Articles of stone, of plaster, of cement, of asbestos, of mica and of similar materials
Chapter 69:	Ceramic products
Chapter 70:	Glass and glassware
Chapter 71:	Pearls, precious and semi-precious stones, precious metals, rolled precious metals, and articles thereof; imitation jewellery
Chapter 73:	Iron and steel and articles thereof
Chapter 74:	Copper and articles thereof
Chapter 75:	Nickel and articles thereof
Chapter 76:	Aluminium and articles thereof
Chapter 77:	Magnesium and beryllium and articles thereof
Chapter 78:	Lead and articles thereof
Chapter 79:	Zinc and articles thereof
Chapter 80:	Tin and articles thereof
Chapter 81:	Other base metals employed in metallurgy and articles thereof
Chapter	Tools, implements, cutlery, spoons and forks, of base metal, parts thereof,

82:	<p>except:</p> <p>ex 82.05: tools</p> <p>ex 82.07: tools, parts</p>
Chapter 83:	Miscellaneous articles of base metal
Chapter 84:	<p>Boilers, machinery and mechanical appliances, parts thereof,</p> <p>except:</p> <p>ex 84.06: engines</p> <p>ex 84.08: other engines</p> <p>ex 84.45: machinery</p> <p>ex 84.53: automatic data-processing machines</p> <p>ex 84.55: parts of machines under heading No 84.53</p> <p>ex 84.59: nuclear reactors</p>
Chapter 85:	<p>Electrical machinery and equipment, parts thereof,</p> <p>except:</p> <p>ex 85.13: telecommunication equipment</p> <p>ex 85.15: transmission apparatus</p>
Chapter 86:	<p>Railway and tramway locomotives, rolling-stock and parts thereof, railway and tramway tracks fixtures and fittings, traffic signalling equipment of all kinds (not electrically powered),</p> <p>except:</p> <p>ex 86.02: armoured locomotives, electric</p> <p>ex 86.03: other armoured locomotives</p> <p>ex 86.05: armoured wagons</p> <p>ex 86.06: repair wagons</p> <p>ex 86.07: wagons</p>
Chapter	Vehicles, other than railway or tramway rolling-stock, and parts thereof,

87:	<p>except:</p> <p>ex 87.08: tanks and other armoured vehicles</p> <p>ex 87.01: tractors</p> <p>ex 87.02: military vehicles</p> <p>ex 87.03: breakdown lorries</p> <p>ex 87.09: motorcycles</p> <p>ex 87.14: trailers</p>
Chapter 89:	<p>Ships, boats and floating structures,</p> <p>except:</p> <p>ex 89.01A: warships</p>
Chapter 90:	<p>Optical, photographic, cinematographic, measuring, checking, precision, medical and surgical instruments and apparatus, parts thereof,</p> <p>except:</p> <p>ex 90.05: binoculars</p> <p>ex 90.13: miscellaneous instruments, lasers</p> <p>ex 90.14: telemeters</p> <p>ex 90.28: electrical and electronic measuring instruments</p> <p>ex 90.11: microscopes</p> <p>ex 90.17: medical instruments</p> <p>ex 90.18: mechano-therapy appliances</p> <p>ex 90.19: orthopaedic appliances</p> <p>ex 90.20: X-ray apparatus</p>
Chapter 91:	<p>Manufacture of watches and clocks</p>

**ANNEX IV**  
**REQUIREMENTS RELATING TO DEVICES FOR THE ELECTRONIC RECEIPT**  
**OF TENDERS, REQUESTS FOR PARTICIPATION AND PLANS AND PROJECTS**  
**IN CONTESTS**

Devices for the electronic receipt of tenders, requests for participation and plans and projects in contests must at least guarantee, through technical means and appropriate procedures, that:

- (a) the exact time and date of the receipt of tenders, requests to participate and the submission of plans and projects can be determined precisely;
- (b) it may be reasonably ensured that, before the time limits laid down, no-one can have access to data transmitted under these requirements;
- (c) where that access prohibition is infringed, it may be reasonably ensured that the infringement is clearly detectable;
- (d) only authorised persons may set or change the dates for opening data received;
- (e) during the different stages of the procurement procedure or of the contest access to all data submitted, or to part thereof, must be possible only through simultaneous action by authorised persons;
- (f) simultaneous action by authorised persons must give access to data transmitted only after the prescribed date;
- (g) data received and opened in accordance with these requirements must remain accessible only to persons authorised to acquaint themselves therewith, and
- (h) authentication of tenders must conform to the requirements set out in this Annex.

**ANNEX V**  
**LIST OF INTERNATIONAL AGREEMENTS REFERRED TO IN ARTICLE 23**

Agreements with the following countries or groupings of countries:

- Albania (OJ L 107, 28.4.2009)
- Former Yugoslav Republic of Macedonia (OJ L 87, 20.03.2004)
- CARIFOUM (OJ L 289, 30.10.2008)
- Chile (OJ L352, 30.12.2002)
- Croatia (OJ L 26, 28.1.2005)
- Mexico (OJ L 276, 28.10.2000, L 157/30.6.2000)
- Montenegro (OJ L 345 of 28.12.2007)
- South Korea - (OJ L 127/14.5.2011)
- Switzerland (OJ L 300, 31/12/1972)

**ANNEX VI**  
**INFORMATION TO BE INCLUDED IN NOTICES**

**PART A**  
**INFORMATION TO BE INCLUDED IN NOTICES OF THE PUBLICATION OF A**  
**PRIOR INFORMATION NOTICE ON A BUYER PROFILE**  
**(as referred to in Article 46(1))**

1. Name, identification number (where provided for in national legislation), address including NUTS code, telephone, fax number, email and internet address of the contracting authority and, where different, of the service from which additional information may be obtained.
2. Type of contracting authority and main activity exercised.
3. Where appropriate, indication that the contracting authority is a centralised purchasing body; or that any other form of joint procurement is involved.
4. CPV Nomenclature reference No(s).
5. Internet address of the "buyer profile" (URL).
6. Date of dispatch of the notice of the publication of the prior information notice on the buyer profile.

**PART B**  
**INFORMATION TO BE INCLUDED IN PRIOR INFORMATION NOTICES**  
**(as referred to in Article 46)**

*I. INFORMATION TO BE INCLUDED IN ALL CASES*

1. Name, identification number (where provided for in national legislation), address including NUTS code, telephone, fax number, email and internet address of the contracting authority and, where different, of the service from which additional information may be obtained.
2. Email or internet address at which the specifications and any supporting documents will be available for unrestricted and full direct access, free of charge.
3. Type of contracting authority and main activity exercised.
4. Where appropriate, indication that the contracting authority is a centralised purchasing body or that any other form of joint procurement is involved.
5. CPV Nomenclature reference No(s); where the contract is divided into lots, this information shall be provided for each lot.
6. NUTS code for the main location of works in case of works contracts or NUTS code for the main place of delivery or performance in supply and service contracts; where the contract is divided into lots, this information shall be provided for each lot.

7. Brief description of the procurement: nature and extent of works, nature and quantity or value of supplies, nature and extent of services.
8. Where this notice is not used as a means of calling for competition, estimated date(s) for publication of a contract notice or contract notices in respect of the contract(s) referred to in this prior information notice
9. Date of dispatch of the notice.
10. Any other relevant information.
11. Indication whether the contract is covered by the Agreement.

*II. ADDITIONAL INFORMATION TO BE SUPPLIED WHERE THE NOTICE IS USED AS A MEANS OF CALLING FOR COMPETITION (ARTICLE 46(2))*

1. A reference to the fact that interested economic operators shall advise the authority of their interest in the contract or contracts.
2. Type of award procedure (restricted or competitive procedures with negotiation, dynamic purchasing system, competitive dialogue or innovation partnership).
3. Where appropriate, indication whether:
  - (a) a framework agreement is involved,
  - (b) a dynamic purchasing system is involved.
4. As far as already known, time-frame for delivery or provision of goods, works or services and duration of the contract.
5. As far as already known, conditions for participation, including:
  - (a) where appropriate, indication whether the public contract is restricted to sheltered workshops, or whether its execution is restricted to the framework of protected job programmes,
  - (b) where appropriate, indication whether the execution of the service is reserved by law, regulation or administrative provision to a particular profession,
  - (c) brief description of selection criteria.
6. As far as already known, brief description of criteria to be used for award of the contract: 'lowest cost' or 'most economically advantageous tender'.
7. As far as already known, estimated total value of contract(s); where the contract is divided into lots, this information shall be provided for each lot.
8. Time limits for receipt of expressions of interest.
9. Address where expressions of interest shall be transmitted.
10. Language or languages authorised for the presentation of candidatures or tenders.

11. Where appropriate, indication whether:
  - (a) E-submission of tenders or requests to participate will be required/accepted,
  - (b) E-ordering will be used,
  - (c) E-invoicing will be used,
  - (d) E-payment will be accepted.
12. Information whether the contract is related to a project and /or programme financed by European Union funds.
13. Name and address of the oversight body and the body responsible for review and, where appropriate, mediation procedures. Precise information concerning time limits for review procedures, or, if need be, the name, address, telephone number, fax number and e-mail address of the service from which this information may be obtained.

**PART C**  
**INFORMATION TO BE INCLUDED IN CONTRACT NOTICES**  
**(as referred to in Article 47)**

1. Name, identification number (where provided for in national legislation), address including NUTS code, telephone, fax number, email and internet address of the contracting authority and, where different, of the service from which additional information may be obtained.
2. Email or internet address at which the specifications and any supporting documents will be available for unrestricted and full direct access, free of charge.
3. Type of contracting authority and main activity exercised.
4. Where appropriate, indication that the contracting authority is a central purchasing body or that any other form of joint procurement is involved.
5. CPV Nomenclature reference No(s); where the contract is divided into lots, this information shall be provided for each lot.
6. NUTS code for the main location of works in case of works contracts or NUTS code for the main place of delivery or performance in supply and service contracts; where the contract is divided into lots, this information shall be provided for each lot.
7. Description of the procurement: nature and extent of works, nature and quantity or value of supplies, nature and extent of services. Where the contract is divided into lots, this information shall be provided for each lot. Where appropriate, description of any options.
8. Estimated total value of contract(s); where the contract is divided into lots, this information shall be provided for each lot.
9. Admission or prohibition of variants.

10. Time-frame for delivery or provision of supplies, works or services and, as far as possible, duration of the contract.
  - (a) In the case of a framework agreement, indication of the planned duration of the framework agreement, stating, where appropriate, the reasons for any duration exceeding four years; as far as possible, indication of value and frequency of contracts to be awarded, number and, where appropriate, proposed maximum number of economic operators to participate.
  - (b) In the case of a dynamic purchasing system, indication of the planned duration of the system; as far as possible, indication of value and frequency of contracts to be awarded.
11. Conditions for participation, including:
  - (a) where appropriate, indication whether the public contract is restricted to sheltered workshops, or whether its execution is restricted to the framework of protected job programmes,
  - (b) where appropriate, indication whether the provision of the service is reserved by law, regulation or administrative provision to a particular profession; reference to the relevant law, regulation or administrative provision,
  - (c) a list and brief description of criteria regarding the personal situation of economic operators that may lead to their exclusion and of selection criteria; minimum level(s) of standards possibly required; indication of required information (self-declarations, documentation).
12. Type of award procedure; where appropriate, reasons for use of an accelerated procedure (in open, restricted and competitive procedure with negotiation);
13. Where appropriate, indication whether:
  - (a) a framework agreement is involved,
  - (b) a dynamic purchasing system is involved,
  - (c) an electronic auction is involved (in the event of open, restricted or competitive procedures with negotiation).
14. Where the contract is to be subdivided into lots, indication of the possibility of tendering for one, for several or for all of the lots; indication of any possible limitation of the number of lots that may be awarded to any one tenderer. Where the contract is not subdivided into lots, indication of the reasons therefore.
15. In the case of a restricted procedure, a competitive procedure with negotiation, a competitive dialogue or an innovation partnership, where recourse is made to the option of reducing the number of candidates to be invited to submit tenders, to negotiate or to engage in dialogue: minimum and, where appropriate, proposed maximum number of candidates and objective criteria to be used to choose the candidates in question.

16. In the case of a competitive procedure with negotiation, a competitive dialogue or an innovation partnership, indication, where appropriate, of recourse to a staged procedure in order gradually to reduce the number of tenders to be negotiated or solutions to be discussed.
17. Where appropriate, particular conditions to which performance of the contract is subject.
18. Criteria to be used for award of the contract or contracts ‘lowest cost’ or ‘most economically advantageous tender’. Criteria representing the most economically advantageous tender as well as their weighting shall be indicated where they do not appear in the specifications or, in the event of a competitive dialogue, in the descriptive document.
19. Time limit for receipt of tenders (open procedures) or requests to participate (restricted procedures, competitive procedures with negotiation, dynamic purchasing systems, competitive dialogues, innovation partnerships).
20. Address where tenders or requests to participate shall be transmitted.
21. In the case of open procedures:
  - (a) time frame during which the tenderer must maintain its tender,
  - (b) date, time and place for the opening of tenders,
  - (c) persons authorised to be present at such opening.
22. Language or languages in which tenders or requests to participate must be drawn up.
23. Where appropriate, indication whether:
  - (a) E-submission of tenders or requests to participate will be accepted,
  - (b) E-ordering will be used,
  - (c) E-invoicing will be accepted,
  - (d) E-payment will be used.
24. Information whether the contract is related to a project and/or programme financed by European Union funds.
25. Name and address of the oversight body and the body responsible for review and, where appropriate, mediation procedures. Precise information concerning deadlines for review procedures, or if need be, the name, address, telephone number, fax number and email address of the service from which this information may be obtained.
26. Date(s) and reference(s) of previous publications in the *Official Journal of the European Union* relevant to the contract(s) advertised in this notice.

27. In the case of recurrent procurement, estimated timing for further notices to be published.
28. Date of dispatch of the notice.
29. Indication whether the contract is covered by the Agreement.
30. Any other relevant information.

**PART D**  
**INFORMATION TO BE INCLUDED IN CONTRACT AWARD NOTICES**  
**(as referred to in Article 48)**

1. Name, identification number (where provided for in national legislation), address including NUTS code, telephone, fax number, email and internet address of the contracting authority and, where different, of the service from which additional information may be obtained.
2. Type of contracting authority and main activity exercised.
3. Where appropriate, indication whether the contracting authority is a central purchasing body or that any other form of joint procurement is involved.
4. CPV Nomenclature reference No(s).
5. NUTS code for the main location of works in case of works contracts or NUTS code for the main place of delivery or performance in supply and service contracts.
6. Description of the procurement: nature and extent of works, nature and quantity or value of supplies, nature and extent of services. Where the contract is divided into lots, this information shall be provided for each lot. Where appropriate, description of any options.
7. Type of award procedure; in the case of negotiated procedure without prior publication (Article 30), justification.
8. Where appropriate, indication whether:
  - (a) a framework agreement was involved,
  - (b) a dynamic purchasing system was involved.
9. Criteria referred to in Article 66 which were used for award of the contract or contracts. Where appropriate, indication whether the holding of an electronic auction was involved (in the event of open, restricted or competitive procedures with negotiation).
10. Date of contract award decision or decisions;
11. Number of tenders received with respect of each award, including:
  - (a) number of tenders received from economic operators which are small and medium enterprises,

- (b) number of tenders received from abroad,
  - (c) number of tenders received electronically.
12. For each award, name, address including NUTS code, telephone, fax number, email address and internet address of the successful tenderer(s) including
    - (a) information whether the successful tenderer is small and medium enterprise,
    - (b) information whether the contract was awarded to a consortium.
  13. Value of the successful tender (tenders) or the highest tender and lowest tender taken into consideration for the contract award or awards;
  14. Where appropriate, for each award, value and proportion of contract likely to be subcontracted to third parties.
  15. Information whether the contract is related to a project and /or programme financed by European Union funds.
  16. Name and address of the oversight body and the body responsible for review and, where appropriate, mediation procedures. Precise information concerning the deadline for review procedures, or if need be, the name, address, telephone number, fax number and email address of the service from which this information may be obtained
  17. Date(s) and reference(s) of previous publications in the *Official Journal of the European Union* relevant to the contract(s) advertised in this notice.
  18. Date of dispatch of the notice.
  19. Any other relevant information.

**PART E**  
**INFORMATION TO BE INCLUDED IN DESIGN CONTEST NOTICES**  
**(as referred to in Article 79(1))**

1. Name, identification number (where provided for in national legislation), address including NUTS code, telephone, fax number, email and internet address of the contracting authority and, where different, of the service from which additional information may be obtained.
2. Email or internet address at which the specifications and any supporting documents will be available for unrestricted and full direct access, free of charge.
3. Type of contracting authority and main activity exercised
4. Where appropriate, indication whether the contracting authority is a central purchasing body or that any other form of joint procurement is involved.
5. CPV Nomenclature reference No(s); where the contract is divided into lots, this information shall be provided for each lot.

6. Description of the principal characteristics of the project.
7. Number and value of any prizes.
8. Type of contest (open or restricted).
9. In the event of an open contest, time limit for the submission of projects.
10. In the event of a restricted contest:
  - (a) number of participants contemplated,
  - (b) names of the participants already selected, if any,
  - (c) criteria for the selection of participants,
  - (d) time limit for requests to participate.
11. Where appropriate, indication that the participation is restricted to a specified profession.
12. Criteria to be applied in the evaluation of the projects.
13. Names of any members of the jury who have already been selected.
14. Indication whether the jury's decision is binding on the contracting authority.
15. Payments to be made to all participants, if any.
16. Indication whether any contracts following the contest will or will not be awarded to the winner or winners of the contest.
17. Date of dispatch of the notice.
18. Any other relevant information.

**PART F**  
**INFORMATION TO BE INCLUDED IN NOTICES OF THE RESULTS OF A**  
**CONTEST**  
**(as referred to in Article 79(2))**

1. Name, identification number (where provided for in national legislation), address including NUTS code, telephone, fax number, email and internet address of the contracting authority and, where different, of the service from which additional information may be obtained.
2. Type of contracting authority and main activity exercised.
3. Where appropriate, indication whether the contracting authority is a central purchasing body or that any other form of joint procurement is involved.
4. CPV Nomenclature reference No(s).

5. Description of the principal characteristics of the project.
6. Value of the prizes.
7. Type of contest (open or restricted).
8. Criteria which were applied in the evaluation of the projects.
9. Date of the jury decision.
10. Number of participants.
  - (a) Number of participants who are small and medium enterprises.
  - (b) Number of participants from abroad.
11. Name, address including NUTS code, telephone, fax number, email address and internet address of the winner(s) of the contest and indication whether the winner(s) are small and medium enterprises.
12. Information whether the design contest is related to a project or programme financed by Union funds.
13. Date(s) and reference(s) of previous publications in the *Official Journal of the European Union* relevant to the project(s) concerned by this notice.
14. Date of dispatch of the notice.
15. Any other relevant information.

**PART G**  
**INFORMATION TO BE INCLUDED IN NOTICES OF MODIFICATIONS OF A**  
**CONTRACT DURING ITS TERM**  
**(as referred to in Article 72(6))**

1. Name, identification number (where provided for in national legislation), address including NUTS code, telephone, fax number, email and internet address of the contracting authority and, where different, of the service from which additional information may be obtained.
2. CPV Nomenclature reference No(s);
3. NUTS code for the main location of works in case of works contracts or NUTS code for the main place of delivery or performance in supply and service contracts;
4. Description of the procurement before and after the modification: nature and extent of the works, nature and quantity or value of supplies, nature and extent of services.
5. Where applicable, increase in price caused by the modification.
6. Description of the circumstances which have rendered necessary the modification.
7. Date of contract award decision.

8. Where applicable, the name, address including NUTS code, telephone, fax number, email address and internet address of the new economic operator or operators.
9. Information whether the contract is related to a project and /or programme financed by European Union funds.
10. Name and address of the oversight body and the body responsible for review and, where appropriate, mediation procedures. Precise information concerning the deadline for review procedures, or if need be, the name, address, telephone number, fax number and email address of the service from which this information may be obtained.
11. Date(s) and reference(s) of previous publications in the *Official Journal of the European Union* relevant to the contract(s) concerned by this notice.
12. Date of dispatch of the notice.
13. Any other relevant information.

**PART H**  
**INFORMATION TO BE INCLUDED IN CONTRACT NOTICES CONCERNING**  
**CONTRACTS FOR SOCIAL AND OTHER SPECIFIC SERVICES**  
**(as referred to in Article 75(1))**

1. Name, identification number (where provided for in national legislation), address including NUTS code, telephone, fax number, email and internet address of the contracting authority and, where different, of the service from which additional information may be obtained.
2. Where appropriate, email or internet address at which the specifications and any supporting documents will be available.
3. Type of contracting authority and main activity exercised.
4. Where appropriate, indication whether the contracting authority is a central purchasing body or that any other form of joint procurement is involved.
5. CPV Nomenclature reference No(s); where the contract is divided into lots, this information shall be provided for each lot.
6. NUTS code for the main location of works in case of works or NUTS code for the main place of delivery or performance in case of supplies and services
7. Description of the services and where applicable, incidental works and supplies to be procured
8. Estimated total value of contract(s); where the contract is divided into lots, this information shall be provided for each lot.
9. Conditions for participation, including

- (a) where appropriate, indication whether the contract is restricted to sheltered workshops, or whether its execution is restricted to the framework of protected job programmes,
  - (b) where appropriate, indication whether the execution of the service is reserved by law, regulation or administrative provision to a particular profession.
10. Time limit(s) for contacting the contracting authority in view of participation.
  11. Brief description of the main features of the award procedure to be applied.
  12. Any other relevant information.

**PART I**  
**INFORMATION TO BE INCLUDED IN CONTRACT AWARD NOTICES**  
**CONCERNING CONTRACTS FOR SOCIAL AND OTHER SPECIFIC SERVICES**  
**(as referred to in Article 75(2))**

1. Name, identification number (where provided for in national legislation), address including NUTS code, telephone, fax number, email and internet address of the contracting authority and, where different, of the service from which additional information may be obtained.
2. Type of contracting authority and main activity exercised.
3. Where appropriate, indication whether the contracting authority is a central purchasing body or that any other form of joint procurement is involved.
4. CPV Nomenclature reference No(s); where the contract is divided into lots, this information shall be provided for each lot.
5. NUTS code for the main location of works in case of works or NUTS code for the main place of delivery or performance in case of supplies and services ;
6. Brief description of the services, and where applicable, incidental works and supplies procured.
7. Number of tenders received.
8. Price or range of prices (maximum/minimum) paid.
9. For each award, name, address including NUTS code, telephone, fax number, email address and internet address of the successful economic operator or operators.
10. Any other relevant information.

**ANNEX VII**  
**INFORMATION TO BE INCLUDED IN THE SPECIFICATIONS IN ELECTRONIC**  
**AUCTIONS**  
**(Article 33(4))**

The specifications to be used where contracting authorities have decided to hold an electronic auction shall include at least the following details:

- (a) the features, the values for which will be the subject of electronic auction, provided that such features are quantifiable and can be expressed in figures or percentages;
- (b) any limits on the values which may be submitted, as they result from the specifications relating to the subject of the contract;
- (c) the information which will be made available to tenderers in the course of the electronic auction and, where appropriate, when it will be made available to them;
- (d) the relevant information concerning the electronic auction process;
- (e) the conditions under which the tenderers will be able to bid and, in particular, the minimum differences which will, where appropriate, be required when bidding;
- (f) the relevant information concerning the electronic equipment used and the arrangements and technical specifications for connection.

**ANNEX VIII**  
**DEFINITION OF CERTAIN TECHNICAL SPECIFICATIONS**

For the purposes of this Directive:

- (1) "technical specification" means one of the following:
  - (a) in the case of public works contracts the totality of the technical prescriptions contained in particular in the procurement documents, defining the characteristics required of a material, product or supply, so that it fulfils the use for which it is intended by the contracting authority; those characteristics include levels of environmental and climate performance, design for all requirements (including accessibility for disabled persons) and conformity assessment, performance, safety or dimensions, including the procedures concerning quality assurance, terminology, symbols, testing and test methods, packaging, marking and labelling, user instructions and production processes and methods at any stage of the life cycle of the works; those characteristics also include rules relating to design and costing, the test, inspection and acceptance conditions for works and methods or techniques of construction and all other technical conditions which the contracting authority is in a position to prescribe, under general or specific regulations, in relation to the finished works and to the materials or parts which they involve;
  - (b) in the case of public supply or service contracts a specification in a document defining the required characteristics of a product or a service, such as quality levels, environmental and climate performance levels, design for all requirements (including accessibility for disabled persons) and conformity assessment, performance, use of the product, safety or dimensions, including requirements relevant to the product as regards the name under which the product is sold, terminology, symbols, testing and test methods, packaging, marking and labelling, user instructions, production processes and methods at any stage of the life cycle of the supply or service and conformity assessment procedures;
- (2) "standard" means a technical specification approved by a recognised standardising body for repeated or continuous application, compliance with which is not compulsory and which falls into one of the following categories:
  - (a) international standard: a standard adopted by an international standards organisation and made available to the general public,
  - (b) European standard: a standard adopted by a European standards organisation and made available to the general public,
  - (c) national standard: a standard adopted by a national standards organisation and made available to the general public;
- (3) "European technical approval" means a favourable technical assessment of the fitness for use of a product for a particular purpose, based on the fulfilment of the essential requirements for building works, by means of the inherent characteristics of the product and the defined conditions of application and use. European technical

approvals are issued by an approval body designated for this purpose by the Member State;

- (4) "Common technical specification" means a technical specification laid down in accordance with a procedure recognised by the Member States or in accordance with Articles 9 and 10 of Parliament and Council Regulation [XXX] on European standardisation [and amending Council Directives 89/686/EEC and 93/15/EEC and Directives 94/9/EC, 94/25/EC, 95/16/EC, 97/23/EC, 98/34/EC, 2004/22/EC, 2007/23/EC, 2009/105/EC and 2009/23/EC of the European Parliament and the Council] which has been published in the *Official Journal of the European Union*;
- (5) "Technical reference" means any deliverable produced by European standardisation bodies, other than European standards, according to procedures adapted to the development of market needs.

**ANNEX IX**  
**FEATURES CONCERNING PUBLICATION**

1. Publication of notices

The notices referred to in Articles 46, 47, 48, 75 and 79 must be sent by the contracting authorities to the Publications Office of the European Union and published in accordance with the following rules:

Notices referred to in Articles 46, 47, 48, 75 and 79 shall be published by the Publications Office of the European Union or by the contracting authorities in the event of a prior information notice published on a buyer profile in accordance with Article 46(1).

In addition, contracting authorities may publish this information on the Internet on a 'buyer profile' as referred to in point 2(b).

The Publications Office of the European Union will give the contracting authority the confirmation referred to in Article 49(5), second subparagraph.

2. Publication of complementary or additional information

(a) Contracting authorities shall publish the specifications and the additional documents in their entirety on the Internet.

(b) The buyer profile may include prior information notices as referred to in Article 46(1), information on ongoing invitations to tender, scheduled purchases, contracts concluded, procedures cancelled and any useful general information, such as a contact point, a telephone and a fax number, a postal address and an e-mail address.

3. Format and procedures for sending notices electronically

The format and procedure for sending notices electronically as established by the Commission are made accessible at the Internet address '<http://simap.europa.eu>'.

**ANNEX X**  
**CONTENTS OF THE INVITATIONS TO SUBMIT A TENDER, PARTICIPATE IN**  
**THE DIALOGUE OR TO CONFIRM INTEREST PROVIDED FOR UNDER**  
**ARTICLE 52**

1. The invitation to submit a tender or to participate in the dialogue provided for under Article 52 must contain at least:
  - (a) a reference to the call for competition published;
  - (b) the deadline for the receipt of the tenders, the address to which the tenders must be sent and the language or languages in which the tenders must be drawn up;
  - (c) in the case of competitive dialogue the date and the address set for the start of consultation and the language or languages used;
  - (d) a reference to any possible adjoining documents to be submitted, either in support of verifiable declarations by the tenderer in accordance with Articles 59 and 60 and, where appropriate, Article 61 or to supplement the information referred to in those Articles, and under the conditions laid down in Articles 59, 60 and 61;
  - (e) the relative weighting of criteria for the award of the contract or, where appropriate, the descending order of importance for such criteria, where they are not given in the contract notice, in the invitation to confirm interest, in the specifications or the descriptive document.

However, in the case of contracts awarded through a competitive dialogue or an innovation partnership, the information referred to in point (b) shall not appear in the invitation to participate in the dialogue or to negotiate but it shall appear in the invitation to submit a tender.

2. When a call for competition is made by means of a prior information notice, contracting authorities shall subsequently invite all candidates to confirm their interest on the basis of detailed information on the contract concerned before beginning the selection of tenderers or participants in negotiations.

This invitation shall include at least the following information:

- (a) nature and quantity, including all options concerning complementary contracts and, where possible, the estimated time available for exercising these options for renewable contracts, the nature and quantity and, where possible, the estimated publication dates of future notices of competition for works, supplies or services to be put out to tender;
- (b) type of procedure: restricted or competitive procedure with negotiation;
- (c) where appropriate, the date on which the delivery of supplies or the execution of works or services is to commence or terminate;

- (d) the address and closing date for the submission of requests for procurement documents and the language or languages in which they are to be drawn up;
- (e) the address of the entity which is to award the contract and the information necessary for obtaining the specifications and other documents;
- (f) economic and technical conditions, financial guarantees and information required from economic operators;
- (g) the amount and payment procedures for any sum payable for obtaining procurement documents;
- (h) the form of the contract which is the subject of the invitation to tender: purchase, lease, hire or hire-purchase, or any combination of these; and
- (i) the contract award criteria and their weighting or, where appropriate, the order of importance of such criteria, where this information is not given in the prior information notice or the specifications or in the invitation to tender or to negotiate.

**ANNEX XI**  
**LIST OF INTERNATIONAL SOCIAL AND ENVIRONMENTAL CONVENTIONS**  
**REFERRED TO IN ARTICLES 54(2), 55(3)(a) AND 69(4)**

- Convention 87 on Freedom of Association and the Protection of the Right to Organise;
- Convention 98 on the Right to Organise and Collective Bargaining;
- Convention 29 on Forced Labour;
- Convention 105 on the Abolition of Forced Labour;
- Convention 138 on Minimum Age;
- Convention 111 on Discrimination (Employment and Occupation);
- Convention 100 on Equal Remuneration;
- Convention 182 on Worst Forms of Child Labour;
- Vienna Convention for the protection of the Ozone Layer and its Montreal Protocol on substances that deplete the Ozone Layer;
- Basel Convention on the Control of Transboundary Movements of Hazardous Wastes and their Disposal (Basel Convention);
- Stockholm Convention on Persistent Organic Pollutants (Stockholm POPs Convention);
- Convention on the Prior Informed Consent Procedure for Certain Hazardous Chemicals and Pesticides in International Trade (UNEP/FAO) (The PIC Convention) Rotterdam, 10/09/1998 and its 3 regional Protocols.

## ANNEX XII REGISTERS<sup>46</sup>

The relevant professional and trade registers and corresponding declarations and certificates for each Member State are:

- in Belgium the "Registre du Commerce"/"Handelsregister", and, *in the case of service contracts*, the "Ordres professionnels/Beroepsorden";
- in Bulgaria, the "Търговски регистър";
- in the Czech Republic, the "obchodní rejstřík";
- in Denmark, the "Erhvervs- og Selskabsstyrelsen";
- in Germany, the "Handelsregister", the "Handwerksrolle", and, *in the case of service contracts*, the "Vereinsregister", the "Partnerschaftsregister" and the "Mitgliedsverzeichnisse der Berufskammern der Länder";
- in Estonia, the "Registrite ja Infosüsteemide Keskus";
- in Ireland, the economic operator may be requested to provide a certificate from the Registrar of Companies or the Registrar of Friendly Societies or, where he is not so certified, a certificate stating that the person concerned has declared on oath that he is engaged in the profession in question in the country in which he is established, in a specific place under a given business name;
- in Greece, the "Μητρώο Εργοληπτικών Επιχειρήσεων — ΜΕΕΠ" of the Ministry for Environment, Town and Country Planning and Public Works (Υ.Π.Ε.ΧΩ.Δ.Ε) *in respect of works contracts*; the "Βιοτεχνικό ή Εμπορικό ή Βιομηχανικό Επιμελητήριο" and the "Μητρώο Κατασκευαστών Αμυντικού Υλικού" *in the case of supplies contracts*; *in the case of service contracts*, the service provider may be asked to provide a declaration on the exercise of the profession concerned made on oath before a notary; in the cases provided for by existing national legislation, for the provision of research services as referred to in Annex I, the professional register "Μητρώο Μελετητών" and the "Μητρώο Γραφείων Μελετών";
- in Spain, the "Registro Oficial de Licitadores y Empresas Clasificadas del Estado" *in respect of works and services contracts*, and, *in the case of supplies contracts*, the "Registro Mercantil" or, in the case of non-registered individuals, a certificate stating that the person concerned has declared on oath that he is engaged in the profession in question;
- in France, the "Registre du commerce et des sociétés" and the "Répertoire des métiers";
- in Italy, the "Registro della Camera di commercio, industria, agricoltura e artigianato"; *in the case of supplies and services contracts* also the "Registro delle

---

<sup>46</sup> For the purposes of Article 56(2), "professional or trade registers" means those listed in this Annex and, where changes have been made at national level, the registers which have replaced them.

commissioni provinciali per l'artigianato" or, in addition to the already mentioned registers, the "Consiglio nazionale degli ordini professionali" *in respect of services contracts*;

- in Cyprus, the contractor may be requested to provide a certificate from the "Council for the Registration and Audit of Civil Engineering and Building Contractors (Συμβούλιο Εγγραφής και Ελέγχου Εργοληπτών Οικοδομικών και Τεχνικών Έργων)" in accordance with the Registration and Audit of Civil Engineering and Building Contractors Law *in respect of works contracts; in the case of supplies and services contracts* the supplier or service provider may be requested to provide a certificate from the "Registrar of Companies and Official Receiver" (Εφορος Εταιρειών και Επίσημος Παραλήπτης) or, where this is not the case, a certificate stating that the person concerned has declared on oath that he is engaged in the profession in question in the country in which he is established, in a specific place and under a given business name;
- in Latvia, the "Uzņēmumu reģistrs";
- in Lithuania, the "Juridinių asmenų registras";
- in Luxembourg, the "Registre aux firmes" and the "Rôle de la Chambre des métiers";
- in Hungary, the "Cégnyilvántartás", the "egyéni vállalkozók jegyzői nyilvántartása" and, *in the case of service contracts*, some "szakmai kamarák nyilvántartása" or, in the case of some activities, a certificate stating that the person concerned is authorised to be engaged in the commercial activity or profession in question;
- in Malta, the economic operator obtains his "numru ta' registrazzjoni tat-Taxxa tal-Valur Miżjud (VAT) u n-numru tal-licenzja ta' kummerc", and, in the case of a partnership or company, the relevant registration number as issued by the Malta Financial Services Authority;
- in the Netherlands, the "Handelsregister";
- in Austria, the "Firmenbuch", the "Gewerberegister", the "Mitgliederverzeichnisse der Landeskammern";
- in Poland, the "Krajowy Rejestr Sądowy";
- in Portugal, the "Instituto da Construção e do Imobiliário" (INCI) *in respect of works contracts*; the "Registo Nacional das Pessoas Colectivas" in the case of *supplies and services contracts*;
- in Romania, the "Registrul Comerțului";
- in Slovenia, the "Sodni register" and the "obrtni register";
- in Slovakia, the "Obchodný register";
- in Finland, the "Kaupparekisteri"/"Handelsregistret";
- in Sweden, the "aktiebolags-, handels- eller föreningsregistren";

- in the United Kingdom, the economic operator may be requested to provide a certificate from the Registrar of Companies stating that he is certified as incorporated or registered or, where he is not so certified, a certificate stating that the person concerned has declared on oath that he is engaged in the profession in a specific place under a given business name.

**ANNEX XIII**  
**CONTENT OF EUROPEAN PROCUREMENT PASSPORT**

The European Procurement Passport contains the following particulars:

- (a) Identification of the economic operator;
- (b) Certification that the economic operator has not been the subject of a conviction by final judgment for one of the reasons listed in Article 55(1);
- (c) Certification that the economic operator is not the subject of insolvency or winding-up proceedings as referred to in Article 55(3)(b) ;
- (d) Where applicable, certification of enrolment in a professional or trade register prescribed in the Member State of establishment, as referred to in Article 56(2);
- (e) Where applicable, certification that the economic operator possesses a particular authorisation or is member of a particular organisation within the meaning of Article 56(2);
- (f) Indication of the period of validity of the Passport, which shall be not less than 6 months.

**ANNEX XIV**  
**MEANS OF PROOF OF SELECTION CRITERIA**

*Part I: Economic and financial standing*

Proof of the economic operator's economic and financial standing may, as a general rule, be furnished by one or more of the following references:

- (a) appropriate statements from banks or, where appropriate, evidence of relevant professional risk indemnity insurance;
- (b) the presentation of balance-sheets or extracts from the balance-sheets, where publication of the balance-sheet is required under the law of the country in which the economic operator is established;
- (c) a statement of the undertaking's overall turnover and, where appropriate, of turnover in the area covered by the contract for a maximum of the last three financial years available, depending on the date on which the undertaking was set up or the economic operator started trading, as far as the information on these turnovers is available.

*Part II: Technical ability*

Means providing evidence of the economic operators' technical abilities, as referred to in Article 56:

- (a) the following lists:
  - (i) a list of the works carried out over at the most the past five years, accompanied by certificates of satisfactory execution for the most important works; where necessary in order to ensure an adequate level of competition, contracting authorities may indicate that evidence of relevant works carried out more than five years before will be taken into account;
  - (ii) a list of the principal deliveries effected or the main services provided over at the most the past three years, with the sums, dates and recipients, whether public or private, involved. Where necessary in order to ensure an adequate level of competition, contracting authorities may indicate that evidence of relevant supplies or services delivered or performed more than three years before will be taken into account;
- (b) an indication of the technicians or technical bodies involved, whether or not belonging directly to the economic operator's undertaking, especially those responsible for quality control and, in the case of public works contracts, those upon whom the contractor can call in order to carry out the work;
- (c) a description of the technical facilities and measures used by the economic operator for ensuring quality and the undertaking's study and research facilities;
- (d) where the products or services to be supplied are complex or, exceptionally, are required for a special purpose, a check carried out by the contracting authorities or on

their behalf by a competent official body of the country in which the supplier or service provider is established, subject to that body's agreement, on the production capacities of the supplier or the technical capacity of the service provider and, where necessary, on the means of study and research which are available to it and the quality control measures it will operate;

- (e) the educational and professional qualifications of the service provider or contractor or those of the undertaking's managerial staff;
- (f) an indication of the environmental management measures that the economic operator will be able to apply when performing the contract;
- (g) a statement of the average annual manpower of the service provider or contractor and the number of managerial staff for the last three years;
- (h) a statement of the tools, plant or technical equipment available to the service provider or contractor for carrying out the contract;
- (i) an indication of the proportion of the contract which the economic operator intends possibly to subcontract;
- (j) with regard to the products to be supplied:
  - (i) samples, descriptions or photographs, the authenticity of which must be certified where the contracting authority so requests;
  - (ii) certificates drawn up by official quality control institutes or agencies of recognised competence attesting the conformity of products clearly identified by references to specifications or standards.

# THE BUILD-FOR-ALL REFERENCE MANUAL

## GOOD INTENTIONS ARE NOT ENOUGH

A guide to the implementation of accessibility to the built environment through Public Procurement

This Reference Manual is produced by:

The Architects' Council of Europe (ACE); Cooperative Integrate Onlus (CO.IN); The Council of European Municipalities and Regions (CEMR); EUROCITIES; The European Committee for Standardization (CEN); The European Construction Industry Federation (FIEC); The European Disability Forum (EDF); The European Institute for Design and Disability (EIDD); The European Lifts Association (ELA); AGE - The European Older People's Platform; The National Disability Council of Luxembourg (Info-Handicap); NEUMANNCONSULT; ProASolutions; The City of Gdynia

supported by the European Commission

Pilot project on actions to mainstream disability policies submitted under the open call for proposals for transnational projects VP/2004/008

Sole responsibility lies with the authors and the Commission is not responsible for any use that may be made of the information contained.

**DRAFT PUBLIC CONSULTATION DOCUMENT, January 2006**

**Build for All** is a Pilot Project to mainstream disability policies, supported by the European Commission promoting Accessibility to the built environment through the implementation of Design for All.

The Expert Group of the European Commission on Full Accessibility delivered its conclusions at the end of 2003, the European Year of People with Disabilities. The report, entitled “**2010, a Europe Accessible to All**”<sup>1</sup>, identified a lack of awareness in the professional sector, as one of the most important obstacles to achieving accessibility in the built environment. The report also identified the key role that public authorities play in changing attitudes and practices relating to accessibility and the leverage that they can exert when calling for tenders for public Works and services.

The Build for All project gives guidance on three main areas:

1. The need to provide public authorities with guidance in the establishment of essential accessibility criteria, and a methodology for step-by-step implementation of accessibility as provided for by the EU Public Procurement Directives.
2. The need to inform private sector and professional stakeholders about how to meet the demands of the accessibility criteria.
3. The need to bring together the representatives of disability organisations and older people’s organisations at European, national and local level together with their counterparts from the other professional and stakeholder groups - the local and regional authorities, the construction industry, the lift manufacturers and architects - in order to promote and create lasting and ongoing constructive dialogue.

## 1. Introduction

This Reference Manual is a product of work carried out by the partners of the European funded project known as *Build-for-All*. The principal objectives of the project are to raise awareness of accessibility to the built environment (buildings, outdoor spaces and facilities), and to provide practical guidance to those who prepare calls for tender for design and construction Works under the Public Procurement Directives of the European Union. It consists of two documents - a Handbook and a Toolkit:

**1. The Handbook** provides background information for raising the awareness of decision makers and public servants about the importance of accessibility in the built environment for all citizens and the supporting role which Public Procurement can play in achieving this.

**2. The Toolkit** gives a practical approach for contracting authorities to include certain procedures and technical requirements in procurement, so as to ensure that accessibility criteria are met in design and construction work.

### Target Audience

The Reference Manual is intended for those whose work brings them into contact with the Public Procurement process – either directly or indirectly. These include:

- **Legislators at National and Regional Levels**, officially responsible for the transposition of the EU Directives to national and regional law;
- **National, Regional and Local Governments across Europe**, in their specific role as procurers, owners and managers of public infrastructure, including buildings;
- **Public Authorities and entities**, including all publicly funded bodies and agencies that procure Works through the use of the Public Procurement procedures established by European Law<sup>2</sup>;
- **Economic Operators**, as a source of information to them on how Contracting Authorities approach the making of calls for tender.

The motivation for preparing this Reference Manual arises from the introduction of revised European Union Directives on Public Procurement<sup>3</sup> that (when transposed

<sup>2</sup> Annex IV of the Directives names all central public entities in each Member State that will have to meet the requirements of the Directive, in addition to public authorities at all levels.

into national law), must be respected by Contracting Authorities when tendering for public Works. These Directives offer scope to Contracting Authorities **to promote full accessibility for all, including disabled persons, older persons and others, to the built environment** - both to public buildings, the outdoor environment of streets, pavements, roads and to any Works procured by the public sector.

The goal of full accessibility to the built environment was recognised internationally as long ago as 1993 in The United Nations Standard Rules on the Equalisation of Opportunities for Disabled Persons<sup>4</sup>. Despite almost every country in the world signing up to the Standard Rules, the issue of access, which is dealt with in Rule number 5, remains a major technical and societal problem.

The revised Public Procurement Directives offer scope for contracting authorities to consider social and accessibility issues. Public authorities, at all levels, are being encouraged to positively implement these provisions as far as the new rules allow.

The Directive provides for

- criteria for qualitative selection (Art. 45-52),
- contract award criteria (Art. 53),
- technical specifications (Art. 23 and Ann. VI) and, finally,
- conditions of performance of contracts (Art. 26).

These categories, each in a different way, allow public authorities to include accessibility aspects in the procurement process.

While the Public Procurement Directives do not oblige Contracting Authorities to include accessibility criteria in calls for tender, there are significant benefits from the adoption of this approach. National Legislation may, in certain countries, require this obligation and this is strongly welcomed by the Build-for-All partners, but the aim of the work of the project is to encourage the voluntary adoption of accessibility requirements in procurement by public authorities in all European Union Member States.

---

### **3 DIRECTIVE 2004/17/EC**

Of the European Parliament and of the Council, 31st March 2004

Coordinating the Procurement procedures of entities operating in the water, energy, transport and postal services sectors.

and

### **DIRECTIVE 2004/18/EC**

Of the European Parliament and of Council of the of 31<sup>st</sup> March 2004

Coordinating the procedures for the award of public works contracts, Public supply contracts and public service contracts

<sup>4</sup> United Nations. Standard Rules on the Equalization of Opportunities for Persons with Disabilities. A/RES/48/96. 85<sup>th</sup> plenary meeting. 20 December 1993. The full document can be read online at: <http://www.un.org/documents/ga/res/48/a48r096.htm>

Fundamentally, the Build-for-All partners believe that by following the principles and advice presented in this Reference Manual, Public Procurement can lead to better functioning, more comfortable and safer environments for **all** people in society.

## 2. Handbook Introduction

**This Handbook** provides background information for raising the awareness of decision makers and public servants about the importance of accessibility in the built environment for all citizens, and the supporting role which Public Procurement can play in achieving this.

The Handbook is specifically aimed at those who wish to know about the provisions of the European Union Directives on Public Procurement Procedures, and the importance of accessibility and the “Design for All”<sup>5</sup> approach.

In particular, the partners in the Build-for-All project believe that the Handbook will be especially useful to elected members of Local, Regional and National government and to managers who have to weigh up whether or not to include a particular set of criteria in a call for tender or to adopt new policies within their administration, reflecting equal opportunities in society.

This Handbook therefore addresses a wide range of issues, which administrations might take into account to bring accessibility issues into focus. Further reference material is listed in the Appendixes and in the Bibliography.

### **Motivation:**

Did you know that by including accessibility in Public Procurement tenders, you will promote social inclusion, contribute to full employment, save public money and ultimately foster economic growth?

Did you know that disabled people, older people and other persons with temporary reduced mobility together make up 40% of the population of Europe?

Did you know that, according to UN figures, 34.5% of the European population will be aged 60+ in 2050 compared to 20.3% in 2000?

Did you know that European and national legislation are increasingly requiring disability access to the built environment and to public Works?

Did you know that Public Procurement transactions account for approximately 16% of the European Union's GDP, equivalent to 1500 billion Euros per year?

Did you know that Public Procurement rules have a direct impact on the daily lives of European citizens?

<sup>5</sup> For a description of the “Design for All” approach, please see section (3).

### 3. The Importance of Full Accessibility and “Design for All”

This section of the Handbook concerns “full accessibility”, a term which indicates the growing demand for full participation and equal opportunities for all people in society.

The goal of full accessibility to the built environment was recognised internationally as long ago as 1993 in The United Nations Standard Rules on the Equalisation of Opportunities for Disabled Persons<sup>6</sup>. Despite almost every country in the world signing up to the Standard Rules, the issue of access, which is dealt with in Rule number 5, remains a major technical and societal problem.

In recent years, European planners, designers and proponents of accessibility, have laid particular emphasis on the practice of “Design for All” as an approach to design and construction that can contribute to full accessibility.

*“Design for All” means designing developing and marketing mainstream products, services, systems and environments to be accessible and usable by as broad a range of users as possible.<sup>7</sup>*

*This can be achieved in three ways:*

- *by designing products, services and applications that are readily usable by most potential users without any modifications*
- *by designing products that are easily adaptable to different users (e.g. by adapting their user interfaces)*
- *by standardising interfaces of products to be compatible with specialised equipment (e.g. technological aids for disabled persons).*

*Through supporting the application of design for all to all areas of life – home, education, work, leisure, transport, etc. – it is possible to make significant progress towards avoiding access barriers which currently prevent citizens with disabilities from participating fully and on equal terms with non-disabled people”.*

Source: Background Document of the European Conference “Discrimination by Design” held on the European Day of Disabled People, 3<sup>rd</sup> December 2001.

<sup>6</sup> United Nations. Standard Rules on the Equalization of Opportunities for Persons with Disabilities. A/RES/48/96. 85<sup>th</sup> plenary meeting. 20 December 1993. The full document can be read online at: <http://www.un.org/documents/ga/res/48/a48r096.htm>

<sup>7</sup> This definition of “Design for All” is also quoted in: Treffers, B. (2004) *Design for All: a history of discrimination by design, future cities for all*” available at: <http://www.eca.lu/upload/History%20of%20Discrimination%20by%20Design.pdf>

### Who benefits from the Design for All approach?

People with disabilities and older people are the most obvious beneficiaries of a fully accessible environment, but it must be emphasised that people of all ages and abilities appreciate the advantages of accessible surroundings and facilities.

Design for All is recognised as an important tool for ensuring *physical accessibility* for people with physical disabilities, but there are many other types of accessibility which depend on mental and social factors. If our surroundings have been designed to take into account the diversity of human dimensions, perceptual, motor and cognitive abilities, they can better support human functioning.

“... dimensional, perceptual, motor and cognitive diversity have to be taken into account when developing environments because everybody has the WISH, the NEED and the RIGHT to be independent, to choose his/her way of life and to live it without the environment putting barriers in his/her way” .

Source: ECA- European Concept of Accessibility 2003- Technical Assistance Manual, 2003

During the human life cycle, changes are inevitable. Everybody happens, at some point in their lives, to have temporary problems interacting with the environment. Some changes may be brought forward or postponed as a result of an individual's attitude to their surroundings: what they feel is possible or not. It is also the case that accidents, illnesses or personal choices also affect ways of relating to the environment, especially when it is not possible to avoid certain places or to choose when to be there.

The importance of promoting Design for All in the context of Public Procurement is that it can help to raise the quality of life in society and in our surroundings, by ensuring more accessible environments, products, services and communications. Furthermore, a fully accessible environment contributes in a fundamental way to social solidarity by facilitating interaction between people.

#### 4. The social model of disability within the concepts of Design for All and Corporate Social Responsibility

Design for All, a European development of the 1990's, recognizes that "Inclusion" equals "Accessibility" and applies to Social, Cultural, Intellectual and Environmental conditions. Thus it challenges decision makers to ensure accessibility to the built environment, transport facilities and public spaces.

EIDD (European Institute for Design and Disability), on the occasion of its Annual General Meeting in **Stockholm** on 9 May 2004, adopted the following Declaration:

Across Europe, human diversity in age, culture and ability is greater than ever. We now survive illness and injury and live with disability as never before. Although today's world is a complex place, it is one of our own making, one in which we therefore have the possibility – and the responsibility – to base our designs on the principle of inclusion.

Design for All is design for human diversity, social inclusion and equality. This holistic and innovative approach constitutes a creative and ethical challenge for all planners, designers, entrepreneurs, administrators and political leaders.

Design for All aims to enable all people to have equal opportunities to participate in every aspect of society. To achieve this, the built environment, everyday objects, services, culture and information – in short, everything that is designed and made by people to be used by people – must be accessible, convenient for everyone in society to use and responsive to evolving human diversity.

Based on the **social model of disability**, Design for All is design for human diversity, social inclusion and equality.

The social model of disability recognises that when a person loses the use of a particular function they employ alternative functions to cope with living situations. For example, a blind person uses touch and sound, a deaf person uses touch and sight, a person who cannot walk uses a wheelchair operated by hand, to become mobile. The problem then arises when the environment does not permit them to use that function. For example, a blind person uses non-visual means to obtain information and becomes disabled from *reading* when books are only available in print. A blind person is disabled when traffic signals are given silently by means of coloured lights. Similarly, a deaf person operates through tactile and visual means and is disabled when fire alarms are only given by means of a ringing bell or howling siren. A person who cannot walk overcomes the problem of immobility by using a wheelchair to allow

him or her to move around but becomes disabled when presented with a step at the entrance to a building or a door that is too narrow.

“The disadvantage or restriction of activity caused by a contemporary social organisation which takes little or no account of people who have a physical, sensory, learning, mental health or emotional impairment and thus excludes them from participation in the mainstream of social activities.”

As quoted in Fundamental Principles of Disability, Union of Physically Impaired Against Segregation (UPIAS) London, 1976.

The concept of **Corporate Social Responsibility**<sup>8</sup> is increasingly pressed for by political decision makers at all levels of Government and, as a result, is increasingly being highlighted as an important criterion in Public Procurement decisions. That is to say that there is a growing tendency to require that companies who are entrusted with the execution of large public Works contracts are actively engaged in pursuing Corporate Social Responsibility within their structures.

#### Corporate Social Responsibility

- is a concept of business ethics based on the principle that companies have stakeholders who are broadly defined as any person or group affected by the activities of the company. The idea of Corporate Social Responsibility is that a company should be accountable to its stakeholders for all of its actions. For this reason the Corporate Social Responsibility focuses on how companies should identify and “engage” stakeholders and how they should determine, measure and report the impact of their activities on others.

[www.ethicaltrade.org/Z/ethtrd/gloss/index.shtml](http://www.ethicaltrade.org/Z/ethtrd/gloss/index.shtml)

- highlights the voluntary role of business in contributing to a better society and a cleaner environment beyond its financial and capital commitments.

[www.smallbusinesseurope.org/Glossary/](http://www.smallbusinesseurope.org/Glossary/)

- is concerned with treating the stakeholders of the firm ethically or in a socially responsible manner. Stakeholders exist both within a firm and outside it. Consequently, socially responsible behaviour will increase the human development of stakeholders both within and outside the corporation.

Source: Michael Hopkins: A Planetary Bargain: Corporate Social Responsibility Comes of Age (Macmillan, UK, 1998)

<sup>8</sup> Corporate Social Responsibility is defined by the European Commission as “a concept whereby companies integrate social and environmental concerns in their business operations and in their interaction with their stakeholders on a voluntary basis” Source: <http://europa.eu.int/scadplus/leg/en/lvb/n26034.htm>

Corporate Social Responsibility recognises that the problems preventing social inclusion are structural in essence and result neither solely nor primarily from an individual's disabilities but from economic, social and technological changes occurring throughout human society. This is the same concept that is expressed in the social model of disability on which Design for All is based.

The European Commission<sup>9</sup> recognizes that *"Within a business, Corporate Social Responsibility relates to quality employment, lifelong learning, information, consultation and participation of workers, equal opportunities, integration of people with disabilities, anticipation of industrial change and restructuring."*

Preventing and combating exclusion demands effort and the involvement of the persons experiencing exclusion together with national, regional and local authorities, welfare associations, non-governmental organisations, social partners and businesses.

Leading business corporations understand that exclusion constitutes a waste of human resources and a threat to social cohesion; it is a contributory factor in the rise in collective costs and financial burdens for businesses. Companies are also involved in Corporate Social Responsibility for ethical reasons and, in particular, to demonstrate their awareness of the twin concepts of progress and responsibility.

'...Corporate Social Responsibility becomes both business and stakeholder-led, to open the discussion to all people, and all groups concerned. Employers, trade unions, consumers and investors finding common solutions and agreements that respond to their diverse needs...'

Anna Diamantopoulou, former European Commissioner for Employment and Social Affairs. Source: <http://europa.eu.int/rapid/pressReleasesAction.do?reference=SPEECH/02/485&format=HTML&aged=0&language=EN&guiLanguage=en>

<sup>9</sup> Communication from the Commission concerning Corporate Social Responsibility: A business contribution to Sustainable Development COM(2002) 347 final

## 5. Design for All Considerations in Public Procurement

There are significant benefits and advantages to be gained by the adoption of a Design for All approach in the preparation of calls for tender for public Works. These benefits and advantages accrue in many different ways, to many of the affected actors in the process. Not least of these is the Contracting Authority itself, whose standing in the community is certain to be improved and whose overall budget will benefit as the advantages of accessible, friendly environments pay dividends in encouraging more involvement by more people in the use of public facilities.

The inclusion of Design for All principles in the Procurement of public Works will:

1. Take account of human diversity, social inclusion and equal opportunity
2. Enable all people to have equal opportunities to participate in every aspect of society
3. Act as an instrument for obtaining sustainable development and social cohesion
4. Assist in facing the challenges concerning the increasing cultural and functional diversity of the population in Europe
5. Create a win-win situation by providing an environment that everybody can enjoy
6. Create environments that can be adapted to different requirements both spatially and over time
7. Copes with interesting and new market consequences, generates an increased number of consumers and greater commercial opportunities

Alongside the principal advantages and benefits listed above, there are other benefits that arise from the adoption of the Design for All philosophy:

- **Social Impacts and Opportunities**

The population of the European Union is a diverse population. It is made up of people of different social, historical, economical, cultural and religious backgrounds. This diversity will increase as new countries join the Union. Accordingly, there is a need to create environments which are accessible for all and which bring economic and social opportunities to all. The Design for All approach is one of the most important solutions for the future of Europe and offers opportunities to advance social inclusion and economic development within the community. These new opportunities apply to society as a whole, as well to businesses and individual persons.

To achieve social effects and equal opportunities, the built environment, everyday objects, services, culture and information, everything that is designed and made by people to be used by people, must be accessible, convenient for everyone in society to use and responsive to evolving human diversity.

- **Demographic Change in Europe**

Europe is facing an important demographic change<sup>10</sup>. The most significant impact will be the ageing population in Europe. By 2050 34.5 % will be over the age of 60 years old. Since there is a strong correlation between getting older and increasing prevalence of functional impairments, an accessible environment is imperative for maintaining an active ageing population.

Environments designed and built according to Design for All and accessibility principles will ensure that also older persons and disabled persons are able to enjoy their independence over the longer term. These possibilities for being independent also offer an important service to society. Older people are knowledgeable, they have many years of experience, and above all they have the desire to go on being useful and the need to continue their chosen way of life on their own terms.

An accessible building stock and built environment allows full social participation and offers the opportunity for a:

- Safer and healthier use
- More comfortable use
- More efficient use

Thus, the adoption of this approach increases the demonstrable factors that allow a Contracting Authority to show to its constituency that it is taking its public duties seriously.

- **Economic Impacts and Opportunities**

Disabled persons and older persons represent a significant consumer market that is both insufficiently catered for at the present time and under-exploited. When it is realised that applying accessibility criteria has no negative effects on other groups in the population, there is no reason why their use should be limited or curtailed.

There are strong socio-economic and market incentives to apply the Design for All, accessibility and usability approaches that should go hand in hand with everyday development and evolution of the built environment.

<sup>10</sup> 2005 EU Green Paper on demographic change:  
[http://europa.eu.int/comm/employment\\_social/social\\_situation/green\\_paper\\_en.html](http://europa.eu.int/comm/employment_social/social_situation/green_paper_en.html)

**Example:** Study on Accessibility in the tourism industry

A study on the behaviour of disabled travellers and other travellers with activity limitations in Germany has shown that:

- 36 % did not travel because the service proposed was not accessible
- 48 % would travel more often if the service provided was more accessible
- 62 % would spend more to pay for accessible services
- 17 % travelled abroad because of more accessible offers

(Source: Federal Ministry of Economics and Labour, 2004)

## 6. About the EU Public Procurement Directives

The revised Public Procurement Directives<sup>11</sup> offer scope for contracting authorities to consider social and accessibility issues. Public authorities, at all levels, are being encouraged to positively implement these provisions as far as the new rules allow.

The Directive provides for

- criteria for qualitative selection (Art. 45-52),
- contract award criteria (Art. 53),
- technical specifications (Art. 23 and Ann. VI) and, finally,
- conditions of performance of contracts (Art. 26).

These categories, each in a different way, allow to include accessibility aspects

In this way the Directives can positively influence the inclusion and employment of people with disabilities and unemployed people, the safety of the workplace or even social care fiscal obligations

### General Description of the Directives

The principal aim of the Directives coordinating the award procedures of Public Procurement is to ensure that the taxpayers' money is spent in a way to have "best value for money", respecting, at the same time, the principles of equal treatment, non-discrimination and transparency.

Accessibility criteria can be introduced as technical specifications or performance conditions in both, the "lowest-price" and the "most economically advantageous" tender procedure, however, accessibility issues, as award criteria, can only be considered in the case of the most economically advantageous offer

A Public Procurement procedure consists of several successive phases, each of which allows, to a varying degree, taking environmental and social criteria (of which accessibility criteria are a part) into consideration. In any case, the basic principles of equal treatment, non-discrimination and transparency remain to be respected throughout all phases.

---

<sup>11</sup> **DIRECTIVE 2004/17/EC**

Of the European Parliament and of the Council, 31st March 2004

Coordinating the Procurement procedures of entities operating in the water, energy, transport and postal services sectors.

and

**DIRECTIVE 2004/18/EC**

Of the European Parliament and of Council of the of 31<sup>st</sup> March 2004

Coordinating the procedures for the award of public works contracts, Public supply contracts and public service contracts

**PHASE 1: Identification of the needs, preparation of the tender notice**

The public client has to identify its needs. This consists of defining the subject-matter of the contract, as well as drafting the contract notice, including technical specifications and contract performance conditions (refer also to PHASE 4). Only if all of these have been published can Tenderers be expected to correctly respond to a call for tender.

Accessibility criteria, of a technical nature, can be included in the technical specifications, where appropriate with references to technical standards. This defines the characteristics of the building or goods to be purchased.

**PHASE 2: Selection of the qualified contractors**

Once the public client has received the tenders, they have to evaluate the Tenderers on the basis of the so-called "selection criteria". The selection phase serves to exclude those Tenderers who are not qualified for the job. Tenderers who do not satisfy the selection criteria, will be excluded from the further procedure.

The "classical" Directive (2004/18/EC) deals with the "criteria for qualitative selection" in Articles 45 to 52. Tenderers that have been convicted ("final judgment") for organised crime, corruption, fraud or money laundering **shall** be excluded from participation in the procedure.

Tenderers having been convicted ("final judgment") for a list of other things **may** be excluded. In this list, there is reference to offences concerning professional conduct<sup>12</sup> and not fulfilling obligations relating to payment of social security or taxes.

At the selection stage, accessibility criteria can be introduced under the heading of "technical and/or professional ability" (see 2004/18/EC, Art. 48). For example, a list of accessible Works carried out over the past five years, an indication of the specialised accessibility technicians or technical bodies involved, a description of the technical facilities and measures for ensuring quality and respect of accessibility criteria, the educational and professional qualifications of the persons who will be chosen to deliver the expertise required in the execution of the contract.

---

<sup>12</sup> Recital 43: Non-observance of national provisions implementing the Council Directives 2000/78/EC (1) and 76/207/EEC (2) concerning equal treatment of workers, which has been the subject of a final judgment or a decision having equivalent effect may be considered an offence concerning the professional conduct of the economic operator concerned or grave misconduct.

**PHASE 3: Evaluation of the tenders, award of the contract**

Once the unqualified Tenderers are eliminated from the procedure, the public client is left with the tenders submitted by qualified Tenderers and can now proceed to the material evaluation of the tenders. This evaluation is based on the so-called "award criteria" (2004/18/EC, Art. 53).

In the case of the award being made to the most economically advantageous tender, from the point of view of the Contracting Authority, such award criteria must be linked to the subject matter of the public contract in question. The Directive gives the following examples: quality, price, technical merit, aesthetic and functional characteristics, environmental characteristics, running costs, cost effectiveness, after sales service and technical assistance, delivery date and delivery period or period to completion.

Based on the examples given, it is also possible to specifically mention accessibility criteria in the award criteria. This would allow the evaluation of the Tenderers' specific track record on accessibility including experience, references, know how etc.

**PHASE 4: Execution and performance of the contract**

Once the public client has awarded and signed the contract, they should monitor the correct implementation of the contract and all obligations deriving there from, including the "contract performance clauses" mentioned above and described at the Contract Notice stage of the procedure.

It should be noted that the Public Procurement Directives do not set out procedures or conditions for this stage of the Procurement of a work. This is because the procedures set out in the Directives will have been fulfilled at this point.

Social criteria can be included as contract performance conditions.

For example:

- to recruit more disabled persons than are required under national legislation
- to favour on-site vocational training
- the employment of people experiencing particular difficulty in achieving integration
- the fight against unemployment
- to recruit long-term job-seekers

- to implement training measures for the unemployed or young persons
- to comply in substance with the provisions of the basic International Labour Organisation (ILO) Conventions, assuming that such provisions have not been implemented in national law

As these contract performance conditions are part of the contract, they have to be respected by the appointed contractor (the “winner” of the procedure) during the execution of the contract, but not earlier. Each Tenderer is deemed to have based their tender on the published conditions. Consequently, respect of such performance conditions is an integral part of the contract and must not be used as a selection or award criterion.

### Key elements of the Directive from an Accessibility Perspective

- When drawing up a call for tender, public authorities are required to identify all of the characteristics that the product, Works or service will have to meet. Rules and an outline of the kind of characteristics that can be included are specified in the Articles and Annexes of the Directives that relate to technical specifications of a tender. In particular, the EU Directives refer specifically to technical specifications relating to accessibility for disabled people and Design for All requirements.
- Public authorities can also decide to impose contract performance conditions on the company that wins a call for tender. These may range from environmental requirements to accessibility requirements to the obligation to employ a certain percentage of disabled people to do the job. However, any such conditions must be set out in the call for tender so as to allow Tenderers to take account of them in their offers.
- The Directives also include rules on the possibility to **reserve contracts** for certain kinds of companies, which benefit undertakings such as sheltered Workshops<sup>13</sup> that employ a majority of people with disabilities.
- Social considerations such as accessibility and employment of disabled people can be a selection criterion to the extent that a firm does not respect a statutory obligation to employ disabled persons or engages discrimination and is convicted. It can also be a "contract performance condition", to be respected by the successful Tenderer. These must be specified in the call for tender.
- When making the final choice for a tender, according to the most economically advantageous tender, public authorities can take accessibility and social considerations into account under some conditions.

---

<sup>13</sup> Under certain conditions, and concerning accessibility criteria, there is a partial exception to some of these principles, called a "special arrangement" in the classical Directive (2004/18). In fact, Art. 19 (explained in recital 28) gives the possibility to reserve the right to participate in a Public Procurement procedure to "sheltered workshops" or to programmes in which most of the employees concerned are disabled persons who "cannot carry on occupation under normal conditions".

## 7. Points to consider

In this section the main points that should be considered in following the procedures presented in the Public Procurement Directives for the preparation of a call for tenders are set out.

The most important point to consider is the fact that the Public Procurement Directives allow for the inclusion of social and environmental criteria and that it specifically mentions "accessibility criteria for people with disabilities" and "design for all users" as being valid criteria that should, wherever possible, be taken into account when defining technical specifications (Article 23, §1). Although this means that the inclusion of social and environmental (Article 53 §1a) considerations is optional in the text of the European Union Directives, it is clearly a strongly expressed wish of the European Union that they be included, as stated in the first two introductory recitals. It is therefore essential that in transposing the requirements of the EU Directives into the national law, these are studied and understood by those preparing calls for tender.

In cases where the national law does not require the inclusion of social and environmental considerations or criteria and where there is no other law requiring the implementation of a Design for All approach (such as Disability Acts), a Contracting Authority can still include accessibility and Design for All in the criteria for the realisation of public Works contracts.

Having studied the text of the Directives, the Build-for-All partners wish to highlight the main points that need to be considered as being desirable for inclusion in the calls for tender and in the procedures that surround the award of contracts for the execution of public Works contracts.

### 1. Accessibility as part of social and environmental considerations.

#### Relevant Articles and Recitals:

Article 2 – Recitals 1 &2

Recitals 1 and 2, which between them, set out the general background for the Directives, support the inclusion of social and environmental considerations in the awarding phase of contracts. These recitals are to be read in conjunction with Article 2 which states unequivocally that Contracting Authorities shall treat economic operators equally and non-discriminatorily and in a transparent manner, and article 53 on the award criteria.

These provisions therefore allow for the full inclusion of accessibility and Design for All approaches.

## 2. Design for all and Accessibility in the technical specifications of a contract

### Relevant Articles and Recitals:

Article 23, §1- Recital 29 & Annex VI

Article 23, §1, as mentioned in the introductory text specifically mentions the inclusion of accessibility and Design for All principles in the context of the technical specifications that a Contracting Authority can include in the call for tenders.

These specifications are further detailed in Annex VI.

## 3. All electronic means of communication and all documents used in the procedures must, in accordance with the principles of equal treatment and non-discrimination, be available in accessible formats.

### Relevant Articles and Recitals:

Article 23 & Recital 29

Article 28

Article 29

Article 38

Article 39

Article 40

Article 41

Article 42

Article 44

Article 54 & Recitals 12, 13, 14

The large numbers of references relevant to this point are the Articles that describe the procedures that are open to Contracting Authorities to choose in deciding on how to structure a call for tender. It is important to realise that many economic operators that will receive the documents may employ disabled persons and so it is essential, to achieve the non-discrimination and transparency requirements of the Directive, to ensure that they are accessible to all persons. For example, this means that calls for tender cannot be available in print alone and that any electronic means used, including equipment, is in compliance with WAI<sup>14</sup> guidelines or similar national guidelines.

The same principles must be applied to the procedures adopted for possible "technical dialogues" before launching an award procedure (Recital 8) with economic entities so that all participating persons have full access to all relevant information.

---

<sup>14</sup> The Web Accessibility Initiative (WAI) works with organizations around the world to develop strategies, guidelines, and resources to help make the Web accessible to people with disabilities. Source: <http://www.w3.org/WAI/>

**4. The Directives permit, under certain conditions the reservation of contracts to sheltered Workshops.**

**Relevant Articles and Recitals:**

Article 19

Recital 28

These provisions of the Directive are aimed at guaranteeing equal opportunities for all and they contribute to integration into society of people with disabilities. Contracting Authorities should consider the possibility of taking up this option as often as it can reasonably be pursued as it demonstrates a clear commitment to corporate social responsibility.

**5. The inclusion of Design for All and accessibility principles in the various criteria and conditions for the performance of contracts is encouraged by some of the provisions of the Directives.**

**Relevant Articles and Recitals**

Article 26 & Recitals 33, 44

Article 27 & Recitals 34, 43 (at the end)

Article 34

The various contract performance clauses can, in particular, relate to social and environmental matters and, therefore, to accessibility and they should be disability-proofed in order that they are non-discriminatory.

Some provisions also allow for the exclusion of Tenderers, in the selection phase, that have been convicted for breach of social and employment legislation, including of measures fighting discrimination of disabled people in employment.

The inclusion of these principles will assist Contracting Authorities to define and demonstrate non-discriminatory criteria in consultation with people with disabilities.

**6. The Directive allows for the assessment of the technical and/or professional ability of Tenderers to be undertaken.**

**Relevant Articles**

Article 48

Article 52

Recital 45

These provisions of the Directives are very important to the potential to successfully introduce and implement accessibility and Design for All criteria and relate to the power of the Contracting Authority to assess the expertise on offer from an economic operator and to use this as a criterion for selection. It is therefore particularly

important to ensure that Tenderers are requested to demonstrate the level and quality of skills that they can bring to the project in the field of accessibility and Design for All. Furthermore they will allow the Contracting Authority to require that specific expertise and successful experience in the field of accessibility and Design for All is proven.

**7. Only using the "most economically advantageous" approach to the choice of contractor allows the weighted evaluation of Design for All and accessibility criteria for the award of the contract.**

**Relevant Article**

Article 53 & recital 1,2, 5, 6  
Recitals 46, 47

In deciding on the criteria to use for the award of a contract, the Build-for-All partners recommend that Contracting Authorities use the option open to them to include Design for All and accessibility criteria: by making the award to the tender most economically advantageous from the point of view of the contracting authority.

If the decision to do so is taken, then this must be stated in the Contract Notice.

## 8. Briefing Note on the use of Quality/Price Tender Evaluation Models

Tenders may be evaluated on the basis of the most economically advantageous tender (quality based approach) or on the basis of price alone (lowest price approach). In the former case a range of non-price based criteria might be included as legitimate evaluation criteria of the best tender and the partners of the Build-for-All project consider this to be the best way to evaluate tenders in the Procurement of public Works as it allows the Contracting Authority to take accessibility fully into account. Factors relating to access to facilities of people with disabilities, may be legitimately included as award criteria.

The extent to which quality issues may be taken into account in the evaluation of tenders may vary. It is for the selection panel to agree the quality factors, and their impact on the evaluation process, in advance of inviting tenders. However, in certain circumstances, it might be appropriate to increase the balance further in favour of quality, and an evaluation based entirely on quality might sometimes be legitimate.

Key steps are:

- Form a Panel of experts for the award phase;
- Clarify your award criteria (key success factors), including the relative importance of accessibility and all other criteria;
- Ensure tender invitation documents include a full explanation of the evaluation process;
- Compile robust evaluation and scoring methodologies and keep to them;
- Pay adequate attention to how presentations and interviews are to be structured;
- Fully record each stage of the evaluation process;
- Debrief unsuccessful candidates immediately after having identified the successful tender and sufficiently prior to effectively awarding the contract.

# THE BUILD-FOR-ALL TOOLKIT

Practical approach for contracting authorities to include certain procedures and technical requirements in procurement, so as to ensure that accessibility criteria are met in design and construction work

By

## 9. Toolkit Introduction

This **Toolkit** concentrates on delivering the means by which Contracting Authorities can ensure that, in their procurement procedures, they take adequate account of the accessibility issue which is so fundamentally important.

If you are unfamiliar with the concepts of accessibility and Design for All, or with the content and objectives of the Public Procurement Directives, you are advised to read the **Handbook**, which is Part 1 of this Reference Manual. If these matters are familiar to you, then you should find the tools in this short Toolkit useful when planning and carrying out public Calls for Tender.

The Toolkit is specifically aimed at the procurement officers who work, on a daily basis to write calls for tender for public Works and who are familiar with the provisions of the European Union Directives on Public Procurement Procedures and/or the equivalent national legislation. It will also be informative to those who respond to calls for tender, as it gives an insight into how such calls are structured, at least as far as the inclusion of accessibility criteria is concerned.

As the Public Procurement Directives do not oblige Contracting Authorities to include accessibility criteria in calls for tender, it is worth noting that there are significant benefits from the adoption of this practice. National Legislation may, in certain countries, require this obligation and this is strongly welcomed by the Build-for-All partners, but the aim of the work of the project is to encourage the adoption of such inclusions in all European Union Member States in all design and construction of the built environment.

## 10. The Benefits and Advantages of Design for All

As stated in the Handbook, there are significant benefits and advantages to be gained by the adoption of a Design for All approach in the preparation of calls for tender for public Works. These benefits and advantages can affect many actors in the process. Not least of these is the Contracting Authority itself, whose standing in the community is certain to be improved and whose overall budget will benefit as the advantages of accessible, friendly environments pay dividends in encouraging more involvement by more people in the use of public facilities.

## 11. Technical Guidance

### Introduction

This chapter does not contain the full description of the process of preparing the tender documents, a process that is familiar to all those who regularly prepare calls for tender. Rather it shows only the moments where the inclusion of accessibility issues make a difference in the specific steps undertaken.

It should be noted that the accessibility guidelines are only part of the “big picture”. The other parts consists of employment issues as well as transportation, customer services and communications. These are addressed in a general way in the chapters of the Handbook.

The description of the step-by-step procedure is set out in accordance with the relevant phases of preparing the tender documents by procurement officers for the purposes of preparing tenders for buildings and outdoor environment facilities, funded with the use of public financing and procured by the public sector. The relevant items are described in the light of EU Directive on Public Procurement, Directive 2004/18/EC and all Article references below are from that Directive.

### General Conditions on Scope of Application

In principle the whole procedure applies in cases where the value of the contract exceeds EUR 5,923,000 (Art.7 § (c)). For public Works contracts of lower value the tender procedure described in this Toolkit can refer to the national Public Procurement legislation in force in each Member State of the European Union. However, in all cases the basic principles of the European Treaties have to be respected, namely transparency, equal treatment/non-discrimination and best value for money. Consequently, the guidance provided by this Toolkit is equally useful for projects below the thresholds.

In Art. 1. § ( 2/b ) a “work” is defined as “...*the outcome of building or civil engineering Works taken as a whole to fulfil an economic or technical function...*”

This means that buildings and outdoor environment facilities belong to the term “Works” in the meaning of this Directive.

The simplest method to get the desired result is to realise the differences in the approach of making a given facility and built environment accessible right at the beginning of both the design Works and the procurement procedures. The three main areas of concern to make the environment accessible to all can be considered as, firstly, eliminating barriers in existing facilities, secondly, issues associated with alterations and, thirdly issues associated with new construction.

Therefore it is helpful to consider the following division of the Works, all of which are

relevant to the guidance in this reference manual:

- New public buildings for general use (with the exclusions contained in the legislation of the Member States such as, for example, military facilities)
- New residential buildings (single-family houses excluded)
- Alterations and additions in existing buildings of any functional use including historical buildings, which are not classified as historical monuments, on the occasion of every renovation, modernisation adaptation or revitalisation Works
- Alterations and additions in existing buildings of any functional use, classified as historical monuments on the occasion of every renovation, modernisation, adaptation or revitalisation Works
- New outdoor facilities
- Alterations to existing outdoor facilities and existing outdoor spaces, not classified as historical monuments on the occasion of every renovation, modernisation, adaptation or revitalisation Works
- Alterations to existing outdoor facilities, classified as historical monuments on the occasion of every renovation, modernisation, adaptation or revitalisation Works
- For the buildings, facilities and outdoor spaces classified as historical monuments the relevant legislation concerning the historical heritage and culture protection in force in every Member State shall be applied

**For the buildings, facilities and outdoor spaces classified as historical monuments the relevant legislation concerning the historical heritage and culture protection in force in every Member State shall be applied**

The principal aim of the Directive coordinating the award procedures of Public Procurement is to ensure that the taxpayers' money is spent in a way to have "best value for money", respecting, at the same time, the principles of equal treatment, non-discrimination and transparency.

Accessibility criteria can be introduced as technical specifications or as contract performance conditions in both, the "lowest-price" and the "most economically advantageous" tender procedures. However, accessibility issues, as award criteria, can only be considered in the case of the most economically advantageous tender and this fact needs to be signalled at the time of the publishing the contract notice.

**The text that follows gives a series of guidance notes set out in accordance with the phases described in the Handbook.**

#### **PHASE 1: Identification of the needs, preparation of the tender notice**

The public client has to identify its needs. This consists of defining the subject matter of the contract, as well as drafting the tender notice, including technical specifications and contract performance conditions. Only if all of these have

been published can Tenderers be expected to correctly respond to a call for tender.

Accessibility criteria of a technical nature, can be included in the technical specifications, where appropriate, with references to technical standards. These define the characteristics of the building or goods to be purchased.

#### 4.01 Tender Notice and Notice of Invitation to pre-qualify

The contracting authority in preparing the Tender Notice and the Invitation to Pre-qualify should state that **accessibility and Design for All criteria will be included in the selection and award criteria**. The Notice must indicate the relative weighting that will be assigned to each of the award criteria (refer to Art. 23)

#### 4.02 Issue and Submission of Pre-qualification Documents

The Tenderers will have to respond to the published requirements. To this extent Art. 23 states that: *"...The technical specifications, as defined in point 1 of Annex VI, shall be set out in the contract documentation, such as contract notice, contract documents or additional documents. Whenever possible these technical specifications should be defined so as to take into account accessibility criteria for people with disabilities or Design for All users"*.

#### PHASE 2: Selection of the qualified contractors

The selection phase serves to exclude those Tenderers who are not qualified for the job. Tenderers who do not satisfy the so-called "selection criteria", will be excluded from the subsequent stages of the procedure.

The "classical" Directive (2004/18/EC) deals with the "criteria for qualitative selection" in Articles 45 to 52. Tenderers that have been convicted ("final judgment") for organised crime, corruption, fraud or money laundering **shall** be excluded from participation in the procedure.

Tenderers having been convicted ("final judgment") for a list of other things **may** be excluded. In this list, there is reference to offences concerning professional conduct<sup>15</sup> and not fulfilling obligations relating to payment of social security or taxes.

At the selection stage, accessibility criteria can be introduced under the heading of "technical and/or professional ability" (see Art. 48). For example, a list of accessible Works carried out over the past five years, an indication of the

<sup>15</sup> Recital 43: Non-observance of national provisions implementing the Council Directives 2000/78/EC (1) and 76/207/EEC (2) concerning equal treatment of workers, which has been the subject of a final judgment or a decision having equivalent effect may be considered an offence concerning the professional conduct of the economic operator concerned or grave misconduct.

specialised accessibility technicians or technical bodies involved, a description of the technical facilities and measures for ensuring quality and respect of accessibility criteria, the educational and professional qualifications of the persons who will be chosen to deliver the expertise required in the execution of the contract.

**4.03** The contracting authorities must establish the selection and award criteria, respecting the provisions of the Directives, and they can indicate which proof of (pre-) qualification they will accept in selecting the Economic Operator to take part in the tender. This can be done according to the following steps (4.04 to 4.08):

**4.04 The team.** The procurement officer should point to the fact that the composition of the technical staff of the Economic Operator should be composed so that:

- the role of every professional is specified, especially showing the expertise related to accessibility and Design for All,
- a staff organisation chart is included, specifying the role of every professional
- their educational and professional qualifications, their technical expertise related to the accessibility and Design for All, shall be included.

**4.05** There should be a **Clause** that the Tenderers (Economic Operators) will be asked to describe their entrepreneurial history with special regard to the correspondence of the described Works to accessibility and Design for All criteria. Also there should be a statement that a declaration that the Tenderer is not the subject of a judgement, of bankruptcy procedures and judgement which has the force of res judicata (see Art. 45), for example that they are not subject to an exclusion.

**4.06 Certifications – Internal Experts:** The procurement officer should point to the fact that the possession of quality certifications and membership of qualification lists (assessed by certification bodies established under national public or private law) of approved Economic Operators undertaking public Works, is needed. This includes certifications in the field of accessibility. If, in a given Member State, the figure of an Accessibility Expert is not recognised or identified then the Procurement Officer should ask the bidders to show the personal training and professional experience which could be referred to as the basis to assess the knowledge and competencies pertaining to accessible design (see Art. 48)

**4.07 Certifications – External Experts:** There is a possibility of using an external expert on accessibility – The procurement officer should point to the fact that the Economic Operator may rely on the economical and technical capabilities of other external operators - this guarantees that at least one of the Economic Operators involved in the Public Procurement, can prove possession of the required accessibility certifications. (see Art. 48 § 3)

**4.08 Exclusions** – the reasons for the exclusion of a Tenderer are set out in Art. 45. The Procurement Officer should point out these reasons for exclusion from participation in a Public Procurement process which include: involvement in criminal organisations, the re-use of revenues from illegal acts, corruption, fraud/tax evasion and failure to comply with non-discrimination legislation. (see Art. 45)

### **PHASE 3: Evaluation of the tenders, award of the contract**

Once the unqualified Tenderers are eliminated from the procedure, the public client invites the qualified Tenderers to submit their offers and it then proceeds to the material evaluation of the tenders. This evaluation is based on the "award criteria" set out in Art. 53.

In the case of the award being made to the most economically advantageous tender, from the point of view of the Contracting Authority, the award criteria must be linked to the subject matter of the public contract in question. The Directive gives the following examples: quality, price, technical merit, aesthetic and functional characteristics, environmental characteristics, running costs, cost effectiveness, after sales service and technical assistance, delivery date and delivery period or period to completion.

Based on the examples given, it is also possible to specifically mention accessibility criteria in the award criteria. This allows for the evaluation of the Tenderers' specific track record on accessibility including experience, references, know how etc.

**4.09** In this phase of the tender procedure, in the part concerning the **technical specifications** the Procurement Officer should again point to the fact that the **relevant special conditions** taking into account accessibility criteria for people with disabilities and Design for All users will be imposed. **The special conditions will be described in Technical Specifications part of the tender documentation** (see Art.23).

**4.10** It is recommended that contracting authorities should always decide to use the most economically advantageous tender procedure so that accessibility criteria can be a **part of the Contract Award Criteria**. The fact must be signalled from the outset of the procedure and the relative weighting that will be given to the criteria published. The objective should be that the proposals prepared with Design for All solutions in mind will be given a high weighting and therefore a high importance in the awarding of the contract.

**Explanation:** (The first part of Art. 53 is relevant: "...Contract award criteria: Without prejudice to national laws, regulations or administrative provisions

*concerning the remuneration of certain services, the criteria on which the contracting authorities shall base the award of public contracts shall be either:*

*...when the award is made to the most economically advantageous tender from the point of view of the contracting authority, various criteria linked to the subject-matter of the public contract in question, for example, **quality**, price, technical merit, **aesthetic and functional characteristics**, **environmental characteristics**, running costs, cost-effectiveness, after-sales service and technical assistance, delivery date and delivery period or period of completion, or...*

**4.11** As the call for tender should describe the scope of the Works, the quality of the materials and the standards of workmanship that the successful Tenderer will be called upon to provide in carrying out the Works it should also convey other essential information having a bearing on the performance of the Works. Therefore it should be clearly stated that:

The building legislation mandatory in every Member State is obligatory for every Tenderer (Economic Operator) in the given Member State and it is not the intention of the document to make any kind of compilation of legislation in order to get specific standards. All the provisions described above are to comply with the Member State legislation being in force with regard to the superiority of European Union law.

#### **PHASE 4: Execution and performance of the contract**

Once the public client has awarded and signed the contract, it should monitor the correct implementation of the contract and all obligations deriving there from, including the "contract performance clauses" mentioned above and described at the Contract Notice stage of the procedure.

It should be noted that the Public Procurement Directives do not set out procedures or conditions for this stage of the procurement of a work. This is because the procedures set out in the Directives will have been fulfilled at this point.

**4.12** The Procurement Officer can prescribe, as contract performance conditions, the test, inspection and acceptance conditions of the finished Works. Any such conditions must be clearly set out in the contract notice and the invitation to tender and may include items such as:

- **audit** of the finished Works undertaken by independent experts from professional associations and public or private accessibility centres, if available in a given Member State
- **the end users' involvement** in prototypes analysis, virtual use, interviews etc. in a way complying with the legislation in force in a given Member State.

In case of alterations and/or additions to existing buildings and outdoor spaces, historically classified or not classified,, the Procurement Officer can additionally require the preparation of a survey identifying existing accessibility barriers.

Comentari [FIEC-UP1]: PAG  
E : 10  
NO, logically impossible to  
make a preparatory study party of  
the performance conditions (i.e. to  
be respected only by the successful  
tenderer after he has signed the  
contract.)

## 12. Examples of Good Procedural Practice in Public Procurement

The project partners were invited to submit examples of good procedural practice in Public Procurement projects. These have been compiled and are presented below without critical appraisal, for the information of the reader.

The following are examples of projects where good procedural approaches were adopted to the procurement of Works or services by Contracting Authorities. They are given so as to encourage the uptake of similar good and best practices across Europe.

It is essential that the accessibility issues to be solved are defined as early as possible in the process. Very recent (bad) examples abound of large public projects, where the most evident needs for accessibility have not been taken into account despite the billions of € and the large numbers of professionals involved.

A primary school for 500 pupils aged between 4 and 11 (case A) needs to accommodate pupils with permanent and temporary disabilities. A pupil with a broken leg requiring weeks or months using wheelchair or crutches is only too frequent.

In the much larger and farther-reaching examples of the metropolitan transport organization in Barcelona – Spain (cases B and C), the ambition to transport millions of people per year from door to door, requires an extensive study of passenger traffic flows, of commuting walking distances, of smooth levelling between all interconnecting areas and means of transport, of accessibility of all levels by lifts, escalators and moving walks. Buses, trams and trains need to provide full accessibility to all, without any discrimination. Platforms for buses, trams and trains should be at the exact level of the carriage. In the case of buses, a projecting platform and partial lowering of the bus are available solutions which are widely used around the world – but only where these requirements are specified. In other words, it means a clear understanding of the needs of the visually impaired, the persons with limited mobility, limited hearing and users with other disabilities. Technological solutions exist and their relative need should be identified early on in the Public Procurement process by experts in the field. All types of public buildings must be easily accessible to all.

In some cases, the social commitment of the administrative bodies involved, guarantees a good analysis of the needs and the level of accessibility requested, but in most cases, it is highly recommended to consult experts in the field of disabilities, who will clearly identify the accessibility issues to be covered by the project. In all cases, Design for All is an excellent tool for the companies to improve their business opportunities and their reputation.

All cases presented are related to a geographical region, showing that a local snowball effect can appear, through which more actors wish to be involved in the bettering of the built environment and improvement of social relations.

#### **Case A: Bleak Hill Primary School, St Helens, Lancashire**

The Bleak Hill project, a partnering contract between St Helens Metropolitan Borough Council and contractors Willmott Dixon, was the first example of a local authority awarding a partnering contract for a building based purely on the basis of quality with no mention of price.

##### **Context**

Bleak Hill is a 500-pupil county primary school for 4-11 year olds. Existing buildings occupied about 25% of the school grounds. The new school with infants and junior playgrounds was built in the playing fields, giving complete segregation of construction from school activity. The main 40-week construction period was followed by one week to transfer pupils and staff and a further 12 weeks for demolition of the old school and creation of a new multi-use sports field and running track, new main entrance and car park.

##### **Key Achievements**

- The production of a bigger school for a smaller budget.
- Some aspects, such as the M&E (IT, lighting control, energy saving), above average quality.
- Higher level of cost certainty than normal for the Council.
- 11% cost savings against traditional approaches.
- 32% faster construction than original programme.

##### **Key Drivers**

- **The People Factor** - Key officers at St. Helens believed that partnering could help them break out of the 'worst value' scenario often produced by traditional contracting.
- **Central Government** – Began linking adoption of 'Rethinking Construction' and Asset Management to local authority cash allocations. Treasury looking for annual savings of 2% under Best Value as a whole.

##### **Essential Success Factors**

- **Corporate Commitment** – St Helens ensured that they had contracts sub-committee buy in and because the change was driven from the top they did not have the difficulties with their standing orders that are sometimes encountered in local authority partnering.
- **Involvement of Stakeholders** – As well as the authority's building professionals and senior management, all stakeholders attended the final interviews. Local

councillors, head teacher, school governors, political leaders, education, audit and legal officers – some 30 people in all.

- **Trust** – In each other as well as in themselves to be able to deliver something different. The team had a total open book approach.

### **The Process**

Following its initial advertisement St Helens issued 52 copies of its comprehensive information pack on the project. This explained the partnering ethos and requested method statements for eight quality assessment criteria (not including price). The 26 responses were scored and the four best performing firms were invited for interview.

The decision at the interview to appoint Willmott Dixon was unanimous and at this stage they had not mentioned figures. Their proposal was based around experience in partnering and in schools, management team and added value they thought that they could bring to the project. The first of the key subcontractors, M&E contractor Drake & Scull, was then jointly appointed by both parties, using a scoring system weighted 70% quality and 30% price. Other subcontractors and suppliers were then brought into the partnership on a similar basis.

### **Shared Savings and Risk**

The form of contract used was the ACA Standard Form of Contract for Project

Partnering, written by Trowers & Hamlins, with the cost plan figure used as both a target price and a guaranteed maximum price (GMP). The contractors agreed to include profit and on-cost recovery within the cost plan, however if savings during construction were achieved they were shared 50:50. There was a 5% cap on extras over the GMP which meant that the Council's risk was identified in the agreement at 2.5%, half of the 5%, as was Willmott Dixon's. Beyond that shared risk, except for pre-defined areas, Willmott Dixon picked up all the risk.

### **Cost Plan within Budget**

This was done through a series of Value Engineering (VE) Workshops over an eight month period. The cost plan was revised 12 times to identify approximately £300,000-worth of savings and efficiency gains. The school was fully involved and everything was done on a completely open-book basis. Each item identified in the VE Workshops as a potential saving was championed by one or more members of the team, who took responsibility for bringing forward a workable solution to the next meeting.

### **Open Book**

Open book means that the actual accounts are the balance sheet for that project, and can therefore be inspected by the client. They include the fee structures for the design teams, the contractor and subcontractors on that particular scheme. The actual contract price is built up in a joint manner, so that the contractor's team is satisfied that the prices in it are correct, and the Quantity Surveyors are likewise satisfied that everything is correct. Adjustments are made in the Value Engineering

process, by the team together. Once the GMP is agreed and the work proceeds on site, the open-book approach means that if the client's representatives want to make sure that there is not a huge profit being generated from the scheme, or if, say, there are some extras and they want to justify them, the books are there to be examined, and to reveal how the calculations have been arrived at.

'We've been listened to and we've argued sensibly for the good of the pupils. We think we've got the best deal possible because of the expertise of the Partnership.' - Peter Isaac, Headmaster, Bleak Hill School

#### Case B

In 2005 the Entitat Metropolitana del Transport (transport authority of the metropolitan area of Barcelona-Spain) distributed among related administrative bodies and NGOs a draft of a call for tenders aiming to procure the service provision of door to door transport in Barcelona.

The Design for All Foundation answered to the invitation to comment the draft proposing several suggestions. The majority of these suggestions focused in to guarantee the quality of the service provision, like to adjust the number of vehicles to the demand, to inform about public accessible transport (as well as to foreigners), including interviews to the users in the quality assessment method, etc.

Another suggestion also accepted by the Transport Authority was to include CSR aspects in the awarding criteria. That is, it was suggested that 5% of the total score were related to social policies like employment of people with disabilities, balance in gender among employees, involvement in the community NGOs, etc.

#### Comments

It is innovative and a good tool for administrations not experienced in to include Design for All and disability issues in calls for tenders to distribute a draft of the call among related administrative bodies and NGOs that will help to improve the contents of the calls in these aspects.

It is also remarkable the inclusion of social aspects in the award criteria. A cheaper offer of a company lacking social responsibility would be more costly for society.

#### Case C

Since 1992, with the collaboration of experts and user organisations, Transports Metropolitans de Barcelona (Barcelona's public transport company) has been updating and improving throughout the years the technical description in the calls for tenders that they launch when purchasing buses. The technical requirements include detailed definitions, technical drawings and all the necessary elements (including the accessibility ones) to avoid mistakes in the construction process.

#### Comments

To produce well defined technical requirements not only helps to prevent mistakes and to purchase exactly what is intended but to facilitate the comparison between offers.

#### Case D

Applus Corporation is a multinational company with more than 6000 employees and present in 25 countries in three continents. The main business is certification, testing and audit in fields like automotive, safety, food, building, electronics, chemist, quality assurance, etc.

In 2004 the company decided that, due to the fact that their business guarantees the quality of products and services for the consumers, they decided to enlarge the concept of consumers including children, elderly and people with activity limitations.

As a consequence, the company developed the Corporate Social Responsibility policy based on the Design for All criteria. In practise that droved them to develop a plan to make their facilities accessible, to offer their clients a system to certify the accessibility of their premises, means of transport, and services and to use the income generated to disseminate the Design for All concepts through publications, conferences, etc.

#### Comments

The ethical approach of Applus has increased the reputation of the company among clients, companies, administrations and users facilitating their relationship with them.

But another unexpected outcome is that the employees realized in a very tangible way that the company is not only seeking for profit but also pursuing social ends.

Bearing in mind that, in Europe, one family out of four have a member with disability (and that also happens among the company's employees), the human resources of the corporation feel more involved to the philosophy of the company.

#### Case E

According to Spanish law companies with more than 50 employees have to employ at least 2% of its workforce with people with disabilities.

This law exists since 1982 but the companies didn't paid attention to and the administrative bodies didn't check up on this process.

In the last years, thanks to the pressure of NGOs, this question has been put in the social agenda. Beginning by requesting for a certificate of people with disability employment to have the right to participate in a call for tenders, nowadays to be candidate to be selected for any kind of administration's economical support (including Research & Development (R+D)) the company should demonstrate the fulfilment of this law.

**Comments**

Although it was hard for the companies in the beginning, throughout this process many companies realized that they already have employees with disability not being aware of the advantages in taxes that the company was losing and, on the other hand, by contracting new employees with disability, the attitudes of the human resources also improved regarding respect to diversity.

Regarding R+D initiatives it should be said that, since the 4<sup>th</sup> R+D Framework Program of the European Commission, when the projects associated with the improvement of quality of life, sustainable growth and information technologies include aspects related to Design for All, the elderly and people with disability tend to have more opportunities to achieve a better score in the calls for proposals.

**Case F**

In 2000, the Government of the Autonomous Region of Extremadura (Spain) passed the 202 Decree offering SMEs based in the region subsidies to cover up to 50% of the investments made by the companies implementing Design for All in their products and services.

This initiative supported by the regional Chamber of Commerce caused several companies from the food, transport and building sectors to develop plans in that respect.

**Comments**

In the past the belief was that the only way for administrative bodies to promote changes was through legislation, nowadays, both the Public Procurement considering social issues and economical support have become important tools for bringing out changes.

# THE BUILD-FOR-ALL APPENDICES

By  
The **Build-For-All** Partnership.  
Info-Handicap, Luxembourg

supported by the European Commission

Pilot project on actions to mainstream disability policies submitted under the open call for proposals for transnational projects VP/2004/008

Sole responsibility lies with the authors and the Commission is not responsible for any use that may be made of the information contained.

**DRAFT PUBLIC CONSULTATION DOCUMENT, January 2006**

**Please visit [www-build-for-all.net](http://www-build-for-all.net) for updates**

## Appendix 1 - List of accessibility relevant European standards (CEN norms)

The following CEN standards should be the support documents for the officers writing the invitations to tender as well as for the Tenderers:

### ISO TC 59: Building construction

ISO TR 9527:1994 *"Building construction – needs of disabled persons in buildings – design guidelines"* has been elaborated to give guidelines on the subject.

Sub Committee 16 "Accessibility and usability of the built environment", is currently drafting the ISO/CD 21542 *"Building construction — Accessibility and usability of the built environment"*

### CEN/TC 178 "Paving units and kerbs"

A specific standard for those with limited visual capacities is under development. It regards prEN 15209 *"Accessibility and usability of the built environment"*

### CEN/TC 10 "Lifts, escalators and moving walks"

EN 81-70:2003 *"Safety rules for the construction and installations of lifts - Particular applications for passenger and good passengers lifts - Part 70: Accessibility to lifts for persons including persons with disability"*

EN 115:1995 and its Amendments *"Safety rules for the construction and installation of escalators and passenger conveyors"*

Following standards are under preparation:

prEN 81-40 *"Safety rules for the construction and installation of lifts - Special lifts for the transport of persons and goods - Part 40: Stairlifts and inclined lifting platforms intended for persons with impaired mobility"*

prEN 81-41 *"Safety rules for the construction and installation of lifts - Special lifts for the transport of persons and goods - Part 41: Vertical lifting platforms intended for use by persons with impaired mobility"*

### CEN TC293: Technical aids for disabled persons

The primary objectives of this TC are:

- to produce standards on technical aids for persons with disabilities, including follow-up activities and revisions;
- to contribute to the development of mandates, the 'design for all' concept, and other centrally-located activities of importance to the field of technical aids for persons with disabilities;
- to inform about the CEN/TC 293 standards production and other activities.

TC293 is currently working, inter alia, on standards for hoists, walking aids, wheelchairs and prosthetics.

### **ISO TC 159: Ergonomics**

A specific ad hoc group “ergonomics for people with special requirements” has been set up. A new standard on usability of everyday products is under development. It regards:

ISO/DIS 20282-1 *“Ease of operation of everyday products – Part 1: Context of use and user characteristics”*

ISO/CD TS 20282-2 *“Ease of operation of everyday products -- Part 2: Test method”*

Also, the following project is under development:

ISO/AWI TR 22411 *“Ergonomic data and guidelines for the application of ISO/IEC Guide 71 in standards related to products and services to address the needs of older persons and persons with disabilities”*

### **ISO TC 22: Road vehicles**

Sub Committee 26 “Accessibility of vehicles to the physically handicapped” is preparing ISO/AWI 23688 *“Vehicles for the transport of people with reduced mobility with a maximum capacity of 8 seated passengers, driver not included”*

CEN/CENELEC Guide 6: *“Guidelines for standards developers to address the needs of older persons and persons with disabilities”*

This guide is primarily addressed to the standard’s writers and helps them to take into account the needs of older persons and persons with disabilities. But it is also a good tool for gathering information on the specific topic. The CEN/CENELEC Guide 6 is technically identical to the ISO/IEC Guide 71 and can be downloaded – free of charge – at following webpage:

<http://www.cenorm.be/boss/supporting/reference+documents/reference+documents.asp#8>

### **CEN Workshop: Design for All and Assistive Technologies in ICT.**

Two CWAs were elaborated:

- CWA 14661: 2003 containing guidelines to standardisers of ICT products and services in the CEN ICT domain (aimed to be a kind of ICT-sector guide, complementing CEN/CENELEC Guide 6)
- CWA 14835: 2003 containing guidelines for making information accessible through sign language on the web

Both CWAs reach the end of their 3 year life time during 2006. Unless resources are available for a major update to both of them, their validity will not be prolonged beyond 2006.

### **CEN/CENELEC Workshop: Accessibility in Collective Transport Systems (ACTS)**

This Workshop has drafted a CEN/CENELEC Workshop Agreement to provide guidance – to writers of relevant standards relating to collective transport systems -

how to take account of the needs of potential passengers with functional limitations, especially older persons and persons with disabilities.

The CWA 45546-1:2004 "*Guidelines to standardisers of Collective Transport Systems - Needs of older people and persons with disabilities - Part 1: Basic Guidelines*" can be considered as a sector specific supplement to CEN/CENELEC Guide 6.

Note: the development of standards is an ongoing process. For getting the latest information on the state of play, consult the website of CEN ([www.cenorm.be](http://www.cenorm.be)), CENELEC ([www.cenelec.org](http://www.cenelec.org)) or ISO ([www.iso.org](http://www.iso.org)).

## Appendix 2 - Implementing Accessibility Criteria in Practice

The ideas and statements of the lift, escalator and moving walks industry, drawing on the work of the Report of the Expert Group of the European Commission under the title of: *“Europe, accessible to all by 2010”* (2003), chapters 1.2, 1.3 and 2 are summarized below. They indicate numerous aspects of accessibility which should be taken into consideration in order to ensure that accessibility of the built environment is achieved by Contracting Authorities:

- The built environment must be fully accessible to all, keeping the mobility chain unimpaired and applying state-of-the-art safety
- All buildings should have horizontal and vertical easy access, to all floors or other spaces, suitable to all people.
- Where circumstances dictate, all main entrance and exit building doors will be powered
- No public building should be built without a lift if it has more than one floor.
- Level differences should be compensated by ramps or preferably lifting platforms. No step(s) up or down will hamper the access if no ramp is provided.
- All lifts should be equipped with audio and visual signals & controls which are designed for ease of use by every user and positioned at the right height in the lift car and on landings.
- Sanitary facilities should be accessible to all and will satisfy local requirements in terms of size and organisation
- Buildings signage must be integrated and displayed so that they will fulfil their function without being visually-discriminating, including the clear identification of glass areas for people with impaired vision.
- Lighting of public spaces should be sufficient to read signage in all conditions
- Every public building must provide means for the evacuation of ALL present in the building at all floors, in case of a fire or other emergency. The accessibility of fire-fighters and the evacuation of people with disabilities are priorities for officers writing public tenders.
- External connections of buildings with the public transport infrastructure will be optimized, with the necessary means, taking distance into account, avoiding level differences and enabling access to all able and less-able citizens.

**Further Measures that can be taken by Procurement bodies to achieve accessibility include:**

- Identification of the main issues affecting accessibility and inclusion

- Establishment of consultation groups
- Cooperation with representative organisations of and for disabled people
- Bringing accessibility expertise into construction projects
- Consulting or checking the accordance with pertinent CEN standards, related to specific areas (car parks), equipment (lifts, escalators & moving walks for ex.) and materials (tactile floors for ex.) (See list in Annex 1)
- Operating Disability proofing decision making to generate practical and pragmatic recommendations for accessible environments
- Conducting case studies in accessibility that demonstrate what can be achieved with careful thought and willingness to compromise

### Appendix 3 - Accessibility rules related to design

The fundamental accessibility criteria understood as **rules relating to design** are as following:

- Providing means for achieving equal spatial orientation to all users by the means of adequate spatial layout of the outdoor space and the spaces inside buildings, including the use of accessible signage, adequate way-finding and information systems.
- Providing means for achieving equal and unrestricted mobility to all users, outside and inside buildings, especially in terms of vertical circulation, horizontal circulation, spatial parameters of the spaces and facilities, having regard to site topography seen in the broader context, to the adequate illumination levels; mobility seen as elimination of hazardous elements, providing necessary infrastructure, selection of the adequate finishing materials and all necessary state-of- the art solutions.
- Providing means for achieving safe evacuation conditions from the buildings and from the outdoor facilities for everybody, having regard to their mobility possibilities.
- Providing means for assuring everyone's dignity in terms of creating the adequate conditions for personal hygiene in the inner spaces and in the use of the outdoor facilities.

This should be achieved by incorporating the requirements of Design for All in all groups of design and construction Works as specified in the Tender, according to the Member State Law, and according to the competencies of the Economic Operator. Compliance with these fundamental accessibility criteria should be clearly pointed out in the design and technical description of all kinds of Works by the Economic Operator .

## Appendix 4 - How to demonstrate Social Commitment

Having studied the range of issues and options open to an organisation in the field of adopting better practice approaches to disability and accessibility issues, it will be desirable to find ways of openly demonstrating this commitment to Corporate Social Responsibility<sup>16</sup> to the outside world. This can be done by adopting one or more of the following actions:

- Actively promoting diversity in your work force;
- Practicing equal opportunities recruitment;
- Undertaking positive action towards disabled persons (such as providing traineeships for disabled persons, targeted outreach towards disability organisations in the recruitment process; recruitment of disabled persons to the work force);
- Undertaking systematic disability awareness training for all company staff;
- Providing regular training of company staff in accessibility and Design for All;
- Undertaking specific initiatives to raise awareness about the benefits of accessibility and Design for All approaches;
- Ensuring the work place is accessible for disabled persons (both disabled clientele and disabled staff);
- Using new technologies to the advantage of people with disabilities, who stand to gain from more flexible forms of work and work organisation.
- Ensuring the provision of accessible goods and services
- Adopting a seamless approach to accessibility: implementation of this approach throughout all stages of the project from conception and design to implementation, construction and maintenance.
- Involving representative disability and older people's organisations in the design and implementation of project work

---

<sup>16</sup> Corporate Social Responsibility is defined by the European Commission as "a concept whereby companies integrate social and environmental concerns in their business operations and in their interaction with their stakeholders on a voluntary basis"

**Good practice examples**

The Schindler Award for Architecture "Access for All": to raise awareness and promote training of architecture students on the issue of accessibility in built environment design.

Adecco is implementing a Corporate Social Responsibility program: "Disability & Skills" is currently being spread throughout the Adecco network to have all business units compliant in terms of employment of people with disabilities at Adecco's clients and for internal recruitment focusing on skills.

Hewlett-Packard Products and Services accessibility information - accessibility database to inform customers of how HP products meet accessibility requirements.

**Appendix 5 - Resources for training**

**A series of national training Workshops will be organised in 2006**

Target audience will be public authorities, professional organisations and disability organisations from national and local level.

The outcome of these events – to be included in the final version of this document at the end of 2006 - will contribute to improve the content of the present Reference Manual in order that it can be adapted to the particular national, regional or local situations in the Member States.

**Supplemental appendixes are being prepared, i.e.:**

- How to ensure Public Procurement Results in Accessibility
- Disability proof decision making

**In the meantime all interested persons should refer to the project Website [www.build-for-all.net](http://www.build-for-all.net), that will be updated always when new materials will be available.**

## Appendix 6 - Glossary

**'Built Environment'** The "European Concept for Accessibility" mentions two types of environment: natural and built.

Natural environments: their development depends solely on the action of natural elements (rain, wind). As soon as natural environments like for example forests are modified in order to be used by people, they become part of the built environment.

Built environments: these are environments created or modified by people so that people may live in them. Examples of built environments: buildings, squares, vehicles (transport), parking spaces, streets, children's play areas, monuments, water/gas installations, etc. natural parks - in which plant life is protected, and designated paths and different services are provided and beaches - with equipment (ramps, walkways on the sand, etc.) that facilitates access to them and the various services they offer, and which provides specific assistance in terms of bathing (floats for children, floating chairs for people with mobility problems, or buoys to indicate safe areas).

Thus, the built environment refers to any space or facility designed by people for people, whether public or private...

**'Disabled people'** Disability is a "general term denoting the negative aspects of the (WHO, 2001) interaction between a person (with a health condition) and that person's contextual factors, i.e. environmental and personal. This term is only used when reference to the three dimensions of the 2001 WHO International Classification of Functioning, Disability and Health (ICF) - **Body Functions & Structures, Activity and Participation** - is intended." (Source: Sustainable Design International Ltd. 2000-2002: Harmonized E.U. Vocabulary - Useful Terms & Definitions Relating to 'Disability & Human Perception')

**'People with Reduced Mobility'** As quoted in the EDF response to the European Commission Staff Working Paper : Rights of Persons with Reduced Mobility when Travelling by Air - DOC EDF 04/08 EN June 2004 The term "person with reduced mobility" has been widely used in European Community and European Civil Aviation conference (ECAC) documents. Some concerns have been raised by disability organisations that the term "persons with reduced mobility" is not sufficiently clear. There has been some concern that the term does not, in an explicit-enough way, relate to those individuals who are blind, partially sighted, deaf, hard of hearing, or those who have an intellectual disability as such individuals do not necessarily experience limited "mobility" when travelling.

Therefore, EDF stresses that the diversity of disability must be recognised in the draft Regulation and that the term "person with reduced mobility" should be interpreted broadly

**For the purposes of Directives 2004/18/EC and 2004/17/EC, the following definitions shall apply.**

(Source: L 134/128 EN Official Journal of the European Union 30.4.2004)

**'Public contracts'** are contracts for pecuniary interest concluded in writing between one or more economic operators and one or more contracting authorities and having as their object the execution of Works, the supply of products or the provision of services within the meaning of this Directive.

**'Public Works contracts'** are public contracts having as their object either the execution, or both the design and execution, of Works related to one of the activities within the meaning of Annex I or a work, or the realisation, by whatever means, of a work corresponding to the requirements specified by the contracting authority.

A **'work'** means the outcome of building or civil engineering Works taken as a whole which is sufficient of itself to fulfill an economic or technical function.

**'Public supply contracts'** are public contracts having as their object the purchase, lease, rental or hire purchase, with or without option to buy, of products. A public contract having as its object the supply of

products and which also covers, as an incidental matter, siting and installation operations shall be considered to be a 'public supply contract'.

**'Public service contracts'** are public contracts having as their object the provision of services referred to in Annex II. A public contract having as its object both products and services within the meaning of Annex II shall be considered to be a 'public service contract' if the value of the services in question exceeds that of the products covered by the contract.

A public contract having as its object services within the meaning of Annex II and including activities within the meaning of Annex I that are only incidental to the principal object of the contract shall be considered to be a public service contract.

**'Public Works concession'** is a contract of the same type as a public Works contract except for the fact that the consideration for the Works to be carried out consists either solely in the right to exploit the work or in this right together with payment.

**'Service concession'** is a contract of the same type as a public service contract except for the fact that the consideration for the provision of services consists either solely in the right to exploit the service or in this right together with payment.

A **'framework agreement'** is an agreement between one or more contracting authorities and one or more economic operators, the purpose of which is to establish the terms governing contracts to be awarded during a given period, in particular with regard to price and, where appropriate, the quantity envisaged.

A **'dynamic purchasing system'** is a completely electronic process for making commonly used purchases, the characteristics of which, as generally available on the market, meet the requirements of the contracting authority, which is limited in duration and open throughout its validity to any economic operator which satisfies the selection criteria and has submitted an indicative tender that complies with the specification.

An **'electronic auction'** is a repetitive process involving an electronic device for the presentation of new prices, revised downwards, and/or new values concerning certain elements of tenders, which occurs after an initial full evaluation of the tenders, enabling them to be ranked using automatic evaluation methods. Consequently, certain service contracts and certain Works contracts having as their subject-matter intellectual performances, such as the design of Works, may not be the object of electronic auctions.

The terms **'contractor'**, **'supplier'** and **'service provider'** mean any natural or legal person or public entity or group of such persons and/or bodies which offers on the market, respectively, the execution of Works and/or a work, products or services.

The term **'economic operator'** shall cover equally the concepts of contractor, supplier and service provider. It is used merely in the interest of simplification.

An economic operator who has submitted a tender shall be designated a **'Tenderer'**. One which has sought an invitation to take part in a restricted or negotiated procedure or a competitive dialogue shall be designated a **'candidate'**.

**'Contracting authorities'** means the State, regional or local authorities, bodies governed by public law, associations formed by one or several of such authorities or one or several of such bodies governed by public law.

A **'body governed by public law'** means any body:

- (a) established for the specific purpose of meeting needs in the general interest, not having an industrial or commercial character;
- (b) having legal personality; and
- (c) financed, for the most part, by the State, regional or local authorities, or other bodies governed by public law; or subject to management supervision by those bodies; or having an administrative, managerial or supervisory board, more than half of whose members are appointed by the State, regional or local authorities, or by other bodies governed by public law.

Non exhaustive lists of bodies and categories of bodies governed by public law which fulfill the criteria referred to in (a), (b) and (c) of the second subparagraph are set out in Annex III. Member States shall periodically notify the Commission of any changes to their lists of bodies and categories of

bodies.

A **'central purchasing body'** is a contracting authority which:

- acquires supplies and/or services intended for contracting authorities, or
- awards public contracts or concludes framework agreements for Works, supplies or services intended for contracting authorities.

**'Open procedures'** means those procedures whereby any interested economic operator may submit a tender.

**'Restricted procedures'** means those procedures in which any economic operator may request to participate and whereby only those economic operators invited by the contracting authority may submit a tender.

**'Competitive dialogue'** is a procedure in which any economic operator may request to participate and whereby the contracting authority conducts a dialogue with the candidates admitted to that procedure, with the aim of developing one or more suitable alternatives capable of meeting its requirements, and on the basis of which the candidates chosen are invited to tender.

For the purpose of recourse to the procedure mentioned in the first subparagraph, a public contract is considered to be **'particularly complex'** where the contracting authorities:

- are not objectively able to define the technical means in accordance with Article 23(3)(b), (c) or (d), capable of satisfying their needs or objectives, and/or
- are not objectively able to specify the legal and/or financial make-up of a project.

**'Negotiated procedures'** means those procedures whereby the contracting authorities consult the economic operators of their choice and negotiate the terms of contract with one or more of these.

**'Design contests'** means those procedures which enable the contracting authority to acquire, mainly in the fields of town and country planning, architecture and engineering or data processing, a plan or design selected by a jury after being put out to competition with or without the award of prizes.

**'Written'** or **'in writing'** means any expression consisting of words or figures which can be read, reproduced and subsequently communicated. It may include information which is transmitted and stored by electronic means.

**'Electronic means'** means using electronic equipment for the processing (including digital compression) and storage of data which is transmitted, conveyed and received by wire, by radio, by optical means or by other electromagnetic means.

The **'Common Procurement Vocabulary (CPV)'** shall designate the reference nomenclature applicable to public contracts as adopted by Regulation (EC) No 2195/2002, while ensuring equivalence with the other existing nomenclatures.

In the event of varying interpretations of the scope of this Directive, owing to possible differences between the CPV and NACE nomenclatures listed in Annex I, or between the CPV and CPC (provisional version) nomenclatures listed in Annex II, the NACE or the CPC nomenclature respectively shall take precedence.

**'public telecommunications network'** means the public telecommunications infrastructure which enables signals to be conveyed between defined network termination points by wire, by microwave, by optical means or by other electromagnetic means;

a **'network termination point'** means all physical connections and their technical access specifications which form part of the public telecommunications network and are necessary for access to, and efficient communication through, that public network;

**'public telecommunications services'** means telecommunications services the provision of which the Member States have specifically assigned, in particular, to one or more telecommunications entities;

**'telecommunications services'** means services the provision of which consists wholly or partly in the transmission and routing of signals on the public telecommunications network by means of telecommunications processes, with the exception of broadcasting and television.

[SEC(2008) 2916]

## 1. EXECUTIVE SUMMARY

As our society is evolving to an 'information society', we are becoming intrinsically more dependent on technology-based products and services in our daily lives. Yet poor e-accessibility means many Europeans with a disability are still unable to access the benefits of the information society.

This issue of e-accessibility has received high policy visibility and attention in recent years. In 2006, European Ministers agreed targets in their 'Riga Declaration' to deliver significant progress by 2010. In 2007, benchmarking showed that the pace of progress was still insufficient and that further efforts were needed in order to achieve the Riga targets. Web accessibility, especially the accessibility of public administration websites, has emerged as a high priority due to the growing importance of the Internet in everyday life.

The Commission considers it is now urgent to achieve a more **coherent, common and effective approach to e-accessibility, in particular web accessibility**, to hasten the advent of an accessible information society, as announced in the Renewed Social Agenda<sup>1</sup>. Through this Communication, the Commission describes the current state of play, establishes the rationale for European action and sets out key steps to be taken.

To achieve a common and coherent **e-accessibility approach**:

- European Standardisation Organisations (ESOs) should **pursue wider e-accessibility standardisation** activities to reduce market fragmentation and facilitate increased adoption of ICT-enabled goods and services.
- Member States, stakeholders and the Commission should **stimulate greater levels of innovation and deployment** in e-accessibility, in particular through the use of the EU research and innovation programmes and the Structural Funds.
- All stakeholders should **make full use of** the opportunities to address e-accessibility within **existing EU legislation**. The Commission will include appropriate e-accessibility requirements in revisions or new legislative developments.
- The Commission will **boost stakeholder cooperation activities** to enhance the coherence, coordination and impact of the actions. In particular, a new high-level ad hoc group will be mandated to provide guidance on the overall coherent approach to e-accessibility (including web accessibility) and propose priority actions to overcome e-accessibility barriers.

---

<sup>1</sup> COM(2008)412.

To speed up progress in the special case of **web accessibility**:

- ESOs should **rapidly adopt European standards** for web accessibility, following the establishment of updated web guidelines (WCAG 2.0) by the World Wide Web Consortium.
- Member States should **step up work** on making public web sites **accessible** and **jointly prepare for swift adoption** of European web accessibility standards.
- The Commission will **monitor and publish progress** and may follow up at a later stage with legislative action.

## 2. E-ACCESSIBILITY

**E-accessibility** means overcoming the technical barriers and difficulties that people with disabilities, including many elderly people, experience when trying to participate on equal terms in the information society.

If everyone is to have equal opportunities for participation in today's society, the full range of ICT goods, products and services need to be accessible. This includes computers, telephones, TVs, online government, online shopping, call centres, self-service terminals such as automatic teller machines (ATMs) and ticket machines.

### 2.1. State of play

The scale of the accessibility challenge is huge and growing: around 15% of Europe's population has a disability and up to one in five working-age Europeans have impairments requiring accessible solutions. Overall, three out of every five people stand to benefit from e-accessibility, as it improves general usability<sup>2</sup>.

E-accessibility has socio-economic implications for both individuals and Europe as a whole. For example, accessible ICT-enabled solutions can help older workers to stay in employment and enhance the take-up of online public services such as e-Government and e-Health. Lack of e-accessibility excludes significant sectors of the population and prevents them from fully carrying out their professional, education, leisure, democratic participation and social activities. Strengthening e-accessibility will contribute to both economic and social inclusion goals.

Many countries have adopted at least some legislative or support measures to promote e-accessibility and parts of the ICT industry are making significant efforts to improve the accessibility of their products and services<sup>3</sup>.

E-accessibility is also a key element in the European e-Inclusion policy<sup>4</sup>. In a broader context, ICT falls within the scope of the proposed Directive on equal treatment that refers to access to and supply of goods and services available to the public<sup>5</sup>. The European Community and the

<sup>2</sup> The Demographic Change — Impacts of New Technologies and Information Society.

<sup>3</sup> See details in accompanying Staff Working Paper.

<sup>4</sup> i2010 Communication COM(2005) 229, Communication on e-accessibility COM(2005) 425, and Communication on e-Inclusion COM(2007) 694.

<sup>5</sup> COM(2008) 426.

Member States also have to fulfil obligations under the United Nations Convention on the Rights of Persons with Disabilities in relation to accessibility of ICT goods and services. Some pieces of EU legislation already directly or indirectly address e-accessibility issues.

## 2.2. Rationale for further action

Despite the benefits and political attention, progress in e-accessibility is still unsatisfactory. There are many striking examples of accessibility deficits. E.g. text relay services, essential for deaf and speech-impaired people, are only available in half of the Member States; emergency services are directly accessible by text telephone in only seven Member States; broadcasting with audio description, subtitled TV programming and TV sign-language programming remains very poor; only 8% of ATMs installed by the two main European retail banks provide 'talking' output<sup>6</sup>.

The existing EU *acquis* relating to e-accessibility is limited. At Member State level, there is considerable fragmentation in the treatment of e-accessibility, both in the issues addressed (usually fixed telephony services, TV broadcast services and public website accessibility) and the completeness of policy instruments used. Faced with divergent requirements and uncertainties, the ICT industry suffers from this market fragmentation, making it difficult to achieve the economies of scale necessary to sustain widespread innovation and market growth. Parts of the industry are actively engaged and cooperating with users (e.g. on accessible digital television) but too many are watching from the sidelines.

The key issue in e-accessibility is that current efforts have insufficient impact due to a lack of coherence, unclear priority setting, and poor legislative and financial support.

**A common and coherent European approach** to e-accessibility is therefore key to achieving significant improvements.

## 2.3. Proposed actions

### (1) Delivering the change — strengthening policy priorities, coordination and stakeholder cooperation

At European level several activities have been put in place in recent years. Now is the time to increase synergies between these and reinforce individual areas of action for greater and more consistent impact.

Member States, users and industry need to step up their efforts and seek more impact through greater cooperation at European level and better exploitation of existing EU policy instruments. To support and strengthen coherence and effectiveness of a common approach and to help define priorities, the Commission will establish an **ad hoc high-level group on e-accessibility**, reporting to the i2010 high level group, involving consumer organisations and representatives of disabled and elderly users, ICT and assistive technology and service industries, academia and relevant authorities.

Early in 2009, the Commission will establish an **ad hoc high-level group** to provide guidance on priorities and a more coherent approach to e-accessibility. Stakeholders are called upon to commit to this cooperation.

<sup>6</sup> For details, see the MeAC study (Measuring progress of e-accessibility in Europe).

The Commission will **boost its existing support for cooperation** with and between stakeholders. In particular the groups following the implementation of i2010, standardisation matters, telecommunication issues and the disability action plan should use the guidance of the high-level group to inform their priorities. It is also important that users, relevant authorities, and industry reinforce their commitment and cooperation on e-accessibility matters.

Priorities for e-accessibility need to be selected. The first is web accessibility, where the proposed coherent and common approach can be applied. Next are the accessibility of digital television and electronic communications, including accessibility of the single European emergency number. For these, cooperation of users and industry should be increased and, with the help of the high-level group, better linked to the EU-level legislative and innovation support.

Self-service terminals and electronic banking is another high priority<sup>7</sup>. The closer cooperation of stakeholders will help to obtain guidance on further priorities and define a common programme of future work.

The Commission has already addressed e-accessibility in its proposal for a new version of the e-government European Interoperability Framework<sup>8</sup>, and will do so in its follow-up to the i2010 initiative and the disability action plan.

The Commission will ensure e-accessibility remains a **policy priority** in the follow-up to i2010 and disability action plan.

This closer coordination and cooperation will be further strengthened through enhanced exploitation of the activities mentioned below.

## (2) Monitoring progress and reinforcing good practice

The Commission will launch a study in 2009 to continue monitoring general e-accessibility and web accessibility progress and implementation, following up two studies conducted in 2006-2008<sup>9</sup>.

Under the 2009 Competitiveness and Innovation Programme (CIP), the Commission will propose a new thematic network on e-accessibility and web accessibility to further enhance stakeholder cooperation and the building up of experience and collection of good practices. It will also seek to reinforce the *ePractice* good practice exchange network on e-government, e-health and e-Inclusion, which has already amassed a vast amount of expertise on e-accessibility.

The Commission will monitor web-accessibility and e-accessibility progress and implementation, support cooperation and exchange of good practices via **studies** and a **CIP thematic network**, to be launched in 2009.

## (3) Supporting innovation and deployment

---

<sup>7</sup> See report on the public consultation.

<sup>8</sup> <http://ec.europa.eu/idabc/en/document/7728>

<sup>9</sup> MeAC and study on accessibility of ICT products and services for disabled and elderly people.

There is already extensive support for e-accessibility research and innovation. In 2008, 13 new projects were funded with some €43m from the EU research programme. The Commission will continue to actively support e-accessibility and ICT for independent living of elderly people through the EU research programmes with a further call for proposals in 2009.

The Commission will **ensure e-accessibility is a strong research and innovation priority** in 2009 and beyond.

Member States and the Commission will use the Ambient Assisted Living joint research programme, launched in 2008, to stimulate innovative ICT-based solutions for independent living and the prevention and management of chronic conditions of elderly people.

Under the 2008 CIP, the Commission funded a pilot project on accessible TV and pilots on ICT for elderly people to accelerate technology deployment. In 2009, the Commission will fund a pilot on 'total conversation' (the combination of audio, text and video communications to support people with disabilities), which will help hearing- and speech-impaired persons to access the European '112' emergency number.

Member States and stakeholders are urged to **stimulate e-accessibility innovation and deployment** via the Structural Funds, FP7, the AAL programme and national programmes.

The Structural Funds Regulation<sup>10</sup> requires that the Member States consider accessibility for disabled persons as one of the criteria to receive funding. In this context, the Commission will provide a 'disability toolkit' in 2009, applicable to ICTs, and encourage Member States and Regions to ensure that ICT accessibility is incorporated in their procurement and funding criteria.

The Commission will provide a **disability toolkit** applicable to ICTs in 2009 for use in Structural Funds and other programmes.

#### **(4) Facilitating standardisation activities**

The Commission continues its strong support for e-accessibility in its standardisation work programme. In particular, Mandate 376 issued to the European Standardisation Organisations is an important standardisation activity to foster e-accessibility.<sup>11</sup> The Commission will promote the use of the results from this standardisation work and will seek a rapid continuation of Mandate 376 to deliver the actual standards and related conformity assessment schemes. This process will be complemented and supported by stakeholders' dialogue, exchange of good practices and deployment pilots, as referred to in the proposed actions of this Communication.

Under Mandate 376, ESOs should **rapidly develop EU standards** for e-accessibility, in cooperation with relevant stakeholders during 2009 and beyond.

<sup>10</sup> Council Regulation (EC) 1083/2006

<sup>11</sup> The aim of Mandate 376 is to enable the use of public procurement and practice for ICT's to remove barriers to participation in the Information Society by disabled and older people. The Mandate was given by the European Commission to the ESOs to come up with a solution for common requirements (for example for text sizes, screen contrast, keypad sizes etc) and conformance assessment.

## (5) Exploiting current and considering new legislation

There is a clear correlation at national level between the existence of legislation and the actual level of progress on e-accessibility<sup>12</sup>. Research points to the risks of legal fragmentation in the EU due to divergent legislative measures. Based on this, and building on the 2005 and 2007 Communications, the Commission has started exploring a more general legislative approach to e-accessibility.

However, given the vast, complex and evolving nature of the e-accessibility field, there is not yet a clear consensus on possible EU legislation dedicated to e-accessibility<sup>13</sup>, e.g. on elements such as scope, standards, compliance mechanisms and links to existing legislation. Furthermore, although there is a clear consensus on the need to act jointly to improve e-accessibility, there are different views on the next priorities to address. The Commission has therefore concluded that the time is not yet right for a specific e-accessibility legislative proposal, but will continue to assess its feasibility and relevance, taking into account actual progress in the field.

Nevertheless, there are provisions under current EU legislation that remain under-exploited, in particular for radio telecommunications equipment, electronic communications, public procurement, copyright in the information society, equality in employment, value added tax and state aid exemptions<sup>14</sup>. Making full use of these provisions would already significantly improve e-accessibility in Member States. The Commission therefore encourages Member States to make the most of these before new legislation is considered.

Several of the above pieces of EU legislation are under review or will be reviewed soon<sup>15</sup>. The Commission will work to ensure that, where appropriate, e-accessibility requirements are considered and reinforced in these revisions. Moreover, legislative proposals for electronic communications significantly strengthen provisions on disabled users under the current framework. The Commission will also carefully monitor the transposition and implementation of the audiovisual media services Directive<sup>16</sup> in particular its Article 3c that provides that Member States shall encourage media service providers under their jurisdiction to ensure that their services are gradually made accessible to people with a visual or hearing disability.

**The Commission will ensure that appropriate e-accessibility provisions are integrated in revisions of EU legislation. Member States, stakeholders and the Commission should make full use of opportunities in current legislation to strengthen e-accessibility.**

---

<sup>12</sup> See MeAC and study on accessibility of ICT products and services for disabled and elderly people.

<sup>13</sup> In the public consultation 90% of user organisations considered binding legislation a high priority, versus 33% of industry and public authorities.

<sup>14</sup> Directives 2000/78/EC, 2002/21/EC, 1999/5/EC, 2004/18/EC, 2001/29/CE, 2007/65/EC.

<sup>15</sup> For example, Directive 1999/5/EC on terminal equipment is under review: in this context, the Commission will make sure to maintain the possibility to activate the relevant Article 3(3)(f).

<sup>16</sup> Directive 2007/65/EC.

### 3. WEB ACCESSIBILITY

**Web accessibility** is an important aspect of e-accessibility which offers disabled people the possibility to perceive, understand, navigate, interact with and contribute to the Web. It also benefits other people confronted with visual, dexterity or cognitive limitations, such as elderly people. Web accessibility has become particularly important because of the explosive growth in online information and interactive services: online banking, shopping, government and public services, and communicating with distant relatives or friends.

#### 3.1. State of play

Despite its importance, the overall level of web accessibility remains poor across the EU. Several national and European surveys conducted over the last few years have found that the majority of websites, public and private, do not comply even with the most basic internationally accepted guidelines for accessibility. A recent survey found that only 5.3% of government websites and hardly any of the commercial websites surveyed were fully compliant with the basic accessibility guidelines<sup>17</sup>. This confirms why many people find important websites difficult to use and are therefore at risk of being partially or totally excluded from the information society.

The accessibility of public websites has received increasing policy attention in recent years in Member States<sup>18</sup>. At European level, a 2001 Communication on web accessibility encouraged Member States to endorse the Web Content Accessibility Guidelines (WCAG)<sup>19</sup>. In two Resolutions<sup>20</sup>, the Council stressed the need to speed up accessibility to the web and its content. The European Parliament suggested in 2002 that all public websites be fully accessible to disabled persons by 2003<sup>21</sup>. In 2006, the Riga Ministerial Declaration on an inclusive Information Society included a commitment that 100% of public websites be accessible by 2010.

Internationally, WCAG version 1 was adopted in 1999 by the World Wide Web Consortium (W3C). However, ambiguities led to fragmented implementations by Member States, and in view of new internet developments, WCAG 1.0 is becoming outdated. W3C has been working on a new version of the specifications (WCAG 2.0) for several years; these are now in the final stages of adoption. The challenge this time is to avoid a fragmented implementation.

#### 3.2. Rationale for further action

Making websites more accessible may be challenging in some cases, involving certain costs and expertise. However, there is increasing evidence and documented examples that making a website accessible delivers real benefits not only for disabled users, but also for website owners and users in general. Services are easier to use, simpler to maintain and accessed by more users<sup>22</sup>. As a result, improving website accessibility improves the situation for people

---

<sup>17</sup> MeAC study.

<sup>18</sup> See related Staff Working Paper.

<sup>19</sup> COM(2001) 529.

<sup>20</sup> 2002/C 86/02 and 2003/C 39/03.

<sup>21</sup> C5-0074/2002-2002/2032(COS).

<sup>22</sup> Staff Working Paper.

with disabilities and also for others and can thus strengthen the competitiveness of European companies.

#### **Case study: benefits of an accessible website**

After making their website accessible, a financial services business in the UK identified as benefits:

- Customers found information more quickly and stayed on the site longer.
- New customers used the service, increasing online sales.
- Website maintenance was simpler, quicker and cheaper.
- The website achieved significantly higher search engine rankings.
- Compatibility problems were eliminated and mobile device access improved.
- 100% return on investment in less than 12 months.

Even so, persistent legislative fragmentation across Member States combined with the lack of clear legislative action at European level continues to hamper the internal market, constitutes barriers to consumers and citizens in this cross-border environment, and hinders industry development. The United Nations Convention on the Rights of Persons With Disabilities foresees obligations related to the internet which State Parties have to comply with. Further action at European level is therefore appropriate.

### **3.3. Proposed actions**

The primary responsibility for improving web accessibility rests with Member States and individual service providers. Nevertheless, there are actions that the Commission can undertake or facilitate that will help accelerate the improvement in web accessibility in Europe, even without specific EU legislative provisions on web accessibility. Overall success will be achieved through a common and consistent approach. The key action areas are:

#### **(1) Facilitate the rapid adoption and implementation of international guidelines in Europe**

There is broad consensus that WCAG 2.0 guidelines are the technical specifications to be closely adhered to for web accessibility. Once W3C reaches agreement on the guidelines, expected in the near future, Mandate 376 will be able to complete its harmonisation work at European level. In the meantime, Member States should undertake actions to ensure the Riga target for accessible public websites is achieved and prepare for the rapid incorporation of new web-accessibility specifications into national rules in a common and coherent way by:

- Publishing during 2009-2010 updated technical guidance and, where appropriate, translating relevant W3C specifications;
- Identifying during 2009 the public websites and intranets<sup>23</sup> concerned and achieving their accessibility by 2010.

---

<sup>23</sup> In accordance with the Employment Equality Directive 2000/78/EC.

The Commission will continue its work to improve the accessibility of its own websites, updating its internal guidance to reflect the new specifications.

Non-public service providers, in particular owners of websites providing services of general interest<sup>24</sup>, and providers of commercial websites that are essential for participation in the economy and society are also encouraged to improve web accessibility (2008 onwards).

Member States should **achieve 100%** accessibility of public websites by 2010 and prepare for rapid transition to updated web accessibility specifications **in a common and coherent way**.

Websites owners providing services of general interest and other relevant website owners should improve the accessibility of their websites.

The European Standardisation Organisations, in cooperation with stakeholders, should rapidly develop **EU standards for web accessibility** building on WCAG 2.0.

The Commission is improving the accessibility of Commission websites, updating internal guidance to reflect the new specifications.

The Commission will monitor and support these developments, encouraging Member States to take rapid action on the key aspects of implementation and facilitating the collection and exchange of practical experience, primarily through the ePractice platform<sup>25</sup>. Depending on progress and when the standards are in place, the Commission will consider the need for common EU guidance, including legislative action<sup>26</sup>.

The Commission will monitor and publish progress and consider the need for common EU guidance, including legislative action (2009 onwards).

## (2) **Improve the understanding of and promote web accessibility**

There is a strong need for increased visibility, understanding and awareness of the needs and solutions for web accessibility. Member States should take a leading role in achieving this by:

- Widely promoting accessibility of websites by providing clear information and guidance on website accessibility, including assistive technologies<sup>27</sup>, and encouraging the use of accessibility statements<sup>28</sup>;
- Supporting training schemes, knowledge sharing and good practice exchange;
- Purchasing accessible tools and websites in their public procurement;
- Assigning a national contact point for web accessibility, e.g. via a website, in 2009;

---

<sup>24</sup> As referred to in COM(2007) 725.

<sup>25</sup> [www.epractice.eu](http://www.epractice.eu).

<sup>26</sup> See Impact Assessment of COM 2007 (694)

<sup>27</sup> Pieces of ICT equipment that support functional capabilities of people with disabilities.

<sup>28</sup> Providing supporting information such as accessibility policy of the website, compliance with relevant specifications, support for persons with disabilities, complaint mechanisms.

- monitoring and reporting progress on compliance, user satisfaction and implementation costs for web accessibility on both public and other websites to the proposed high-level group and general public.

Member States should **lead in improving the awareness and understanding** of web accessibility in a coherent, efficient and effective manner and **report progress** to the high-level group.

#### 4. CONCLUSION

Common and coherent action is required on many fronts to achieve e-accessibility. In particular, immediate and rapid progress on web accessibility is essential. All stakeholders have decisive roles to play to achieve the common goal of a truly inclusive information society.

The Commission invites the Council, the European Parliament, the Committee of the Regions, and the Economic and Social Committee to express their views on the actions to be taken to make the information society accessible to all.

## Annex – Summary of actions

### E-accessibility

<i>Actions</i>	<i>Date</i>	<i>Responsible</i>
Establish an ad hoc <b>high-level group</b> to provide guidance on priorities and a more coherent approach to e-accessibility. Stakeholders are called upon to commit to this cooperation.	Early 2009	EC, stakeholders
Ensure e-accessibility remains a <b>policy priority</b> in the follow-up to i2010 and disability action plan.	2009-	EC
<b>Monitor web-accessibility and e-accessibility progress and implementation</b> , support cooperation and exchange of good practices via <b>studies</b> and a <b>CIP thematic network</b> .	2009-	EC, industry and stakeholders
Ensure e-accessibility is a strong <b>research and innovation priority</b> .	2009 -	EC
Stimulate <b>e-accessibility innovation and deployment</b> via the Structural Funds, FP7, the AAL programme and national programmes.	2009 -	MS, other stakeholders
Provide a <b>disability toolkit</b> applicable to ICTs for use in Structural Funds and other programmes.	2009	EC
Under Mandate 376, <b>rapidly develop EU standards</b> for e-accessibility, in cooperation with relevant stakeholders.	2009-	ESOs
Ensure appropriate <b>e-accessibility provisions are integrated in revisions</b> of EU legislation.	2008-	EC
<b>Make full use of opportunities in current legislation</b> to strengthen e-accessibility.	2008-	MS, EC industry and stakeholders

### Web-accessibility

Achieve 100% <b>accessibility of public websites</b> and prepare for rapid transition to updated web accessibility specifications in a <b>common and coherent way</b> .	2009-2010	MS
Rapidly develop <b>EU standards for web accessibility</b> building on WCAG 2.0.	2009-	ESOs (and stakeholders)
Improve the accessibility of <b>Commission websites</b> , updating internal guidance to reflect the new specifications.	2009-	EC
<b>Websites owners providing services of general interest</b> and other relevant website owners to improve the accessibility of their websites.	2009-	Other stakeholders
<b>Monitor and publish progress</b> and consider the need for common EU guidance, including legislative action.	2009-	EC
Lead in improving the <b>awareness and understanding</b> of web accessibility in a coherent, efficient and effective manner and report progress to the high-level group.	2008-	MS

COMMISSION OF THE EUROPEAN COMMUNITIES

Brussels, 13.9.2005  
COM(2005)425 final

**COMMUNICATION FROM THE COMMISSION TO THE COUNCIL,  
THE EUROPEAN PARLIAMENT AND THE EUROPEAN ECONOMIC AND  
SOCIAL COMMITTEE AND THE COMMITTEE OF THE REGIONS**

**eAccessibility**

**[SEC(2005)1095]**

**COMMUNICATION FROM THE COMMISSION TO THE COUNCIL,  
THE EUROPEAN PARLIAMENT AND THE EUROPEAN ECONOMIC AND  
SOCIAL COMMITTEE AND THE COMMITTEE OF THE REGIONS**

**eAccessibility**

Accessible Information and Communication Technologies (ICT) will improve the quality of life of people with disabilities significantly. At the same time, the lack of equal opportunities to access ICT can lead to exclusion. In this Communication, the Commission proposes a set of policy actions that foster eAccessibility. It calls on Member States and stakeholders to support voluntary positive actions to make accessible ICT products and services far more widely available in Europe.

This Communication on eAccessibility contributes to the implementation of the recently launched “**i2010 – A European Information Society for growth and employment**”<sup>1</sup> initiative, that presents a new strategic framework and broad policy orientations to promote an open and competitive digital economy, emphasising ICT as a driver of inclusion and quality of life. The Commission has the ambitious objective of achieving an “Information Society for All”, promoting an inclusive digital society that provides opportunities for all and minimises the risk of exclusion.

## **1. INTRODUCTION**

People with disabilities constitute about 15% of the European population and many of them encounter barriers when using ICT products and services. In certain cases, older people can be faced with similar problems. Accessible ICT products and services have now become a priority in Europe, due to the demographic shift: 18% of the European population was aged over 60 in 1990, while this is expected to rise to 30% by 2030.<sup>2</sup>

A recent study in the USA<sup>3</sup> found that 60% of working-age adults can benefit from the use of accessible technologies because they experience mild impairments or difficulties when using current technologies.

A 2002<sup>4</sup> study found that over 48% of 50 years+ persons in Europe considered that they are not being adequately addressed by manufacturers in the design of their products. Between 10 and 12 million were nevertheless potential customers of new mobile phones, computer and internet services.

The implications are clear: **making the benefits of ICT available to the widest possible number of people is a social, ethical and political imperative.** Furthermore, this creates markets of increasing economic significance.

<sup>3</sup> The Wide Range of Abilities and Its Impact on Computer Technology – Forrester Research Inc., 2003.

<sup>4</sup> Seniorwatch IST-1999-29086 [www.seniorwatch.de](http://www.seniorwatch.de)

Overcoming the technical barriers and difficulties that people with disabilities and others experience when trying to participate on equal terms in the Information Society (IS) is known as “**eAccessibility**”. This is part of the broader eInclusion concept, which also addresses other types of barriers, such as financial, geographical or educational.

This Communication builds on previous work on eAccessibility under the two eEurope Action Plans and on the conclusions and results of RTD projects. It also integrates the main findings of an **online consultation**<sup>5</sup> that was held early 2005, which showed a very strong support (over 88% of responses) for the European Institutions to take initiatives to address a situation that is perceived by a significant majority (over 74%) as a lack of coherence among accessible ICT products and services in Europe. A wider availability of accessible products and services is also felt to be needed (84% of respondents).

**The main objective of this Communication is to promote a consistent approach to eAccessibility initiatives in the Member States on a voluntary basis, as well as to foster industry self-regulation.**

## **2. THE PRACTICAL CHALLENGES**

New technologies have already provided clear support to persons with disabilities and have enabled the realisation of functions in an independent manner that was only possible before with human assistance. However, despite efforts by industry, persons with disabilities still report a large number of problems when trying to use information technology products and services for example:

- lack of harmonised solutions, e.g. lack of access to the 112 emergency number from text phones in many Member States;
- lack of interoperable solutions for accessible ICT ;
- software not compatible with assistive devices, screen readers for blind users are often impossible to use after releases of new operating systems;
- interference between mainstream products and assistive devices, e.g. GSM telephones and hearing aids;
- lack of European-wide standards, e.g. the seven different, incompatible text phone systems for deaf and hard-of-hearing persons;
- lack of adequate services, e.g. many websites too complicated for cognitively impaired or inexperienced users or impossible to read and navigate through for visually impaired persons;
- lack of products and services for certain groups, e.g. telephone communication for sign language users;
- physical design difficult to use, e.g. keypads and displays on many devices;
- lack of accessible content;
- restricted choice of electronic communication services, quality and price.

---

<sup>5</sup> Results available at:  
[http://europa.eu.int/information\\_society/policy/accessibility/com\\_ea\\_2005/a\\_documents/com\\_consult\\_res.html#\\_Toc97028181](http://europa.eu.int/information_society/policy/accessibility/com_ea_2005/a_documents/com_consult_res.html#_Toc97028181)

Most of these problems could, conceptually, be easily solved from a technical point of view, but require cooperation, coordination and determination at European level as market forces alone seem not to have been sufficient to date.

In the near future, examples of new technologies where accessibility aspects must be considered early include:

- digital television, e.g. regarding standards and compatibility as well as design of services and hardware;
- third generation mobile telephones, e.g. regarding design of hardware and software as well as services;
- broadband communication, e.g. using the possibilities of multimodal presentations in a way that enhances accessibility rather than the opposite.

Addressing these issues, previously thought to be of interest to a specific target segment of the population, will actually have positive consequences for the majority of technology users.

### **3. MARKET AND ECONOMY ISSUES**

ICT research and the market have come up with innovative solutions for some of these challenges. The main obstacles to their widespread availability are:

- until now they have been targeting a small market (seen essentially as people with disabilities and in some cases older people), mostly through SMEs at a national or regional level;
- the scarcity of applicable technical standards and technical specifications;
- relevant European legislation only recently explicitly contemplated the possibility of using accessibility requirements in the technical specifications in public procurement procedures;
- there are significant differences in the way some Member States have developed their own solutions.

As a consequence, the accessible ICT products and services market in Europe is still in an initial development phase, largely fragmented at national borders and lacking harmonised legislation and applicable technical standards. This does not facilitate the functioning of a single market and poses an increased burden on industry to comply with differing requirements in different Member States.

Increasingly, the target consumers are not seen anymore as only persons with disabilities and in some cases, older people, but as the whole population. This realization entails a market change we are just beginning to witness, as the bigger European industrial players are now turning their attention to this market sector, although they are still some time away before putting their full weight behind it.

This is also the case of the Telecommunications area – the pervasiveness of telecommunications products and services is now such that even this (relatively small for now) market niche is significant as a differentiator and growth generator, attracting interest from the bigger market players.

In conclusion, eAccessibility and related assistive technology products and services are now on the “midterm radar” of even the bigger mainstream technology providers, not only from Europe but also from other regions of the world.

#### 4. LEGAL AND POLICY ISSUES

On several occasions, Council has encouraged action at EU level for instance when it called on Member States and invited the Commission to “*Tap the Information Society’s potential for people with disabilities and, in particular, tackle the removal of technical and other barriers to their effective participation in the Knowledge Based Economy and Society*”<sup>6</sup>. The European Parliament has also supported this perspective<sup>7</sup>.

In particular, European policies and legislation have recognised employment and occupation as key elements in guaranteeing equal opportunities for all, contributing strongly to the full participation of citizens in economic, cultural and social life and to realising their potential. The potential impact on this from a wider availability of quality accessible ICT products and services is clear. It will foster greater employability, better social inclusion and give people the ability to live independently for longer.

The need to include all Europeans in the Information Society has been expressed by the European Institutions in many contexts. The Commission has taken initiatives in the two eEurope Action Plans to build a more accessible IS. The 2002 Action Plan included a separate action line addressing these issues. It recommended the adoption of the Web Accessibility Initiative (WAI)<sup>8</sup> guidelines, the development of a European Design for All (DFA) curriculum and strengthening assistive technology and DFA standardisation. In the eEurope 2005 Action Plan, the aim was to mainstream eInclusion in all action lines. It also proposed the introduction of accessibility requirements for ICT in public procurement.

Supporting this work, the Telecommunications Council has expressed the need to improve eAccessibility in Europe<sup>9</sup>. Furthermore the Ministerial Declaration<sup>10</sup> on eInclusion proposes taking all necessary actions towards an open, inclusive knowledge-based society accessible to all citizens.

Furthermore, in its 2003 Resolution on eAccessibility<sup>11</sup>, the Social Affairs Council called on Member States to tackle the removal of technical, legal and other barriers to the effective participation of people with disabilities in the knowledge-based economy and society.

In line with this, the European Parliament, in its 2002 Resolution on web accessibility<sup>12</sup>, “*reiterates the need to avoid any form of exclusion from the IS, and calls for the integration of*

<sup>8</sup> «eEurope 2002 : Accessibility of public websites and their content», COM(2001) 529 final, [http://europa.eu.int/eur-lex/en/com/cnc/2001/com2001\\_0529en01.pdf](http://europa.eu.int/eur-lex/en/com/cnc/2001/com2001_0529en01.pdf)

<sup>9</sup> Council Resolution on the eEurope Action Plan 2002 : Accessibility of public websites and their content, OJ C 86, 10.4.2002.

<sup>10</sup> Ministerial Declaration on eInclusion, 11 April 2003 <http://www.eu2003.gr/en/articles/2003/4/11/2502/>

<sup>11</sup> Council resolution 14892/02.

<sup>12</sup> EP Resolution on eEurope 2002: Accessibility of Public Web Sites and their Content (2002 (0325))

*disabled and elderly people in particular*". Furthermore in another Resolution, the use of sign language in Telecommunications in Europe<sup>13</sup> is mentioned.

In a general sense, Article 13 of the Treaty establishing the EC provides for action to combat discrimination, *inter alia* because of disability.

Based on this article, Council Directive 2000/78/EC of 27 November 2000<sup>14</sup>, has the explicit purpose (Article 1) "*...to lay down a general framework for combating discrimination on the grounds of religion or belief, disability, age or sexual orientation as regards employment and occupation*". In particular the Directive states that "*Appropriate measures should be provided, i.e. effective and practical measures to adapt the workplace to the disability, for example adapting premises **and equipment**...*"

Furthermore, a number of European Directives related to the Information Society have clauses referring to the inclusion of persons with disabilities and older people. These include the Electronic Communications Directives, in particular the Framework<sup>15</sup> and the Universal Service Directives<sup>16</sup>, the Directive on Radio and Telecommunication Terminals (RTTE)<sup>17</sup> the Public Procurement Directive<sup>18</sup> and the Employment Equality Directive<sup>19</sup>.

The Commission Action Plan<sup>20</sup> published in December 2003 on the follow-up of the European Year of People with Disabilities included as one of its four areas the access to, and use of, new technologies and describes actions undertaken to improved accessibility to the information society using instrument available at EU level.

Activities at EU level have an added value as several Member States are developing legislation, regulations, standards or guidelines to tackle these issues at national level. These actions are leading to similar but yet different eAccessibility requirements for products and services, thus creating a high risk for the European industry, i.e. being forced to operate in a fragmented market with the consequent loss of competitiveness and effectiveness.

The risk for consumers is even greater, particularly for people with disabilities and older persons: a fragmented market means costlier, more unfamiliar and incompatible products, more difficulty in accessing/moving information across borders, etc.

EU actions also take into account international experiences, like those in the USA and Canada, with which a dialogue has been initiated by the European Commission, particularly regarding the use of legislative provisions in the context of public procurement as a powerful leverage factor.

Consequently, basic conditions are set for initiatives to be taken at EU level – this was the view expressed by an overwhelming majority of the stakeholders during the public consultation process (84%).

## 5. ONGOING ACTIVITIES AT EU LEVEL

Several measures are already under way at EU level and will be strengthened and continued.

### *Accessibility requirements and standards*

Standards are a strategic tool for industry and for the public sector as well as a key enabler for new market opportunities. Although the production and implementation of standards are voluntary, they are an important tool to support the implementation of policy actions. European Standards on eAccessibility would contribute to the proper functioning of the single European market and consequently promote the development of new markets, competitiveness and employment. Thus, the Commission will continue to provide financial support to specific activities proposed by the European Standardisation Organisations (ESO) in the framework of the European Standardisation Action Plan or issuing mandates to the ESO<sup>21</sup>.

Accessibility requirements specified by standards must meet the needs of industry, designers and providers of products and services to avoid the hampering of creativity or innovation. At the same time they must meet user needs, and the involvement of users in the development of standards is therefore essential: a balance should be found between industrial and public interest. Standards should allow easy enforcement and reference in legislation, regulation and other instruments that promote accessibility. Free availability of standards or availability at a reduced cost would make their uptake easier, especially by SMEs with limited resources to purchase them and for users to access them.

Whilst promoting interoperability, care should be taken that patented technologies without reasonable and non-discriminatory (RAND) licensing are not promoted as standard solutions.

### *Design for All (DFA)*

The DFA methodology denotes the design of products and services to be accessible to as broad a range of users as possible<sup>22</sup>. DFA is now well established, although not yet widely practiced. It is therefore essential to continue raising awareness and promotion of DFA in Europe. To this end, the Commission has set up a network of centres of excellence known as EDEAN<sup>23</sup>, which has over one hundred members.

DFA not only allows a **more thorough consideration of accessibility requirements when designing a product or service**, but also fosters important **economies by avoiding costly redesign or technical fixes** after their deployment.

The basic structure for a European DFA curriculum for engineers and designers has been developed and several pilot courses have been provided in Member States. Strengthening its use in post secondary and professional education is a way of ensuring a future accessible IS.<sup>24</sup>

---

<sup>21</sup> This process is governed by Directive 98/34:

[http://europa.eu.int/eur-lex/pri/en/oj/dat/1998/l\\_204/l\\_20419980721en00370048.pdf](http://europa.eu.int/eur-lex/pri/en/oj/dat/1998/l_204/l_20419980721en00370048.pdf)

<sup>22</sup> There are three main strategies for DFA: 1) design for most users without modifications, 2) design for easy adaptation to different users (e.g. using adjustable interfaces), 3) design with a view to connect seamlessly to assistive devices.

<sup>23</sup> Website EDEAN (European Design for All e-Accessibility Network), <http://www.e-accessibility.org/>

<sup>24</sup> DFA curriculum report of IDCnet project.

The presence of an accessibility officer competent in DFA in relevant organisations, could be a way to professionalize eAccessibility.

### *Web accessibility*

A 2001 Commission Communication<sup>25</sup> on accessibility to public websites was followed by Council and Parliament resolutions in 2002. As a result, Member States have committed themselves to make their public websites accessible according to international guidelines<sup>26</sup>.

Through the eAccessibility Expert Group, the Commission with the Member States is monitoring developments, including new evaluation methods<sup>27</sup> and procedures, benchmarking, data collection and identification of best practices. **Web accessibility is an enabler** of accessible online services of public interest. To facilitate this process, it is important to encourage the development of authoring tools that encompass accessibility<sup>28</sup>.

A need for certification schemes of accessibility has arisen from the fact that several Member States have binding legislation that mandates accessibility and the need to assess compliance. A European Committee for Normalization (CEN) Workshop<sup>29</sup> is currently exploring adequate solutions.

### *Benchmarking and monitoring*

Several Member States are introducing benchmarking for accessibility and monitoring in their national legislation. At EU level, monitoring of web accessibility has been requested by Council and the European Parliament. The Parliament also requested monitoring subtitles and audio description for Digital TV.

To be able to further develop adequate European eAccessibility policies **it is essential to have European data comparable across Member States**. The Commission will build upon the ongoing European monitoring activities, taking account of the revised Lisbon approach.

The Commission maintains a dialogue with statistical bodies in order to develop and improve relevant indicators, in particular to mainstream accessibility questions in existing indicators.

### *Research*

Research and technological development (RTD) is a fundamental element in the push towards an accessible IS. Almost 200 European RTD projects since 1991, representing approximately €200 Million in EC co-financing<sup>30</sup> have already contributed to improving accessibility with increased knowledge of accessibility problems and required solutions.

Specific results demonstrated possible solutions such as accessible remote home services for older people (including alarms and emergency services). Solutions have been developed to

<sup>29</sup> <http://www.cenorm.be/cenorm/businessdomains/businessdomains/iss/activity/ws-wac.asp>

<sup>30</sup> For examples of projects, see <http://www.cordis.lu/ist/so/einclusion/home.html> and [http://www.cordis.lu/ist/directorate\\_f/einclusion/previous-research.htm](http://www.cordis.lu/ist/directorate_f/einclusion/previous-research.htm)

improve access to digital information by blind and partially sighted persons (text, graphics, 3D images, coded music, television programmes). Systems for motor impaired persons to facilitate mobility, manipulation and control have been demonstrated, as have services to improve communication possibilities of hearing impaired persons including sign language and lip movement generation. Other examples included computer environments to facilitate the integrated education of children with disabilities or employment of adults with disabilities and contributions to policy-making (eEurope i.e. Web Accessibility, Design for all).

Many of the results of Community projects have been further successfully elaborated in products in the market, or the knowledge developed has contributed to the improvement of the accessibility of ICT products and services.

As technologies continue to rapidly evolve, offering new technical solutions, it is essential to invest in research to reap the significant potential that they have for people with disabilities and older persons. The current proposal for the 7<sup>th</sup> Framework Programme integrates the **need to continue and, indeed, to expand RTD in eAccessibility** so as to further develop European assistive technology industry<sup>31</sup> and to make accessibility an everyday issue for mainstream industry.

## **6. INCREASING THE E-ACCESSIBILITY OF ICT PRODUCTS AND SERVICES IN EUROPE – THREE NEW APPROACHES**

In addition to promoting the ongoing measures just listed, the Commission will foster the use of three approaches not yet widely used in Europe: (i) accessibility requirements in public procurement, (ii) accessibility certification, and (iii) better use of existing legislation.

Two years after the publication of this Communication, the Commission will evaluate the outcome of these actions. Following the principle of Better Regulation<sup>32</sup> the Commission will hold an exchange of views with the Member States and, subject to full impact assessment, may consider the possibility of taking additional measures, including legislation if deemed necessary.

### **1. Public procurement**

The total public procurement in Europe is about 16% of the gross domestic product. Public authorities at all levels can require accessibility features in the goods and services they purchase. In fact, the European Public Procurement Directives specifically mention the possibility to include DFA and accessibility requirements in conditions for tender (technical specifications).

This implies a clear commitment to **an inclusion policy that makes the products and services available to more users, citizens and employees**. It encourages industrial companies to include accessibility as a built-in feature of their products and creates a larger market for accessible ICT. Such effects have been seen in the USA<sup>33</sup> where legislation mandates accessibility requirements to be included in federal procurement.

---

<sup>31</sup> Access to Assistive Technology in the EU, a DG EMPL report, CE-V/5-03-003-EN-C

<sup>32</sup> European Commission 'White Paper on Governance' COM(2001) 428 final.

<sup>33</sup> Section 508 of the Rehabilitation Act as amended by the Workforce Investment Act of 1998.

In the online consultation over 90% of respondents favoured the principle of public agencies requiring all ICT products and services they buy to be accessible. Some Member States already include accessibility requirements in their public procurement. Shared accessibility requirements at EU level have the potential to reduce market fragmentation and to foster interoperability.

**There is a strong need for consistency of accessibility requirements in public procurement in Europe.** To this effect, the Commission is preparing a mandate to the European standardisation organisations to develop European accessibility requirements for public procurement of products and services in the ICT domain. The mandate is currently submitted to the Member States for consultation. It is foreseen to be issued to the European standardisation organisations by the end of 2005.

The Commission will encourage the debate on this subject with the Member States in the framework of the eAccessibility Expert Group<sup>34</sup>. It will continue to collect experiences from Europe and to encourage an international dialogue in particular with the US through the Transatlantic Economic Partnership (TEP) on harmonisation of eAccessibility requirements for public procurement.

## 2. *Certification*

It is not always obvious when buying ICT products what requirements they fulfil. This is particularly important when buying accessible ICT. Some standards exist or are under development defining how products and services can be made accessible. However, at present there is no reliable means to assess the conformity of products with those accessibility standards. Adequate certification schemes for accessibility of products, organisational processes and professionals (based on the European Key Mark<sup>35</sup> and on European standards) would provide guidance to customers and clients who want accessible products and services and might give manufacturers and service providers due recognition for their efforts. They would also facilitate the monitoring of compliance with regulations demanding accessibility.

In its January 2003 Resolution on eAccessibility, the Council called for an “eAccessibility mark” for goods and services. The 2002 Ministerial Declaration on eInclusion reflected that “*a European web accessibility label that certifies compliance with W3C WAI<sup>36</sup> guidelines could be considered in order to avoid market fragmentation*”.

The Commission will study together with the key stakeholders **possibilities for the development, introduction and implementation of certification schemes for accessible products and services**, including the definition of criteria testing, and evaluation methods. The possibility of self-declaration or third-party certification will also be investigated and the different options will be compared for their effectiveness<sup>37</sup>. The Commission will launch a study on this matter in the last quarter of 2005.<sup>38</sup>

---

<sup>34</sup> The eAccessibility Experts Group coordinates experts from the Member States who support the implementation of the eEurope Action Plan.

<sup>36</sup> World Wide Web Consortium (W3C) Web Accessibility Initiative (WAI).

<sup>37</sup> The online consultation showed a strong support (over 72%) for the certification and labelling of eAccessible ICT products and services, with significant differences among target groups only 61.4% agreement among *Manufacturers, providers or sellers of eAccessibility products & services*). Additionally, among those supporting product certification and labelling, the groups “*Private*

### 3. *Better use of existing Legislation*

Several Directives have provisions that can be used to enforce eAccessibility (such as the Equal Treatment in Employment Directive<sup>39</sup>, the Directive on Radio and Telecommunication Terminals and the Public Procurement Directives). It is important to cooperate with the Member States, to develop a practical way of using these Directives to address eAccessibility.

In particular, implementing the Inclusive Communications Group (INCOM)<sup>40</sup> suggestions would resolve some existing European challenges, e.g. to ensure access by users with disabilities to emergency services using the single European number 112, to have harmonised frequencies in Europe for assistive wireless solutions, to ensure real time text and sign communication across Member States, and to facilitate the purchasing of accessible goods by public authorities. Possible difficulties in putting existing legislation into practice should be addressed.

The Commission, in its audiovisual policy dialogue, will encourage common or interoperable solutions in the field, for example, of improved access to digital TV programmes. Such common solutions will allow the exploitation of economies of scale.

**The “eAccessibility potential” of existing European legislation needs to be fully exploited.** The Commission will launch a study<sup>41</sup> in 2005 to identify best practices and establish a dialogue with Member States and key stakeholders through the relevant groups in charge of the implementation of the Directives.

## 7. CONCLUSIONS AND FOLLOW-UP

This Communication and the results of the online consultation process show and endorse the European Commission’s determination to address eAccessibility issues and find solutions that (i) convey to Member States the urgent need to work together towards a consistent approach to e-accessibility; (ii) encourage industry to develop accessible solutions for ICT products and services; (iii) demonstrate to users with disabilities the active commitment to improve accessibility in the Information Society.

During the next two years (2005-2007), the Commission will continue to raise awareness, promote the use of the proposed instruments, gather evidence and continue stakeholder consultation in order to take informed decisions in the eAccessibility domain.

To this effect, the Commission plans a study to begin in the last quarter of 2005 on “*Measuring progress of eAccessibility in Europe*” in order to identify and evaluate policy options aiming at improving eAccessibility in Europe. The initial results of the study will be available in early 2007.

---

*individuals with a disability*” and “*Public Agencies*” clearly favouring mandatory schemes, while “*Manufacturers, providers or sellers of eAccessibility products & services*” favour voluntary procedures, with the remaining groups standing somewhere in between.

<sup>38</sup> See chapter Follow-up and conclusions.

<sup>39</sup> Council Directive 2000/78/EC of 27 November 2000 prohibits discrimination of persons with disabilities *inter alia* at work and encompasses reasonable accommodation including ICT.

<sup>40</sup> Formed in 2003 and made up of representatives of Member States, Telecoms operators, user organisations and standardisation bodies.

<sup>41</sup> See Follow-up and conclusions.

A follow-up that focuses on the eAccessibility situation will be made two years after the publication of this Communication. It will include an evaluation of the outcome of the approaches proposed here, following the principle of Better Regulation<sup>42</sup> and, subject to full impact assessment, the Commission may consider additional measures, including new legislation if deemed necessary. This eAccessibility work will in turn contribute to the already announced 2008 European Initiative on eInclusion<sup>43</sup>.

Neutral Citation 2012 [IEHC] 491

THE HIGH COURT  
[2011 No. 9548P]

BETWEEN

M.X. [APUM]  
PLAINTIFF  
AND  
HEALTH SERVICE EXECUTIVE

DEFENDANT  
AND  
BY ORDER

THE ATTORNEY GENERAL

NOTICE PARTY  
AND  
IRISH HUMAN RIGHTS COMMISSION

AMICUS CURIAE

JUDGMENT of Mr. Justice John MacMenamin delivered on Friday, the 23rd day of November, 2012

1. The unfortunate factual background to the proceedings to date has already been set out in a previous judgment in this matter, namely, HSE v X. [APUM] [2011] IEHC 326. Since that time, new proceedings have been initiated on behalf of the plaintiff, M.X. (hereinafter referred to as "X"). On her behalf, her counsel seeks to challenge a number of aspects of the procedure which have been adopted in her care regime. It is now claimed that the medical decisions, made in the context of her incapacity by reason of treatment-resistant paranoid schizophrenia, fail to have regard to her equal rights before the law as a citizen; and that she should be entitled to have the decision that she lacks capacity to decide whether or not to receive treatment subject to an independent review, ideally by an independent tribunal or court. While not fully alluded to in the pleadings, it is claimed that she is entitled to have the medical options concerning her treatment made on an "assisted decision-making" basis, which would give proper weight to her own wishes as to that treatment. It is contended that the plaintiff is being treated under s. 57 of the Mental Health Act 2001 ("the Act"), and that this provision is repugnant to the Constitution, incompatible with the European Convention on Human Rights ("ECHR"), and also fails to have due regard for the provisions of the United Nations

Convention on the Rights of Persons with Disabilities ("UNCRPD"). The Attorney General and the Irish Human Rights Commission have been joined as notice parties to the proceedings. As this judgment outlines, the law in this area is evolving, and this case must be decided on its very unusual, if not unique, facts. It is essential to bear in mind the nature of the treatment being administered against the plaintiff's will. It involves the regular administration of the drug Clozapine, together with the necessary involuntary abstraction by a syringe of blood samples from the plaintiff's veins. This is itself an invasion of the plaintiff's bodily integrity – a constitutionally protected right.

Issues to be considered

2. This judgment, first, considers how the plaintiff's assessment was carried out in the context of the Act of 2001, and in particular the precise provisions of that Statute which are applicable.

3. Second, in cases like the present, where challenges are brought to the constitutionality of legislation, and declarations as to the incompatibility of legislation with the European Convention on Human Rights are also sought, the sequencing approach which a court should follow has been set out in a number of decisions of the Supreme Court. The guiding principle regarding determinations of constitutionality was set out by Henchy J. in *The State (Woods) v. Attorney General* [1969] I.R. 385 at p. 400 where he stated "... that a court should not enter upon a question of constitutionality unless it is necessary for the determination of the case before it". Similarly, in *Murphy v. Roche* [1987] I.R. 106, Finlay C.J. stated at p. 110:-

"... where the issues between the parties can be determined and finally disposed of by the resolution of an issue of law other than constitutional law, the Court should proceed to determine that issue first and, if it determines the case, should refrain from expressing any view on the constitutional issue that may have been raised."

Therefore, a court must initially seek to resolve an issue by a means other than through constitutional reference. Here, counsel for the plaintiff contends, in a novel argument, that the UNCRPD is directly applicable within this jurisdiction, by virtue of the fact that the European Union is a signatory to that Convention. As will be explained later, the Court is not of the view that this Convention has direct effect in this jurisdiction at this time. That is not to say however that the provisions of that Convention are entirely immaterial, however.

4. Therefore, it will then be necessary to consider the other aspects of the plaintiff's claim, namely that the impugned provisions are unconstitutional, and/or incompatible with the ECHR. In accordance with the judgment in *Carmody v. Minister for Justice* [2010] 1 I.R. 635, this judgment will first assess questions of constitutionality before turning to consider the compatibility of the legislation with the ECHR. At p. 650 of *Carmody*, Murray C.J. pointed out:-

"... when a party makes a claim that an Act or any of its provisions is invalid for being repugnant to the Constitution and at the same time makes an application for a declaration of incompatibility of such Act or some of its provisions with the State's obligations under the Convention, the issue of constitutionality must first be decided.

If a court concludes that the statutory provisions in issue are incompatible with the Constitution and such a finding will resolve the issues between the parties as regards all the statutory provisions impugned, then that is the remedy which the Constitution envisages the party should have. Any such declaration means that the provisions in question are invalid and do not have the force of law. The question of a declaration pursuant to s. 5 concerning such provisions cannot then arise. If, in such a case, a court decides that the statutory provisions impugned are not inconsistent with the Constitution then it is open to the court to consider the application for a declaration pursuant to s. 5 if the provisions of the section including the absence of any other legal remedy, are otherwise met.”

5. As will be explained, the Court does not conclude that any of the statutory provisions impugned are inconsistent with the Constitution. The conclusion is, rather, that procedures which have been adopted in purported compliance with s. 60 of the Act of 2001 are to be applied in a constitutional manner, which process, in this specific category of cases, involves a right to independent review and assisted (rather than substituted) decision making. The incursion into the plaintiff’s constitutional rights is very significant. It involves medical treatment against her will. The conclusion is that it is only in this manner can the rights of the plaintiff under the Constitution be vindicated “as far as practicable” (Article 40.3 of the Constitution). I do not think such vindication can take place unless the steps outlined here are an integral part of the process and, allow for remedies commensurate with the protection of rights. To decide whether the plaintiff is entitled on a mandatory basis to an independent tribunal or court to determine the issues as to her treatment, and in light of the connections between rights identified in the Charter of Fundamental Rights in European Union jurisprudence and the ECHR, it will then be necessary to outline some current jurisprudence of the Strasbourg Court. The judgment follows the following sequence therefore. Having outlined the statute law and the evidence, it asks first can the issues be decided and finally disposed of by an issue of law other than constitutional law (section 1) (see *The State (Woods) v. Attorney General* and *Murphy v. Roche*). This question is answered in the negative. Section 2 addresses the constitutional issues (see *Carmody*). Section 3 addresses whether the plaintiff is entitled to a declaration regarding an independent tribunal or court under s. 5 of the European Convention of Human Rights Act 2003, in the absence of any other legal remedy.

6. Finally, the judgment addresses the issue of the plaintiff’s locus standi (section 4). While parts of this judgment may overlap with the earlier judgment relating to the same plaintiff, for completeness it is necessary to outline certain of the statutory provisions in detail.

The provisions of the Mental Health Act 2001

7. Section 2 of the Act provides:-

“2(1) In this Act, save where the context otherwise requires— ...  
‘treatment’, in relation to a patient, includes the administration of physical, psychological and other remedies relating to the care and rehabilitation of a

patient under medical supervision, intended for the purposes of ameliorating a mental disorder;”

...

Section 4 provides:-

“4(1) In making a decision under this Act concerning the care or treatment of a person (including a decision to make an admission order in relation to a person), the best interests of the person shall be the principal consideration with due regard being given to the interests of other persons who may be at risk of serious harm if the decision is not made.

(2) Where it is proposed to make a recommendation or an admission order in respect of a person, or to administer treatment to a person, under this Act, the person shall, so far as is reasonably practicable, be notified of the proposal and be entitled to make representations in relation to it and before deciding the matter due consideration shall be given to any representations duly made under this subsection.

(3) In making a decision under this Act concerning the care or treatment of a person (including a decision to make an admission order in relation to a person) due regard shall be given to the need to respect the right of the person to dignity, bodily integrity, privacy and autonomy.”

Part 4 of the Act deals with the question of consent to treatment. For present purposes ss. 56-60 must be read together. They provide as follows:-

“56. In this Part ‘consent’, in relation to a patient, means consent obtained freely without threats or inducements, where—

(a) the consultant psychiatrist responsible for the care and treatment of the patient is satisfied that the patient is capable of understanding the nature, purpose and likely effects of the proposed treatment; and

(b) the consultant psychiatrist has given the patient adequate information, in a form and language that the patient can understand, on the nature, purpose and likely effects of the proposed treatment.”

Section 57 of the Act provides:

“57(1) The consent of a patient shall be required for treatment except where, in the opinion of the consultant psychiatrist responsible for the care and treatment of the patient, the treatment is necessary to safeguard the life of the patient, to restore his or her health, to alleviate his or her condition, or to relieve his or her suffering, and by reason of his or her mental disorder the patient concerned is incapable of giving such consent.

(2) This section shall not apply to the treatment specified in sections 58, 59 or 60.”

8. It is important to point out, therefore, that s. 57 does not apply in relation to forms of treatment specified in s. 60. The latter section deals with a position where it is necessary to administer medicine for a continuous period of three months. The evidence now clearly establishes that the treatment regime adopted in the case of the plaintiff is that identified in s. 60, and, contrary to what is asserted on behalf of the plaintiff, not under s. 57 of the Act. Sections 58 and 59 of the Act are not relevant. However, s. 60 provides:-

“60. Where medicine has been administered to a patient for the purposes of ameliorating his or her mental disorder for a continuous period of 3 months, the administration of that medicine shall not be continued unless either—

(a) the patient gives his or her consent in writing to the continued administration of that medicine, or

(b) where the patient is unable or unwilling to give such consent—

(i) the continued administration of that medicine is approved by the consultant psychiatrist responsible for the care and treatment of the patient, and

(ii) the continued administration of that medicine is authorised (in a form specified by the Commission) by another consultant psychiatrist following referral of the matter to him or her by the first-mentioned psychiatrist,

and the consent, or as the case may be, approval and authorisation shall be valid for a period of 3 months and thereafter for periods of 3 months, if, in respect of each period, the like consent or, as the case may be, approval and authorisation is obtained.”

9. During the four day hearing, a number of witnesses testified regarding the treatment regime. I would emphasise that all the evidence indicates that the greatest care has been taken by each of the practitioners involved in the plaintiff's care in a unique and very difficult situation.

The evidence on capacity

Dr. Paul O'Connell

10. Dr. Paul O'Connell is employed as Consultant Forensic Psychiatrist in the Central Mental Hospital. Earlier in the case, he set out the nature of his first involvement in the provision of care to the plaintiff. He is the primary treating psychiatrist responsible for her care. He gave a detailed account of the course of her treatment, along with her medical and forensic history dating from 2007.

11. The plaintiff's diagnosis is one of treatment resistant paranoid schizophrenia, the salient symptoms of which include auditory hallucinations, which take the form of mocking voices, which are at different times attributed to members of the staff or laughter of small children. Associated with these hallucinations, the plaintiff has reported the delusional belief that she has been

controlled by the voices or, more often, by members of staff. When acutely psychotic, the plaintiff admits to urges to assault or kill members of staff. At times, she exhibits various behaviours including agitated pacing, facial expression of excitement and fixed staring at those she believes are mocking her. At such times she has made efforts to, and has assaulted, members of staff. As was pointed out earlier, prior to being placed in the Central Mental Hospital, she harboured urges to harm, or even to kill small children.

12. In the course of the hearing of these proceedings, Dr. O'Connell gave further testimony on the question of capacity. He was satisfied, as the treating consultant that the plaintiff was not capable of fully understanding the nature, purpose and likely risks of the proposed treatment. He concluded the plaintiff's understanding was made up of different components. His clinical view has remained consistently, that the plaintiff could not form a balanced judgment in relation to the treatment being afforded to her. She saw both the staff and himself as a threat to her. She was delusional, and while she would not admit to hallucinating, he was of the strong clinical conclusion that she was hallucinating. He was also of the firm clinical opinion that the plaintiff lacked capacity because of her mental disorder and therefore was, to quote him, "unable to consent to, or refuse, either the administration of anti-psychotic medication, or the ancillary and necessary blood tests associated with that treatment course".

13. The witness went on to conclude that the plaintiff's illness has the effect of impairing her reasoning, emotional regulation, and judgment. Although she is able to register and retain information with respect to her care and treatment, she remains unable to exercise her judgment in coming to a balanced decision about that treatment, insofar as she lacks insight and fails to appreciate the nature of her mental illness and the need to receive treatment. She fails to appreciate that her illness, if untreated, would represent a serious and immediate risk to herself and others, and would inevitably deteriorate, exacerbating that risk.

Professor Harry Kennedy

14. Professor Harry Kennedy, Consultant Forensic Psychiatrist and Executive Clinical Director of the National Mental Health Service at the Central Mental Hospital testified that his function was as leader of the team of psychiatrists working in the hospital. He described his responsibility for clinical governance and for the planning of modernised services. He testified that when ill, the plaintiff has homicidal preoccupations which focus particularly on children, or on the children of those who come into contact with her. He said that the plaintiff loses insight, and her capacity to give or withhold consent to treatment, is at its lowest. He, too, testified that when the plaintiff became agitated, she attacked doctors and nurses causing significant injuries. On such occasions, it was necessary that she be secluded for her own safety, and that of others. At times, this seclusion has had to be for prolonged periods which have been monitored by the Mental Health Commission Inspectorate of Mental Health Services.

15. Professor Kennedy pointed out, importantly, that capacity can fluctuate, and that many patients in the hospital experience differing levels of capacity at different times. He considered that it would be profoundly wrong to assume that all patients in the hospital lack capacity. Where a patient has capacity, they are encouraged to take their full role in the therapeutic decision making regarding their care and treatment. Professor Kennedy has a particular professional interest in this issue. He has led a research team that has published learned articles on the assessment of mental capacity to consent to treatment, and that subject forms part of his teaching responsibilities. He too, was of the strong professional opinion that the plaintiff lacked capacity to give or withhold consent to treatment. She does not understand the information about her mental health and the treatment options, lacks the ability to reason about these options, and is unable to compare such choices. She is unable to reason about the possible or potential side effects or consequences of the treatment. He testified that she is unable to appreciate the importance of information about mental health and mental illness for herself. She does not believe information because of her paranoia, her delusions, and her impaired capacity to reflect on her situation.

16. Professor Kennedy highlighted a number of the procedural safeguards in place in the Central Mental Hospital. All patients in the hospital are subjected to regular multi-disciplinary review. A treating doctor in a situation such as this does not act alone. He pointed out that there is in being, a process of obtaining second opinions from a consultant psychiatrist who is not attached to the hospital. This is not unique to this case but is rather a consistent feature of treatment in the hospital since the commencement of the Act of 2001.

17. The witness took issue with a typification of the treatment regime as being one "imposed against the plaintiff's will". He stated that, rather, treatment is provided in the absence of her capacity to make decisions, and subject always to independent review and safeguards. Second, he testified that it was the plaintiff's illness, and not the views of her treating doctors, that deprived her of the ability to consent to, or refuse treatment. Every effort is made to engage a patient in the decision-making process. If, and when, a patient such as the plaintiff regained sufficient mental capacity, she will then be again empowered to make decisions regarding her treatment including the then regained ability to give or withhold consent. Professor Kennedy also expressed the view that the UNCRPD, to which reference was made earlier, did not contain any explicit condemnation of "paternalism", which he summarised as being an ethical principle of protecting the best interests of vulnerable persons and which, he claimed, was not in conflict with a rights based respect for disabled people as persons. This part of the testimony is particularly relevant, and I will return to it later.

18. The witness took issue with a contention that disability was seen through medical criteria as a deviation from the norm which he characterised as a polemic "straw man". He distinguished between "disability" (not an inherently

medical categorisation being a qualitative term defining status in society before the law), and, on the other hand, medical measurements of impairment due to disorder which are quantitative. The former "qualitative" approach is inherently more reductive, and hence lends itself to ease of definition and legal convenience; as opposed to the latter quantitative medical approach which recognises degrees of impaired and restored mental capacity. He entirely rejected any suggestion that the plaintiff had been subjected to inhuman or degrading treatment. In fairness, it must be pointed out that any such suggestion was withdrawn by the plaintiff's legal advisers. Professor Kennedy's view was that it was the plaintiff's own lack of capacity which constituted an infringement on her rights and rendered her unable to exercise those rights. He described it as unhelpful and damaging to therapeutic relationships to imply that a "finding" by psychiatrists, rather than the absence of capacity of itself, was what was important.

Dr. Ian Bownes

19. It is important here to re-emphasise that the defendant, (the HSE), assisted in the retention of an independent psychiatrist to testify on behalf of the plaintiff. Dr. Ian Bownes is a Consultant Forensic Psychiatrist with the South Eastern Health and Social Trust in Northern Ireland. He is a Forensic Psychiatrist with the Northern Ireland Prison Service. His report was furnished to the Court and admitted in evidence. He examined the plaintiff on behalf of her solicitors, and presented a report to the court with his assessment of her condition. That assessment is largely, if not entirely corroborative of the views of Dr. O'Connell and Professor Kennedy.

Dr. Brendan Kelly's evidence – the "Form 17" procedure

20. Dr. Brendan Kelly is a Consultant Psychiatrist at the Mater Misericordiae University Hospital and Senior Lecturer in Psychiatry at University College, Dublin. He was retained by the HSE on a national panel of consultants who are in a position to carry out assessments for the purposes of s. 60 of the Act of 2001. He explained that the function of the independent psychiatrist, carrying out a s. 60 assessment, is to exercise a fully independent clinical judgment in appraising the situation. He noted that, in the past, he had had occasion to disagree with responsible consultant psychiatrists, and had no difficulty in so doing. On a number of occasions in this case, Dr. Kelly completed the Mental Health Commission forms recording his decisions pursuant to s. 60 authorising the continued administration of medicine without consent to the plaintiff. These forms are referred to as "Form 17".

21. In evidence, Dr. Kelly described the number of occasions when he carried out examinations in pursuance of the Form 17 procedure. He described the structure of such an examination as follows. First, the clinician considers whether a patient suffers from a mental disorder as understood in the 2001 Act. Second, that clinician considers the question of capacity and insight. This includes a consideration of whether the patient has any understanding of his or her illness, (including whether they accept that they are in fact ill), the proposed treatment, and the purposes of that treatment. Third, if the patient has capacity or is found to so have, the question of whether the patient is willing to undergo the treatment is next considered. Fourth, the proposed medication regime is

considered, and particularly, whether it will likely benefit the patient. Finally, the clinician records his notes in writing in accordance with the structured mental state examination structure. In doing so he summarises the key issues, before forming a view on the entire examination which is then reflected on the completed Form 17, which is checked and then signed.

22. Dr. Kelly was satisfied that each time he was requested to authorise the continuance of medication to the plaintiff without her consent, he carried out an independent examination and assessment, and concluded that, first, the plaintiff was unable to consent to treatment, and second, that she would benefit from the continuation of the treatment with the medication in question. He had examined the plaintiff on at least six occasions between November 2010 and December 2011. Finally, he agreed with an analysis of the plaintiff's doctors regarding the taking of blood samples in conjunction with the administration of the anti-psychotic medication in question, and noted that, to date, and to the best of his knowledge, nobody in the State had died from Agranulocytosis resulting from the administration of Clozapine following the introduction of a mandatory blood testing requirement.

Findings on the section 60 procedure

23. I am satisfied that each of the doctors faithfully complied with the procedure laid down under Form 17, which, itself, forms part of treatment under section 60. The evidence established conclusively that the situation which existed is not one where the treatment regime was being administered under s. 57 which, among other areas, deals with treatment which is required urgently to safeguard a patient's life or to restore him or her to health. Section 57 treatment arises when the patient is "incapable" of giving consent. The evidence clearly establishes that here the medicine has been, to use the terms deployed in s. 60 of the Act, "administered to a patient for the purposes of ameliorating ... her mental disorder for a continuous period of 3 months" and where "the patient is unable or unwilling to give consent".

24. Some idea of the extent of the difficulty in this case can be derived from Dr. Bownes reports, where he described visiting X on a number of occasions. On those occasions her mood fluctuated. On the first occasion, she was pacing backwards and forwards, muttering to herself relentlessly for the duration of the interview. She became increasingly agitated on questioning, and her narrative became tangential, poorly structured, contradictory and internally inconsistent.

25. On a later visit, on 26th February, 2012 the plaintiff welcomed him warmly with a handshake using his correct name and recalled the previous examination. She was able to sit at peace during the session. Nevertheless, during the course of the interview, her mood became increasingly low, irritable, and perplexed, and she evinced extraordinarily hostile and homicidal attitudes towards her doctors. She felt that her doctors were poisoning her, and were administering her medication which was in some sense being kept a secret from her. She also showed suicidal ideation, and stated that she would kill herself "at the first opportunity". She stated that her family never visited her, but that her

children were well looked after and there was now no need for her to stay alive. It is difficult, therefore, to exaggerate the extremely tragic nature of the plaintiff's illness.

26. Section 60 of the Act addresses the limited circumstances in which a finding of incapacity takes place. It requires that two decisions be made, the first on the appropriateness of the medicine proposed, and the second on the issue of consent by the responsible consultant. These decisions must then be approved by the independent consultant psychiatrist before the treatment can be authorised. All this was done in the plaintiff's case. The case, insofar as it relates to a challenge to the constitutionality of s. 57 of the Act is unsustainable. I am unable to conclude that the provisions of s. 57(1) are engaged at all. Moreover, I think it would be inconsistent with the earlier judgment in these proceedings to adopt anything but a broad and purposive approach to the concept of "treatment". As such, any treatment which is ancillary to principal "treatment" administered pursuant to s. 60 of the Act must benefit from the same protections and prescriptions as that principal treatment. This does not absolve the Court from a consideration of the issues arising from the treatment regime however.

The procedural safeguards under s. 60 of the Act

27. The focus of analysis in this judgment must be confined to the terms of s. 60 on the administration of medicine and the safeguards identified in that section. This is not a case where there is a dispute in relation to the correctness of the treatment. It is clear that the responsible treating consultant psychiatrist, and the independent consultant, Dr. Kelly, at an early stage clinically assessed the plaintiff's capacity to consent to the proposed treatment as part of their respective functions. Dr Bownes agreed with this diagnosis and proposed treatment.

Matters not addressed in Form 17

28. It is important also to emphasise, however, that the contents of Form 17 are set out in what might be termed "box" form. After a description of the patient, her location, the treating psychiatrist, the medication intended, and how it will benefit the patient, the form simply sets out options for the independent consultant to identify whether the patient is unable or unwilling to give consent to the treatment. Dr. Kelly indicated that the plaintiff was unable to give such consent. The form, thereafter, identifies the name of the independent consultant psychiatrist and how the details of the treatment will benefit the patient. However, it goes no further. The form does not address the patient's views at all. This has consequences which are addressed later in the judgment. I now turn to consider whether the UNCRPD is directly effective in the State.

Section 1 – Can the issues be decided and finally disposed of by an issue of law other than constitutional law?

The United Nations Convention on the Rights of Persons with Disabilities

29. The European Union acceded to the UNCRPD through Council Decision 2010/48/EC, formally adopted on 26 November, 2009. The instrument of ratification on behalf of the EU was then deposited in December 2010. This was

the first occasion that the EU became a party to an international human rights treaty, and that an intergovernmental organization had joined with a United Nations human rights treaty. Although a signatory to the UNCRPD, Ireland has not, as yet, itself ratified the Convention.

30. The Convention specifies rights and obligations with regard to persons with disabilities. Of particular relevance to the present case are Articles 12(1) and (2) which provide:

“1. States Parties reaffirm that persons with disabilities have the right to recognition everywhere as persons before the law.  
2. States Parties shall recognize that persons with disabilities enjoy legal capacity on an equal basis with others in all aspects of life.”

It is right to say that the values enunciated in the Convention constitute a “paradigm-shift” in the manner in which persons with disabilities are to be treated by, and before, the law. However, the Convention, in its preamble, also acknowledges the diversity of persons with disabilities. Therefore, in considering the applicability and the interpretation of the Convention, due regard must be had to the individual circumstances of each individual. What is the legal status of the Convention within the State?

31. Article 300(7) of the Treaty for the Establishment of the European Community (“TEC”) provides that international treaties, once concluded by the EU, are binding on European institutions and Member States, provided that they relate to areas of EU competence. The European Court of Justice (“ECJ”) has adopted a “monist” approach to international agreements, whereby such agreements have legal effect without the requirement for further active implementation (see the decision in *Haegem v. Belgium* [1974] E.C.R. 449). Under certain conditions, international agreements can, in principle, be invoked before a national court by an individual, if there is direct effect (see *Demirel v. Stadt Schwabish Gmund* [1987] ECR I-3719). In order for there to be such effect, the provisions sought to be relied on must be clear, precise and unconditional. It is argued that the terms of Article 12 come within these criteria.

32. Counsel for the plaintiff contends that the main objective of the UNCRPD is the equal treatment of, and the prohibition of discrimination against, disabled persons. It is important to the argument now made, to state that it is the plaintiff’s contention that this area is also covered in ‘large measure’ by Community law – for example, Directive 2000/43/EC, which governs non-discrimination on the grounds of ethnic origin; Directive 2000/78/EC, which establishes a general framework for equal treatment in employment and occupation; Directive 2002/73/EC, which governs the equal treatment of men and women in the employment sphere; and Directive 97/80/EC, which governs matters of proof in sexual discrimination cases. The plaintiff argues that as a Member State of the European Union, Irish law must give force to Article 12 as part of their obligations under the EU’s legal order.

33. Two questions arise from these contentions. First, this Court must consider whether the principles set out in the UNCRPD, despite Ireland's non-ratification, have the force of law in this jurisdiction. In order to establish her case, the plaintiff would be required to establish (a) that the relevant provision of the UNCRPD falls within a community competence which had been exercised to a "large degree" or was an "integral part of Community law"; and, also, (b) that the provision sought to be enforced is sufficiently clear, concise and unconditional as to be capable of itself directly regulating the legal position of individuals. Alternatively, the Court is asked to consider whether the UNCRPD is a "guiding instrument" in respect of the interpretation of the plaintiff's constitutional rights, or her rights under the European Convention of Human Rights.

(a) Community competence

34. The UNCRPD is a mixed international agreement where the EU, its member states, and other third party states are contracting parties. As a mixed agreement, the UNCRPD does, in fact, cover fields that, in part, fall within the competence of the EU; in part within the competence of member states; and in part within the shared competence of the EU and its member states. This issue will be explained in greater detail later. However, it is not the case that, once the EU ratifies an international convention, its subject matter automatically falls within its competence, and is thus directly enforceable in its member states. Nor is such convention enforceable simply by virtue of the fact that the EU has legislated in some of the areas which the Convention addresses.

35. Member states, when participating in mixed agreements, are subject to a duty of loyal cooperation between one another and the EU, deriving from Article 4(3) of the TFEU. This duty of loyal co-operation embraces two sets of obligations. First, member states must take appropriate measures, whether general or particular, to ensure fulfilment of the obligations arising out of the TFEU, or resulting from action taken by EU institutions. Second, member states must facilitate the achievement of the EU's tasks, and abstain from any measures which could jeopardise the attainment of the objectives of the TFEU.

36. The plaintiff relies on principles enunciated in *Commission v. France* [2004] E.C.R. I-09352, in which the issue was whether France, in failing to take all appropriate measures to prevent, abate and combat heavy pollution of the lagoon area known as the Étang de Berre, had breached its obligations under Articles 4(1) and 8 of the Convention for the Protection of the Mediterranean Sea Against Pollution and its Protocol, which had been signed and approved on behalf of the European Economic Community by two Council Decisions. The European Court of Justice held that the fact that there had been no EEC legislation covering the nature of the breach committed by France did not release that state from its obligations under the Convention. The breach fell within Community law, because the Convention and Protocol was a mixed agreement in a field in "a large measure covered by Community law". Thus, in such cases, there was "a Community interest in compliance by both the Community and its Member States with commitments entered into". Therefore, a member state must implement such a mixed agreement, provided the

measure to be implemented falls within the competence of the EU, either by way of being covered by Community legislation, or, where the particular issue was “covered in large measure” by Community legislation.

37. At Article 44(1), the UNCRPD requires regional integration organisations such as the EU, who accede to the Convention to declare the extent of their competence in their instruments of formal confirmation or accession. The Council Decision sets out the legal basis under the Treaties by which the EU has ratified the UNCRPD, and also lists EU instruments that demonstrate its competence. The Council Decision also provided that the extent of the EU’s competence must be assessed by reference to the precise provisions of each measure, and in particular, the extent to which the provisions establish common rules. The Decision goes on to say that the scope and the exercise of EU competence are subject to continuous development, and that the EU will complete or amend its declaration, if necessary in accordance with Article 44(1) of the UNCRPD. It is thus possible to identify which areas of the UNCRPD fall under EU competence, and which do not.

38. Despite a Commission proposal to use a number of legal bases (Articles 13, 26, 47(2), 55, 71(1), 80(2), 89, 93, 95 and 285 EC in conjunction with Article 300(2), and the first subparagraph of Article 300(3) EC), in fact the Council selected only two substantive legal bases, namely Article 13 and Article 95 EC, in conjunction with the (procedural) provisions of Article 300(2) EC and Article 300(3) EC, as authorising the EU to conclude the UNCRPD. This has some legal significance, in that the ECJ has ruled that the legal basis cited gives an indication to the other contracting parties of the extent of EU competence, and the division of competence between the EU and its member states (see *Commission v. Council* [2006] E.C.R I-00001). However, although the choice of legal basis for the decision is of some significance, it is not decisive for implementation, as the ECJ has also held that it is not necessary for the same provisions to be used as the legal basis for the adoption of the measures intended to implement the agreement at Community level (see *Commission v. Parliament* [2006] E.C.R. I-00107).

39. The Court has been referred to a report compiled by the European Foundation Centre in response to a request by the European Commission in 2010 to carry out a study in relation to the implementation of the UNCRPD. The aim of the study was to analyse in detail the obligations set out there, and to gather information about the various practices relating to the implementation of the Convention by the EU and its member states. This study was designed to support the objectives of the current EU Disability Action Plan; which, too, emphasised full participation and equal opportunities for all people with disabilities, and which was intended to contribute to the preparation of the new EU Disability Strategy, based more explicitly on the UNCRPD. The project team carrying out the study included a wide range of experts in the field of disability law and policy, including many persons who took part in the negotiations of the UNCRPD, and who made submissions to the ad hoc committee of the UNCRPD as to the drafting of the Convention. This report has

been admitted into the case without any dispute. I am prepared, therefore, to admit it as being a useful reference work and as an aid to interpretation. The plaintiff's submissions face an immediate difficulty here.

40. In a table provided therein at p. 40, the Article in question here, Article 12 is stated to fall solely within the competence of Member States. It is not within EU competence, or the shared competence of the EU and Member States.

41. The report also notes that before the Council Decision issued, the High Level Group on Disability (HLGD), in its first report on UNCRPD, identified nine areas of interest for the EU, considering both the EU, and its member states, with regard to implementation. These areas included legal capacity under Article 12. The Report points out that some of the matters addressed by the HLGD were beyond the EU competence to act. Notwithstanding this, in 2008, member states confirmed that collaboration at European level would be of added value in implementing the UNCRPD, and that the EU would become the "platform" to facilitate this collaboration. However, the only clear inference from this is that, as matters stand, Article 12 lies outside the EU competence. The Report also points out that some member states expressed reservations in relation to Article 12.

42. By way of distinction, the ECJ recent addressed the direct applicability of international agreements in *Lesoochranarske Zoskupenie*, C-240/09, 8th March 2011, where the issue at stake was Article 9(3) of the Aarhus Convention dealing with access to administrative or judicial procedures. There, the ECJ specifically held that the objective of the Aarhus Convention was consistent with the objectives of the Community's environmental policy listed in Article 174 of the EC Treaty. This was found to be an area in which the Community did share competence with its member states, and where a comprehensive body of legislation was evolving and contributing to the achievement of the objective of the Convention, not only by its institutions, but also by public bodies within its member states.

43. As matters stand, however, the same cannot be said of the law relating to mental capacity, an area in which to date, the EU has not assumed any large or appreciable jurisdiction. Furthermore, the measures to which the plaintiff referred, do not support the assertion that, at present, the EU has legislated or exercised a large degree of competence in the matters governed by Article 12. I am not convinced that Directive 2000/43/EC, Directive 2002/73/EC, nor Directive 97/80/EC are, in the relevant particulars, comparable to the questions of legal capacity, or to the detention and treatment of persons in the category of the plaintiff. I must accept the submission made on behalf of the Attorney General that the *Commission v. France* case is distinguishable as that case concerned a shared competence between the EU and member states.

44. There being no such competence here, I must conclude, therefore, that as the law stands, the plaintiff's argument on this point cannot succeed.

(b) Direct applicability

45. The question also arises as to whether Article 12 is capable of being directly applicable. It is contended on behalf of the Attorney General that the Article constitutes a “principle not a rule” and is dependent on subsequent measures to identify a particular manner in which the principle may be respected. It is not necessary for this Court to express a view on this point. For the reasons outlined earlier, the court does not consider that the UNCRPD can, as yet, be seen as a rule in the interpretation of an application of EHCR jurisprudence or, through that avenue, to E.U. rights law. This does not, however, prevent the UNCRPD being a guiding principle in the identification of standards of care and review of persons in this category.

46. As matters stand, the realm of EU law has not yet extended to the area of mental health law, nor to the issue of legal capacity. However, the rights of equal treatment and non-discrimination are core values in the EU legal order. As far as the present case goes, it has not been shown the right to equal treatment, as enshrined in the UNCRPD, is presently part of the EU’s legal order such that Article 12 UNCRPD creates directly enforceable rights or obligations.

47. The law in this area is evolving, both in the legislative and judicial realm. It is of interest that a recent judgment, *R. (on the application of NM) v. the London Borough of Islington and Northamptonshire County Council and Others* [2012] EWHC 414, Sales J. observed at para. 102 that:-

“In principle, a point might be reached when the [UN]CPRD has been ratified by sufficient European states, or when sufficient European states have brought their domestic law and practice into line with the standards set out in the CPRD, that the CPRD or the practice flowing from it could be taken to amount to a relevant European consensus to inform the interpretation and application of the Convention rights. Also, though the position is less clear, a point might be reached where the CPRD is taken to be a leading international instrument establishing an appropriate standard against which to judge the conduct of member states of the Council of Europe, as in relation to other international instruments...”

48. However, that judge expressed reservations as to whether the Convention has yet acquired this significance for the purposes of interpretation in light of the significant number of member states which have yet to ratify it. Sales J. observed that none of the Strasbourg authorities cited to him in that case went as far as to say that an individual could, in substance, rely on the provisions of UNCRPD under the guise of relying on ECHR rights. If the rights asserted here are not to be found in EU law which is directly effective in the State, can they be found elsewhere and if so, precisely which rights?

Section 2 – Decision as to the constitutionality of the impugned provisions

Constitutional requirements

49. What are the applicable constitutional and legal principles? The facts of the present case from two legal authorities where the question of consent has been very comprehensively considered. These were *Fitzpatrick & Anor. v. K.* [2009] 2 I.R. 7 and *Re Ward of Court (Withholding Medical Treatment) (No. 2)*

[1996] 2 I.R. 79. By way of distinction from Fitzpatrick, we are not dealing, here, with a person, who was, at least prima facie, of full capacity although as was held, there, that the patient's capacity had been affected by the influence of others. Nor are we considering a situation such as that which arose in *Re Ward of Court (No. 2)*, where the ward was in a condition known as P.V.S. or persistent vegetative state. But what is involved here is involuntary medication, together with the invasive taking of blood samples by a syringe on a regular basis. The plaintiff strongly objects to the procedure. The invasive nature of the treatment results in a loss of bodily integrity and dignity. (see the judgment of Denham J. in *Re Ward of Court*, cited above, at p.158 of the report)

50. In the latter case, the High Court, at first instance, had the opportunity of considering evidence from family members of the ward as to what her wishes would have been had she been in a position to speak about her tragic situation. By virtue of the ward's legal status, the court was vested with jurisdiction over all matters relating to her person and estate, and in the exercise of its jurisdiction, was subject only to the provisions of the Constitution. The High Court, and on appeal the Supreme Court, held that, in the exercise of that jurisdiction, the prime and paramount consideration must be the best interests of the ward. Both Courts found that, although the views of the committee and family of the ward were factors to be taken into consideration, they could not prevail over the court's view as to what was in the ward's best interests. The Supreme Court upheld the finding of the trial judge that the court should approach from the standpoint of a prudent, good and loving parent in deciding what course should be adopted, and held that the treatment being afforded by means of a gastrostomy tube, surgically inserted into the stomach was an intrusive interference with the ward's bodily integrity, and could not be regarded as a "means of nourishment". The care and treatment being afforded constituted medical treatment and not merely medical care. The Supreme Court held that the nature of the right to life, and its importance, imposed a strong presumption in favour of taking all steps capable of preserving it, save in exceptional circumstances. However, it concluded that, if the ward had been mentally competent, she would have had the right to forego or discontinue her treatment, and the exercise of that right would be lawful in the pursuance of her constitutional right to self determination implicit in her right to bodily integrity and privacy. However, this right did not include the right to have life terminated, or death accelerated, and was confined to the natural process of dying. The court decided that the loss by the ward of her mental capacity did not result in any diminution of her personal rights recognised by the Constitution, including the right to life, bodily integrity, privacy (including self determination), or the right to refuse medical treatment.

51. At the statutory level, s. 60 provides for a mechanism whereby the plaintiff's rights, and those of the community, can be balanced and protected. That is not to say, of course, that her rights could not also be vindicated under the inherent jurisdiction of this court, that jurisdiction having been invoked in this case. But there are constitutional dimensions to this case which cannot be ignored. In the next paragraphs, the main emphasis is on the concept of

decision making. It logically follows that the observations which are made here, also apply to a right of independent review, a statutory right provided by s. 60 itself.

52. The plaintiff's complaint is that the review procedure, as outlined earlier, insufficiently vindicates her constitutional rights, and fails to give recognition to rights identified in the jurisprudence of the European Court of Human Rights. Her counsel contends that the effect of the current procedure results in what is termed "substituted decision-making" (bearing the hallmarks of a paternalistic approach to the treatment of mental health patients), rather than "assisted decision-making" which better vindicates the range of rights engaged. For brevity, the range of values and rights involved will be collectively referred to as "personal capacity rights". These comprise the Article 40.3 values of self-determination, bodily integrity, privacy, autonomy and dignity, all unenumerated, but identified in case-law, as well as the explicit right to equality before the law, as identified in, and qualified by, Article 40.1 of the Constitution. For the purposes of consideration here, these are all, whether characterised as values or rights, capable of vindication in the courts. The case is now made that both the treatment regime, and the protections therein, fail properly to reflect the changes and provisions under the United Nations Convention on the Rights of Persons with Disabilities which, by contrast, aims at encouraging assisted decision-making and seeks to vindicate the interests of disabled persons.

53. Prior to a consideration of those rights, it is worthwhile recollecting the observations of Costello J. in *R.T. v. Director of the Central Mental Hospital* [1995] 2 I.R. 65, where he drew attention to the concept that, in considering the safeguards necessary to protect the rights of vulnerable people, regard should be had to the standards set by the recommendations and conventions of international organisations of which this country is a member. The superior courts have resorted to international human rights instruments in order to interpret appropriate constitutional standards in a number of cases. In *The State (Healy) v. Donoghue* [1976] I.R. 325, the Supreme Court had regard to Article 6 of the European Convention of Human Rights and also to the United States Constitution. In *O'Leary v. The Attorney General* [1993] 1 I.R. 102, Costello J. referred to Article 6(2) ECHR; Article 11 of the United Nations Universal Declaration on Human Rights; Article 8 (2) of the American Convention on Human Rights; and Article 7 of the African Charter of Human Rights in holding that the presumption of innocence in a criminal trial was one which enjoyed "universal recognition". Are these principles of interpretation applicable here?

54. Article 40.1 of the Constitution provides:-

"1.All citizens shall, as human persons, be held equal before the law. This shall not be held to mean that the State shall not in its enactments have due regard to differences of capacity, physical and moral, and of social function...."

At Article 40.3 it is provided:-

"1. The State guarantees in its laws to respect, and, as far as practicable, by its laws to defend and vindicate the personal rights of the citizen.  
2. The State shall, in particular, by its laws protect as best it may from unjust attack and, in the case of injustice done, vindicate the life, person, good name, and property rights of every citizen."

55. Hitherto, arising from the facts in each case, decisions of the Superior Courts in this area have tended to lay emphasis on a paternalistic intent of legislation concerning persons with incapacity. This approach, very much in line with long-established decided authority, was most recently reiterated by the Supreme Court in *E.H. v. Clinical Director of St. Vincent's Hospital* [2009] 3 I.R. 774.

56. By way of illustration of the approach, in *Gooden v. St. Otteran's Hospital* [2005] 3 I.R. 617, McGuinness J. pointed out, at p.633, that:-

"In *Re Philip Clarke* [1950] I.R. 235 the former Supreme Court considered the constitutionality of s. 165 of the Act of 1945. O'Byrne J. who delivered the judgment of the court described the general aim of the Act of 1945 at pp. 247-248 thus:-

'The impugned legislation is of a paternal character clearly intended for the care and custody of persons suspected to be suffering from mental infirmity and for the safety and wellbeing of the public generally. The existence of mental infirmity is too widespread to be overlooked and was, no doubt, present to the minds of the draftsmen/draughtsmen when it was proclaimed in Article 40.1 of the Constitution that though all citizens as human persons are to be held equal before the law, the State, may, nevertheless in its enactments, have due regard to differences of capacity, physical and moral, and of social function. We do not see how the common good would be promoted or the dignity and freedom of the individual assured by allowing persons, alleged to be suffering from such infirmity to remain at large to the possible danger of themselves and others.'" (emphasis added)

57. In *E.H.*, Kearns J., speaking on behalf of the Supreme Court, observed that the same principle should be adopted in interpreting the provisions of the Mental Health Act 2001, again, in issues concerning personal liberty. He stated:- "I do not see why any different approach should be adopted in relation to the Mental Health Act 2001, nor, having regard to the Convention, do I believe that any different approach is mandated or required by Article 5 of the European Convention on Human Rights 1950."

58. However, it is noteworthy that these observations, very understandably on the facts, deal with the interpretation and application of the statutes predominantly in the context of the right to liberty and the right to fair trial. The position here is distinct. The case before this Court does not concern the right to liberty or fair trial, but rather, the plaintiff's entitlements while being treated in involuntary care.

59. I do not think there is anything inconsistent with the avowedly paternalistic nature of the legislation or that jurisprudence, insofar as they concern liberty, in also ensuring that the wishes and choices of a person suffering from a disability, while under such care, should be guaranteed in a manner which, "as far as practicable" (to use the phrase adopted in Article 40.3.1 of the Constitution), vindicates his or her personal capacity rights. The interpretation of the Constitution in this area of the law should be informed by, and have regard to international conventions. This principle of interpretation, of course, applies a fortiori in relation to the regard which, as a matter of law, must be had to decisions of the European Court of Human Rights (see ss. 2-5 of the European Convention on Human Rights Act 2003).

60. That the Constitution is a living instrument which adapts to protect rights that develop over time cannot be controverted. In *The State (Healy) v. Donoghue* [1976] I.R. 325, O'Higgins C.J. observed of the values espoused in the preamble to the Constitution that:-

"The judges must therefore, as best they can from their training and their experience interpret these rights in accordance with their ideas of prudence, justice and charity. It is but natural that from time to time the prevailing ideas of these virtues may be conditioned by the passage of time; no interpretation of the Constitution is intended to be final for all time. It is given in the light of prevailing ideas and concepts..."

61. Should this Court then have reference to the UNCRPD if not as a rule, then at least as a guiding principle? The values in question here are in no sense contrary to any provision of the Constitution. The UN Convention affirms the contemporary existence of fundamental rights for persons with a mental disorder. Although the UN Convention itself is not part of our law, it can form a helpful reference point for the identification of "prevailing ideas and concepts", which are to be assessed in harmony with the constitutional requirements of what is "practicable" in mind. A court will, of course, (subject to the qualification pronounced in *McD. v L.* [2010] 2 I.R. 199) also "have regard" to the jurisprudence of the European Court of Human Rights to which Ireland also adheres on the basis of an international convention. As well as the UNCRPD itself, are there also relevant principles, ideas and concepts identified in Strasbourg case law? By virtue of ss. 2-5 of the European Convention on Human Rights Act 2003, this court is required to interpret laws of this State in compliance with the State's obligation under the ECHR provisions. Judicial notice is to be taken of decisions of the ECHR and the principles contained therein. This allows a court in an appropriate case to consider whether those principles may inform present day interpretation of "prevailing ideas and concepts" provided such principles accord with the Constitution.

62. *Shtukaturov v. Russia*, (Application no. 44009/05, ECHR, 27th June 2008) concerned the issue of capacity in mental health. There, the ECtHR had regard to "Principles concerning the legal protection of incapable adults", Recommendation No. R (99) 4, adopted by the Council of Europe on the 23rd February 1999. The Court referred in its judgment to Principle 3 of the Recommendation which stipulates that legislative frameworks relating to

persons suffering from incapacity should as far as possible recognise that different degrees of capacity may exist and that incapacity may vary from time to time. Accordingly, measures of protection should not result automatically in a complete removal of legal capacity. Principle 3.2 specifically provides that measures of protection should not automatically deprive a person of "... the right to consent or refuse consent in the health field..."

63. While it was suggested in argument in this case that the European Court of Human Rights had not specifically approved the United Nations Convention on the Rights of Persons with Disabilities, I do not think this is so. The judgment of the ECtHR in *Glor v. Switzerland* (Application No. 13444/04, ECHR, 30th April 2009), is noteworthy for pointing out that the UNCRPD signalled the existence of a European and universal consensus on the need to protect persons with disabilities from discriminatory treatment.

64. In *Kiss v. Hungary* (Application No. 38832/06, ECHR, 20th May, 2010) the ECtHR pointed out:-

"The court further considers that the treatment as a single class of those with intellectual or mental disabilities is a questionable classification, and the curtailment of their rights must be subject to strict scrutiny. This approach is reflected in other instruments of international law ..."

65. More immediately relevant is the decision of the ECtHR in *X v. Finland* (Application no. 34806/04, ECHR, 3rd July 2012). That judgment of the Court will now be analysed. The applicant complained that her involuntary confinement in a mental hospital following psychiatric examination was in breach of her right to liberty conferred by Article 5, particularly in the absence of an independent second opinion. The Court agreed with this contention. It stated at paras. 169-171:-

"169. The Court first draws attention to the fact that, in the present case, the decisions to continue the applicant's involuntary confinement after the initial care order were made by the head physician of the Vanha Vaasa hospital after having obtained a medical observation statement by another physician of that establishment. In the Finnish system the medical evaluation is thus made by two physicians of the same mental hospital in which the patient is detained. The patients do not therefore have a possibility to benefit from a second, independent psychiatric opinion. The Court finds such a possibility to be an important safeguard against possible arbitrariness in the decision-making when the continuation of confinement to involuntary care is concerned. In this respect the Court also refers to the CPT's recommendation that the periodic review of an order to treat a patient against his or her will in a psychiatric hospital should involve a psychiatric opinion which is independent of the hospital in which the patient is detained (see paragraph 133 above). This covers all of the criteria in section 8 of the Mental Health Act.

170. Secondly, the Court notes that the periodic review of the need to continue a person's involuntary treatment in Finnish mental hospitals takes place every six months. Leaving aside the question whether a period of six months can be

considered as a reasonable interval or not, the Court draws attention to the fact that, according to section 17(2) of the Mental Health Act, this renewal is initiated by the domestic authorities. A patient who is detained in a mental hospital does not appear to have any possibilities of initiating any proceedings in which the issue of whether the conditions for his or her confinement to an involuntary treatment are still met could be examined. The Court has found in its earlier case-law that a system of periodic review in which the initiative lay solely with the authorities was not sufficient on its own (see *mutatis mutandis* *Rakevich v. Russia*, no. 58973/00, §§ 43-44, 28 October 2003; and *Gorshkov v. Ukraine*, no. 67531/01, § 44, 8 November 2005). In the present case this situation is aggravated by the fact that in Finland a care order issued for an involuntary hospitalisation of a psychiatric patient is understood to contain also an automatic authorisation to treat the patient, even against his or her will. A patient cannot invoke any immediate remedy in that respect either.

171. The Court considers, in the light of the above considerations, that the procedure prescribed by national law did not provide in the present case adequate safeguards against arbitrariness. The domestic law was thus not in conformity with the requirements imposed by Article 5 § 1 (e) of the Convention and, accordingly, there has been a violation of the applicant's rights under that Article in respect of her initial confinement to involuntary care in a mental hospital."

66. The ECtHR further examined claims that the forced administration of medication was in breach of the applicant's rights under Article 8 of the ECHR. The Court noted that under Finnish law, an involuntary care order also included an automatic authorisation to treat such a patient, even against his or her will. It also found that the decisions of a treating doctor are not subject to appeal. In those circumstances, it concluded, at paras. 220-222:-

"220. The Court considers that forced administration of medication represents a serious interference with a person's physical integrity and must accordingly be based on a "law" that guarantees proper safeguards against arbitrariness. In the present case such safeguards were missing. The decision to confine the applicant to involuntary treatment included an automatic authorisation to proceed to forced administration of medication when the applicant refused the treatment. The decision-making was solely in the hands of the treating doctors who could take even quite radical measures regardless of the applicant's will. Moreover, their decision-making was free from any kind of immediate judicial scrutiny: the applicant did not have any remedy available whereby she could require a court to rule on the lawfulness, including proportionality, of the forced administration of medication and to have it discontinued.

221. On these grounds the Court finds that the forced administration of medication in the present case was implemented without proper legal safeguards. The Court concludes that, even if there could be said to be a general legal basis for the measures provided for in Finnish law, the absence of sufficient safeguards against forced medication by the treating doctors deprived the applicant of the minimum degree of protection to which she was entitled under the rule of law in a democratic society (see *Herczegfalvy v. Austria*, cited

above, § 91; and, mutatis mutandis, *Narinen v. Finland*, no. 45027/98, § 36, 1 June 2004).

222. The Court finds that in these circumstances it cannot be said that the interference in question was “in accordance with the law” as required by Article 8 § 2 of the Convention. There has therefore been a violation of Article 8 of the Convention.” (emphasis added)

67. The emphasised part of the passages quoted leave it unclear whether access to a court is thought to be mandatory, or, as I believe, whether there must be a right of access capable of vindication other than just by State initiative. This is considered in section 3 of this judgment.

68. The Article 13 contention, that the applicant was denied an effective remedy to challenge the forced administration of medication, was not examined on the basis of the findings in relation to Article 8.

“229. The Court reiterates that the applicant complained in essence about the lack of an effective remedy to challenge the forced administration of medication.

230. In view of the submissions of the applicant in the present case and of the grounds on which it has found a violation of Article 8 of the Convention, the Court considers that there is no need to examine separately the complaint under Article 13 of the Convention.”

69. The issues raised are relevant to the instant case. The decision clearly establishes that adequate safeguards must be placed in legislation apparently permitting a patient’s involuntary detention and involuntary treatment. It was held that these safeguards were not present in the Finnish legislation. In the instant case, the detention procedures are not being questioned. Therefore, this aspect of the case has limited application.

70. How then should these concepts and principles be applied here? Under the provisions of s. 60 itself, the right to independent review and independent determination of capacity are already, in effect, recognised statutory procedural rights; the provisions give effect to the duty of the State to vindicate the plaintiff’s personal capacity rights. Professor Kennedy’s evidence establishes that the proper vindication of these rights is “practicable”.

71. But what is at issue here are truly fundamental constitutional rights in more than just name. What is at stake is truly, in the words of Kenny J. in *Ryan v. Attorney General* [1965] I.R. 294 at p. 313, the right to the “integrity of the person”. Each of the rights affected under s. 60 fall within that category, should be policed and monitored by the courts, and are susceptible to judicial supervision, where necessary. Do they necessitate ancillary rights, analogous to the right to legal aid in defence of a serious criminal charge, which itself derives from the constitutional right under Article 38.1 to a criminal trial “in due course of law”?

72. As in the Irish and ECtHR authorities identified, I believe the broader range of constitutional “personal capacity rights” identified earlier, now fall to be informed by the United Nations Convention on the Rights of Persons with Disabilities, as well as the principles enunciated in the judgments of the European Court of Human Rights. The vindication of these rights to a sufficiently high level is necessary because of the serious incursion into bodily integrity and the other personal capacity rights which arises in the case of persons who are subject to orders made under s. 60 of the Act of 2001. Decisions of this type, involving the continued administration of an involuntary drug regime and the taking of blood samples require, in the words of the European Court of Human Rights, “heightened scrutiny”.

73. I believe a constitutional reading of s. 60 of the Act of 2001 now requires that this range of rights must be recognised at the constitutional as well as the legal level, especially if the present application of that legal provision does not vindicate those rights “as far as practicable”. The constitutional protections must act as an appropriate counterweight to the nature of the incursion into fundamental constitutional rights. Professor Kennedy’s evidence establishes that every effort is made to engage a patient in the decision-making process, and that when a patient regains sufficient mental capacity, they will again be empowered to make decisions regarding their treatment, including the then regained ability to give or withhold consent. Why then should the voice of a patient not be heard, and if not by the patient, then through a representative? This was not a situation, unfortunately, where the plaintiff had family members to speak for her. Such a situation may arise in other cases. What is necessary is to achieve the maximum protection which is “practicable”. If a patient lacks capacity, does it not follow that, in order to vindicate these rights, the patient should, where necessary, be assisted in expressing their view as part of the decision-making process? It cannot be said that such a process is impractical. I think the constitutional duty involved here is a positive one. I do not think even a retrospective declaration of incompatibility under the European Convention on Human Rights Act 2003 could be a sufficient protection. A sub-constitutional, and possibly retrospective, remedy is not commensurate with the nature of the rights engaged, and the extent of the possible incursion into such rights.

74. There is, of course, the irony that in this case, on its unique facts, the entire process involved in this extensive court hearing may already be seen as a vindication of each one of the rights claimed, including that of assisted decision-making. The function of counsel for the plaintiff in this case has been nothing less than to put forward, in as comprehensive a manner as is practicable, the views and choices of the plaintiff regarding her treatment regime under s. 60.

75. But the unique nature of the case gives rise to an obstacle from the plaintiff’s point of view. Decision-making, even assisted decision-making, does not predetermine the outcome of the deciding process. The nature of this case necessitated that it went to court because of the unusual legal issues which arose. The plaintiff has a right of access to court under the Constitution. As discussed at other points in this judgment, I do not envisage that a court

procedure will be necessary or mandatory in the vast range of other such cases involving patients subject to s. 60 of the Act. In my view, it would require a truly exceptional case to necessitate a court application. What I think is constitutionally necessary is a right of access to the courts, independent of any State agency, should the need arise. I do not think that an assisted decision-making process of this type need necessarily involve lawyers. The views of the patient might be expressed by carers, social workers or, perhaps most appropriately, by family members. Very frequently, such decisions are ones in which the courts will have little expertise. I would also observe that the evidence of Professor Kennedy indicates that, at least in part, these entitlements are already observed as a matter of course in the hospital where, as he testified, patients are asked to participate in decisions regarding their own treatment. This begs the question as to why this participation process cannot be performed on behalf of the incapacitated patient by another, suitably qualified, person. The case has not been made that assisted decision-making is not practicable; the contrary is so. To judge from experience in neighbouring jurisdictions, and in light of legislative proposals on mental capacity here, such a form of decision making must be seen as "practicable".

76. But, here, the plaintiff indisputably does not have capacity to make decisions. There is no controversy on the point. Therefore, having heard the parties, it fell to this court to make decisions as to her treatment, applying the best interest test identified in *Re Ward of Court* (No. 2). This test has been applied, having examined whether the choices made are the least restrictive, and involve the minimum practical incursion into the plaintiff's rights.

77. Having made that determination, however, it should not be thought that what is involved here is the application of what is termed a "status" approach. This involves making an "across the board" assessment of a person's capacity or views capacity in "all or nothing terms". A "once and for all" status approach in cases in this narrow category does not, I think, vindicate rights as far as practicable. It would not take into account patients whose capacity fluctuates, or those who have episodic mental illness. It may also not take into account the actual capacity of otherwise incapacitated individuals to make decisions in a particular sphere. However, here, there is the real problem that the patient wished to make a decision, which would be not only detrimental to her own health, but would place her life, and the life of others, at risk.

78. In adopting the best interest test, it might be suggested that what was applied then was an "outcome approach" involving the court assessing the patient's wishes, based on an assessment of the outcome of the process. Failure to make what might be a "prudent" decision will not always, of itself, be an indicator of want of decision making capacity. Here, one must look at not only the decision itself, but the quality of the plaintiff's decision making capacity. Unavoidably in this instance, the nature of the decision and the dangerous nature of the plaintiff's wishes must be a factor. The court cannot disregard that it has constitutional duties toward the plaintiff and the public.

79. As the ECtHR judgments point out, however, such decision-making in this area should seek to apply a “functional” approach” to capacity, involving both an issue-specific and time-specific assessment of the plaintiff’s decision-making ability. One determination should not be permanent; the process must refer to “differences in capacity” (Article 40.3 of the Constitution). This involves analysing, not only differences in capacity between patients, but also variations in each patient’s capacity at particular times. Only in that manner can their rights be properly vindicated in accordance with the constitutional requirement.

80. In all this, there must be both trust and commonsense. Every decision cannot be made by a court. This case is one where, sadly, on the indications so far, the plaintiff has an ongoing condition. While her capacity fluctuates, the evidence does not show that, at any point since the initiation of these proceedings, she has reached a point where she is capable of making a decision independently. It has not been suggested that any decisions have been made which were not in the plaintiff’s best interests, or at a time, when she actually had capacity to make decisions as to her treatment.

#### Conclusion

81. In summary, I conclude that the plaintiff is entitled to both an independent review and to an assisted decision-making process in vindication of her rights. But the entire process here involved a vindication of other rights. It has been necessary for this Court to make the ultimate decision because of her incapacity. In the strict sense, therefore, the plaintiff cannot be entitled to the reliefs she claims. It has not been shown that s. 60 of the Act of 2001, constitutionally interpreted, is repugnant to the Constitution. Applying the principle of double construction what then is necessary for a constitutional interpretation and application of the section? What is required is that it should be applied in a constitutional manner, giving effect to rights to be found within the Constitution itself (see *East Donegal Co-operative Ltd v Attorney General* [1970] I.R. 319). The constitutional application of that section should have regard to international norms and conventions identified in this part of the judgment.

82. For the future, I think it will be necessary to review the Form 17 procedure, adopted under s. 60. This can be done in a manner so as to ensure that the range of “personal capacity rights” of a patient objecting to treatment under s. 60 of the Act are vindicated, not only in form but in substance. There should be independent review and the patient’s decision or choice, albeit whether assisted or not, should be recorded and due regard given to it. The patient’s choice, however conveyed, will not always be determinative, but must always be part of the balance. But the role of the consultant psychiatrists remains pivotal. I turn now to another aspect of the relief claimed.

83. The plaintiff, at paragraph 1 of the statement of claim has sought also a declaration that the finding in respect of capacity must be subject to independent tribunal or court review. In this case, I think that right has already been vindicated to date, and will continue to be. But then the claim goes rather

deeper. Does a s. 60 treatment-decision necessitate ongoing court review on a mandatory basis?

Section 3 – Is the plaintiff entitled to a declaration of incompatibility under the ECHR Act and is there an ECHR right to an independent court or tribunal to consider future treatment?

84. It is now contended that, if the HSE should continue to administer treatment on the basis that the plaintiff lacks capacity, that defendant must convincingly show that such treatment is necessary before an independent tribunal or court. I would observe here that because of the highly unusual nature of this case it was proper that the matter should be dealt with by the Court. Can a genuine right to a court or tribunal hearing in all cases of this type be found? Do the constitutional rights, to be vindicated in each case, necessitate a mandatory ongoing court involvement in every such case? I am not persuaded that a mandatory engagement, even in a narrow category of cases involving difficult clinical decisions, can be seen as “practicable”. In my view, it would involve a degree of legal involvement in the field of psychiatry, which would be unprecedented, and, I believe, often impractical. Even on this basis alone, it would be very difficult to give recognition to such a right. Does such a right nonetheless exist under the ECHR? Is the plaintiff, therefore, entitled to a declaration that s. 60 is incompatible with the provisions of the ECHR under s. 5 of the Act of 2003?

85. Even having regard to the decision in *X v. Finland*, I am not persuaded that such a right exists in ECHR jurisprudence. That case must be seen as still pending as at present an application for admission to a Grand Chamber hearing remains to be considered. I think the passages cited earlier lack clarity as to whether what is in question is a right to a court hearing as alleged, or, rather a right of access to a court. The rights identified in the cases which follow lay particular emphasis on review of detention procedures. Clearly, at a minimum, there must be a right of court access. Decisions as to involuntary medical treatment must be subject to the rule of law, and must be independently reviewed. They must be capable of being assessed by a court, and cannot be arbitrary. The case of *Storck v Germany* (Application 61603/00, ECHR, 16th September 2005), addresses involuntary treatment and detention but is based on very different facts. There was a real question there as to the plaintiff’s incapacity, and as to the lawfulness of her detention. The ECtHR held that under Article 5 and Article 8 ECHR, there were positive obligations to ensure that an involuntary deprivation of liberty was carried out in accordance with a procedure prescribed by a rule of law. Significantly, it held that special procedural safeguards may be necessary to protect the interests of persons not fully capable of acting for themselves; that even a minor interference with the physical integrity of an individual was to be regarded as an interference with the respect for private life, if carried out against that person’s will; and that the State had a positive obligation to protect the applicant against interference with her private life guaranteed by Article 8 of the Convention. By way of distinction with that case, there is no question here that the plaintiff has been wrongly diagnosed, or as to her decision-making capacity. The detention process, here, is in accordance with law. The treatment has been independently

assessed by Dr. Kelly, Dr. Bownes and by this Court. It cannot be said that any part of the process is arbitrary therefore.

86. Earlier, in *Winterwerp v. The Netherlands* [1979 – 80] 2 E.H.R.R. 387, the applicant had been compulsorily detained pursuant to successive court orders, was not allowed to appear or be represented at proceedings and was not notified when such proceedings were in progress. As a consequence of his detention, the applicant also automatically lost the capacity to administer his property. There, the ECtHR unanimously held that the applicant's ability to have his detention reviewed by a court and the failure to hear him constituted a violation of Article 5(4) of the Convention. I do not think this case is on point here.

87. Three further decisions of the ECtHR were cited to this Court. All must now be seen in light of the decision in *X v. Finland*. The first, *Shtukaturov*, has already been briefly referred to. The applicant there suffered from a mental disorder but despite this was a relatively autonomous person. His mother lodged an application with the District Court of St. Petersburg seeking to deprive him of his legal capacity. An expert team assessed the applicant and concluded that he was suffering from "simple schizophrenia". A hearing then occurred, of which the applicant was neither notified nor present, where the judge declared the applicant to be legally incapable and his mother was appointed to be a legal guardian. The hearing lasted only ten minutes. At his mother's request he was then placed in a psychiatric institution where he was prohibited from having contact with the outside world. Unsurprisingly, the European Court of Human Rights in that case held that although domestic courts had a certain margin of appreciation, there had been a breach of the applicant's right to fair trial, as guaranteed under Article 6 of the Convention. This arose because, in assessing whether or not a particular measure such as the exclusion of the applicant from a hearing was necessary, relevant factors had to be taken into account including the nature and complexity of the issue which had been before the domestic courts, what had been at stake for the applicant and whether the applicant's appearance in person represented any threat to others or to himself. It was held that the domestic court proceedings had been unfair. The court observed that the applicant had played a double role in the proceedings, that of interested party and also the main object of the court's examination. His participation was therefore necessary not only so that he could present his own case but so as to afford the judge the opportunity to form an opinion about the applicant's mental capacity. The court also held that the declaration of the domestic court with the effect that the applicant was regarded as having full incapacity for an indefinite period which could not be challenged otherwise than through the guardian constituted a breach of Article 8 of the Convention.

88. It is significant in the context of this case that the ECtHR laid emphasis on the right of a person, the subject matter of an order, to representation and participation in the proceedings concerning a very significant incursion in their right to liberty and to private life.

89. Similar observations were made by the court in *Stanev. v. Bulgaria* (Application no. 36760/06, ECHR, 17th January 2012), where, in national court proceedings on capacity, the applicant was denied the right to have a lawyer of his choice. This had not been authorised by his guardian. He could not perform legal transactions or take part in court proceedings without his guardian's consent; although the guardian's decisions were subject to review by an authority, there was no clarity as to whether the applicant as a partially incapacitated person could challenge the decisions of that authority by way of judicial review. As a consequence, the court held that there were breaches of Article 5(4) involving an entitlement to institute proceedings reviewing a decision and a denial of direct access to courts in violation of Article 6(1) of the Convention. Again, the facts are very different from those in the instant case. The Wilkinson case

90. In the earlier judgment, I made reference to the decision in *R. (On the Application of Wilkinson) v. Broadmoor Special Hospital Authority and Others* [2002] 1 W.L.R 419. As well as pursuing remedies in domestic legislation, the plaintiff in that case, also sought to pursue his rights in the European Court of Human Rights in *Wilkinson v. United Kingdom*, (Application No. 14659/02, 28th February, 2006).

91. The applicant had been detained in a psychiatric institution under the Mental Health Act 1983 in England following conviction for rape of a minor in 1969. Though a clinical consensus existed at the relevant time that he suffered from psychopathic personality disorder, opposing views had been expressed as to whether he suffered from a recognised mental illness. In 1999, his treating doctor sought to administer antipsychotic medication without consent, on the basis that it was necessary to relieve the applicant of 'paranoid ideation'. The treatment was administered moments after an independent doctor approved it under s. 58(3) of the 1983 Act, without notice to the applicant (due to the prospect that he would respond violently). The applicant resisted the injections and had to be physically restrained. On the first occasion, he suffered an angina attack and had to be secluded. The medication was administered on one further occasion, and thereafter he engaged solicitors to contest the treatment.

92. Wilkinson is significant because the provisions at issue were broadly akin to those which arise in these proceedings. Section 63 of the 1983 United Kingdom Act removed the general requirement for obtaining a patient's consent for any treatment given to him for his mental disorder so long as the treatment was approved by the clinician in charge of his treatment subject to special requirements stipulated in the case of long term medication, ECT and psychosurgery, equivalent to ss. 58, 59 and 60 of the Act of 2001. However, I think that the observations of the ECtHR must now be seen in the light of the *Glor, Kiss and X v. Finland* judgments referred to earlier.

93. At the time of the hearing, I was not referred to any of the ECHR jurisprudence involving a right to ongoing court or tribunal engagement as to ongoing treatment decisions. However, counsel subsequently brought to my

attention the case of *X v. Finland* (Application no.34806/04, 3 July, 2012), where a request to the Grand Chamber is pending. The findings of the ECtHR have been set out earlier.

94. I fully agree that the interference with a patient's rights, in cases like the present, is so serious to require adequate safeguards against arbitrariness. What is necessary is a clearly defined procedure, in accordance with law, which vindicates ECHR rights to privacy and autonomy involving proper clinical decision-making procedures. I believe such safeguards are to be found in s. 60 through the requirement for a second opinion from an independent consultant, in relation to the proposed treatment, at regular three month intervals, together with such charges as may be necessitated by this judgment. I would add that a further consequence of assisted decision-making is that it enhances the right of access to the court on behalf of a s. 60 patient. But I do not think any of the ECtHR case law goes further than the rights identified here under the Constitution. In short, I do not understand the law, whether national or under the ECHR, presently to require a mandatory court hearing in every case. I note the *X. v Finland* case remains pending before the Grand Chamber. I should re-iterate that, in the instant case, the plaintiff here was, thanks both to the HSE and to her lawyers, able to have the legality of her treatment procedure reviewed by this Court. But the plaintiff is not, in my view, entitled to a declaration of incompatibility under s. 5. The provisions of s. 60 are of course to be interpreted and applied in a manner compatible with the State's obligations under the ECHR. On my understanding of the ECHR jurisprudence, this objective is achieved by virtue of the adherence to the constitutionally compliant procedures under s. 60 of the Act, outlined earlier in this judgment.

#### Section 4 - Locus Standi

95. It is necessary finally to address the question of the plaintiff's locus standi. This case directly arose from questions which were raised in the earlier case wherein the plaintiff in these proceedings was the defendant. The questions directly related to the proper interpretation of the Act of 2001. The plaintiff was directly concerned with how Part 4 of the Act applied to her. It must be recollected also that the HSE, the plaintiff in the original proceedings, as an alternative to the statutory argument, advanced the contention that the Court would be entitled to grant the reliefs sought, pursuant to its inherent jurisdiction. The issues in this case, in my view could only properly have been resolved by court proceedings.

96. Even though it cannot be said that the plaintiff has succeeded on the issues, this case comes within one of the exceptions identified by Henchy J. in *Cahill v. Sutton* [1980] I.R. 269, as being one where the legal provisions involved were directed to, or operable against a group which includes the plaintiff and where the plaintiff may be said to have a common interest, albeit in circumstances where it may be difficult to segregate the plaintiff's own position from the rights of other persons similarly affected. The law in this area is in a state of evolution and the issues here required judicial determination. In an area where the law required clarification, I therefore conclude that the plaintiff did have locus standi.

97. Having regard to all the circumstances, I must find that the plaintiff is not entitled to relief under the headings identified in the claim.

98. I would like to express appreciation to counsel for the parties and the notice parties whose submissions helped to chart the way through the shoals of this difficult area of jurisprudence. It is to be hoped their efforts have resulted in the arrival at a destination which best protects the interests and rights of the plaintiff and those in similar situations.

EUROPEAN COURT OF HUMAN RIGHTS  
COUR EUROPÉENNE DES DROITS DE L'HOMME

FIRST SECTION

**CASE OF LASHIN v. RUSSIA**

*(Application no. 33117/02)*

JUDGMENT

STRASBOURG

22 January 2013

*This judgment will become final in the circumstances set out in Article 44 § 2 of the Convention. It may be subject to editorial revision.*

**In the case of Lashin v. Russia,**

The European Court of Human Rights (Chamber), sitting as a Chamber composed of:

Isabelle Berro-Lefèvre, *President*,

Elisabeth Steiner,

Nina Vajić,

Anatoly Kovler,

Khanlar Hajiyev,

Linos-Alexandre Sicilianos,

Erik Møse, *judges*,

and Søren Nielsen, *Section Registrar*,

Having deliberated in private on 18 December 2012,

Delivers the following judgment, which was adopted on that date:

**PROCEDURE**

1. The case originated in an application (no. 33117/02) against the Russian Federation lodged with the Court under Article 34 of the Convention for the Protection of Human Rights and Fundamental Freedoms (“the Convention”) by a Russian national, Mr Aleksandr Petrovich Lashin (“the applicant”), on 29 July 2002.

2. The applicant, who had been granted legal aid, was represented by Mr D. Bartenev, a lawyer practising in St Petersburg. The Russian Government (“the Government”) were represented by Mr G. Matyushkin, the Representative of the Russian Federation at the European Court of Human Rights.

3. The applicant complained, in particular, about his status as a legally incapacitated person, his non-voluntary commitment to a psychiatric hospital and his inability to marry.

4. By a decision of 6 January 2011, the Court declared the application partly admissible.

5. The applicant and the Government each filed further written observations on the merits (Rule 59 § 1 of the Rules of Court). The Chamber having decided, after consulting the parties, that no hearing on the merits was required (Rule 59 § 3 *in fine*), the parties replied in writing to each other’s observations.

## THE FACTS

### I. THE CIRCUMSTANCES OF THE CASE

6. The applicant was born in 1960 and lives in Omsk.

#### **A. Deprivation of legal capacity**

7. The applicant suffers from schizophrenia, which was first diagnosed in 1987. In the 1980s and early 1990s he was employed as a bus driver, but in 1995 he stopped working. The applicant kept writing nonsensical letters to state officials and lodged numerous administrative complaints and lawsuits. At some point he started giving money and clothes to strangers and invited them to his house, explaining it by religious considerations. Such behaviour led to recurrent conflicts with his wife. The applicant became irritable, aggressive and once in 1996 tried to strangle her. As a result, they divorced. In 1998 the applicant was officially given the “2<sup>nd</sup> degree disability” status due to his mental disorder.

8. Between 1989 and 17 July 2000 the applicant was hospitalised nine times in the Omsk Regional Psychiatric Hospital. As follows from the opinion of the Serbskiy Institute of 19 August 1999 (a leading State psychiatric research centre based in Moscow) during that period the applicant considered himself as a “defender of justice”, believed that he knew important State secrets, and claimed that there was a conspiracy against him. Amongst other things, he challenged his diagnosis, complained of his confinement to the hospital, threatened the doctors who had been treating him in the Omsk Regional Psychiatric Hospital, and tried to institute criminal proceedings against them. The report did not mention any incidence of violence or self-destructive behaviour after 1996, and it was not alleged that during that period the applicant was unable to take care of himself in everyday life. However, it is clear that his mental condition had a persistent character, and that he kept harassing doctors from the Omsk Regional Psychiatric Hospital with complaints and litigations.

9. On 5 April 2000 the applicant underwent an examination in the Omsk Regional Psychiatric Hospital by a panel of doctors, who confirmed the previous diagnosis and the opinion by the Serbskiy Institute and concluded that the applicant was “incapable of understanding the meaning of his actions and was unable to control them”.

10. On 16 June 2000, following an application by the public prosecutor, the Kuybyshevskiy District Court of Omsk declared the applicant legally incapacitated because of his illness. The hearing took place in the absence of the applicant. On 30 August 2000 the Omsk Regional Court upheld the decision of the District Court.

11. On an unspecified date the Omsk Municipal Public Health Department appointed the applicant's father as his guardian.

## **B. Attempts to restore legal capacity**

### *1. First request*

12. On 2 October 2000 the applicant's daughter brought court proceedings seeking to restore his legal capacity. Her request was supported by the applicant's father as guardian. The plaintiffs claimed that the applicant's mental state had significantly improved and requested that the court conduct a new psychiatric examination of his health. As the plaintiffs did not trust doctors from the Omsk Regional Psychiatric Hospital, they insisted that the process of the psychiatric examination of the applicant be recorded on a videotape.

13. On 27 October 2000 the court commissioned a psychiatric examination of the applicant, but refused to order a video recording of it. The expert examination was entrusted to the Omsk Regional Psychiatric Hospital. However, the applicant failed to submit himself for an examination at the hospital, so the examination was not conducted.

14. On 19 March 2001 the Sovetskiy District Court of Omsk decided to confirm the status of legal incapacity and maintain the applicant's guardianship. It is unclear whether the applicant was present at the hearing. The court noted that because the new expert examination could not be conducted due to the applicant's failure to cooperate, the results of the examination of 5 April 2000 were still applicable. It appears that the decision of 19 March 2001 was not appealed against.

### *2. Second request*

15. On 9 July 2001 the applicant's father (as guardian) instituted court proceedings challenging the medical report of 5 April 2000 by the Omsk Regional Psychiatric Hospital which had served as grounds for declaring the applicant legally incapacitated. He also sought restoration of the applicant's legal capacity. Since the plaintiffs did not trust doctors from the Omsk Regional Psychiatric Hospital they requested that the court commission a panel of experts from the Independent Psychiatric Association of Russia, a non-State professional association of psychiatrists, based in Moscow, to assess the applicant's mental capacity.

16. On 26 February 2002 the Kuybyshevskiy District Court held a hearing in the applicant's absence, having decided in particular that:

“... [the applicant's] mental condition prevented him from taking part in the hearing, and, moreover, [his] presence would be prejudicial to his health”.

The court further refused to commission a new expert examination by a non-State psychiatric association, on the ground that only State-run

institutions were allowed by law to conduct such examinations and issue reports. The relevant part of the District Court judgment reads as follows:

“... under section 1 of the Psychiatric Care Act ... State forensic examination activity in judicial proceedings is carried out by State forensic examination institutions, and consists of organising and implementing the forensic examination”.

In conclusion the court found that the expert report of 5 April 2000 was still valid, that the applicant continued to suffer from a mental disorder and that, therefore, his status as a legally incapacitated person should be maintained.

17. The applicant’s father (as his guardian) appealed to the Omsk Regional Court, which on 15 May 2002 upheld the judgment of 26 February 2002.

### **C. Confinement of the applicant in the psychiatric hospital**

18. Some time later the applicant’s father solicited an opinion from Dr S., a psychiatrist not affiliated with the Omsk Regional Psychiatric Hospital, concerning the applicant’s mental condition. Dr S. examined the applicant and on 1 July 2002 he submitted a report according to which the applicant’s mental illness was not as serious as claimed by the doctors at the Omsk Regional Psychiatric Hospital.

19. On an unspecified date in 2002 the applicant’s father, as his guardian, delivered a power of attorney to a third person, mandating that person to act in the applicant’s name. However, a notary public refused to certify the power of attorney, on the basis that under the law a guardian should represent his ward personally and could not confer his duties on a third person. The applicant’s father brought proceedings against the notary public in court, but to no avail: on 10 October 2002 the Sovetskiy District Court of Omsk confirmed the lawfulness of the refusal.

20. On 2 December 2002 the applicant and his fiancée, Ms D., requested that the municipality register their marriage. According to the applicant, they received no reply from the municipality.

21. On 4 December 2002 a district psychiatrist (*uchastkovyi psikhiatr*) examined the applicant and concluded that the latter suffered from “paranoid schizophrenia with paraphrenic delusion of reformism”. The psychiatrist delivered a hospitalisation order, which relied strongly on the “nonsensical complaints” lodged by the applicant’s representatives.

22. On 6 December 2002 the Guardianship Council of the Omsk Region decided to strip the applicant’s father of his status as the applicant’s guardian. The decision was taken by the Guardianship Council without the applicant or his father being heard.

23. By virtue of the hospitalisation order the applicant was placed in the Omsk Regional Psychiatric Hospital on 9 December 2002. According to the

applicant, he and his father unambiguously opposed this provisional placement in the hospital.

24. On the same day a panel of three doctors from the Omsk Regional Psychiatric Hospital examined the applicant and concluded that he should stay in the hospital. They mostly based themselves on the medical history of the applicant that had led to the deprivation of legal capacity. The report stated that the worsening of the applicant's mental condition was demonstrated by the numerous complaints by which he had tried to recover his legal capacity and challenge the actions of the hospital.

25. On 10 December 2002 the Omsk Municipal Public Health Authority approved the decision taken by the Guardianship Council on 6 December 2002. From that moment on the applicant's father ceased to be his guardian and, according to the Government, the functions of the applicant's guardian were performed by the municipal authorities, namely the Omsk Public Health Authority.

26. On 11 December 2002 the Omsk Regional Psychiatric Hospital requested that the Kuybyshevskiy District Court authorise the applicant's further confinement. On the same day the judge, in accordance with section 33 of the Psychiatric Care Act, ordered that the applicant be held in the hospital for such time as was necessary for the examination of his case. The provisional order issued by the judge was a one-sentence annotation on the hospitalisation order of 4 December 2002: "I hereby authorise detention [in hospital] pending the examination [of the case] on the merits".

27. Having been informed of that ruling, the applicant asked the hospital staff to release him for home treatment. The hospital staff refused, however, and prohibited him from seeing his relatives or talking to them.

28. On 15 December 2002 the applicant lodged an application with the court for his release from the Omsk Regional Psychiatric Hospital. However, the judge informed the applicant by letter that such a provisional placement of a patient in a psychiatric hospital for a period necessary for the examination of the case on the merits was not subject to judicial review.

29. On 17 December 2002 the District Court held a hearing in the presence of the applicant, the applicant's father, the public prosecutor, and a representative of the hospital. From the case file it appears that the participants and the judge himself were not aware that the applicant's father was no longer the applicant's guardian.

30. At that hearing the applicant and his father claimed that the applicant's condition did not require hospitalisation. They insisted that the hospital had not proved the medical necessity of such a measure. The applicant and his father referred to the report by Dr. S. of 1 July 2002 (see paragraph 18 above). In order to clarify the matter, the applicant asked the court to commission a fresh medical examination of his mental health, in order to establish whether there had been any deterioration. The court rejected the request, while at the same time admitting the applicant's

medical record in evidence. At the end of the day the hearing was adjourned to 24 December 2002.

31. On 20 December 2002 the Guardianship Council appointed the administration of the Omsk Regional Psychiatric Hospital as the applicant's guardian and delivered an authorisation for his extended confinement in the hospital.

32. On 24 December 2002, without holding a hearing, the District Court closed the proceedings because the hospital, as the applicant's only legitimate guardian, had revoked its request for authorisation of his confinement. The applicant's confinement was thus considered to be "voluntary", and therefore did not require court approval.

33. On the same day, the applicant's father and fiancée asked the court to give them a copy of the decision, so that they could lodge an appeal. The judge refused because the applicant's father, who was no longer his guardian, could not act on behalf of the applicant. The court also denied a request to consider the applicant's fiancée to be his representative.

34. On 27 January 2003, the applicant's fiancée wrote a letter to the Guardianship Council where she requested that the council appoint her as the guardian of "her husband, Mr. Lashin". There is no information whether she received any reply.

35. On an unspecified date the applicant's father lodged an appeal against the decision of 24 December 2002. On 10 February 2003 the Regional Court refused to examine the appeal on the grounds that the applicant's father had no right to represent his son and that no decision on the merits of the case had been taken by the first-instance court.

36. On 2 February 2003 the applicant's fiancée lodged a supervisory review appeal, which was returned to her without examination on 13 February 2003 on the basis that she had no power to represent the applicant.

37. In the following months the applicant's father and fiancée lodged several criminal-law complaints against the hospital and its doctors. Their complaints were addressed to various state authorities and the courts. It appears that none of those complaints was successful.

38. On an unspecified date the applicant's father challenged the decision of the Guardianship Council of 6 December 2002, as approved by the municipal authorities on 10 December 2002, stripping him of his status as the applicant's guardian. On 16 July 2003 the Kuybyshevskiy District Court of Omsk upheld the decision of the Guardianship Council. The District Court found that the applicant's father had neglected his duties on many occasions and had tried to entrust the guardianship to a third party, referring in particular to the episode concerning the power of attorney (see paragraph 19 above). The court also noted that the applicant's father had failed to secure appropriate medical treatment for the applicant as prescribed by the doctors, as a result of which the applicant's condition had

worsened. According to the applicant, he lodged an appeal against that decision.

39. In their letters to the Court of 28 July 2002 and 25 July 2003 the applicant and his fiancée informed the Court of their desire to marry.

40. On 10 October 2003 the Guardianship Council decided to appoint the applicant's daughter as his guardian. That decision was approved by the municipality on 17 October 2003.

41. On 10 December 2003 the applicant was released from the town hospital. The medical report issued in connection with the applicant's discharge indicated that his mental health during his confinement had been predominantly characterised by "litigious" ideas similar to those he had presented at the time of his admission.

42. It appears that in 2006 the applicant's relatives brought court proceedings seeking to restore the applicant's full legal capacity. The Court has not been provided with any information about the outcome of those proceedings.

## II. RELEVANT DOMESTIC AND INTERNATIONAL LAW

### A. Legal capacity

#### 1. Substantive provisions

43. Under Article 21 of the Civil Code of the Russian Federation of 1994, any individual aged 18 or more has, as a rule, full legal capacity (*дееспособность*), which is defined as "the ability to acquire and enjoy civil rights, [and] create and fulfil civil obligations by his own acts". Under Article 22 of the Civil Code, legal capacity can be limited, but only on the grounds defined by law and within a procedure prescribed by law.

44. According to Article 29 of the Civil Code, a person who cannot understand or control his or her actions as a result of a mental disease may be declared legally incapacitated by a court and placed in the care of a guardian (*опека*). All legal transactions on behalf of the incapacitated person are concluded by his guardian. In practical terms this means that the guardian ensures mandatory representation of the incapacitated person in all matters concerning his property, income, work relations, travel and residence, social contacts and so on. The incapacitated person can be declared fully capable if the grounds on which he or she was declared incapacitated cease to exist.

45. Article 30 of the Civil Code provides for the partial limitation of legal capacity. If a person's addiction to alcohol or drugs is creating serious financial difficulties for his family, he can be declared partially incapacitated. That means that he is unable to conclude large-scale

transactions. He can, however, dispose of his salary or pension and make small transactions, under the control of his guardian.

46. Under Article 35 (4), where a person deprived of legal capacity is placed under the supervision of a medical institution, that medical institution must take on the functions of the guardian.

47. It follows from Article 39 (3) of the Civil Code that the guardianship authority may revoke the authority of a guardian who neglects his duties.

## 2. *Incapacitation proceedings*

48. Article 258 of the Code of Civil Procedure of 1964, as in force at the material time (hereinafter “the old CCP”), established that members of the family of the person concerned, a prosecutor, a guardianship authority or a psychiatric hospital, as well as “trade unions and other organisations”, might apply to a court seeking to deprive a person of his legal capacity. The court, if there was evidence of a mental disorder, was required to commission a forensic psychiatric examination of the person concerned (Article 260). The case was required to be heard in the presence of the person concerned, provided that his presence was compatible with his state of health, and also in the presence of the prosecutor and a representative of the guardianship authority (*орган опеки и попечительства*, Article 261 paragraph 2 of the old CCP). Under Article 263 of the old CCP it was possible for legal capacity to be restored by a court decision upon the application of the guardian or the persons listed in Article 258, but not based on the application of the person declared incapacitated.

49. Article 32 of the old CCP provided that a person declared incapacitated could not bring an action before the courts. The guardian was entitled to do so in order to protect the rights of the incapacitated person.

## **B. Confinement to a psychiatric hospital**

50. The Psychiatric Care Act of 1992, as amended (hereinafter “the Act”), stipulates that any recourse to psychiatric aid must be voluntary. However, a person declared fully incapacitated may be subjected to psychiatric treatment at the request or with the consent of his official guardian (section 4 of the Act).

51. Section 5 (3) of the Act provides that the rights and freedoms of persons with mental illnesses cannot be limited solely based on their diagnosis or the fact that they have undergone treatment in a psychiatric hospital.

52. Under section 5 of the Act a patient in a psychiatric hospital can have a legal representative. However, pursuant to section 7 (2) the interests of a person declared fully incapacitated are represented by his official guardian or, in absence of an officially appointed guardian, the administration of the psychiatric hospital where the patient is confined.

53. Section 28 (1) of the Act (“Grounds for hospitalisation”) provides that a person suffering from a mental disorder may be placed in a psychiatric hospital for further examination or treatment on the basis of a decision by a psychiatrist or on the basis of a court order. Section 28 (3) and (4) states that a person declared incapacitated can be placed in a psychiatric hospital at the request or with the consent of his guardian. This hospitalisation is regarded as voluntary and, unlike non-voluntary hospitalisation, does not require court approval (sections 29 and 33 of the Act).

54. Section 29 sets out the grounds for non-voluntary placement in a psychiatric hospital in the following terms:

“A mentally disturbed individual may be hospitalised in a psychiatric hospital against his will or the will of his legal representative and before a court decision [on the matter] has been taken, if the individual’s examination or treatment can only be carried out in in-patient care, and the mental disorder is severe enough to give rise to:

- a) a direct danger to the person or to others, or
- b) the individual’s helplessness, i.e. inability to take care of himself, or
- c) a significant health impairment as a result of a deteriorating mental condition, if the affected person were to be left without psychiatric care.”

55. Section 32 of the Act specifies the procedure for the examination of patients compulsorily confined in a hospital:

“1. A person placed in a psychiatric hospital on the grounds defined by section 29 of the present Act shall be subject to compulsory examination within 48 hours by a panel of psychiatrists of the hospital, who shall take a decision as to the need for hospitalisation. ...

2. If hospitalisation is considered necessary, the conclusion of the panel of psychiatrists shall be forwarded to the court having territorial jurisdiction over the hospital, within 24 hours, for a decision as to the person’s further confinement in the hospital.”

56. Sections 33-35 set out the procedure for judicial review of applications for the non-voluntary in-patient treatment of mentally ill persons:

### **Section 33**

“1. Non-voluntary hospitalisation for in-patient psychiatric care on the grounds laid down in section 29 of the present Act shall be subject to review by the court having territorial jurisdiction over the hospital.

2. An application for the non-voluntary placement of a person in a psychiatric hospital shall be filed by a representative of the hospital where the person is detained ...

3. A judge who accepts an application for review shall simultaneously order the person’s detention in a psychiatric hospital for the term necessary for that review.”

**Section 34**

“1. An application for the non-voluntary placement of a person in a psychiatric hospital shall be reviewed by a judge, on the premises of the court or hospital, within five days of receipt of the application.

2. The person shall be allowed to participate personally in the hearing to determine whether he should be hospitalised. If, based on information provided by a representative of the psychiatric hospital, the person’s mental state does not allow him to participate personally in the hearing, the application shall be reviewed by the judge on the hospital’s premises. ...”

**Section 35**

“1. After examining the application on the merits, the judge shall either grant or refuse it. ...”

57. On 5 March 2009 the Constitutional Court of Russia adopted Ruling No. 544-*O-P* in which it examined the compatibility of sections 32 and 34 (1) and (2) of the Psychiatric Care Act with Article 22 of the Constitution of the Russian Federation, which provides that a person can be arrested without a court order for a maximum period of forty-eight hours. The Constitutional Court found that the Psychiatric Care Act did not allow non-voluntary hospitalisation in a mental clinic for more than forty-eight hours without a court order (point 2.3 of the Ruling). It appears from the last paragraph of point 2.2 of the Ruling that the Constitutional Court did not consider that an interim decision taken by a judge by virtue of section 33 (3) of the Act qualified as a “court order” within the meaning of Article 22 of the Constitution, since the judge in such a situation did not examine the reasons for the confinement and had no power to release the person concerned. However, the Constitutional Court did not declare the relevant provisions of the Psychiatric Care Act unconstitutional.

58. Section 36 (3) of the Act provides for the courts to verify every six months whether the patient’s non-voluntary confinement continues to be necessary.

59. Section 37 (2) establishes the rights of a patient in a psychiatric hospital. In particular, the patient has the right to communicate with his lawyer without censorship. However, under section 37 (3) the doctor may limit the patient’s rights to correspond with other persons, have telephone conversations and meet visitors.

60. Section 47 of the Act provides that the doctors’ actions are open to appeal before a court. Section 48 stipulates *inter alia* that the person whose rights are affected by the actions of the psychiatric institution must participate in the court proceedings if it is compatible with his or her mental condition.

### **C. State and private expert institutions**

61. The State Forensic Expert Activities Act of 2001 (no. 73-FZ) defines the basic principles of the functioning and organisation of the State forensic institutions, which are supposed to assist judges, prosecutors and investigators in their professional activities where technical or scientific knowledge in a particular field is needed. Section 41 of that Act provides that forensic examination may be conducted by experts not belonging to the State forensic institutions, in accordance with Russia's procedural laws.

62. Article 75 of the old CCP provided that an expert examination had to be entrusted to "experts of the appropriate expert institutions or to other specialists appointed by the court. Any person having the appropriate knowledge [to give expert evidence] might be called [to testify before the court]."

### **D. Family Code**

63. Article 14 of the Family Code of the Russian Federation of 1995 (Federal Law No. 223-FZ) makes it impossible to marry if at least one of the would-be spouses has been declared incapable by a court because of a mental illness.

64. Under Article 16 of the Family Code a marriage may be dissolved at the request of the guardian of a spouse who has been declared incapable by the court.

### **E. International instruments concerning legal capacity and confinement to a psychiatric institution**

65. On 23 February 1999 the Committee of Ministers of the Council of Europe adopted "Principles concerning the legal protection of incapable adults", Recommendation No. R (99) 4. The relevant provisions of these Principles read as follows:

#### **Principle 2 – Flexibility in legal response**

"1. The measures of protection and other legal arrangements available for the protection of the personal and economic interests of incapable adults should be sufficient, in scope or flexibility, to enable suitable legal responses to be made to different degrees of incapacity and various situations. ...

4. The range of measures of protection should include, in appropriate cases, those which do not restrict the legal capacity of the person concerned."

#### **Principle 3 – Maximum reservation of capacity**

"1. The legislative framework should, so far as possible, recognise that different degrees of incapacity may exist and that incapacity may vary from time to time. Accordingly, a measure of protection should not result automatically in a complete

removal of legal capacity. However, a restriction of legal capacity should be possible where it is shown to be necessary for the protection of the person concerned.

2. In particular, a measure of protection should not automatically deprive the person concerned of the right to vote, or to make a will, or to consent or refuse consent to any intervention in the health field, or to make other decisions of a personal character at any time when his or her capacity permits him or her to do so. ...”

#### **Principle 6 – Proportionality**

“1. Where a measure of protection is necessary it should be proportionate to the degree of capacity of the person concerned and tailored to the individual circumstances and needs of the person concerned.

2. The measure of protection should interfere with the legal capacity, rights and freedoms of the person concerned to the minimum extent which is consistent with achieving the purpose of the intervention. ...”

#### **Principle 13 – Right to be heard in person**

“The person concerned should have the right to be heard in person in any proceedings which could affect his or her legal capacity.”

#### **Principle 14 – Duration review and appeal**

“1. Measures of protection should, whenever possible and appropriate, be of limited duration. Consideration should be given to the institution of periodical reviews. ...

3. There should be adequate rights of appeal.”

66. The United Nations Convention on the Rights of Persons with Disabilities (the “CRPD”), which Russia signed on 24 September 2008 (but has not yet ratified), provides in Article 12 (3) that “persons with disabilities enjoy legal capacity on an equal basis with others in all aspects of life”. Article 12 (4) stipulates:

“States Parties shall ensure that all measures that relate to the exercise of legal capacity provide for appropriate and effective safeguards to prevent abuse in accordance with international human rights law. Such safeguards shall ensure that measures relating to the exercise of legal capacity ... are proportional and tailored to the person’s circumstances, apply for the shortest time possible and are subject to regular review by a competent, independent and impartial authority or judicial body. The safeguards shall be proportional to the degree to which such measures affect the person’s rights and interests. ...”

Article 23 (a) of the CRPD establishes that “the right of all persons with disabilities who are of marriageable age to marry and to found a family on the basis of free and full consent of the intending spouses is recognised.”

### **F. Comparative law**

67. A comparative law research concerning the law of persons with mental disabilities to marry and covering 25 member States of the Council of Europe demonstrated that in approximately one half (13/25) of the States

an incapacitation decision automatically leads to the loss of the right to marry. In approximately one third (9/25) of them a guardian's consent to the conclusion of marriage of an incapacitated person is needed. An express ban on the right to marry for mentally disabled persons is in place in six of the 25 member States. The language and procedures used to verify the legal consequences of the mental insufficiency in the marital sphere vary considerably from one member State to another.

## THE LAW

### I. ALLEGED VIOLATION OF ARTICLE 8 OF THE CONVENTION

68. The applicant complained about his inability to have his legal incapacity reviewed. The Court will examine this complaint under Article 8, which reads as follows:

“1. Everyone has the right to respect for his private and family life, his home and his correspondence.

2. There shall be no interference by a public authority with the exercise of this right except such as is in accordance with the law and is necessary in a democratic society in the interests of national security, public safety or the economic well-being of the country, for the prevention of disorder or crime, for the protection of health or morals, or for the protection of the rights and freedoms of others.”

#### A. The parties' submissions

##### 1. *The Government*

69. The Government started by summarising provisions of the Russian legislation on legal capacity. They admitted that deprivation of legal capacity would constitute an interference with the private life of the person concerned. However, in the applicant's case it had been necessary in view of his diagnosis – schizophrenia, twice confirmed by doctors at the Serbskiy Institute in Moscow and the Omsk Regional Psychiatric Hospital, in 1999 and 2000 respectively. In particular, the psychiatric examination report prepared in 2000 concluded that the applicant was incapable of understanding the meaning of his actions and unable to control them. The incapacitation decision had thus been taken in order to protect the interests of other people, as well as his own interests. Such a limitation of his rights was provided for by Article 29 of the Civil Code and had therefore been “lawful”. The decision to deprive him of legal capacity had been taken in the applicant's absence because he was in a psychiatric hospital at that time and his appearance before the court could therefore have been prejudicial to his health. The option of taking a decision without seeing the person

concerned was provided for under Article 261 of the Code of Civil Procedure. The case had been heard by courts at two levels of jurisdiction, which had both concluded that the applicant's illness warranted the deprivation of his legal capacity.

70. The Government further indicated that the applicant's father had ceased to be his guardian on 10 December 2002, when the Public Health Authority approved the decision of the Guardianship Council. Between 10 and 20 December 2002 the applicant had no guardian.

## *2. The applicant*

71. The applicant argued that the decision of 26 February 2002 had been procedurally flawed. The judge conducted the hearing in the applicant's absence without giving any explanation as to why the latter's mental health prevented him from attending the hearing. The applicant acknowledged that he had suffered from some psychiatric problems, but there had been no indication that the applicant was aggressive or incapable of understanding the proceedings. It was therefore important for the judge responsible for deciding whether to restore the applicant's legal capacity to form a personal opinion about his mental capacity.

72. During the 2002 proceedings the applicant's representatives had requested that the District Court commission an independent medical body (a panel of experts from the Independent Psychiatric Association of Russia) to assess his mental capacity. This application was dismissed because in the court's view the law did not allow private entities to perform such assessments. However, Section 41 of the State Forensic Expert Activities Act explicitly stated the contrary. Moreover, Article 75 of the old CCP had provided for expert assessments to be performed by experts from the relevant institutions or by other specialists appointed by the court.

73. The applicant also stressed that, having rejected the request to commission an independent panel of experts, the District Court had not made arrangements for any other expert assessment of his mental capacity. The only State expert psychiatric institution in the Omsk Region was the Omsk Regional Psychiatric Hospital whose actions the applicant had challenged in the proceedings in question, and which had previously sought the incapacity in 2000 by applying to the prosecutor's office. It would have been contrary to the principle of equality of arms to appoint experts from the respondent hospital to assess the applicant's mental capacity.

74. The applicant also complained that after the transferral of the guardianship on 20 December 2002 to the Omsk Regional Psychiatric Hospital he had lost any possibility to have his legal capacity reviewed.

75. As to the substance of the domestic decisions, the applicant recalled that he had been entirely deprived of his legal capacity in accordance with Article 29 of the Civil Code, that is to say on the sole basis that he suffered from a mental disorder. In 2002 the judge had simply reiterated the

conclusion of the 2000 expert report and of the incapacity judgment, without establishing the actual mental capacity of the applicant at the time of the hearing. Thus, in the court's view, the mere diagnosis of a mental disability had been enough to strip the applicant of all his fundamental rights. The judge had not examined the applicant's actual capacity in any meaningful way in order to establish whether his mental health still prevented him from understanding the meaning of his actions and from controlling them. In any event, the existing legislative framework had not left the judge any other choice than to declare the person concerned fully incapacitated. The Russian Civil Code distinguished between full capacity and full incapacity, but did not provide for any borderline situation, except for drug or alcohol addicts.

### **B. The Court's assessment**

76. The Court notes that the applicant's complaint is two-fold. First, he complained that his Article 8 rights had been breached in the 2002 proceedings seeking the restoration of his legal capacity. Second, he complained that after 20 December 2002 he had no possibility to have his legal incapacity reviewed. The Court will start its analysis by addressing the first limb of the applicant's complaint.

#### *1. The applicant's attempts to recover his legal capacity until 20 December 2002*

77. The Court recalls that deprivation of legal capacity may amount to an interference with the private life of the person concerned (see *Matter v. Slovakia*, no. 31534/96, § 68, 5 July 1999, and *Shtukaturov v. Russia*, no. 44009/05, § 83, ECHR 2008). The Government in the present case did not contest that the applicant's incapacitation had amounted to such an interference, and the Court does not see any reason to hold otherwise, especially in view of various serious limitations to the applicant's personal autonomy which that measure entailed.

78. Under the six-month rule in Article 35 of the Convention the Court is precluded from examining the original incapacitation proceedings of 2000. That being said, the Court may examine the applicant's situation under Article 8 of the Convention insofar as his attempts to have his capacity restored in 2002 are concerned (see the admissibility decision of 6 January 2011 in the present case).

79. An issue arises as to whether the applicant's inability to obtain the review of his status must be examined in terms of the interference by the State with his Article 8 rights or rather in view of the positive obligations of the State under that provision. The Court recalls in this respect that whether the case is analysed in terms of a positive duty on the State to take reasonable and appropriate measures to secure the applicant's rights under

paragraph 1 of Article 8 or in terms of an interference by a public authority to be justified in accordance with paragraph 2, the applicable principles are broadly similar. In both contexts regard must be had to the fair balance that has to be struck between the competing interests of the individual and of the community as a whole (see *Oluić v. Croatia*, no. 61260/08, § 46, 20 May 2010, with further references). This approach is fully applicable in the case at hand: the Court will examine whether a fair balance was struck between his Article 8 rights and any other legitimate interest, private or public, which may have been at stake in the 2002 proceedings.

80. The Court accepts that depriving someone of his legal capacity and maintaining that status may pursue a number of legitimate aims, such as to protect the interests of the person affected by the measure. In deciding whether legal capacity may be restored, and to what extent, the national authorities have a certain margin of appreciation. It is in the first place for the national courts to evaluate the evidence before them; the Court's task is to review under the Convention the decisions of those authorities (see, *mutatis mutandis*, *Winterwerp v. the Netherlands*, 24 October 1979, § 40, Series A no. 33; *Luberti v. Italy*, 23 February 1984, Series A no. 75, § 27; and *Shtukurov v. Russia*, cited above, § 67).

81. That being said, the extent of the State's margin of appreciation in this context depends on two major factors. First, where the measure under examination has such a drastic effect on the applicant's personal autonomy as in the present case (compare *X. and Y. v. Croatia*, no. 5193/09, § 102, 3 November 2011), the Court is prepared to subject the reasoning of the domestic authorities to a somewhat stricter scrutiny. Second, the Court will pay special attention to the quality of the domestic procedure (see *Shtukurov v. Russia*, cited above, § 91). Whilst Article 8 of the Convention contains no explicit procedural requirements, the decision-making process involved in measures of interference must be fair and such as to ensure due respect of the interests safeguarded by Article 8 (see *Görgülü v. Germany*, no. 74969/01, § 52, 26 February 2004).

**(a) Procedural aspects**

82. As to the procedural aspect of the domestic decisions, the Court first of all observes that on 26 February 2002 the domestic court refused to restore the applicant's legal capacity. The court made this decision without seeing or hearing him (see paragraph 16 above). The Court recalls that in such cases the individual concerned is not only an interested party but also the main object of the court's examination (see *X. and Y.*, cited above, § 83, with further references; see also *mutatis mutandis*, *Winterwerp*, cited above, § 74). There are possible exceptions from the rule of personal presence (see, as an example, *Berková v. Slovakia*, no. 67149/01, §§ 138 et seq., 24 March 2009); however, departure from this rule is possible only where the domestic court carefully examined this issue. In the present case, however,

the District Court merely stated that the applicant's personal presence would be "prejudicial to his health", and there is no evidence that the court ever sought a doctor's opinion on that particular question, namely what effect appearing in court might have had on the applicant. The Court is not aware of any other obstacles to the applicant's personal appearance in court. The Court considers that a simple assumption that a person suffering from schizophrenia must be excluded from the proceedings is not sufficient.

83. The second aspect of the domestic proceedings of concern to the Court is the refusal of the domestic court to commission a new psychiatric examination of the applicant (see paragraphs 14 and 16 above). The Court recalls its findings in *Stanev v. Bulgaria* [GC] (no. 36760/06, § 241), ECHR 2012) where it held, in the context of the right of access to court under Article 6 § 1, that "the right to ask a court to review a declaration of incapacity is one of the most important rights for the person concerned".

84. The Court observes that in February 2002 more than a year and a half had elapsed since the original incapacitation decision had been taken in June 2000 (see paragraph 10 above). Nothing in the case file indicates that the applicant's condition was irreversible, or that the time elapsed since his incapacitation was too short for the question to be examined again. The Court concludes that in these circumstances the applicant was entitled to a full review of his status, which, as a matter of principle, should have included some sort of fresh expert assessment of his condition.

85. The applicant asked for a fresh examination of his mental condition and asked the court to entrust it to a non-State medical institution. However, the court refused on the sole ground that it was prohibited by law. The Court is not aware of any norm in Russian law that would prohibit a court from seeking an expert opinion from a clinic or a doctor not belonging to the State system of public health institutions. The Government did not refer to any such norm either. The fact that there is a State-run system of forensic institutions (see the domestic court's reasoning in paragraph 16 above) does not mean that they have a monopoly on providing expert opinions to the courts. On the contrary, Russian law at the time explicitly permitted examinations by experts not belonging to the State forensic institutions (see paragraph 61 above). The domestic court's decision in this respect appears to have no basis in the domestic law.

86. Further, the Court does not see what prevented the domestic court from seeking a fresh expert opinion from experts not directly affiliated with the Omsk Regional Psychiatric Hospital. The Court observes that one of the reasons for the applicant's many hospitalisations in the Omsk Regional Psychiatric Hospital were his numerous complaints about the doctors of that institution. His incapacitation was also based on the opinion of the doctors from that hospital. Nevertheless, when the applicant sought to restore his legal capacity (see paragraphs 12 et seq. above), the District Court entrusted his examination to the same hospital. In such circumstances the applicant's

demand was not frivolous: first, he refused to submit himself for an examination in the Omsk Regional Hospital, and then he asked for an examination by the doctors from the Independent Psychiatric Association of Russia (see paragraph 15 above).

87. The Court reiterates that where the opinion of an expert is likely to play a decisive role in the proceedings, as in the case at hand, the expert's neutrality becomes an important requirement which should be given due consideration. Lack of neutrality may result in a violation of the equality of arms guarantee under Article 6 of the Convention (see, *mutatis mutandis*, *Sara Lind Eggertsdóttir v. Iceland*, no. 31930/04, § 47, 5 July 2007, with further references). In the Court's opinion an expert's neutrality is equally important in the context of incapacitation proceedings, where the person's most basic rights under Article 8 are at stake.

88. The Court notes that the applicant never categorically refused to submit himself to an examination, and that he doubted the neutrality of the doctors from the Omsk Regional Psychiatric Hospital. Without taking a position as to whether his doubts were well-founded, the Court considers that in such circumstances it was the District Court's duty to make arrangements for a fresh examination of the applicant by an independent psychiatric institution – not necessarily private, but lacking direct affiliation to the Omsk Regional Psychiatric Hospital. The Government have not referred to any serious considerations that might have prevented the court from seeking such an examination.

89. The Court recalls that according to the judgment of 26 February 2002 the applicant continued to suffer from a mental disorder which had warranted his incapacitation in 2000. However, in a situation where the court did not see the person concerned personally and did not obtain a fresh assessment of his mental condition, such a conclusion cannot be regarded as reliable.

**(b) Substantive aspects**

90. As to the substance of the domestic decisions, the Court observes that the judgment of 26 February 2002 relied on the medical report prepared in 2000. The Court does not cast doubt on the findings of that report, in particular that in 2000 the applicant suffered from schizophrenia. However, the Court recalls that in the *Shtukurov* case, cited above, § 94, it held that “the existence of a mental disorder, even a serious one, cannot be the sole reason to justify full incapacitation. By analogy with cases concerning deprivation of liberty, in order to justify full incapacitation the mental disorder must be “of a kind or degree” warranting such a measure”. In *Shtukurov* the Court found that in the domestic proceedings the issue of “the kind and degree” of the applicant's mental illness remained unresolved.

91. In the present case the Court faces essentially the same situation as in *Shtukurov*. On the one hand, it is clear that the applicant suffered from a

serious and persistent mental disorder: he had delusory ideas, was a vexatious litigant, etc. On the other hand, the Serbskiy Institute report of 1999 did not refer to any particular incident of violent, self-destructive or otherwise grossly irresponsible behaviour on the part of the applicant since 1996, and did not allege that the applicant was completely unable to take care of himself (see paragraph 8 above).

92. The Court is ready to admit that some measure of protection in respect of the applicant might have been advisable. However, the Russian Civil Code did not provide for any intermediate form of limitation of legal capacity for mentally ill persons – this existed only in respect of drug or alcohol addicts (*ibid.*, § 95). Therefore, the domestic court in the present case, as in *Shtukaturov*, had no other choice than to apply and maintain full incapacity – the most stringent measure which meant total loss of autonomy in nearly all areas of life. That measure was, in the opinion of the Court and in the light of materials of the case, disproportionate to the legitimate aim pursued.

#### (c) Conclusion

93. In sum, the confirmation of the applicant's incapacity status in 2002 based on the report of 2000 was not justified for at least two reasons: first, because no fresh assessment of the applicant's mental condition was made (either by the doctors, or by the court itself) and the applicant was not personally present in court, and, second, because it is doubtful whether the applicant's mental condition, as described in the report of 2000, required full incapacitation. Therefore, there was a breach of Article 8 of the Convention on that account.

#### 2. *The applicant's inability to restore his legal capacity after 20 December 2002*

94. The Court will now turn to the applicant's situation after 20 December 2002, when the guardianship was transferred to the Omsk Regional Psychiatric Hospital (see paragraph 31 above). The Court recalls that before that date the applicant's guardian (his father) supported the applicant's attempts to restore legal capacity. Afterwards, the situation changed when the guardianship was transferred to the hospital administration. It is clear from the materials of the case that the hospital sought the applicant's confinement and was opposed to his attempts to recover his legal capacity. Thus, from 20 December 2002 onwards, the applicant had no opportunity of challenging his status.

95. Subsequently, the applicant's father tried to reinstate himself as the applicant's guardian (see paragraph 38 above). If successful, he would have been able to challenge the applicant's status again. However, the attempt failed with the judgment of 16 July 2003 by the Kuybyshevskiy District Court, which appears to have been the final decision on that matter. From

that date onwards the applicant was fully dependant on the psychiatric hospital.

96. The Court recalls its findings in the *Shtukatur* case, cited above, § 90, where it criticised the Russian law on incapacitation in the following terms:

“ [T]he Court notes that the interference with the applicant’s private life was very serious. As a result of his incapacitation the applicant became fully dependant on his official guardian in almost all areas of life. Furthermore, “full incapacitation” was applied for an indefinite period and could not, as the applicant’s case shows, be challenged otherwise than through the guardian, who opposed any attempts to discontinue the measure ...”

In the present case the situation was identical: the applicant could only challenge his status through the guardian, who opposed any attempts to discontinue the measure. That situation continued at least until 10 October 2003, when the applicant’s daughter was appointed as his guardian (see paragraph 40 above). It is unclear whether she wished to restore the applicant’s status: the Court does not have sufficient information about the proceedings allegedly initiated in 2006 by the applicant’s relatives (see paragraph 42 above). Be that as it may, it is clear that at least during the time when the role of the applicant’s guardian was assumed by the psychiatric hospital the applicant was unable to institute any legal proceedings to challenge his status.

97. The Court reiterates that in the vast majority of cases where the ability of a person to reason and to act rationally is affected by a mental illness, his situation is subject to change. This is why the Principles concerning the legal protection of incapable adults of 1999 (see paragraph 65 above, Principle 14), recommend a periodical re-assessment of the condition of such persons. A similar requirement follows from Article 12 (4) of the CPRD (see paragraph 66 above). In *Stanev*, cited above, the Court observed that “there is now a trend at European level towards granting legally incapacitated persons direct access to the courts to seek restoration of their capacity” (§ 243). In Russia at the time the law neither provided for an automatic review nor for a direct access to the court for an incapacitated person, so the latter was fully dependant on his guardian in this respect (see, *mutatis mutandis*, *Salontaji-Drobnjak v. Serbia*, no. 36500/05, § 134, 13 October 2009). Where, as in the present case, the guardian opposed the review of the status of his ward, the latter had no effective legal remedy to challenge the status. Having regard to what was at stake for the applicant, the Court concludes that his inability for a considerable period of time to assert his rights under Article 8 was incompatible with the requirements of that provision of the Convention. Consequently, there was a violation of Article 8 of the Convention.

## II. ALLEGED VIOLATION OF ARTICLE 5 OF THE CONVENTION

98. The applicant complained that his confinement in a psychiatric hospital in 2002-2003 was contrary to Article 5 §§ 1 (e) and 4 of the Convention, which read as follows:

“1. Everyone has the right to liberty and security of person. No one shall be deprived of his liberty save in the following cases and in accordance with a procedure prescribed by law:

(e) the lawful detention of persons ... of unsound mind ...;

4. Everyone who is deprived of his liberty by arrest or detention shall be entitled to take proceedings by which the lawfulness of his detention shall be decided speedily by a court and his release ordered if the detention is not lawful.”

### A. The parties' submissions

#### 1. *The Government*

99. The Government claimed that the applicant's rights under Article 5 of the Convention had not been violated. As to the placement of the applicant in a psychiatric hospital in December 2002, the Government indicated that he had been taken there at the request of the district psychiatrist. Upon his arrival at the hospital the applicant had been immediately examined by a doctor on duty. In the ensuing forty-eight hours he had been examined by a panel of three psychiatrists. Following that examination the hospital had sent a hospitalisation request to the court. Consequently, his confinement had been requested and authorised in accordance with the domestic procedural rules established in the Psychiatric Care Act of 1992.

100. Subsequently, his further hospitalisation had been ordered in connection with the state of his health. The applicant's mental illness had been diagnosed on many occasions. Thus, according to the letter of the Ministry of Public Health and Social Development, the applicant suffered from severe schizophrenia. He had thus been incapable of understanding his actions or controlling them. Occasionally he had been in remission, but without any stable improvement in his health. Towards the end of 2002 the applicant had suffered yet another deterioration of his mental condition. He had stopped taking his medicine and visiting the district psychiatrist regularly. As a result, without proper medical supervision and treatment, there had been a risk of further deterioration of his health. In such circumstances the doctors, in accordance with the Psychiatric Care Act of 1992, had ordered the applicant's confinement against his will.

101. As to the legal remedies in force at the material time, the Government submitted that the applicant's father had been stripped of his guardianship in accordance with the law. The applicant's further

hospitalisation had been requested by the hospital, which, from 20 December 2002, had been appointed to act as his guardian. The proceedings concerning the applicant's confinement had been terminated because, after the appointment of the hospital as his guardian, his confinement had become, in domestic law, voluntary. The first-instance court had examined the case on the merits because the judge had not been informed by the parties of the decision of the Guardianship Council stripping the applicant's father of his guardianship. Under the domestic law, the applicant had been able to act, including before the courts, albeit only through his guardian.

## *2. The applicant*

102. The applicant maintained that he had been admitted to the mental hospital against his own and his guardian's will. His psychiatric confinement in 2002 had probably been formally lawful, but his disorder had not been of a kind or degree warranting the confinement. It appears from the hospitalisation order that the psychiatrist had decided to confine the applicant in order to prevent him from lodging complaints. The Government had provided no explanation as to why the applicant's "reformist" behaviour indicated any real threat of further worsening of his state, if left without the prescribed treatment. The hospital's psychiatric report had never considered less restrictive measures such as out-patient treatment. The applicant had been detained in the mental hospital for a year, and upon his discharge his mental health remained the same as at the time of his admission.

103. The applicant noted that from 11 December 2002 his confinement had been authorised by the provisional detention order. However, in its decision of 5 March 2009 the Constitutional Court of the Russian Federation had held that a provisional detention order was not a judicial decision required in constitutional terms (see paragraph 57 above). Furthermore, in the present case the court had issued the order without hearing the applicant or his representative. Lastly, under Russian law its validity had been limited to five days, whereas the applicant had been detained pursuant to that provisional order at least until 20 December 2002, when his further confinement had been authorised by the Guardianship Council.

104. As regards the applicant's detention from 20 December 2002 onwards, the applicant noted that, formally speaking, his hospitalisation had become voluntary: the consent of the hospital – his new guardian and at the same time the detaining authority – had been considered sufficient under the domestic law for his indefinite detention without court order. In other words, he was detained on the basis of an administrative decision which was issued without the applicant being heard, and his objection to the hospital placement had been ignored. In the applicant's opinion, such consent was

no substitute for a judicial decision. His subsequent detention was therefore arbitrary.

105. The applicant further submitted that, under Russian law, the courts were required to verify every six months whether the patient's non-voluntary confinement continues to be necessary (see paragraph 58 above). It was not evident from the Government's submissions and from the documents appended thereto that the applicant had been regularly examined by a panel of psychiatrists in order to decide on the need for his continued confinement, and thus that the procedure prescribed by domestic law had been followed in this regard.

106. The applicant noted that the only way he could have applied for release from the hospital was through his guardian. However, since the detaining authority had become the applicant's guardian by virtue of law, it obtained unrestricted discretion to decide on the continuation of his detention. Thus, judicial review provided by Section 47 of the Psychiatric Care Act could not have been regarded as an effective remedy.

## **B. The Court's assessment**

### *1. Compliance with Article 5 § 1*

107. Insofar as the applicant's complaint under Article 5 § 1 of the Convention is concerned, his confinement in the mental hospital can be divided into two periods: between 9 and 20 December 2002, and after 20 December 2002, when the hospital became his guardian.

108. At the outset, the Court notes that it is not disputed by the parties that the applicant's confinement in the mental hospital constituted "deprivation of liberty" within the meaning of Article 5. The Government also conceded that the applicant had been confined against his will, even though subsequently the newly appointed guardian had approved that measure.

#### **(a) General principles**

109. The Court reiterates that in order to comply with Article 5 § 1, the detention in issue must comply with two major requirements. First of all, it must be "lawful" in domestic terms, including the observance of a procedure prescribed by law; in this respect the Convention refers back essentially to national law and lays down the obligation to conform to the substantive and procedural rules thereof. Secondly, the Court's case-law under Article 5 requires that any deprivation of liberty should be consistent with the purpose of Article 5, namely to protect individuals from arbitrariness (see *Creangă v. Romania* [GC], no. 29226/03, § 84, 23 February 2012; *Herczegfalvy v. Austria*, 24 September 1992, § 63, Series A no. 244; see also *Venios v. Greece*, no. 33055/08, §§ 48, 5 July 2011, and

*Karamanof v. Greece*, no. 46372/09, §§ 40 et seq., 26 July 2011). That means that it does not suffice that the deprivation of liberty is in conformity with national law; it must also be necessary in the circumstances (see *Witold Litwa v. Poland*, no. 26629/95, § 78, ECHR 2000-III).

110. As to the second of the above conditions, an individual cannot be deprived of his liberty as being of “unsound mind” unless the following three minimum conditions are satisfied: firstly, he must reliably be shown to be of unsound mind; secondly, the mental disorder must be of a kind or degree warranting compulsory confinement (i.e. where the person needs therapy, medication or other clinical treatment to cure or alleviate his condition, or where he needs control and supervision to prevent him, for example, causing harm to himself or other persons - see *Hutchison Reid v. the United Kingdom*, no. 50272/99, § 52, ECHR 2003-IV); thirdly, the validity of continued confinement depends upon the persistence of such a disorder (see *Winterwerp*, cited above, § 39; *Shtukaturov*, cited above, § 114; and *Varbanov v. Bulgaria*, no. 31365/96, § 45, ECHR 2000-X).

**(b) The period between 9 and 20 December 2002**

111. The Court will first examine whether the applicant’s detention between 9 and 20 December 2004 was lawful under domestic law. The Court observes that the parties involved in the proceedings at that moment seemed to be uncertain about the legal framework in which they operated. Thus, the Guardianship Council decided to strip the father of his status as guardian on 6 December 2002. It is difficult to say whether that decision became effective in its own right, or only upon further confirmation by the Public Health Authority (which was obtained on 10 December 2002). Be that as it may, during that period the hospital and the court acted as if the father was still the applicant’s guardian and, therefore, as if the confinement in the mental hospital was “non-voluntary”.

112. In this assumption, the provisions of Sections 32 et seq. of the Psychiatric Care Act of 1992 (see paragraphs 55 and 56 above) concerning non-voluntary confinement must have applied. According to the Act, the authorities may place a person in the “preliminary confinement” for eight days in order to decide whether his further confinement is necessary. Thus, the hospital has forty-eight hours to examine the patient (Section 32 (1) of the Act), and then twenty-four hours to submit a hospitalisation request to a competent judicial authority (Section 32 (2) of the Act), which, in turn, has five days to decide on that request (Section 34 (1) of the Act).

113. The Court notes that in 2009 the Constitutional Court examined the compatibility of those provisions with Article 22 of the Constitution (see paragraph 57 above). While the Psychiatric Care Act was not declared unconstitutional, the Ruling can reasonably be construed as requiring that a person confined in a psychiatric hospital obtain full judicial review of his situation not within eight days, as provided by the Act, but within forty-

eight hours – the maximum period of detention without a court order provided for by the Constitution. The Court observes, however, that the Ruling of the Constitutional Court was formulated in indecisive terms, and the validity of the Act was finally confirmed. In any event, nothing suggests that the 2009 Ruling should have had a retroactive effect and apply to the applicant's situation. The Court concludes, therefore, that the "lawfulness" of the applicant's confinement in 2002 must be established in terms of the provisions of the Psychiatric Care Act, as it could have reasonably be interpreted at the time of the events.

114. The applicant's initial admission to the Omsk Regional Psychiatric Hospital was ordered by a district psychiatrist on 4 December 2002 (see paragraph 21 above). It appears that at that stage the requirements of the law were respected: the applicant was suffering from a mental disorder and there was a decision of a psychiatrist to conduct his further examination in the hospital (see paragraph 53 above). After the applicant's placement in the hospital on 9 December 2002, the hospital, under Section 32 of the Act, had forty-eight hours to conduct a further assessment of the applicant's mental health and twenty-four hours to seek a hospitalisation order from the court (see paragraph 55 above). Although the panel examined the applicant on the same day, which was within the time-limits, the request for further detention was received by the court only on 11 December 2002, that is more than twenty-four hours. The court then had five days under the Act to examine the request and authorise further detention or order the applicant's release (see paragraph 56 above). That time-limit was not observed either – the first hearing on was held on 17 December 2002, and at the end of that hearing the judge, without taking any decision on the substance of the case, adjourned the hearing until 24 December 2002, although the Act did not provide for such a possibility (see *Rakevich v. Russia*, no. 58973/00, § 35, 28 October 2003). The Court concludes that the applicant's detention during this first period was not authorised in accordance with the procedure prescribed by the Psychiatric Care Act.

**(c) The period after 20 December 2002**

115. On 20 December 2002 the hospital, which had earlier requested the applicant's confinement, became the applicant's guardian by virtue of the decision of the Guardianship Council and in accordance with Article 35 (4) of the Civil Code. According to Section 28 of the Psychiatric Care Act, if the guardian consented to the hospitalisation it was deemed "voluntary", regardless of the actual wishes of the ward, and no court authorisation for the hospitalisation was required (see paragraph 53 above). The court proceedings concerning the applicant's confinement were consequently terminated.

116. The applicant's situation during the second period closely resembles the one examined by the Court in the *Shtukatur* case (cited

above, § 21). The Court reiterates that confinement in a psychiatric hospital does not necessarily become “voluntary” in Convention terms because the consent of the guardian was obtained. Although it is sometimes difficult to discern the genuine will of a mentally ill person (see, for example, *Storck v. Germany*, no. 61603/00, § 74, ECHR 2005-V), the Court is confident that in the present case the applicant did not agree to the hospitalisation. This is clearly demonstrated by the fact that his confinement was originally regarded as non-voluntary by all the parties involved. Despite that, from 20 December 2002 it became possible to keep him confined without a court order. As a result, the applicant was unable to enjoy the safeguards associated with the judicial process. This factor alone is sufficient, in the Court’s view, to conclude that the applicant’s detention was incompatible with Article 5 § 1 of the Convention.

117. Moreover, the guardian was the same medical institution which had initiated the hospitalisation, which was responsible for the patient’s further treatment and which had previously been attacked in court proceedings by the applicant. In other words, the impartiality of the newly appointed guardian vis-à-vis the applicant were open to doubt.

118. Finally, in the absence of a judicial decision on the substance of the applicant’s situation, it is difficult to say whether his confinement was justified in the light of the criteria set out in the *Winterwerp* case, cited above, § 39. Having examined the reports prepared by the district psychiatrist on 4 December 2002 and by the panel of three doctors inform the Omsk Regional Psychiatric Hospital on 9 December 2002, the Court notes that the applicant did indeed suffer from schizophrenia. However, those reports mostly referred to the history of the applicant’s illness and did not mention recent instances of aggressive or self-destructive behaviour. It appears that the major reason for the confinement in 2002 were his numerous complaints to various State bodies, in particular his complaints against his doctors, but those incidents were clearly not such as to warrant his confinement (cf. *Stanev v. Bulgaria*, cited above, § 157).

119. The Court reiterates that normally it would not review the opinion of a doctor whose impartiality and qualifications were not called into question and who had the benefit of direct contact with the patient. In the present case, however, the Court is prepared to take a critical view of the findings of the psychiatrists, mostly because (a) their conclusions were not submitted to judicial scrutiny at the domestic level, (b) their neutrality was open to doubt, and (c) their reports were not specific enough on points which are crucial for deciding whether compulsory hospitalisation was necessary.

**(d) Conclusion**

120. The above elements are sufficient for the Court to conclude that the applicant's hospitalisation between 9 December 2002 and 10 December 2003 was contrary to Article 5 § 1 of the Convention.

*2. Compliance with Article 5 § 4 of the Convention*

121. The Court reiterates the principle established in § 39 of the *Winterwerp* judgment to the effect that the validity of a person's continued confinement depends upon the persistence of mental illness of a kind or degree warranting compulsory confinement. The Psychiatric Care Act contains similar requirements, providing that the court should consider this issue every six months. However, its provisions concern only those who are confined to a hospital against their will. In domestic terms the applicant's detention was "voluntary" (see paragraph 53 above). Therefore, while the hospital remained the applicant's guardian, there was no possibility of automatic judicial review. In addition, the applicant himself, as an incapacitated person, was unable to seek release from the hospital. In a nearly identical situation the Court found that the inability of a patient of a psychiatric hospital to seek release from it otherwise than through his guardian, where there was no periodic judicial review of the lawfulness of his confinement, amounted to a violation of Article 5 § 4 of the Convention (see *D.D. v. Lithuania*, (no. 13469/06, §§ 164 et seq., 14 February 2012).

122. The Court concludes that in this situation the applicant was unable to "take proceedings by which the lawfulness of his detention [would] be decided ... by a court". There was, therefore, a breach of Article 5 § 4 of the Convention on this account.

**III. ALLEGED VIOLATION OF ARTICLES 12 OF THE CONVENTION**

123. The applicant complained that he had not been able to register a marriage with his fiancée. He referred to Article 12 of the Convention (right to marry), which reads as follows:

"Men and women of marriageable age have the right to marry and to found a family, according to the national laws governing the exercise of this right."

124. The Court observes that the applicant's inability to marry was one of many legal consequences of his incapacity status. The Court has already found that the maintenance of that status (the only measure of protection applicable under the Russian Civil Code to mentally ill persons) was in the circumstances disproportionate and violated Article 8 of the Convention (see paragraph 97 above). In other words, the applicant was unable to marry primarily because of the same two major factors analysed under Article 8, namely the deficiencies in the domestic decision-making process and the rigidity of the Russian law on incapacity. In view of its findings under

Article 8 of the Convention, the Court considers that there is no need for a separate examination under Article 12 of the Convention.

#### IV. ALLEGED VIOLATION OF ARTICLE 13 OF THE CONVENTION

125. The applicant also complained that he did not have effective remedies under Article 13 of the Convention in connection with his complaints under Articles 8 and 12, set out above. Article 13 reads as follows:

“Everyone whose rights and freedoms as set forth in [the] Convention are violated shall have an effective remedy before a national authority notwithstanding that the violation has been committed by persons acting in an official capacity.”

126. The Court notes that in analysing the proportionality of the measure complained of under Article 8 it took account of the fact that the applicant had been unable to challenge that measure independently from his guardian, and that the applicant had not obtained an effective review of his status even when his guardian had sought it. In these circumstances the Court does not consider it necessary to re-examine the issue of effective remedies under Article 13 of the Convention separately (see *Shtukurov*, cited above, §§ 132-133).

#### V. APPLICATION OF ARTICLE 41 OF THE CONVENTION

127. Article 41 of the Convention provides:

“If the Court finds that there has been a violation of the Convention or the Protocols thereto, and if the internal law of the High Contracting Party concerned allows only partial reparation to be made, the Court shall, if necessary, afford just satisfaction to the injured party.”

##### **A. Damage**

128. The applicant claimed EUR 30,000 (thirty thousand euros) under the head of non-pecuniary damages. The Government disputed that figure as excessive and considered that the mere finding of a violation would constitute sufficient just satisfaction. The Court, taking into account the cumulative effect of the violations of the applicant’s rights, their duration, and the fact that the applicant, who suffered from a mental disorder, was in a particularly vulnerable situation, and ruling on an equitable basis, awards the applicant EUR 25,000 in respect of non-pecuniary damage.

129. If, at the moment of payment of the award, the applicant is legally incapacitated, the Government should ensure that the amount awarded is transferred to the guardian, on the applicant’s behalf and in his best interest.

## **B. Costs and expenses**

130. The applicant did not ask for reimbursement of costs and expenses incurred in connection with the proceedings. The Court therefore does not award anything under this head.

## **C. Default interest**

131. The Court considers it appropriate that the default interest rate should be based on the marginal lending rate of the European Central Bank, to which should be added three percentage points.

## **FOR THESE REASONS, THE COURT UNANIMOUSLY**

1. *Holds* that there has been a violation of Article 8 of the Convention on account of the maintenance of the applicant's status as an incapacitated person and his inability to have it reviewed in 2002 and 2003;
2. *Holds* that there has been a violation of Article 5 § 1 of the Convention on account of the applicant's hospitalisation in the psychiatric hospital in 2002-2003;
3. *Holds* that there has been a violation of Article 5 § 4 of the Convention on account of the applicant's inability to obtain a review of the lawfulness of his detention in the psychiatric hospital;
4. *Holds* that it is not necessary to examine separately the applicant's complaint under Article 12 of the Convention;
5. *Holds* that it is not necessary to examine separately the applicant's complaint under Article 13 of the Convention;
6. *Holds*
  - (a) that the respondent State is to pay the applicant, within three months from the date on which the judgment becomes final in accordance with Article 44 § 2 of the Convention, EUR 25,000 (twenty-five thousand euros) in respect of non-pecuniary damage, to be converted into the Russian Roubles at the rate applicable at the date of settlement, plus any tax that may be chargeable;
  - (b) that from the expiry of the above-mentioned three months until settlement simple interest shall be payable on the above amount at a rate

equal to the marginal lending rate of the European Central Bank during the default period plus three percentage points;

7. *Dismisses* the remainder of the applicant's claim for just satisfaction.

Done in English, and notified in writing on 22 January 2013, pursuant to Rule 77 §§ 2 and 3 of the Rules of Court.
